Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

I think the "Master Plan" is appalling! It is unthinkable for those of us who have suffered the increasing intensity of airplane noise and destruction of our small communities, and whose automobiles are covered daily with air only film. Our representative was voted into office with promises that she would fight expansion of the L.A. International, since she has done "I am about face" and is now in the business of promoting her "soundproofing" of homes in our area (e.g. model home 419 W. View Street, P.O. Box 1000). We cannot expect any support for your proposed alternative, I think you, and your supporters are the best hope of all of us in this area.

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

THE LAX MASTER PLAN'S ONLY INTENT IS TO PRESERVE ALL THE FEES THAT REMAIN FOR HANDLING AIRS. WE HAVE AIRPORTS CAPABLE OF HANDLING INTERNATIONAL AIR TRAFFIC WHICH ARE TOTALLY UNDERUSED. (IE) PALMDALE, ONTARIO AND LONG BEACH. IF CAPS WERE PUT ON THIS AMOUNT OF FLIGHTS THAT LAX WAS ALLOWED TO HANDLE, THESE AIRPORTS COULD HANDLE ALL INCREASES IN AIR TRAFFIC WITH LITTLE COST TO THE TAXPAYERS. PLUS AIR AND AUTOMOBILE CONGESTION TO AND FROM LAX WOULD DISAPPEAR. WHY IS SUCH A SIMPLE AND EXPLANABLE SOLUTION SO DIFFICULT FOR POLITICIANS AND BUREAUCRATS TO PUT INTO OPERATION? MUST POLITICIANS CONTINUALLY IGNORE THE PUBLIC'S RIGHTS? OR DO THE POLITICIANS AND THEIR FRIENDS HAVE TOO MUCH INVESTED IN PRESERVING THE STATUS QUO FOR THEIR FINANCIAL GAIN?

Dear Jane,

I have lived in Playa Del Rey, West Westchester, and Marina Del Rey since 1951. My wife and I have lived happily in this area watching it grow and develop, sending our three sons to school and experiencing the changes over the years. Airport expansion bought out our house in West Chester in 1971 after about twenty years of pleasant living. Our children were grown and we moved to a condo in Marina Del Rey. We have been happy here too. But after all these years of airport expanding noise and increasing traffic and congestion we feel that LAX expansion in this area would be a great mistake.

*I do not support the expansion of LAX. There are lots of regional airports in the area that should take the overflow and expand instead of LAX. Traffic around the airport is already horrific, and expansion will increase it. I live in Manhattan Beach, and it is almost impossible, even now, to get north of LAX.*

*As a Manhattan Beach "Tree Section" resident, my main concern is an increase in pollution in our area. I already feel that the pollution from the Chevron plant and various power + water factories that are prevalent in Manhattan Beach + El Segundo are impacting our health already. Since moving to the tree section (3 blocks from Rosecrans/3 blocks to Highland) our 3 year old son has developed asthma. There are several other families in the area that have young children w/ asthma as well. I know LAX is a source of the bad air he's breathing - please fight this expansion.*

*While we agree that airports are necessary and vital to our economy and way of life, the location of airports is certainly a variable we can control and manipulate so that fewer people's lives are adversely affected by noise, air and traffic pollution. The South Bay's streets, freeways and airways are currently saturated. Our population keeps increasing at an alarming rate. We believe that adding and expanding to the LA airport will negatively impact our lives.*

WE ARE STRONGLY OPPOSED TO EXPANSION OF LAX - THE REGIONAL PLAN MAKES GOOD BUSINESS AND ENVIRONMENTAL SENSE. WE HAVE ALREADY BEEN AFFECTED BY THE CHANGE AND INCREASE IN FLIGHT PATTERNS NEAR OUR HOME AND ONE OF US WORKS IN THE PLYMA DELAY AREA - THE GROWTH, AND THEREFORE CONGESTION IS ALREADY OUT OF CONTROL - THE 405 FWY IS OVERCAPACD, AND WE BELIEVE THERE HAS BEEN TOO MUCH GROWTH ALLOWED IN THE SOUTH BAY, WEST SIDE AS IT IS. LIVING IN SOUTH TORRANCE, WE DON'T FEEL AN ECONOMIC IMPACT FROM THE AIRPORT, BUT BELIEVE ITS TIME TO STOP THE GROWTH. EVERY OPPORTUNITY TO DEVELOP LAND FROM PLYMA DELAY TO PROS VORDES IS UNDOUBT - ENOUGH IS ENOUGH!

Dear Congresswoman Harman  
6-8-01  
Congratulations on your work in securing  
a way to a regional airport alternative - I have lived  
in Westchester & Playa del Rey since 1957 - in 1974 I  
lost my Westchester home due to LAX expansion. The  
recent years have brought more traffic, noise &  
pollution to our area caused by LAX - We don't need  
more expansion. Please continue your fight.

Very truly,

LINCOLN BLVD. IS ALMOST UNUSABLE DURING NORMAL RUSH HOURS. THE SAN DIEGO FREEWAY IS GRIDLOCKED FOR AT LEAST 4 HOURS IN THE MORNING + 4 HOURS IN THE EVENING.

BOTH AN EXPANSION OF LAX AND THE HUGE DEVELOPMENT AT BALLONA CREEK WILL MAKE TRAFFIC CONGESTION - WHICH CAN BE SEEN - + AIR + WATER QUALITY SO OVERLOADED AS TO ALMOST SHUT VENICE + SURROUNDING CITIES DOWN.

I WOULD ALSO LIKE TO TAKE THIS OPPORTUNITY TO SAY THAT I AM TOTALLY FED UP WITH THE TAXPAYERS SUBSIDIZING FURTHER DEVELOPMENT. IF DEVELOPERS + AIRLINES WANT INCREASED PUBLIC SERVICES, LET THEM

PAY FOR THEM.

Dear Congresswoman Harman,

No more expansion at LAX please! Those of us who are longtime residents of Westchester already have enough of the noise, traffic congestion, etc. that is the result of being so close to a large International airport of nearby counties in Southern California were to have airports located there - which some apparently do - it would be far better to continue to expand LAX. Please work for Regional development.

The numbers of acreage at LAX tell the story. (3425 acres). Traffic for 67 million passengers filtering in and out of such a confined area is not feasible. The 105 freeway onto Sepulveda is already gridlocked. The 405 Corridor from South to North is often bumper to bumper, stalling completely at the airport. I am very concerned Orange County is blocking the most viable regional airport solution at El Toro. Palmdale, if developed with rapid rail transit into the city, would be an incredible regional

I am totally opposed to the expansion as proposed by L.A. X. Living in El Segundo, we are subjected to horrendous noise & pollution. Many times large jet liners that couldn't land go right over the city from N.E. to S.W. a crash would be disastrous. The traffic on Sepulveda in the A.M. trying to get through the airport tunnel is backed up solid clear to Rosecrans and very heavy stop & go to Manhattan Beach Blvd.

- TRAFFIC, NOISE, POLLUTION WILL INCREASE TO UNACCEPTABLE LEVELS WITHOUT LAX EXPANSION. IMAGINE WITH, UGH!
- WITHOUT A FAST, PRACTICABLE, VIABLE, TRANSPORTATION SYSTEM TO LANCASTER/PALMDALE & ONTARIO, REGIONAL PLAN WILL NOT BE ACCEPTABLE!!!!  
THIS IS "TASK ONE"!!!!
- NO "TASK ONE", NO SOLUTION.

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*Other airports should be built,  
LAX should not be expanded.*

I strongly support the Regional Airport plan! LAX is too crowded with traffic. I would take public transportation 1 hour away to take a flight at other airports. My friends in Riverside + San Bernardino would like more flights at airports closer to them. LA needs more public transportation - spread out the people + the flights at all airports + get them there via bus, rail, etc.! Reduce traffic + pollution!

There's already more than enough - too much! -  
traffic, noise, and pollution from LAX and  
I'm happy you are working against its  
expansion. It is only common sense that  
airports should be in non-congested areas,  
and surprising there's so little common sense.  
Glad you're a caring person.

1. Regional Distribution should provide a safer + more efficient system - it will also enhance business in more areas.

To consolidate more traffic here adds to our pollution, noise, reduces traffic flow + discourages suitable growth in the area that will be impacted by airport traffic. Regional distribution will provide more airline business + accommodate a growing population that has moved out of L.A. ✓

2. LAX Expansion not only drives down property values but is a deterrent to an upscale community in the beach towns that is in the need for more services - more traffic impacts local traffic to local services  
↳ will drive local business out.

To whom it may concern:

Expanding regional airports would not only alleviate the burden from LAX itself but would lessen traffic on all LAX bound freeways. In turn, this could have a positive effect on our air quality. Please consider expanding regional airports instead of going forward with the LAX Master plan. Thank you!

There is not an economic impact directly on us. Our main concern for an expanded LAX is the congestion at LAX and the traffic in and around the terminals. Air pollution and noise are also factors that will increase with expansion. Common sense dictates to our planners, to utilize and expand airport traffic to those other outlying airports. I am in favor of a major regional airport to be built in PALMDALE. This plan has been bented about for the past 30 years. If action had been taken then, the costs would have been minimal. As conditions stand now, LAX is maxed out and we don't have the back up that we need in the pipelines. Late as we are, now is the time to make our move & build a regional airport.

I think the "master Plan" is a disaster for all of the South Bay residents. The traffic is so bad now you hate to have friends or relatives come to see you - I live in Torrance - maybe 10 or so miles away - it takes 45 to 50 minutes to drive to LAX - so you tell them to take a taxi or shuttle & you pay the the bill. Why not "share" some of the "wealth" with the other airports - they need it more than we do. I'm wondering, just who, is going to benefit from this plan. As a tax payer I thank you for your concern and hope you continue working for the little guy.

As an Audubon Program docant at the Ballona Wetlands for the past nine years, I have noticed a constantly increasing amount of air traffic noise. It is now so bad that we must shout to be heard by the school children who are trying to have an outdoor learning experience. Airport noise pollution is ruining the wetlands for people.

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

Because north/south traffic is already limited to four <sup>or five</sup> main routes around the airport, traffic tends to be terribly clogged on the ones that are used the most: the 405 freeway and Lincoln/Sepulveda. Traffic coming from the 105 freeway makes things worse, because cars <sup>are</sup> dump <sup>ed</sup> right before the tunnel that leads to LAX. The Green Line might have improved the situation had it been allowed to be extended right into the airport, which would've provided <sup>much-needed</sup> non-car access. Traffic within LAX is horrible. There are too many cars, mainly because there are no alternatives other than the free LAX shuttles. Playa Vista will make traffic in the LAX/Westchester/Marina del Rey area much more congested. Noise and pollution from the planes are already bad for those people who live near LAX. There's no room to expand LAX. I agree with expanding <sup>other</sup> airports in outlying areas, so that people who live out there can stop using LAX. <sup>+ increasing traffic to</sup>

*Kristi Y. Yuzuki*

Your "Regional Airport Plan" sounds like a better idea to me. As to the North L.A. County region, I think expansion of the Palmdale Airport would be a good way to go. The county (or whatever appropriate entity) could purchase all the land they need at a much cheaper price than Burbank or anywhere in the San Fernando Valley. Now would be the time for them to obtain enough land to plan for the indefinite future.

Although Torrance would be handier for me, I think that expanding the Long Beach Airport would be more suitable for the South Los Angeles area.

The expansion of LAX would affect me by creating more air plane noise in the So. Bay. The economic impact would be the result of lower rents creating less cash flow + the decline of prices of single family residences. I'm totally opposed to any expansion of LAX today or in the future

Dear Jane Harman:  
I would like to thank you for opposing the proposed LAX Master Plan. My husband came home from the war 1946 & like many G.I.'s wanted to settle down here in Westchester & build our home & raised our children here. At that time Century Blvd was a 2 lane street with ditches on each side & LAX was known as Mirna Field & jets had not been heard of. I was born in England in Redmond Ave 1923 so knew the area well. The lots here were sold by Mr. Cothy. We chose one & soon we were building our dream home. We were such pioneers, our mail wasn't even delivered & the nearest phone was

on Sepulveda + 95<sup>th</sup> St. The years passed + so many  
 our neighbors were ex. G.I.'s and we were all happy  
 until the airports put in the North-southway. We were  
 a family - My husband a nose-gunner on a B-24, then a  
 3 yr. POW - Joe - Navy U.S.S. Enterprise + Sherman in the  
 marines. We had our own army + now a war. We  
 lost our lives here at home. In 1970 we began to  
 move + look for other homes. We were waiting for  
 our son to come home from Viet-Nam + so was  
 Sherman our neighbor. The affect the airport had  
 on us was terminal. Our homes were taken from  
 us, made into parking lots - post office, etc. We  
 lost thousands of \$'s as fair market value is not  
 replacement value, and the Airport officials were  
 so cruel to us + so was Major Yorty. I remember at  
 one of our meetings at the Highschool Major Yorty  
 was there + he said "Looks like you got the wrong  
 end of the stick". I've never forgotten. I remember  
 seeing one of our neighbors being carried out of his home.  
 The tears I've shed - + my children can't go home  
 + see where they grew up. How sad! So you see I  
 have no love for the Airport - I have never used it.

I don't know who designed the entrance but these signs look like Pop Cycled to me. All different flowers. I'm sure the money spent for that would of been used better on the tunnel.

The traffic already is too much, we are being sandwiched between the airport + Hughes Playa, if the airport keeps creeping north there will soon be no Westchester - There is plenty of room in Palmdale - now that's a desert + how about the airbase Nova in Orange + Ontario ?? I had the Hughes Playa - with it's movies used for people from the airport to be entertained - We did have Loyale Theater + Paradise Theater. They are now closed.

Pardon me for raddling on but I'm angry at the officials here no concern for the people here in our community. Thank-you again.

Westchester Pioneer + Native

Jean Snook

Please don't round file this as some old lady. It is my voice!

Jim and Jean Snook  
8011 Blériot Ave.

P5.

No one this expansion is only a band-aid.  
In 10 yrs from now it will have to expand  
again, so why not open Palmdale to take  
care of all traffic from Prisma to here and  
to El Paso to take care of Orange counties  
points East + South. I have seen as many  
of as 11 planes out on the approach ways  
to LAX at night coming in to land. This  
is a disaster to happen.

Heavy traffic on the freeway and on Sepulveda (Pacific Coast Highway) is presently a dreaded experience anywhere around the airport on Friday, Saturday, and Sunday. Certainly a substantial portion is due to the heavy concentration of residents, but the airport traffic makes the congestion far worse during certain hours of these days. People are driving in from all parts of Orange County and the inland cities. Why can't they be forced to carry a portion of the airport traffic - by building a medium sized airport at the old Marine base - and also diverting a fair share to inland airports that currently exist?

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*Thanks for fighting for a regional plan regarding air transportation. We in the South Bay should not shoulder the entire burden of crowded skies and crowded traffic to & from LAX. Also money should be spent on updating technology in the control towers and lanes giving pilots enough rest between flights.*

Our house has had planes flying lower than before. I see them now flying above the skylights where they hadn't previously. I worry about falling debris and pollution. There is black soot all over the windows and porches outside. Traffic on the streets is dangerous. I know of friends who drive over 100 miles just to take flights out of LAX. They live in developing areas where there is room for population growth, and they deserve regional access to air travel.

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual) ✓
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Since I drive on the 405 everyday, traffic is already intolerable, and the alternates of Sepulveda & Aviation are the same. Although several miles away, we can hear the planes now. The black soot that appears is not coming from car traffic on a residential street. Devaluing my property from noise and pollution yields an extremely negative response.

Exactly why all the resources that are available in Palmdale are not even being looked at or mentioned is absurd. That community would welcome airport road/rail expansion. The 405 is FULL and the traffic reports are now saying "It's always slow".

As a 51 yr. resident of Westchester, I am very opposed to the LAX master plan. I believe it will destroy much of the area. The traffic has increased greatly the past year or two - and with the Playa Vista area to be developed and the expansion of the airport - will we be able to move??

Thank you Rep. Harmon for this information & opportunity to respond. We are aware of the controversy & agree that regional plans for airports & ground transportation plans to get individuals out of their cars is absolutely necessary. The time spent stop & slow on the 405 & Century etc. takes more time than the bet. to SFO, even for us in Torrance. The cost of gas & the pollution of cars & planes could wreck huge areas around Tor. people in other areas need access to airports closer to where they live. Best wishes in your efforts.

The date is June 13 01 & I received this in the mail. Wanted effort & postage for all of us who are opposed to the master plan & expansion of Lax. A realtor in the area was to drop by papers to take to the meetings. She also never showed up. I'm handicapped & cannot attend meetings. I live on 91st St. & language is enough. Fighting big business & politics has just about knocked me out. I'm willing to struggle on if I can.

My family is affected by airport expansion as:

1. Sepulveda & La Tijera Blvd's are a freeway so overcrowded as to be either gridlocked bumper to bumper or frustrated drivers going at dangerously high speeds and cutting in & out and tailgating (at least no law enforcement present).
2. Noise level ever increasing
3. Cannot leave automobiles outside due to fuel falling

Congresswoman Harman,

I agree with your concerns on the expansion of L.A. I live approximately 200' from Lincoln Blvd in Venice. The traffic on Lincoln is already congested and will only get worse with a larger LAX. Public transportation must be improved and other So. Cal airports expanded and built.

★  
Dear Hon. Harman,

My husband and I are residents of Rancho Palos Verdes. Despite the exorbitant taxes we pay, we are continuously disturbed by the airport noise from LAX - morning & late evening when we need to sleep. If Palmdale and Ontario want more growth - we say let them have it. We moved to this area for the QUIET OPEN SPACE. The noise has, however, been increasing in the last few years. I am vice-president of our homeowner's association and have heard the same concerns from my neighbors. Do we need more congestion, smog and noise here? Absolutely not. I'd rather wait at the airport for a delayed flight than be subject to a worse alternative. Please keep your constituents' concerns in mind.

*Having commuted to San Francisco from Venice regularly over the last 12 years → I have to question the intelligence of any expansion plan that doesn't include a high speed rail extending from San Diego to Seattle. This is 1000miles overdue — common sense approach to people moving embraced everywhere but the USA. Could \$12 billion build the LA-SF segment of a high speed rail? Think about it.*

Dear Jane Harman: I agree with your analysis above. The Denver airport used to be in the middle of town and Denver moved it out of the residential area. Great idea because it means less noise, less pollution and the land is less expensive. Same can be said about the Dallas airport too. LAX needs to move!! The traffic is bad near the airport. At times Sepulveda is backed up over 1 mile trying to get through the Sepulveda tunnel. The airport noise at nite is very bad and I believe it is mostly from FedEx, UPS, etc because there aren't very many passenger flights at LAX after 10 PM. The problem is cargo flights too! Move the cargo flights to Palmdale or Ontario or Burbank or Long Beach or Orange County. CA keeps saying that LAX brings jobs to the South Bay. Don't Agree. El Segundo continues to have many vacant commercial buildings, long for now.

P.S. Traffic is also backed up on the 105 freeway Sepulveda exit. This situation is very dangerous because cars are stopped/merging in 2 lanes on the right while cars are going at freeway speeds (65 mph) on the left lane.

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	105,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Source: Los Angeles World Airport; Denver International Airport; Alliance for a Regional Solution to Airport Congestion

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372-1622. If you need more room, feel free to enclose additional pages with your name and address.

LAX expansion would be devastating to the lifestyle of the people in the So. Bay. Manhattan Beach already suffers from low flyovers, noise pollution, traffic congestion. If the airport is allowed to expand, real estate property values would be dramatically effected. The threat of an airport disaster over our homes would become highly likely.

**NO LAX Expansion!** We know they are working on the expansion, as we speak... **STOP IT!**

Please continue your efforts to stop the expansion of LAX. The surrounding counties should expand their airports. We hear enough noise from planes - let's distribute it.

Thank-you.

I LIVE IN PLAYA DEL REY & OPPOSE FURTHER LAX EXPANSION INCLUDING RING ROAD EXPANSION. NOISE IS AN ONGOING PROBLEM (JETC). MY HOME HAS DOUBLE PANELED GLASS WINDOWS AND I STILL HEAR PLANES (INDOOR). THERE IS A CONSTANT LAYER OF SOOT/DIRT ON MY BALCONY FROM PLANES OVERHEAD. THAT'S TODAY! EXPANSION & MORE AND/OR LARGER PLANES WILL INCREASE THE PROBLEM. THE 405 FWY. IS ALREADY SEVERELY CROWDED - MORE PASSENGERS WILL MAKE THE FWY. IMPASSABLE. AIRPORT FACILITIES MUST BE BETTER DISTRIBUTED THROUGHOUT THE ENTIRE METRO AREA. REGIONAL AIRPORTS ARE IMPERATIVE.

*I am against expanding LAX. This would overburden an already taxed infrastructure of roadway and parking, in addition to more pollution and noise.*

*If the regional airports had more flight options, people wouldn't have to commute to LAX, thereby creating more air pollution, and taxing its capacity.*

THE LAX MASTER PLAN WILL SINGLE-HANDEDLY DESTROY THE QUALITY OF LIFE IN SOUTH BAY AND SURROUNDING AREAS. ALREADY THE NOISE IS TERRIBLE SINCE THE PLANES HAVE BEEN FLYING LOW AND NOT RESPECTING THE PROPER FLIGHT PATHS. POLLUTION DESTROY OUR OUTDOOR FURNITURE. AND WHEN I CALL THE COMPLAINT LINES, ALL I GET ARE RUDE PEOPLE WITH BAD ATTITUDES. OTHER CITIES AROUND THE WORLD BUILD THEIR AIRPORTS AWAY FROM POPULATED AREAS. WHY CAN'T LA. WHY NOT USE PALMDALE FOR FREIGHT, I THINK THAT IDEA IS BEING DISCARDED BECAUSE IT CUTS INTO PROFITS. DAMN THE PEOPLE, LETS NEAR IT FOR THE ALMIGHTY DOLLAR!

William C. Withycombe, Regional Administrator  
FAA Western-Pacific Region  
Federal Aviation Administration  
Box 92007 - Worldway Postal Center  
Los Angeles, California 90009

September 24, 2001

Dear Mr. Withycombe:

The U.S. Environmental Protection Agency (EPA) has reviewed the Draft Environmental Impact Statement/Report (DEIS/R) for **LOS ANGELES INTERNATIONAL AIRPORT (LAX), PROPOSED MASTER PLAN IMPROVEMENTS, Los Angeles County, California** (CEQ #010024. #D-FAA-K51039-CA). Our comments on this DEIS/R were prepared prior to the tragic events of September 11, 2001. Along with all Americans, we are stunned by what has happened and continue to grieve the loss of so many innocent lives. We know our country is deeply affected, and recognize that the Federal Aviation Administration's (FAA's) priorities and future activities will respond to these events. As FAA develops a course of action, EPA stands ready, as a Federal partner, to provide assistance to FAA now and in the future.

The subject DEIS/R is a joint Federal/State document, prepared to meet the requirements of the National Environmental Policy Act (NEPA) and the California Environmental Quality Act (CEQA). The Federal Aviation Administration (FAA) is the lead agency for this document under NEPA and the City of Los Angeles is the lead agency under CEQA. Our comments are provided under NEPA, the Council on Environmental Quality's (CEQ) NEPA Implementing Regulations (40 CFR 1500-1508), and Section 309 of the Clean Air Act (CAA). We sent scoping comments to FAA on the Notice of Intent to prepare the DEIS/R on July 31, 1997, and attended one of the three June 9, 2001 public workshops held in connection with the DEIS/R (Inglewood session). We have had a number of phone conversations with Mr. David Kessler of FAA to discuss issues raised by EPA's review of the DEIS/R. We acknowledge the extensive effort in preparing this DEIS/R and commend FAA's decision to conduct six additional public workshops and extend the comment period to September 24, 2001.

In addition to No Action, the DEIS/R fully evaluated three action alternatives: construction of a new north side runway, construction of a new south side runway, and relocation of an existing runway (Proposed Action, Alternative C). Each build alternative proposes the construction of new taxiways and runway extensions; construction of new terminal buildings and parking garages and a rental-car consolidated facility; construction of a ring road and connection to I-405; construction of new and relocated air cargo and maintenance facilities and roads; extension of the Metro Green Line into the airport; and land acquisition.

Based on our review, we rate the DEIS/R as EO-2, Environmental Objections - Insufficient Information. Please refer to the attached *Summary of EPA Rating Definitions*, found in EPA's Policy and Procedures for the Review of Federal Actions Impacting the Environment (1984). EPA's policy provides for a rating of Environmental Objections (EO) where EPA's review finds that "an action might violate or be inconsistent with achievement or maintenance of a national environmental standard, and in cases where there are no applicable standards...but there is a potential for significant environmental degradation that could be corrected by project modification or other feasible alternatives." The "2" rating (Insufficient Information) serves to identify additional or clarifying information that FAA should provide in the Final EIS/R (FEIS/R). Issues upon which we base our EO-2 rating include:

PC03501

- (a) The DEIS/R's acknowledgment that all three action alternatives, as well as No Action, cause violations of the National Ambient Air Quality Standards (NAAQS); additional information is needed to determine the project's contribution to the projected NAAQS violations and to assess the effectiveness of associated mitigation;
- (b) The DEIS/R's acknowledgment regarding disproportionately high, adverse impacts from aircraft noise to low-income and minority communities; additional information is needed to assess whether other reasonable alternatives and/or associated mitigation can successfully reduce these acknowledged disproportionate effects;
- (c) Potential adverse health effects associated with air pollution increases, especially diesel particulates; and
- (d) Failure to fully analyze a regionally-based alternative that may reduce disproportionately high, adverse impacts on low-income and minority communities.

These issues are summarized below and described in greater detail in our attached comments.

**NAAQS Violations:** The DEIS/R projects violations of the NAAQS for at least two criteria air pollutants for the three action alternatives (see p. 4-509). Due to the severity of existing and projected air quality challenges in the South Coast Air Basin, EPA is seriously concerned about Federally-approved actions projected to yield additional air quality burdens. The DEIS/R projects that all three action alternatives (as well as No Action) will cause NAAQS violations in one or more years, i.e., 2004, 2005, and/or 2015. For Alternative C (Proposed Action), the DEIS/R informs us that maximum concentrations for nitrogen dioxide (NO<sub>2</sub>) and particulate matter (PM<sub>10</sub>) are predicted to violate the annual NO<sub>2</sub> NAAQS, and the 24-hour and annual PM<sub>10</sub> NAAQS in 2004 and 2005. The PM<sub>10</sub> NAAQS are predicted to be exceeded in 2015. Documenting the project's contributions to these projected NAAQS violations, and how they would be successfully mitigated, is a critical consideration in terms of NEPA public disclosure. All affected agencies should participate in developing adequate, enforceable air quality mitigation that can be shown to have quantifiable emissions reductions such that any NAAQS violations are successfully avoided and/or mitigated. Absent this finding in the FEIS/R, the public has no assurance that the project complies with the CAA. EPA will continue working cooperatively with FAA and other parties as planning for this project moves forward.

We recognize that the DEIS/R identifies areas where mitigation can make a significant difference in the magnitude and occurrence of specific impacts. Recognizing that this project's NEPA documentation needs a more detailed discussion of mitigation measures, we look forward to working with FAA in developing an effective, efficient package of mitigation with respect to air quality impacts. Such mitigation efforts could include diesel retrofits for construction equipment and support vehicles, the use of alternative-fueled vehicles at LAX, and other measures. It is important to involve local communities and local authorities in developing mitigation measures.

We note that, based on information in 4.6 (Air Quality), it appears that the project will cause significant emissions, which may make it difficult for FAA to make a positive conformity determination under CAA Section 176(c) and EPA's general conformity regulation. The DEIS/R does not discuss how FAA will address CAA general conformity, including whether an appropriate level of air quality mitigation will help ensure that the project conforms under the CAA. EPA recommends that the FEIS/R address how the project will meet the general conformity regulations.

**Disproportionately High, Adverse Impacts:** Executive Order 12898 requires that Federal agencies identify and address disproportionately high, adverse human health or environmental effects on minority and low-income populations as a result of Federal projects. The U.S. Department of Transportation's (DOT) Environmental Justice Strategy provides that when such disproportionate

impacts are identified, DOT is to *ensure that any of their respective...activities that will have a disproportionately high and adverse effect on minority populations or low-income populations will only be carried out if further mitigation measures or alternatives that would avoid or reduce the disproportionately high and adverse effects are not practicable.*

Page ES-46 acknowledges significant, disproportionate impacts to such communities due to aircraft noise, and potentially air quality and health. Pages 4-395 and 4-396 state that projected increases in aviation activity at LAX would have a disproportionate impact on minority and low-income communities under all three action alternatives, and that noise mitigation may be inadequate to eliminate associated impacts. The DEIS/R informs us that increased emissions of NO<sub>x</sub>, particulate matter and toxic air pollutants could have significant impacts throughout the South Coast Air Basin, and that health effects associated with these pollutants (such as asthma) are more prevalent among low-income and minority populations. According to the DEIS/R, these air quality impacts have the potential to affect minority and low-income individuals "more severely than the general population." Although the DEIS/R refers to mitigation to avoid or minimize adverse impacts, the FEIS/R should identify what mitigation and/or alternatives will be implemented, and determine the extent to which adverse impacts can be reduced or eliminated. We are willing to assist FAA in developing mitigation such as the Environmental Justice Action Plan, which should be developed in close coordination with affected local communities, in keeping with the Council on Environmental Quality's guidance on environmental justice under NEPA.

**Other Air Pollutants:** The DEIS/R includes a major health effects analysis and we acknowledge this effort. However, the DEIS/R does not satisfactorily address two air pollutants of concern: toxic particulates and acrolein. Page 4-1008 acknowledges that diesel particulates, a State of California-listed carcinogen, account for 70% of the cancer risk due to air pollution in the air basin. Diesel particulate emissions are linked to adverse respiratory effects, e.g., asthma, especially in children of low-income and minority communities. The State of California recently listed acrolein as one of five air toxics significantly impacting children's health. The DEIS/R projects large increases in toxic particulate and acrolein emissions from aircraft, cargo transport, ground service vehicles and construction equipment. The FEIS/R should assess the health impacts of these toxic emissions and the extent to which such impacts will be adequately mitigated.

**LAWA's Air Quality and Source Apportionment Study:** EPA commends LAWA for undertaking the 'Air Quality and Source Apportionment Study of the Area Surrounding Los Angeles International Airport,' and we remain committed to our continued role in the completion and implementation of this study. LAWA's air quality and source apportionment study is designed to remedy deficiencies in current information about LAX's current operations on air quality and surrounding communities. Given the existing and projected air quality impacts associated with LAX, this study is extremely important. The data and analysis that becomes available through this study will facilitate full disclosure of impacts, identify appropriate mitigation measures, and inform the NEPA decision-making process. As it becomes available, FAA should fully integrate the information and analysis of the air quality and source apportionment study in this project's NEPA document and decision-making process.

**Alternatives:** NEPA requires disclosure of adverse impacts and how such impacts may be avoided or minimized. Since the project's stated purpose is to respond to local and regional demand for air transportation during...2000-2015 (p. ES-6), we believe the range of fully evaluated alternatives is too narrow. This is critical in light of FAA's recognition of disproportionately high, adverse impacts on minority and low-income communities from aircraft noise, and potentially air quality and health. While the DEIS/R mentions an alternative for other regional airports, FAA determined it is not reasonable. EPA believes there is not sufficient information in the DEIS/R to support this conclusion

and strongly recommends that the FEIS/R include an analysis of the extent to which greater use of existing commercial airports in the five-county region may help to meet the project's stated purpose and need while potentially reducing adverse impacts. While new and/or additional information could be presented in the FEIS/R, a supplemental EIS may be more useful and appropriate to present a broader range of fully evaluated alternatives. Given the scope and complexity of managing projected increases in air traffic over the next 15 years in the five-county region, FAA should consider a comprehensive, long-term effort beyond this particular NEPA document to examine strategies to fairly and effectively distribute air traffic at the commercial airports of the five-county region. We believe such an approach is consistent with the recent commitment by the Secretary of Transportation to establish a task force to assess aviation demand and airport capacity in southern California.

**Conclusion:** As noted, EPA is particularly concerned with the projected NAAQS violations attributable to this project, lack of a detailed plan to avoid and/or mitigate disproportionately high, adverse impacts to minority and low-income populations, potential health effects, and the narrow range of alternatives that were fully evaluated. EPA believes there are serious deficiencies in the information presented in the DEIS/R, which leads to a high level of uncertainty about the magnitude of potential impacts associated with this project. The findings and recommendations of LAWA's air quality and source apportionment study are especially relevant to FAA's decision-making, and merit careful consideration in this NEPA process. The FEIS/R should include FAA's general conformity determination and related mitigation commitments. No matter what alternative under NEPA is finally selected, including No Action, there are major regional air quality, environmental justice, and other issues needing resolution. Because of the complexity of issues involved in avoiding and/or mitigating the projected NAAQS violations attributable to this project, it is important that such issues be addressed with the involvement and cooperation of all parties (e.g., the public, industry, and Federal, State, regional and local governments), utilizing existing regulatory processes to protect air quality in the South Coast Air Basin. EPA looks forward to working with FAA, LAWA, and Secretary Mineta's Task Force to find an effective, comprehensive approach to air transportation in the region and to address the issues raised by the DEIS/R and the public comment process.

Please refer to our attached comments for a detailed explanation of EPA's objections and other issues raised by our review. We look forward to working with FAA to resolve the objections raised by our review. If you have any questions, please call me at 415-744-1585. David Tomsovic is the staff contact for this project, and can be reached at 415-744-1575.

Sincerely,

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

### Fight LAX expansion

In a March 1 *Los Angeles Times* article about the mayoral candidates' views on LAX expansion, John Agoglia, president of the Airport Commission, was quoted as saying, "Here, if you don't build it, they will come anyway." He has his own "field of dreams," obviously, but in a democracy, we, the people, ought not to be told we are helpless.

There are ways to cap flights in time, there are rules to make about noise and air pollution, communities to join together and protest being swallowed up by big business expansion. In my field of dreams, I see leadership coming forward in Los Angeles and the South Bay communities saying loud and clear that we have enough now. Let there be other airports surrounding Los Angeles. If they build, the business and jobs will come to them.

All over the United States and the world, shuttles are bringing people into town for whatever. They are not flying them right into beautiful residential communities like our South Bay and destroying the quality of life there.

I hope Soboroff and others supported by Riordan and Agoglia will not be voted in so they can continue trying to frighten everyone into passivity or into active greed with the monster plan for LAX finally taking over and telling everyone everywhere that we have no limits here, just bring your money and come.

Redondo Beach, CA 90277

Dear Representative Harmon,

Please find enclosed a copy of my letter to the MASTER PLAN LAX. **I am very much against the EXPANSION plan at LAX.** I think you, the folks in "downtown LA" and "all around Los Angeles" are very much aware to this and I hope for many reasons that you will say **NO to LAX expansion.** **Who really has the final say about expansion??**

Thank you for listening.

Sincerely,

Ruth F. Dawson

<p><b>Comments:</b></p> <p>NO EXPANSION at the present site of LAX. We have lived in this community for 30 years. Our home on 92nd Street was taken in 1970 because of LAX expansion (north runway). Westchester is a very special place . . . as is Play Del Rey, El Segundo, Manhattan Beach and so on down the way and around Palos Verdes. AND . . . I feel great sympathy for those who live in Inglewood who for many, many years have had noise and pollution over their homes.</p> <p>WHY don't you really plan ahead for the future??? Use TRAINS and transport people (Passengers, crew etc.) to other sights . . . and build on the "land in the Valley" that YOU have owned for years. Do you "in high places" really drive on Lincoln and Sepulveda Blvds. know of the congestion (at all hours) that we have now? AND do you ever go to the Airport Post Office (new location of not more than 1 1/2 years old) at Arbor Vida and Airport Blvd. and hear and feel the planes so low overhead as they come in for landing??? Think of the pollution that comes down many, many times a day . . . and if ever a crash . . . would you please wake up and plan ahead . . . TODAY . . . about working with regional solutions???</p> <p>I like to fly. It is nice to be near an airport. My brother is a retired captain with American Airlines out of O'Hare. O'Hare was built out of the city, Chicago, as was Dulles from D. C. and the new airport near Denver. Please plan ahead . . . we don't need expansion at LAX for many reasons . . . health pollution, noise, congestion just to name a few!!!</p> <p>I sincerely feel that this planned expansion of LAX or LAWA is only a matter of MONEY and BIG BUSINESS! I do hope you will consider . . . HEALTH AND SAFETY as your number "1" priority.</p> <p>Sincerely, <i>Ruth F. Dawson</i></p> <p>Ruth F. Dawson Concerned Citizen of Westchester</p> <p><i>Attach additional sheets if necessary.</i></p>	<p><i>Office Use Only</i></p>

RE: **LAX MASTER PLAN DRAFT EIR/EIS**

Dear Mr. Ritchie and Mr. Kessler:

After reviewing the EIR/EIS LAX Expansion No! (L.A.X.E.N!) has a series of questions that we would like to have answered and if you can identify where in the LAX Master Plan EIR/EIS these answers could be located we would appreciate it. Before we address those issues we would like to state publicly that we are oppose the any expansion of LAX that would result in additional pollution, negative environmental affects, increase in jet aircraft, increase vehicle traffic/trips, increase passengers, including but not limited to negative health affects, inclusive of both mental and physical.

We would like to make a special note that the Inglewood Meeting hosted by LAX at the Hollywood Park Casino was poorly attended by Inglewood Residents due to a lack of public outreach on the part of LAX. LAX should have scheduled a second meeting after being notified that Congresswoman Maxine Waters had publicized the wrong date. LAX did not notify Inglewood Residents in an effective way explaining the process and the purpose for the Public Hearing concerning LAX.

# **LAX EXPANSION NO!**

**L.A.X.E.N!**

**P.O. BOX 881564**

**LOS ANGELES, CA 90009**

**Tel/Fax (310) 671-9111**

The following are the objections and questions that we have concerning the LAX Master Plan EIR/EIS:

- 1) The document (EIR/EIS) does not identify the factor airport planners use in figuring out how many vehicle trips are associated with each passenger. Please identify what the factor is that the airport planners have used and what is the number of passengers that the factor is predicated on? Where and on what page is this addressed in the EIR/EIS?
- 2) The document (EIR/EIS) does not address the action of the Regional Board of the Southern California Association of Governments removal of the Arbor Vitae Interchange from the Regional Transportation Plan or the Regional Transportation Implementation Plan as a transportation project. Where and on what page can we find this acknowledgement. If it is not necessary to mention the Arbor Vitae Removal from the RTP and RTIP please identify why?
- 3) The document (EIR/EIS) does not identify who will pay for the construction of the Arbor Vitae Interchange if funding is removed for the Arbor Vitae Interchange Project? Where and on what page is the alternative funding source addressed if the Southern California Association of Governments continues to have funds pulled from the project?
- 4) Did LAX calculate what the negative affects would be concerning the computations contained in the EIR/EIS with the elimination of the Arbor Vitae Interchange Project? If there was a calculation done what would be the negative effects? Also how would the elimination of the project impact traffic flow, pollution levels, passenger movement, and overall environmental impacts on the surrounding communities of LAX and LAX itself? If this is documented where in the EIR/EIS is it located?
- 5) Did LAX calculate what the negative affects would be concerning computations contained in the EIR/EIS with the elimination of the Sepulveda Blvd. HOV (High Occupancy Vehicle Lane)? Where is it located in the EIR/EIS?
- 6) Why did LAX not address two air pollutants of concern: Toxic particulates and acrolein? Why did LAX not address how they would mitigate them? If this is documented where in the EIR/EIS is it located?

# **LAX EXPANSION NO!**

**L.A.X.E.N!**

**P.O. BOX 881564**

**LOS ANGELES, CA 90009**

**Tel/Fax (310) 671-9111**

- 7) Why did LAWA not include its own air quality and source apportionment study in the EIR/EIS that would have identified deficiencies in current information about LAX's current operation on air quality and surrounding communities? If this is documented where in the EIR/EIS is it located?
- 8) Given the existing and projected air quality impacts associated with LAX, why did LAWA not wait until its own air quality and source apportionment study was completed before releasing the EIR/EIS? If the study was completed where in the EIR/EIS is it located?
- 9) How does LAX intend to circumvent the ruling of the Southern California Association of Governments that LAX remained constrained to its current foot print and held to 78 Million annual passengers or less? If this is documented where in the EIR/EIS is it located?
- 10) Where does it address in the EIR/EIS when does it become unsafe to land and take off over the ocean simultaneously, how many planes simultaneously landing and taking off before night time operations are declared to be unsafe? If this is documented where in the EIR/EIS is it located?
- 11) Where is the Memorandum of Understanding between the City of Inglewood and Los Angeles World Airports located in the EIR/EIS. Also what are the ramifications concerning the air space over each home and the individual home owners ability to take legal action concerning environmental effects upon them and their family.
- 12) Extension of the Runway across Sepulveda Blvd or any movement of any runway can only be completed with an approved EIR/EIS. What is the Federal Citing? Where is it documented in the EIR/EIS that an approved EIR/EIS is necessary for moving the runways or taxiways?
- 13) Where is Mayor Hahn's of Los Angeles Alternative 5 located in the EIR/EIS? Does Alternative 5 identify moving the runways at LAX closer to the terminal areas located in the interior portion of LAX? What would be the distance between inboard runways on the northern and southern complex sides. If it is documented where in the EIR/EIS is it located?
- 14) How does LAX justify using the phrase "complete breakdown" on page 3-25 concerning meeting passenger demand of 97.9 million? When the maximum identified by the Southern California Association of Governments is 78 Million Annual Passengers or less. If it is documented where in the EIR/EIS is it located?

# **LAX EXPANSION NO!**

**L.A.X.E.N!**

**P.O. BOX 881564**

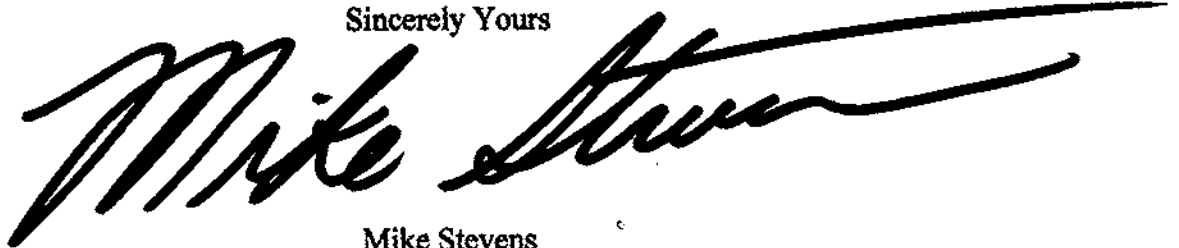

**LOS ANGELES, CA 90009**

**Tel/Fax (310) 671-9111**

- 15) Why does the unconstrained forecast and Alternative A, B, and C all show identical volumes of Cargo, since annual operations are not identical across the board. Even different fleet mixes under the three alternatives and the unconstrained forecast would not likely result in identical volume of cargo (4,172,000 tons) for each alternative? If it is documented where in the EIR/EIS is it located?
- 16) Can the total emissions of criteria air pollutants and toxic air pollutants be reduced by a comprehensive regional analysis?
- 17) If the FAA's recognition of disproportionately high adverse impacts to low-income and minority communities and associated with questions of equity concerning pollution, noise etc. how can LAX be allowed to expand by the FAA or any other Governmental Agency? What other Governmental Agencies are involved in giving approval of the LAX Master Plan EIR/EIS If it is documented where in the EIR/EIS is it located?

In closing I would like to thank Mr. David Kessler of the FAA for coming to the City of Inglewood and addressing the Inglewood Residents in 1999. Thank You Dave.

Sincerely Yours

Mike Stevens  
President  
L.A.X.E.N!  
LAX Expansion NO!

**REGIONAL SOLUTION  
REQUIRED...**

**LAX EXPANSION...**

**HEALTH & SAFETY  
IMPACT ON SURROUNDING  
COMMUNITIES THAT WILL  
HAVE LONG TERM  
NEGATIVE ECONOMIC  
IMPACT ON ALL OF  
SOUTHERN CALIFORNIA**

Our advise to the LAWA Commissioners is JUST SAY NO!

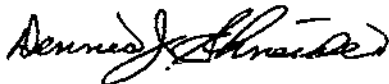

Oppose further LAX expansion. Those surrounding LAX continue to bear the brunt of prior growth. The latest expansion proposal would remove a third of the Westchester-Playa del Rey Business District and many more affordable homes.

Complete West Side and South Bay gridlock is inevitable. Aside from the obvious health and safety risks of an over crowded sky, another LAX expansion will add several million cars and trucks to the 405 freeway and local roads. Even the LAX Environmental Impact Report admits that traffic impacts cannot be mitigated!

It's no wonder that the So. Cal. Assn. of Governments (SCAG) voted AGAINST including any further LAX expansion in their Long Range Plan. Their staff estimated LAX "improvements" would add capacity but result in increased air traffic delays!—and at a \$2-\$4 billion dollars penalty for building at LAX.

The proposition that people will *only* go to LAX is fallacious—especially as traffic gridlock expands. Los Angeles also owns Ontario and Palmdale airports. These airports are capable and anxious to grow—now, but can't compete with the LAX power base for the limited funding without forward planning. Another round of LAX "modernizations" will surely cause economic loss to the region. In twenty years freight capacity will be inadequate and require more lead time, than available, to be built. Jobs and businesses will leave California.

Further, minority areas bear an undue amount of the impacts from growth at LAX. Subsidiary projects such as the "LAX Connector Road" severely impacts our heritage as it will destroy the 1937 National Historic Landmark, the Centinela Adobe, birthplace of Inglewood.

Denny Schneider,  
Member and Subcommittee Chair, LAX Community Roundtable  
310-641-4199 or 310-338-1550

# LAX Expansion Issue

## Four Scenarios

- No Action/No Project (78 MAP, 3.1 M tons cargo)
- Alternative A- Additional north runway and lengthened other north runway with west concourses (98 MAP, 4.2 M tons cargo)
- Alternative B- Additional south runway and lengthened other north runway with west concourses (98 MAP, 4.2 M tons cargo)
- Alternative C- No additional runway, but one north runway moved 350' N and both lengthened and one south runway moved 50' S and lengthened. (90 MAP, 4.2 M tons cargo) (Mayor Riorden endorsed June 1999) **RUNWAYS MOVED NORTH, MADE LONGER AND MOVED EAST!**

All add Ring Road and Western Concourse and expand Cargo Facilities.

Impact starts immediately with preliminary notices of proposed purchases to homes/businesses.

EIR/EIS expects major construction impact 3-4 years after go-ahead.

Many MTA/Caltrans/Fed Hwy/City/County "traffic mitigation" projects separate, but complementary.

## Timetable of Events

- Notice of Preparation Document Released 6/11/1997.
- Draft Master Plan & Environmental Impact Report/Environmental Impact Stmtnt (EIR/EIS) Released 1/18/2001.
- 180 day public comment/meetings ends 7/25/2001.
- Revisions of EIR/EIS to address comments and submission LAWA Airport Commissioners for recommendations and approval. FAA approval of Title VI Environmental Justice report.
- Los Angeles City Mayoral review and approval (**MAKE YOUR VOTE COUNT!**).
- Los Angeles City Council review and approval (**MAKE YOUR VOTE COUNT!**).

Verbal and written comments may be submitted at the Public Hearings. The Hearings will be conducted simultaneously on Saturday, June 9, 2001 from 12:00 noon to 7:00pm at the following locations:

Furama Hotel Los Angeles 8601 Lincoln Boulevard Los Angeles, CA 90045 (310) 670-8111	The Pavilion at Hollywood Park 3883 West Century Boulevard Inglewood, CA 90303 (310) 330-2841	Manhattan Beach Marriott 1400 Parkview Avenue Manhattan Beach, CA 90266 (310) 546-7511
-----------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------

**EXPECT BIG INCREASES IN TRAFFIC CONGESTION.** The last major expansion approval, 1984, was to 40 MAP yet we are currently at 65 and increasing! The EIR/EIS baseline is July 1997. Required mitigation per California Environmental Quality Act (CEQA) Guidelines is as of 1997.

**MANY parts of THE NORTH SIDE, Inglewood, and the South Bay having 55-64 CNEL noise are not counted. They don't qualify for soundproofing or other mitigation.** EIR/EIS states that the noise impact of Alt A/Alt C "reduce the total population exposed to noise above 65 CNEL..." The FAA considers only people at 65 CNEL (noise) to be impacted! The FAA will route more aircraft to larger areas but keep them just under 65 CNEL list. **HEALTH (noise/illness) AND SAFETY (crash) RISKS WILL BE SHARED THROUGHOUT THE WESTSIDE AS ROUTES AROUND LAX BECOME MORE CONGESTED.**

Under Off-Airport surface transportation the Environmental Action Plan states, "measures would eliminate all remaining CEQA 'significant' impacts of the Master Plan alternatives by 2015 except for six intersections..." **This document considers impact of new issues only, not the ones already existing!**

"Alternative C would also have a significant unavoidable impact [Business Relocations]...insufficient relocation space..." (84 more homes also impacted beyond Manchester Square and Belford areas).

**WRITE THE MAYORAL CANDIDATES, ELECTED OFFICIALS AND ALSO LETTERS TO EDITOR**

Contact: Denny Schneider (310)641-4199 Voice or (310)338-1550 Voice/Fax [DennySchneider@WeLiveFree.com](mailto:DennySchneider@WeLiveFree.com)

**TELL YOUR ELECTED OFFICIALS TO SUPPORT A TRULY REGIONAL SOLUTION! IF LAX CONTINUES TO EXPAND, THE OTHER AREAS WILL NEVER INCREASE THEIR SHARE AND BUSINESS WILL ULTIMATELY BE LOST TO SOUTHERN CALIFORNIA.**

In the 1980s LAX was renovated to accommodate 40 million passengers per year (MAP). Everyone agrees that LAX is presently overtaxed, operating at 65 MAP with 2.1 Million tons of cargo—but can we stand another round of facility “improvements” instead of a truly regional solution? Even those proposing facility expansion expects us to outgrow any planned expansion without distributing the load outside of LAX.

**AIR SAFETY WILL BECOME A FACTOR.**

The local environment will get worse (safety, noise, ground traffic, air quality, etc.) regardless of airport actions. Arrivals and departures (routes and quantity) are controlled by the FAA and there is no indication of any inclination on their part to reduce or regulate the amount of air traffic coming to LAX.

**THE HEALTH & SAFETY OF THOSE LIVING UNDER FLIGHT PATHS IS IMPARED AS AIR TRAFFIC INCREASES**

Interestingly, the EIR/EIS projects a reduction of people impacted by noise. The report, however, only considers people “impacted” if they are within an area subjected to the weighted average 65 dB CNEL currently mandated by Congress. Any less magnitude of noise is ignored. LAX Noise Management recently monitored the Osage Area of Westchester. Osage is not “impacted” with an average hourly instantaneous noise level of 70 db and an average of 40 noise events per hour all day and into the late night/early morning.

Health studies at other airports have shown increased probability of repertory diseases and cancer around airports. Jet fuels and other carcinogens released into the air by ground and air traffic is not healthful.

**WITHOUT EXPANSION EXPECT 10 MILLION MORE CARS AND TRUCKS ENTERING AND LEAVING THE AREA! WITH EXPANSION FAR MORE THAN DOUBLE THAT NUMBER.**

Traffic on the San Diego Freeway already comes to a stop frequently—imagine what health risk and time delays the additional traffic will add.

Arm yourselves with knowledge! Visit the websites below:

<http://www.neighborhoodlink.com/la/wpdrnc>

LAX already exceeds the previously specified maximum utilization of passenger and freight activity. I support a truly regional solution of NO EXPANSION of facilities and no reconfiguration of runways at LAX.

There is no viable expansion of LAX that would meet projected aviation capacity requirements for Southern California. Funding for airport facility expansion shall be disbursed throughout the regional airport network to the areas of fastest growth in preference to diverting the limited resources to another LAX multi-billion dollar expansion. Southern California Association of Governments (SCAG) in Technical Appendix G of the current draft Regional Transportation Plan acknowledges that two to four billion dollars will be saved by expanding Ontario Airport facilities in preference to LAX.

I oppose LAX expansion because it would:

- Increase air safety risks with more planes operating in close quarters.
- Dramatically worsen traffic congestion on I-405, I-105 and local arterials from thousands of passenger cars, vans, and cargo-carrying trucks.
- Result in greater air pollution, damaging local residents' health.
- Create more airport noise; impacting a larger population, causing stress, illness, and reduction of children's learning ability and degradation of property values.
- Aggravate environmental justice issues. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- Destroy local homes, schools, libraries, parks, and businesses to provide room for more airport support facilities.
- Divert attention and funds from the expansion of other airport facilities where future population growth is located.

I will push for changes in the FAA charter to require a limit in the number of flights landing at LAX and to cap the passenger and freight traffic to the present levels.

As Mayor, I will push for more realistic federal definitions used to identify and control air and ground traffic, noise and other adverse environmental impacts.

## What Should Be Done In Congress?

Sponsor Legislation to make the FAA lead, responsible agency for effects of noise on areas surrounding airports. Law must have teeth with penalties so that impact on communities is no longer "very low" priority below promulgation of aircraft industry. Must be equal to safety.

Sponsor Legislation to study and upgrade FAA priorities related to health effects of living around airports (noise and chemicals).

Change method of determining "impacted" from the current 65 CNEL to include "number of events in an eight hour period" with lower standards for periods from 11 PM to 8 AM. Basis for noise impact should include instantaneous levels as well as average energy level. (See enclosed chart of noise monitoring data from Osage Area under siege which is not "impacted.")

Sponsor Legislation to enable the FAA to specify limits in the number of scheduled landings at an airport facility. Set up a system that would enable carriers to "sell" landing slots similar to that used in the sale of "pollution credits."

Mrs. Robert J. Topel

Hermosa Beach, California 90254

M<sup>r</sup>. -  
August 24, 2001  
It's me again! Attached you'll find a response to a letter I wrote to the "powers that be" at LTB. As you can see, when the people in the No. Bay complain about constant noise from the planes, flying over, near & taking off from LTB, we're not complaining about an occasional problem, but a constant problem. -

Please note the enclosed fly over pattern is for a half day 7:00am - 3:00pm. I've requested LTB send the rest of fly overs 3-12 midnight also August 11 & 12 + 23. These are days we could not sit outside, or have the windows open because of the barrage of noise from the planes.

Sorry, I missed speaking with you on August 24<sup>th</sup> at the Hermosa Beach Farmers Market.  
Sincerely, Mary Jane Topel

As you can see, we have far too many planes flying low over, near & around our home. - Help!

note:

Date/Time Range:		Zone Violation Check	
Start Date/Time:	07 /29 /01 07 :00 :00	Action:	All
End Date/Time:	07 /29 /01 15 :00 :00	Response:	All

The black square is our home. This pattern is for 1/2 day, 7:00am - 3:00pm. We put in a request for 3:00pm to midnight.

**LAX**

*Los Angeles World Airports*

August 9, 2001

Ms. Mary Jane Topek  
330 30<sup>th</sup> St.  
Hermosa Beach, CA 90254

Dear Ms. Topek:

Thank you for contacting Los Angeles International Airport (LAX) on Sunday, July 29, 2001, regarding aircraft noise events on Sunday, July 29, 2001. As part of our program of examining aircraft operations that result in community noise complaints, we have investigated the following noise incident you reported using flight track data from Federal Aviation Administration (FAA) radar:

- The aircraft activity you heard on Sunday, July 29, 2001 between 07:00 AM and 03:00 PM may be attributed to aircraft on departure and numerous overflights not associated with LAX.
- Enclosed is the graphic that depicts flight tracks observed in the vicinity of your residence.
- Additionally, local weather and atmospheric conditions can have an effect on the amount of the aircraft noise that reaches the adjacent communities. Ambient air temperatures, wind speed and direction, as well as overcast conditions, can sometimes amplify sounds associated with aircraft operations at LAX.

Los Angeles World Airports (LAWA) staff is committed to operating the airport as quietly as possible consistent with safety, and we place great emphasis on reducing noise from aircraft using the airport. To that end we have implemented noise abatement procedures. The LAX Over-Ocean operations procedure, which is in effect from midnight to 6:30 am, direct all aircraft traffic to fly over the ocean when arriving into and departing out of LAX, weather and safety conditions permitting. The run-up of aircraft engines for maintenance is prohibited between the hours from 11 p.m. to 6 a.m. The preferential runway use procedures maximize the use of the inner runways during the evening/early morning hours of 10 p.m. to 7 a.m.

Other noise abatement programs seek and receive voluntary compliance. Jet airplane operators conducting westerly departures are to avoid early turns before reaching the shoreline. LAWA monitors in-flight procedures such as the "loop departure" for minimum elevation and landfall requirements. Helicopter operators are advised to minimize their impact on

LAX  
 Ontario  
 Van Nuys  
 Palmdale  
 City of Los Angeles  
 Richard J. Riordan,  
 Mayor  
 Board of Airport  
 Commissioners  
 John J. Agoglia  
 President  
 Mark E. Schaffer  
 Vice President  
 Lee Kanon Alpert  
 Miguel Contreras  
 Christopher C. Pak

nearby residential areas by using established routes and altitudes to approach and depart LAX.

LAWA monitors all departures and arrivals through the use of FAA radar flight tracks. When an aircraft deviates from a noise abatement procedure, an appropriate notification is triggered. However, airports do not have the authority to regulate aircraft in flight. FAA Air Traffic Controllers, along with the pilots in command of their respective aircraft, have ultimate control of aircraft operations, including the direction, speed, and altitude of aircraft for both arrivals and departures.

Thank you again for voicing your concerns.

Sincerely,

SIR:

ABOUT TWO YEARS AGO, THE AIRPORT SAID OK WE ARE NOT TAKING ANY MORE HOMES, WE ARE GOING TO SOUNDPROOF YOUR HOME IF THE DECIMALS ARE OVER 63 TO 65 OR SO. WE THOUGHT GREAT, THEY WOULDN'T SPEND ALL THAT MONEY ON SOUNDPROOFING IF THEY WERE GOING TO TAKE OUR HOMES. WRONG, LAWA 'LIED' AS USUAL 'THEY NOW WANT TO TAKE MY HOME AND 56 OTHERS PLUS 263 BUSINESSES FROM THE WESTCHESTER COMMUNITY, THAT THEY PROMISED THEY WOULD NOT TAKE. WHEN IS A LINE GOING TO BE DRAWN TO STOP THEM FROM DESTROYING A COMMUNITY AND CAUSING MORE POLLUTION, NOISE, CONJESTION AND A GREATER HEALTH HAZARD TO THOSE THAT ARE LEFT IF THEY ARE ALLOWED TO EXPAND. MOST OF THE HOMES THEY ARE GOING TO TAKE ARE OWNED BY SENIOR CITIZENS, WHO ARE RETIRED OR ARE GETTING READY TO RETIRE IN A COUPLE OF YEARS OR SO. THINKING WE WORKED ALL OUR LIVES LIKE MOST, NOW WE CAN ENJOY WHAT WE LOOKED FORWARD TO AND WORKED TOWARD ALL THOSE YEARS. THEN LAWA COMES ALONG AND SAYS TOO BAD, WE WANT IT, WE'RE TAKING IT. FIND SOMETHING ELSE. WELL WE DON'T WANT TO, THIS IS OUR HOME, WE ARE NOT AT AN AGE WHERE WE CAN START OVER AND WE SHOULDN'T HAVE TO, JUST BECAUSE LAWA WANTS TO CAUSE MORE POLLUTION, NOISE, CONJESTION AND HEALTH HAZARDS. REGARDLESS OF WHAT THEY SAY OR THE NUMBERS THEY PUT IN THEIR EIR REPORTS, THEY ARE EXPERTS AT LYING AND HIDING THE TRUTH. LOS ANGELES OWNS 4 OTHER AIRPORTS THAT THEY CAN BUILD UP, WITH NO HOMES, SCHOOLS OR BUSINESSES TAKEN. PALMDALE ALONE HAS 17,500 ACRES OF LAND. PLEASE DON'T LET THE ENVIRONMENT SUFFER ANYMORE THEN IT IS ALREADY AT LAX AND SO MANY SURROUNDING AREAS IF THEY ARE ALLOWED TO EXPAND BEYOND WHAT THEY ARE AT NOW. THANK YOU FOR TAKING THE TIME TO READ THIS.

PC03508

JANE HARMAN

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX. *IT'S UNBELIEVABLE THAT ANY LAX EXPANSION IS BEING CONSIDERED IF THE FIGURES ARE ACCURATE!*

Region	Pop. Growth 2000 2020	Region	Pop. Growth 2000 2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

• This comparison shows how Denver met growing aviation needs: *WHY DO WE EVEN WANT TO CONSIDER ANY LAX EXPANSION*

	Los Angeles International Airport	vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146 <i>(TOO MANY NOW!)</i>		1,371
Size	3,425 acres <i>THIS IS A BLACK HOLE!</i>		34,000 acres

### Comments of the LAX Master Plan

I have lived in the South Bay area since 1977 and recently purchased a home in North Redondo Beach. The price of my property was almost \$400,000 – a real “bargain” for the beach area. Homes just north of me in Manhattan Beach are in the millions. Over the years, I have watched our little beachside community grow enormously - with more expensive homes being built, property being developed and families moving in. The reason? The South Bay is a beautiful and safe place to live. We have our own school systems, our own police departments, our own fire departments and our own city governments. We breathe fresh ocean air, swim and surf in clean waters and jog on white unpolluted beaches.

However, the beauty of the area is slowly being ruined by the loud overhead noise of flying planes. I cannot tell you how many times recently I have been awakened in the middle of the night by loud airplane thunder. I look at the clock and it is 2am – 3am - 4am in the morning, and I say, “How can this be?” Is this allowed? Can planes land and take off at this hour? Is it a flyover? Outraged, I try to call the LAX noise hotline. Most of the time, I cannot even report the problem because the line is busy – presumably with other angry homeowners who have been awakened.

The once quiet skies of our beautiful and expensive beach community are gone. It is beyond comprehension that decisions are being made by the City of Los Angeles that we in this community cannot even vote on. We are the ones with the noise in our backyards. I am an outraged homeowner. I never remember even hearing plane noise and now it is constant. What is being done to solve this problem?

This airport situation is out of control. A high profile airport the size of LAX just cannot be located in the middle of the city any longer. It is not just the noise and the pollutants. It is extremely dangerous. With the skies this crowded, there is a tragic accident waiting to happen. One day, one of those big noisy planes is going to drop out of the sky, killing those on board and many more on the ground. We remember Cerritos. And how does the LA mayor feel about that?

Hon. Jane Harman  
36<sup>th</sup> Congressional District  
229 Cannon House Office Building  
Washington, DC 20515

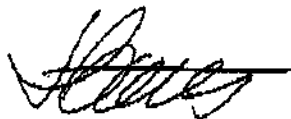

Dear Congresswoman Harman:

I am so glad to see you support and advocate a REGIONAL plan for airports serving the Los Angeles area. I work for Boeing Satellite Systems in El Segundo and can see, first hand, how traffic-impacted that area has become. I frequently use the airport on business travel to the East coast and cannot overstate how bad the current situation is--something you must be acutely aware of as you travel to and from Washington. I cannot fathom how it would be possible to add more travelers into that situation--even if the runways could support the increase.

I also want to bring to your attention the vitally important role that RELIEVER AIRPORTS play in mitigating the LAX situation. These airports (such as Torrance, Hawthorne, Santa Monica, Van Nuys, Compton, Fullerton, Camarillo and others) allow much of the general aviation business traffic to avoid LAX and thus reduce the crowding there. Furthermore, these general aviation airports, as vital on- and off-ramps of the national air transportation system, allow business travelers using general aviation aircraft to fly from an airport near their offices directly to airports close to their customers. For example, I can travel in my single engine piston-powered airplane from Torrance to the San Francisco area FASTER (from office to customer) than I can do so in a commercial jet. My "flights" leave the minute I am ready to go, my baggage never gets lost, and my rental car is waiting a few steps from the plane when I get there!

Please, don't forget the vital role that general aviation and our local airports play in solving the LAX and regional commercial airport problems. Help us to prevent their closure. Help us to remove unnecessary restrictions on general aviation activities at those airports. These are vital and irreplaceable transportation assets and they must be made part of the REGIONAL air transportation solution.

Sincerely,

Jim Gates

In Re: *Airport Expansion*

Dear Ms. Harmon:

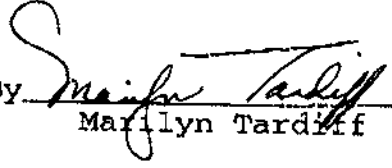

We live in El Segundo - two blocks from Imperial Way which is very close to the South runway (probably a total of 6-8 blocks from our house). We are impacted NOW by the noise, pollution and traffic. It will be just that much worse if they expand the airport. Even with our having "soundproofed" our home we can still hear the planes and are covered in dust! Having many more added flights may create so much noise that the soundproofing won't even be sufficient and we're right back to square one. When you are outside it's difficult to carry on a conversation with a neighbor and with more flights going overhead it will be really impossible. Needless to say, we are very much opposed to the airport expansion.

If they want to increase the passenger load, why don't they then send all the freight out of another airport. Why does everything have to be centered in one location? Many businesses have different locations for different divisions of their companies. That seems to work even when they are bi-coastal. Why can't the airport do the same?

We have tried never to complain about the airport because it was here before we arrived in 1967. However, we are speaking up now because the "ball game" has changed. This is getting to be excessive.

WE DO NOT WANT THE AIRPORT EXPANSION TO GO THROUGH

Robert and Marilyn Tardiff

Re "No.1 in Airfield Close Calls, LAX finds solutions elusive," June 24:

Is it a surprise that LAX officials suggest that airport expansion will reduce future near-crash accidents? I doubt law enforcement officials would similarly argue that the only way to fight rising crime is to expand our jails. The solution to projected increases in air traffic will require a regional approach that shares the burden of airport-related impacts amongst all Southern California facilities.

A half-hearted attempt at exploring alternatives to LAX expansion is not only self-serving, but also a swipe at neighboring communities that will bear the brunt of increased noise, pollution and traffic. By the way, wouldn't fewer planes at LAX also reduce the number of near-crash incidents?

Andy Hui  
Westchester

(213) 217-8557

Ms. Harman:

Have you ever tried to Drive the 405 freeway between Rosecrans and the 90 freeway? Any time during the day and into early evening it is bumper to bumper, going North or going South. Bring more traffic into the LAX area? Why?

Regional airports are the solution. I lived in Thousand Oaks three years ago. LAX is 45 miles away. It would make much more sense to have a regional airport in Ventura/Camarillo/Oxnard area. This would draw more passengers from the Conejo Valley, Simi Valley and the Western San Fernando Valley, as well as the immediate area. As it stands now, all these areas travel to LAX or Burbank. Both of which are brimming to capacity and near gridlock traffic at peak hours. Now add to that Orange County passengers heading to a bigger LAX. Why? Build another regional airport at El Toro.

We need you to be a forward-thinking, big picture leader with an eye towards the future and a long-term solution. We are paying the price from short-sided leadership from the 40' and 50's when mass transit for Los Angeles was ignored for short-term solutions. Please, as a leader for us today, do not make that mistake again.

Thank you.

JOHN W HARRIS  
1507 19TH ST  
MANHATTAN BEACH CA 90266

I have lived at this location in Manhattan Beach for 31 years. Because of the take-off and landing patterns, the noise very rarely affects me. The pollution factor I do not know but I know it could not be healthy. North on Sepulveda is always bad, traffic wise, and probably will always be regardless of the changes now under construction. My major comment about LAX is that it should not be expanded. An International Jetport should be built in the Lancaster/Palmdale area as envisioned years ago and LAX should be downgraded to short haul small jets only. There has been study after study completed on Lancaster/Palmdale and it always results in not feasible because of the inability to get rapid transit into the LA Basin. I think this is false and only represents the ideology of the people in power that do not want it to happen. I spent over 20 years in the United States Air Force, and watched billions spent needlessly for weapon systems because of the ideology of the people in power. It was especially painful to watch Manned Orbiting Laboratory (MOL) and Space Shuttle facilities built at Vandenberg AFB and never used. Why can't we use the same resolve and money and build an International Jetport in Palmdale/Lancaster and the necessary high-speed rapid transit. If the LAX expansion is approved, and I expect it will, is there anyone with enough fortitude to demand that it be approved only if there is a light rail station also? It is absolutely ridiculous that Los Angeles, with all its resources, allow special interest individuals/groups to deny light rail to and from LAX. Even the City of Baltimore, MD with its poor tax base provides rail service from BWI to downtown Baltimore.

I have included a card on another issue that really affects me and many others. I do not know when the SBP Annuity was reduced but, I know it was during a Republican presidency, probably as a rider to some other bill. As the card states, I was never told this would happen when I retired. The perception throughout the United States is the Republican Party is the only party that cares about the military, active or otherwise, that is just not true. Why doesn't someone speak up when things like this reduction happens and let him or her explain it to the millions of us that served? Maybe we can change this perception. I know I would have never bought into this program if I had been told that the 55% annuity for my surviving spouse would be reduced. Even bringing it back to 55% in 2011 is an injustice for those that will die before then. I have been contributing over \$200.00 monthly in this program since August 1973. I did so because I thought it was an equitable insurance program for my spouse. To see it gutted and downgraded is appalling. I could have put that money in my credit union and been better off. Before the program was gutted, why were enrolled members not given an opportunity to withdraw from the program taking a percentage of their contributions? Also, what is happening to the millions of dollars that will now not be received by surviving spouses?

Please reply to these issues. I hope you and other Democrats will fight for us. Remember this annuity, in some cases, is the only source of funds for some surviving spouses.

PC03516

**Dear Representative Harman:**

Your help is needed to provide fairer treatment to elderly uniformed services survivors. Unlike any other federal survivors, their Survivor Benefit Plan (SBP) annuity is reduced at age 62 from 55 percent to as little as 35 percent of SBP-covered retired pay. Federal civilian survivors receive 50 percent or 55 percent for life. Even worse, most older uniformed services retirees were never told of the age-62 reduction! S. 145 in the Senate and H.R. 548 in the House would balance equity and cost considerations by raising the minimum annuity to 40 percent now, to 45 percent by Oct. 1, 2004, and to 55 percent by Oct. 1, 2011.

If you already are a cosponsor, thank you, and please do all you can to ensure this initiative is enacted as soon as possible. If not, please support equity for military survivors by cosponsoring S. 145 (Senate) or H.R. 548 (House).

Sincerely,

  
Lt Col USAF (Ret)

June 11, 2001

Congresswomen Jane Harman  
811 N. Catalina, Suite 1302  
Redondo Beach, CA 90277

Dear Congresswomen Jane Harman:

We live in Torrance California, we do travel to visit our family and often have family members visit us.

Whenever we we have to go to LAX the traffic is just terrible, and almost impossible to pick up someone, or even to find a parking space. It is so dangerous to drive with all this congestion and your odds are very high that you could have a accident no matter how good of a driver you are!

We do travel a lot now that we are retired, so we fly into many States and to several large air ports such as Orlando, Miami, and many other large air ports, None of them seem to have the problem we have at the Los Angeles Air Port!

It has been impossible for Cal-Trans. to build roads fast enough to handle the traffic surrounding LAX, How are they going to handle the added traffic if they expand?

Shuttle buses and parking areas are very expensive and not the answer. We can not understand why they have not taken advantage of some of these military bases such as Norton Air Force Base. This base has potential, It has one of the finest landing strips around, It is just setting out there with weeds growing all around, with a freeway next to it.

There is also El Toro Air Base, also has great potential. Both are able to handle large aircraft, and lots of space to be able to handle traffic and are close to the freeway. We feel that using ether one of these bases would sure help our traffic problem that we have in the South Bay, West LA, and even the Valley.

Do we need to spend all this money in LAX to make our lives more miserable? We don't think so.

Sincerely Yours.  
Mr. and Mrs. W.M. Hudson

PC03517

## FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport, Alliance for a Regional Solution to Airport Congestion

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

June 8, 2001

We moved from Inglewood to Torrance in 1956 to get away from LAX noise and traffic. It has been quiet until the last two years. We now have flights from LAX over our homes all day. The most annoying flights are 1AM--2 AM--4AM which have increased the last year. The planes are extremely large, very noisy and very low and still climbing. We are awakened and the whole house shakes. It sounds as if the planes are going to crash into our homes. We can't get back to sleep.

The planes used to take off and land over the ocean. No more. They take off going east and make a sharp U turn and fly over Torrance. Torrance is not the flight path and never has been.

When we contact the FAA, LAX or Noise Abatement we are given the same stupid answers trying to deny what they are doing.

Example: One day before noon in a 30 minute time frame 6 airlines went over our house. When I called to complain that Torrance is not the flight path the man said due to the very bad weather and high winds the planes were not able to take off to the west. I asked him if he had been outside because it was a very sunny day with not a hint of a breeze. He said, Oh, paused, and then changed his story to the fact that LAX was no longer taking off west, just east, as they had changed the flight paths and we would have to live with it.

Besides the noise LAX is a mess. The traffic, the crowds and the delays should be terminated. If LAX can only handle X amount of arrivals and departures in a safe, quiet and efficient manner and without all the noise then the airlines should only be allowed X amount of flights in or out of the airport daily.

We just received your letter today and cannot attend the meeting on Saturday. Hope this complaint will help you with your goals to put a halt on any expansion of the airport.

Thank you

Clara Delperdang

This is the letter that I sent. Thanks

Environmental Impact Study Commission

Mr. James Westhoff

6/6/2001

911 Cedar St

El Segundo, Ca 90245

Ms. Harman

The environmental impact of the LAX expansion cannot be over stated. The residents of this community have in most cases invested their lives working to develop a community that is safe for their families, healthy to live and retire in, and a wholesome town to walk the streets in safety. So much so, that it is now one of the most desirable areas in the LA area to raise a family. To ask us to quietly relinquish this to allow LAX to expand would be cheating our children of their future homes.

I would like to point out a few issues that I am not sure have been brought to the front but should be considered none the less.

1. The increase of traffic through our city will remove the quality of life that we are all working so hard to preserve. The proposed 105 extensions down Imperial Highway to Pershing will create a traffic snarl that will virtually remove the North Main Street Exit. This is a major thoroughfare for those of us that live on the west end of the city. The daily traffic jams on the 105 freeway that occur today, are just a precursor to what will happen when the 105 is extended and the traffic increased three fold. At present, CHP and the Airport Police, are not able to

06/12/2001

PC03519

control the people that consistently break the traffic laws trying to move to the front of the traffic jam and get to the airport in the most expedient manner, say nothing of the increased accident rate due to these traffic infractions. All the proposals will do is move this type of behavior and traffic directly into our community.

2. The traffic through El Segundo will increase down Imperial Highway and Highland to get to the West Terminal. This is because of the traffic diverting to get around the traffic jams. The removal of the Pershing access will also inhibit our movement through out our home area and the South Bay to the Marina. In order to move anywhere north of El Segundo it will require us to transit the Sepulveda Tunnel and to interact with the airport traffic. This virtually cuts El Segundo off from its northern neighbors.
  
3. With the increased traffic, we can also expect increased crime to move into our city. The immediate access to the 105 will only help to give quick access to a high speed though fare to evade the Police. This will also mean that our families will be subjected to an element that will place them in increased risk. The prospect of one of our children being killed by someone evading the police is a very real possibility. More in line with a certainty. Is the expansion of the airport worth the life of one of our family members? An example of what we face was recently brought to the forefront when local Police was chasing two men who had just gunned down an innocent high school student in a drive-by shooting in Culver City. The chase ended in front of the Southwest Terminal. One of the gunmen was shot to death in front of the terminal, and the other who recovered from his gunshot wounds was just sentenced to life without parole for his disregard for human life. This of course, was after one of the police was killed in the ensuing gunfire. With the extension of the 105 this is scenario a very real probability in our residential areas.
  
4. An additional tax burden on the communities surrounding LAX will occur due to increased use of our infrastructure. This will mean that we will need more Police, increased Fire and Hospital capability, and an increase in the maintenance costs on our roads and streets. These entire costs will be born by those of us that least want the airport to expand. Yet we are being asked to shoulder that burden to an already heavy tax levy.
  
5. The impact on our environmental situation goes far beyond our quality of life environment. It also moves to the quality of our air through the release of twice the pollutants that are now released by running aircraft, ground support equipment, automotive vehicles, and spilled hazardous materials. In addition, the spills that will result from the aircraft operations will allow a variety of petroleum and other chemicals into our water table, thereby further polluting our now fresh water supply. These elements are released as a normal part of doing business. Machinery leaks and the leakage will seep into our ground and migrate into our homes, food and water chain. Again those of us who least benefit pays the largest price.

6. The increase of flights from 2100 flights daily to 2700+ and beyond will mean that there will be a significant increase in ground handling personnel. This increases the ground traffic on the Airport. This ground traffic interfaces with the aircraft and all of the other operational traffic. Many of the airport problems are due to the present congestion. LAX now has one of the highest runway incursion incident rates of any major airport in the US. So much so that all people driving on the AOA have to take a test to answer the FAA on what they are doing to increase incursion safety. This was only eyewash for the FAA, but in fact as had little impact on the number of incursions. Increasing the traffic via normal operations and trying to move the 2700+ flights a day will only exacerbate this problem. How would any of us like to be a passenger on any aircraft taking off with a tug, car, truck or anything else racing across the runway to make another flight takeoff on time? It will happen. In the rush to make the takeoff or landing window, the ground and flight personnel will take risks. Sooner or later just due to the sheer congestion an accident is going to occur. Lives will be lost, and families and public safety destroyed.
  
7. Additional runway incursions present another problem for us in El Segundo. With the southern most take off flyway boundary to be Acacia in El Segundo. What happens if an aircraft must divert its take off heading to miss something on the runway? Our homes are now at risk of not just parts coming off the aircraft, but of the aircraft actually impacting our homes, because it is now in an emergency situation outside of its normal operating window. I live outside the Acacia limit, yet it is nearly a daily occurrence for an aircraft to fly directly over my home. This is due to a pilot that is in a hurry to get to their next destination, tower diversions, or just plain disoriented pilots. Not to mention pilots that just chooses to ignore the "fly runway heading to the water" requirements. Anytime an aircraft flies over a home the possibility of parts or the aircraft in its entirety hitting our homes and families is an inevitability. This is an example of how the airport cannot control the current air and ground traffic. What will happen if the flights are increased 30+>? Again the people of our community must endure the cost of the expansion with no impact or consideration on those trying to impose their will on us.
  
8. The noise from the airport is becoming unreasonable. I live in a 75db level area, and am held hostage to the dollars to quiet my home unless I sign a disclaimer releasing the airport from any further legal actions. They didn't ask me, the homeowner, if they could infringe on my home with their noise. It can be so bad that I cannot even sit and listen to a television program. The noise impact on our schools is such that the quality of our children's education is impaired. The reasons our schools do so well is because of the parent's involvement in the quality education we have built. Stage three will not remove this problem as like all studies performed by the airport. It will be slanted to make the numbers look favorable to the desired outcome. Here again, we of El Segundo are asked to endure the expansion with no recourse.
  
9. The airport has been expanding for years and only now due to the questions from our

Community has anything been brought to the front. The only reason El Segundo has brought suit is because of the negative impact already done to our quality of life, which has been noticeable. Again, demonstration of the honesty of the Airport Officials and their concern for those communities around them. Their attitude is "If I can get it done without anyone knowing then lets do it and get away with it". An honest corporate citizen would truly try to find out what the impact of their business is on their neighbors before moving forward and then adversely affecting the community. What does that say for the Airport Management? Our air is dirtier, our water less pure, and our families less secure. Expansion will do nothing but rob us of our quality of life, our homes, and our safety. It is a criminal offense to take someone's possessions and livelihood. Don't make a criminal act legal.

10. The Airport Police Department are so relaxed with the laws of our community that they seem to be able to do whatever they prefer. They park in the middle of our streets with their lights on and impede traffic just so they can pick up their lunch. They park in our congested parking lots and take two spots so they can pick up their laundry. They run red traffic lights with no emergency call or emergency lights. This is not to levy slander, but to point out that we cannot trust the Airport Authority. They act as if they are above the laws they are to enforce. Instead they use their office for privilege.
11. The main proposal allows for extension of the four (4) current runways. That is because safely, this is all the area will support for major aircraft. LAX is considered to be one of the most dangerous airports in the US to fly into and out of by all of the airline pilots I have spoken with. This is because LAX is so congested with aircraft traffic. The inbound and outbound aircraft separation is already at its minimum and will be reduced when they try to bring 30% more flights per day into the airport. Passenger and ground personnel safety again is at risk. There is technology coming onto the market place that is going to reduce landing separation. Once this is in place, are the LAX officials going to increase the passenger load to 120 million per year so they can jam additional passengers into the terminals?
12. The present proposals remove all aircraft maintenance capability from the airport property with the exception of the United area, which they cannot remove due to their long range agreements to get United to bring in the number of aircraft needed to make LAX a hub for that airline. This is fine for United, but what about the rest of the airlines? What does this mean for us? Well, with no maintenance support other than light line and turn support, it means that more aircraft will be required to leave LAX, flying over our homes, on "ferry tickets". This means that if the aircraft has a severe, non-airworthy deficiency, but can't be repaired on the airport, it must be flown to another location for maintenance. The requirements are a crew specially trained in emergencies, and no passengers or freight. Why? Because the aircraft is not airworthy. Again an increase in the possibility of an aircraft incident over our homes.
13. In order for the FAA to make sure the aircraft are safe, additional surveillance will need to be

done. Current inspectors will be diverted to airport operations and less on safety of our aircraft and the safety of the passengers. The FAA is already taxed as evidenced in the latest news reports on airport delays throughout the US and the significant increase in actual aircraft flying. To increase inspections will require more inspectors and again increased cost to the taxpayer while increasing the revenue to the airport. This is not to mention the increased number of already short air traffic controllers, which is an additional cost to the taxpayer.

14. The reason given by the Mayor of Los Angeles on why LAX must expand is "LAX needs to expand because we cannot control the fact that people just want to come to LAX." Well that is not entirely true. The reason most people fly into LAX is because the fares are lower than outlying airports. Flights into LAX are fuller because of the larger number of flights. If the outlying airports like El Toro were developed LAX would still be a viable and very active input to the LA Basin. But, with increased facilities at other airports the airlines would then increase the number of flights, which will lead to lower fares at those airports as well as the passenger loads increase. I cite John Wayne Airport as an example. Just a few years ago it was nothing more than a grass strip and a wooden hangar. It seems as if LAWA Management has lost sight of development of additional resources as LAX is full.
  
15. Moving air traffic to outlying airports will also remove flight delays due to ground congestion and landing and takeoff windows. Ground congestion will certainly be part of the increases proposed at LAX. You can only take off "X" number of aircraft from four (4) runways while allowing "X" number of aircraft to land. Also moving to outlying airports will allow for an increase well beyond the 80+ million-passenger numbers with more runways, more landing and takeoff slots, and safer operations in a more expanded area. It will also allow the passengers the ability to arrive and depart closer to their destinations. This will create for more hotels and business throughout the LA area. Resulting in an expanded tax base for those communities from the additional jobs. All of the communities will benefit from the increased revenue without asking a few surrounding communities to incur all of the costs and little of the benefit.
  
16. It should be noted that the closest residence impact to El Toro is approximately 5 miles. And the distance to downtown Los Angeles is nearly the same as LAX. Within El Segundo the closest residence is just across Imperial Highway.
  
17. The removal of all of the maintenance support from LAX is also planned. This will mean the removal of in excess of 3000 highly skilled taxpayers and replace them with hundreds of unskilled workers to handle the ground needs of the increased passenger loads. What will happen with those quality taxpayers? With a shortage of this skill do we want it to leave our community?

LAX is considering only one thing. Increase dollars to the airport. The development of outlying airport facilities to spread the traffic to other areas makes good business sense. Just some of the benefits follow as I am sure there are many more:

1. Less centralized congestion at only one airport to LA
2. Safer operations around LAX for the outlying communities
3. Retention of the current quality of life for the outlying areas
4. Cleaner air and water for the South Bay
5. Will prevent the increase of Crime in any central area
6. Retains skilled labor in the work force for LAX
7. Insures safer operating aircraft due to proper maintenance before flight
8. Places passengers closer to their final destinations within the Basin
9. Expands business opportunities near the other Airports
10. Removes the stresses on our current infrastructure
11. The use of LAWA funds generated can be used to develop other LAWA areas like Ontario and Van Nuys airports
12. Genuinely reduces incursions on LAX and improves the Airport Safety
13. Safer and quieter community that is desirable to raise our families.
14. Increased total revenue into the LA Basin and the City of Los Angeles

LAX expansion is unsafe, and negatively impacts approximately 60+ communities in the LA Basin. It is shortsighted management to try to develop an already over developed resource and ignore the surrounding options which will actually benefit the Los Angeles Basin more. It has no positive aspects for the public safety and the future operations within the Basin.

Our quality of life is valuable to us, as is our homes and our children. To deny the expansion will not negatively impact Los Angeles, as there are facilities in the Basin to develop without the negative public safety issues and the loss of current jobs. It would be a service to the residents of Los Angeles to deny the expansion and force LAWA management to develop its other resources for the good of

the City. Would you like to live next to LAX if it were expanded any further?

James Westhoff

Resident Homeowner

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

In your Executive summary of the Master Plan- 2nd paragraph - it states

"To ensure that Los Angeles' air transportation infrastructure continues to facilitate the region's economic needs over the next 15 years, Los Angeles World Airports (LAWA) is developing a new long-range strategic master plan; such a plan has not been updated since 1981. The last major improvements at LAX were completed prior to the 1984 Olympics....." LAX should not facilitate the region's economic needs. Th region should facilitate those needs. Here it appears to me that LAWA is once again playing with words when you say the last major improvement was completed prior to 1984. You must have had a great many minor improvements to allow this airport to grow from 40 MAP IN 1986 to 67.6 MAP IN 2000. PLEASE INFORM THE PUBLIC OF ALL THE IMPROVEMENTS THAT WERE MADE IN THE LAST FIFTEEN YEARS at LAX.

One of your Guiding Principles, Goals and Objectives (on page 1) states

"Balance LAX modernization plans with local community concerns. In particular, potential environmental impacts such as aircraft noise." These are just words that in reality have little value. You are saying that more operations will not increase noise. Please keep in mind that LAX already has 100% compliance with the Airport Noise and Capacity Act. How are more operations going maintain or reduce the noise occurrences?

Another goal of yours is "Operate LAX in an environmentally sensitive, responsible manner." Please explain how you are going to operate LAX in an environmental sensitive and responsible manner when all aspects of noise and air pollution will increase with any and all proposals submitted in this report.

As you well know, the type of criticism I have brought forth in these two instances could be made many times throughout the Master Plan, EIS/EIR.

Congresswoman Jane Harman

I was planning to use this at  
Inglewood on June 9 2001, but couldn't make  
it.

US Representative Jane Harmon  
811 N Catalina Ave  
Redondo Beach, CA 90277

[jane.harmon@mail.house.gov](mailto:jane.harmon@mail.house.gov)

Subject: LAX Expansion

Dear Congresswoman Harmon,

At the Redondo Beach Round Table luncheon this noon at the Crown Plaza Hotel, I sat next to a fine young attorney, Mr. Jon Merchant, who happened to be the Chamber's Man of the Year. I mentioned to Jon that I was drafting a letter to you on the LAX expansion.

Jon said look at London and Paris. Both of these cities have two (2) International airports located outside the inner city. My, what an ideal arrangement if only it were possible for Los Angeles.

I was invited and attended the opening of Congressman Mel Levine's office on Century Blvd several years ago. At that social I talked to a lady from New York City who was in LA doing a study on the number of LAX Take Off and Landings (TO&L) each day. I suggested she read the recent issue of Aviation Week, an aviation trade magazine, that stated LAX had at that time 1600 TO&L each day.

Currently, LAX is pushing 2200 to 2500 TO&L each day. The proposed LAX expansion hopes to boost this to 3,000 TO&L each day.

Quite obviously, something has to give! The South Bay cities cannot tolerate the general disintegration of the Quality of Life with 3,000 TO&L each day.

One suggested approach is to breakout LAX aircraft operations into four categories and address each category. These would be (a) LAX International daily flights, (b) National flights, (c) West Coast flights and (d) all LAX cargo flights.

After obtaining the actual operational numbers, possible solutions in off-loading LAX flights could be determined. Certainly, all cargo flights are a prime candidate for relocation to the closed El Torro Marine Airfield. Then, after that, review the reduction of LAX flights. The goal being that the current 2500 TO&L per day be the max.

PC03521

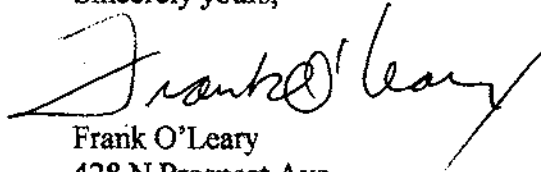

A matrix table should be created with the several options of the above four categories. Candidate air fields need to be identified, such as El Torro, Van Nuys air field, Long Beach airport, Orange County airport, etc.

Then, a trade off study should be conducted. The underlying success depends on a high-speed ground transportation monorail system to interconnect the regional airports.

It becomes quite evident; this is not solely a Los Angeles City problem but rather a State/Federal decision/resolution.

I hope these thoughts are helpful in sorting out this complex problem.

Sincerely yours,

Frank O'Leary  
428 N Prospect Ave  
Redondo Beach, CA 90277

310 372 3264

[folx33@aol.com](mailto:folx33@aol.com)

PS Congratulations on your reelection to Congress. I am still today super pleased by the meeting you chaired at the Aviation High School Auditorium on the Aerospace Corporation issue of changing to a "For Profit" corporation. It is ironic that (Aerospace Corporation President) Pete Aldridge is now in a DOD position to possible reverse that decision. Let's hope that does not happen.

PC03521

November 2, 2001

David B. Kessler, AICP,  
U.S. Department of Transportation,  
Federal Aviation Authority  
P.O. Box 92007 World Way Postal Center,  
Los Angeles, Ca 90009-2007

Dear Mr. Kessler:

I recently read about Mayor Hahn's proposal (Alternate 5) for expanding LAX.

I agree with capping the annual passengers at LAX to the current 78 MAP and cancellation of the Ring Road and Western Terminal. If removal of the parking lots in the Central Terminal Area and the construction of a new Check-in Facility will help with congestion and security, it would be a step in the right direction.

Why change the runway configuration and extend the North Runway over Sepulveda Blvd? Both would involve the removal of homes and businesses, as well as congesting Sepulveda Blvd. more than it is now. Beyond dispossessing families and some Westchester businesses, shutting down tax producing businesses vital to the economy and life of the Westchester Community will eliminate badly needed jobs provided by the newly established businesses and reduce the tax base that cannot be offset by short-term construction jobs.

If LAX is overcrowded, let LAWA and FAA make a real effort to locate viable airport locations to serve the San Fernando Valley, Inland Empire and Orange County Communities. This would lessen traffic congestion on the freeways leading to LAX and reduce ground travel time. It now takes 1 1/2 hours minimum during rush hours to travel from SFV to LAX. Add that to the 2-3 hours before departure for passengers to be at the airport and the passenger must spend almost 4 hours before take-off.

Thank you for considering my thoughts.

Yours truly,

*Florence D. Levinson*

Mr. Jim Ritchie  
Los Angeles World Airports  
LAX Master Plan/Room 218  
P.O. Box 92216  
Los Angeles, CA 90009-2216

Dear Mr. Ritchie:

Please accept this letter as my public comments in regards to Los Angeles World Airport's proposed Master Plan:

I would like to state that I am opposed to the LAX Master Plan and proposed expansion. I have provided the justification for my position below:

Figures 7, 9, and 11, corresponding to alternates A, B & C indicate that my home will be directly under departure track D6RW as well as approach tracks A6L7, A4R0, A4R1, A4R8, A4L0, A4L1, and A4L8. If the indicated departure tracks on the attached sheet are implemented as described in Appendix D, I believe the aircraft noise in my community and at my house will be significant as the aircraft will have only reached an elevation of a few thousand feet.

If my house ultimately ends up being directly underneath a low elevation departure track, its market value will be significantly reduced as will the quality of life for the entire community. In my opinion to reduce the value of my property, without a legal eminent domain proceeding and compensation, constitutes an unfair taking of private property. I am against any plan that places my home under a departure route. I am unwilling to agree to a plan under the assumption that aircraft will be quieter by the time the plan has been implemented.

My computation of aircraft elevation is as follows. Departure track D6RW passes over my house at about 20,000 feet (~4 miles from the end of the runway. Assuming a ground speed for the aircraft of 275 mph (~400 ft/sec), and a climb rate of 2000 ft/min, The aircraft will pass over my house about 60 seconds (one minute) after take off at an altitude of 2000 feet.

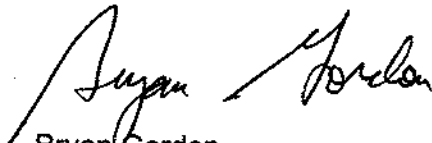

The reduction in air quality that will result from expanding air traffic is totally unacceptable for my wife, my children and me. The air quality of the Los Angeles basin has not yet attained a level of quality that could handle the burden of additional planes and cars. In fact, the EPA is particularly concerned with the projected NAAQS violations attributable to this project, lack of a detailed plan to avoid and/or mitigate disproportionately high, adverse impacts to minority and low-income populations, potential health effects, and the narrow range of alternatives that were fully evaluated. EPA believes there are serious deficiencies in the information presented in the DEIS/R, which leads to a high level of uncertainty about the magnitude of potential impacts associated with this project. The findings and recommendations of LAWA's air quality and source apportionment study are especially relevant to FAA's decision-making, and merit careful consideration in this NEPA process. The FEIS/R should include FAA's

general conformity determination and related mitigation commitments. No matter what alternative under NEPA is finally selected, including No Action, there are major regional air quality, environmental justice, and other issues needing resolution. Because of the complexity of issues involved in avoiding and/or mitigating the projected NAAQS violations attributable to this project, it is important that such issues be addressed with the involvement and cooperation of all parties (e.g., the public, industry, and Federal, State, regional and local governments), utilizing existing regulatory processes to protect air quality in the South Coast Air Basin. EPA looks forward to working with FAA, LAWA, and Secretary Mineta's Task Force to find an effective, comprehensive approach to air transportation in the region and to address the issues raised by the DEIS/R and the public comment process.

For the reasons above, I am opposed to the LAX Master Plan and the proposal to increase the passenger and cargo capacity of Los Angeles World Airports. The costs for the proposed expansion will come in the form of an unfair burden to the quality of life to all tax paying Los Angeles residents. Simply put, the number of people incrementally injured or hurt by the LAX Expansion scheme will far outweigh the benefits to the tax base and to the added jobs generated by the Expansion.

Thank you for considering my comments regarding this very important issue.

Sincerely,

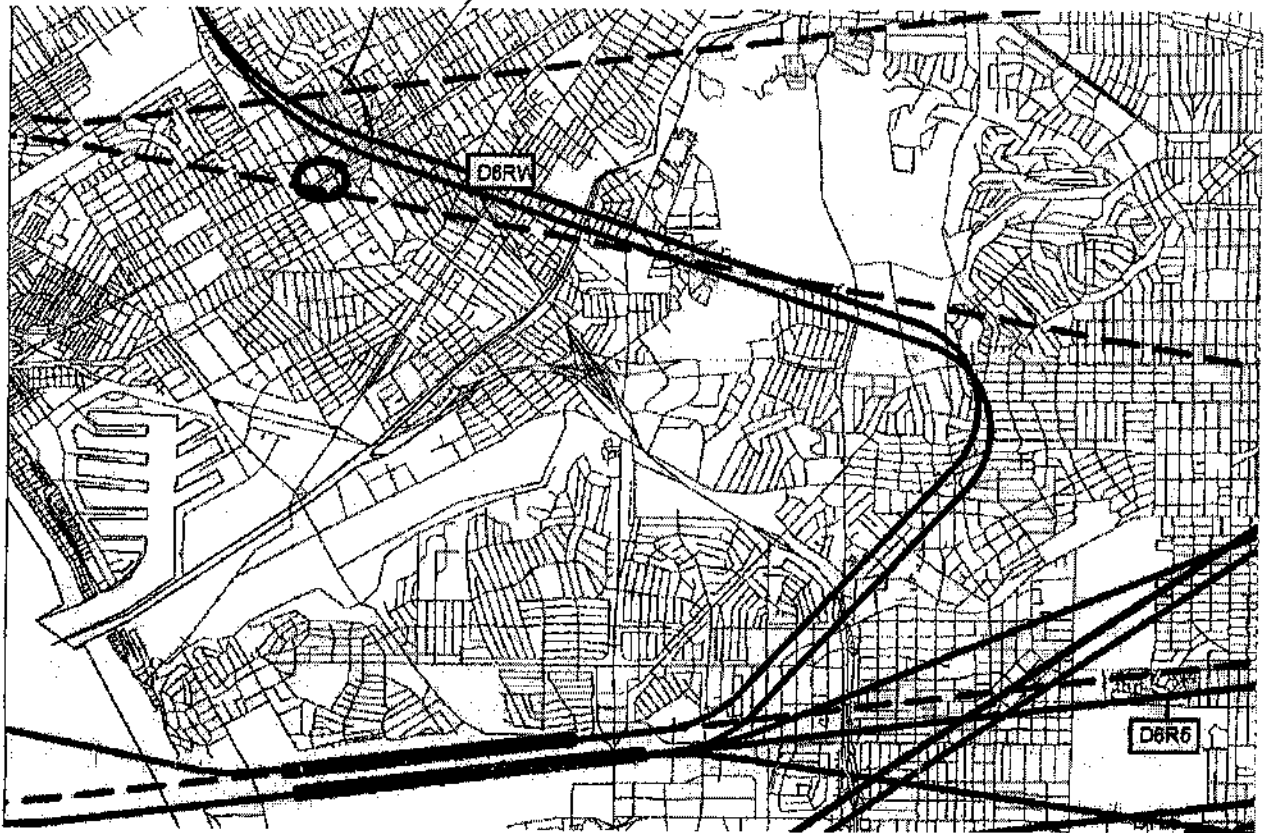

Bryan Gordon

Comments:			
<p>I oppose the dramatic expansion of both passenger and cargo activity at LAX. There are other airports in Southern California equipped to handle the expansion without the adverse effects on noise levels, air pollution and land use that will be felt if the proposed expansion of LAX goes through. The city of Los Angeles itself owns two key airports in the heart of the high growth areas of the region – Ontario and Palmdale airports. Rather than expand LAX, the smart thing would be to develop both of these airports and assist other airports in the region to do the same. Many of these other airports are fully capable of meeting our region's increasing demand for air travel. We do <u>not</u> need to expand LAX as proposed to maintain a vibrant Southern California economy.</p>

P.O. Box 92216 Los Angeles CA 90009-2216

Dear Mr. Ritchie, 11-5-01

Enclosed, please find copy of my letter to LA Times regarding Airport Safety.

Basic Points are as follows:

- 1) Safety should involve not only Air Passengers, but also Hundreds of thousands of people living AROUND the Airport.
- 2) Airports are usually constructed outside Big Cities, not in the middle of densely populated areas. Reasons are too obvious to enumerate them.

Recently South Korea committed a new Airport in Incheon 20 miles West of Seoul with Capacity projected at 29 MAP first year.

- 3) LAX is surrounded by many highly vulnerable targets. See Letter enclosed.
- 4) Accidents may happen because of many reasons not only terrorists' actions.
- 5) The more planes, the greater congestion, the higher the chance of an accident
- 6) Increase Safety by reducing congestion.
- 7) Develop promptly Ontario, Palmdale & EL Toro to take extra traffic. This will increase Safety at and around LAX.

Sincerely  
Andrew Stefanski

RE: Airport Safety

Mayor Hahn and airport officials have recently started stressing the importance of airport safety and security. Unfortunately, these considerations focus mainly on the well-being of air passengers and not on the hundreds of thousands of people living in the vicinity of Los Angeles International Airport.

LAX is surrounded by several highly vulnerable targets: over a dozen schools (including four high schools and Loyola Marymount University), the Playa Vista Development, the Chevron refinery in El Segundo, L.A. City water works, the Inglewood Forum, and many other prominent and populous gathering places. The surrounding locales are home to billions of dollars in investments, in addition to numerous people residing in this densely populated area.

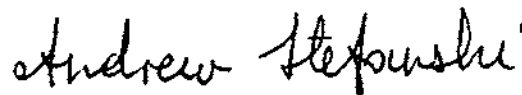

A plane can depart from its path not only due to a terrorist act, but also because of human error, mechanical defect, weather, and other variable causes. Most reasonable people can see that this is already shaky territory for a major airport, with so much at stake around, but we must make the best of the situation.

One of the best ways of improving airport safety is to lengthen the time and distance between airplane takeoffs and landings, as congestion in the air is often what causes accidents. Putting a fictitious cap on the number of passengers will do little good unless alternate facilities are provided somewhere else; otherwise, the planes will still keep coming if there is nowhere else to go.

Now is an excellent time to promptly develop and market Ontario, Palmdale and El Toro as suitable backup air facilities. Establishing a pattern of balanced, uniformly distributed air traffic will automatically increase safety at and around LAX.

Sincerely,

Andrew Stefanski

Los Angeles, CA 90009-2216

RE: Proposed LAX Expansion

Mr. Ritchie:

To move forward on any of the proposed alternatives in the Master Plan would create unbelievable negative affects to the community of Inglewood, LAX's immediate neighbor.

The risks, to which everyone who takes the time to write you will point out, are increased pollution, traffic, both by automobiles and trucks carrying the major increase in cargo and let's not forget the adverse affects of noise. The massive EIR/EIS address these issues but in many cases not well enough. My concerns are as follows:

**Pollution:** The daily tonnage of pollution already created by current airport use is astounding. The black oily residue on my home and foliage cannot be a good thing, and most certainly is dangerous if breathed in its vaporous form. The increase of this by-product of commerce will take an even larger toll on the residents of Inglewood.

**Traffic:** Most certainly, the adage, "if you build it, they will come" would apply here. No matter how much you widen the major street corridors that flow into and around the airport, these so called improvements will not alleviate traffic. It shouldn't be lost on anyone who lives in the Los Angeles basin that there are far more cars/traffic than street capacity - no matter how many streets with extra lanes, there are just too many people driving. One answer here would be to require people to take mass transit of any form into and out of the airport. Off site parking could be provided. One could use Denver's DIA as an example for off site parking. This kind of parking situation could assist in your concern for security measures regarding unattended parked automobiles.

**Arbor Vitae:** By providing mass transit into the airport you remove the need for the multi-million dollar Arbor Vitae interchange and Airport Boulevard connector road projects. These two projects alone would dissect and destroy communities established long before LAX was created. Inglewood and Westchester would carry that burden.

**Flight Trajectories:** One of the more important items is the haphazard nature of aircraft flight trajectories flying over Inglewood since the September 11<sup>th</sup> disaster. Pre 9-11 there was some discernable order to incoming and outbound flights over Northwest Inglewood with the occasional variance from traditional flight paths. But since that date there are several flights a day from the north that turn over my home trying to catch the north runway by flying down La Brea Avenue or just east thereof.

PC03527

Mr. Jim Ritchie  
November 6, 2001  
Page two

That doesn't even count the number of flights that take off over the ocean and fly across my rooftop or use Slauson Avenue as a sight line to the east. Northwest Inglewood takes on this NEW burden.

**Security:** Increased flights coupled with the appearance of non-controlled airspace over North Inglewood creates several questions on the subject of air safety. Since the Master Plan proposes to increase the number of flights, in turn, it will increase the likelihood of a catastrophic error over Inglewood. Again, Inglewood bears this burden.

**Noise:** Lengthening the north runway to the 405 freeway and moving it north to accommodate all the new flights would mean certain madness by noise. As it is now the noise from incoming jets flying over my rooftop can be deafening and I'm not even in the designated noise contour. The outbound jet noise is annoying. Another aspect of the noise is the run-ups and maintenance that takes place on the tarmac. This noise rattles my floors and windows, and as I've said, I live in Northwest Inglewood, a place fairly distant from LAX. These tympanic vibrations are disquieting to say the least. And who at LAWA can assure me that the constant vibration to the earth from current airport activity now and from the additional proposed flights would not do damage to my home?

**Population base:** Demographic projections show that the population, out of need or desire, are choosing to move to places other than Los Angeles. Riverside, San Bernardino and Orange Counties due to the burst of anticipated population growth within the next 15 years, need easier access to airports. Why is it that the communities surrounding LAX have to pay such a severe price, take on an unprecedented burden to accommodate an airport facility that's day has passed it by? LAX is virtually locked into its present footprint. Why is it the powers that run this airport cannot and will not look forward to a truly regional plan? You at LAWA already own Ontario, have upgraded that facility but somehow you turn away from that airport's true potential, to serve the inland empire. LAWA will not acknowledge the possibilities of developing the Orange County El Toro airport. Perhaps a joint venture could be struck between Orange County and LAWA. It would appear that much money could be made at these two facilities if developed properly.

Mr. Ritchie, before this plan or any semblance of the plan were to commence, I request that LAWA and the City of Los Angeles rethink this expansion. That you provide new realistic alternatives that incorporate the entirety of Southern California versus just Los Angeles commerce. And these alternatives need to consider LAX's neighbors more thoroughly and incorporate the reality of LAX being constrained to it's current footprint by the surrounding communities and not the other way around.

I look forward to your response.

Sincerely,

Dawn Scott

**RE: Master Plan and Draft EIR / EIS**

Dear Mr. Ritchie:

This correspondence will constitute the comments of the Westchester Vitalization Corporation to LAWA's proposed Master Plan and Draft Environmental Impact Statement / Report.

The Westchester Vitalization Corporation was founded in 1978 at the direction of Mayor Tom Bradley. Our original charter bears witness to the fact that the community of Westchester / Playa del Rey has been severely and negatively impacted by the expansion of facilities at LAX. Our mission, simply stated, is to do everything a community group can to mitigate the impact of LAX on one of Los Angeles' last true communities. We are proud of what we have accomplished despite the impact of LAX.

We strongly join the numerous groups and individuals who oppose the Master Plan and Draft EIR / EIS. For the reasons set forth below, we declare our belief that the LAWA has not studied the true alternatives and hence has failed to comply with California and federal law. Please note that this position is taken as the unanimous position of the Board of Directors, and that there is no reluctance, hesitation or lack of commitment in our action. Should it become necessary, we will join with other groups to compel LAWA to prepare a legally sufficient environmental document.

**LAWA'S PROPERLY ABANDONED ALTERNATIVES FOUND TO BE IMPRACTICAL, UNFEASIBLE AND UNAPPROVABLE ALTERNATIVES.**

More than five years ago when LAWA undertook the process of creating a master plan, it made the effort to put every possible alternative on the table for study. This includes runways in the Santa Monica Bay, use of Hawthorne Municipal Airport for commuter flights and adding two additional runways at LAX.

Whether in hindsight it was worth the time and money it took to study these alternatives is not for this group to say. However, it must be noted that LAWA correctly recognized that each of these alternatives were so impractical and unapprovable that they could not possibly be implemented and therefore could not be considered true alternatives. These alternatives were therefore abandoned and not moved forward for further study. They do not appear as alternatives in the environmental documents put before the public for comment.

As stated in both the Master Plan and the Draft EIR / EIS, the consideration of alternatives is the heart of both the NEPA, the federal environmental rules, as well as CEQA, its California counterpart. Environmental documents that only go through the motions of considering alternatives, or which use false alternatives in order to gain approval of an alternative preferred by the developer will be struck down by the courts.

**ADDING A FIFTH RUNWAY AT LAX IS NOT A TRUE ALTERNATIVE AND MUST BE ABANDONED.**

The three alternatives carried forward from the study stage to the public comment stage would either add a fifth runway adjacent to El Segundo, add a fifth runway adjacent to Westchester, or add no new runways but build a "new airport" adjacent to the Coastal Dunes at the west end of airport property. A no-built alternative is also studied as required by law.

In the years leading up to release of the Master Plan, it was commonly heard that the first El Segundo Fifth Runway and then the Westchester Fifth Runway was the "favored" alternative of LAWA or certain elected officials. Each was met with overwhelming opposition when presented to the community most impacted. That representatives of each community would sue to prevent an additional runway on their side of the airport was unquestionable.

Largely as a result of this opposition, LAWA retreated to a position of including the two five-runway schemes in the environmental documents circulated for comment, but the alternative that would add no new runways became the agency's officially "preferred" alternative.

The Westchester Vitalization Corporation calls upon LAWA to abandon any alternative based on the addition of a fifth runway. The five runway scenarios are just as unrealistic, unapprovable and unbuildable as were the six-runway, Hawthorne Airport or runway-in-the-Bay alternatives. As a result, it is our position that the five-runway scenarios do not constitute a true alternative for NEPA / CEQA purposes, and that the environmental documents now in circulation are legally insufficient for lack of consideration of true alternatives.

**LAWA MUST RESCOPE, STUDY AND RECIRCULATE FOR COMMENT NEW ENVIRONMENTAL DOCUMENTS WHICH CONSIDER ONLY VARIATIONS OF A FOUR-RUNWAY CONFIGURATION.**

As stated above, the Westchester Vitalization Corporation was founded by Mayor Bradley more than 20 years ago to seek solutions to the negative impacts of LAX expansion. As such, we have seen the homes of thousands of residents torn down for the benefit of LAX, and we have seen the resulting devastation to our business community.

In addition, we have seen that LAWA's statements regarding the "capacity" of any particular airport configurations are worthy of zero credibility. The current airport arrangement was said to be able to handle 40 million annual passengers, but at this time nearly 70 million annual passengers use the facility. General statements of intent by LAWA officials are worthless. Consideration can only be given to mitigation measures that are completely funded, explicitly required, specifically scheduled and that are legal prerequisites for subsequent projects.

The following points are noted as both deficiencies in the Master Plan and Draft EIR / EIS, as well as starting points for consideration of various four-runway configurations.

- (1) Safety must be the primary concern. Recent articles in the media indicate that LAX leads the nation in near-misses. The Master Plan does not include a complete air traffic study for all of Southern California air space, and this must be done. LAWA must demonstrate that it can handle increased air traffic safely both while planes are in the air and on the ground. Spreading air traffic to other airports to increase margins of error may turn out to be the most persuasive reason to seek a regional solution.
- (2) None of the final alternatives in the Master Plan consider options other than construction of terminals west of the Tom Bradley International Terminal. Other options that were not carried into the final study included terminals east of Sepulveda Boulevard. When LAWA is required to

consider only four-runway configurations, then it will be quite obvious that terminals east of the existing terminals is the logical alternative to building an entire new airport adjacent to the Coastal Dunes. The negative impacts of 50 million people per year driving past an environmentally sensitive zone are numerous, and will undoubtedly be commented upon by groups specializing in this important topic. Damage to endangered species and traffic gridlock on roads serving public beaches come immediately to mind.

- (3) None of the final alternatives in the Master Plan consider options other than construction of a massive, intrusive ring road through the Westchester / Playa del Rey community. It is access to this road that causes further devastation to the Westchester business district on Sepulveda Boulevard. The Westchester Vitalization Corporation stood as a lonely advocate for Westchester businesses for years and years. Now, with the first signs of commercial life being seen on Sepulveda, LAWA must consider every feasible alternative to a new round of negative impacts.
- (4) None of the final alternatives in the Master Plan consider options other than extending the in-board northern runway over Sepulveda Boulevard, and building a second tunnel. This tunnel will cut off access to a number of Westchester businesses and negatively impact an entire community. It will result in increased automobile speed through a neighborhood shopping district, and it will create additional massive structures where human scale buildings have been the norm since before the north runways were built. The second tunnel is being proposed despite the fact that the Master Plan itself reveals it to be unnecessary. At pages IV-1.3 and IV-3.36 it is stated that only one runway of 12,000 feet is necessary to handle the relatively unusual situation of a fully loaded 747 taking off in foul weather. There is already a 12,000-foot runway on the south airfield. An obvious alternative to the negative impact of a second tunnel is to have all fully loaded 747's taking off in foul weather use the south airfield.
- (5) None of the final alternatives in the Master Plan consider options that would take mass transit to the existing Central Terminal as the very first step in a program to improve ground access. Apparently, LAWA views gridlock like the weather: something to complain about, but as to which nothing can be done. The Westchester Vitalization Corporation begs to disagree. Community-generated plans have been discussed that would place a world-class intermodal transfer station at the corner of Imperial Highway and Aviation Boulevard which would conveniently connect the Green Line light rail to an Automated People Mover which would run roughly along Aviation and Century Boulevards to the Central Terminal. This system could be financed strictly with LAWA revenues and run on LAWA property. It would be flexible such that it could be modified at a later time to service new terminals either west or east of the existing terminals, should such terminals ever be built. Alternatives that begin, not conclude with connecting the regional transit system to the Central Terminals other than by use of automobiles must be studied and presented.
- (6) The Master Plan calls for the northernmost runway to be moved approximately 350 feet further north towards Westchester homes. This would have an extremely negative impact on thousands of Westchester residents. The Master Plan does not adequately consider alternatives to this move, and does not demonstrate that the same result cannot be achieved through other means that would have less negative impact on residents and businesses.

Far more examples than just these could be cited, but these stand as some of the most obvious failings of the Master Plan. As Mayor Hahn stated in his campaign, the Master Plan must be "scrapped." A regional

solution to air traffic must be embraced. Safety must be extensively studied. The mass transit system must be taken to the Central Terminals. Only after these things have been accomplished (not just promised) can LAWA staff be permitted to further changes on LAX property, and then the alternatives studied must be limited to four-runway configurations.

LAWA MUST INCLUDE ITS INTENTIONS FOR THE "NORTHSIDE / SOUTHSIDE" IN ITS ENVIRONMENTAL DOCUMENTS AND MASTER PLAN.

Just as the Westchester Vitalization Corporation has witnessed the damage to the Westchester residential and business community caused by LAX expansion for 20 years, so also it has followed LAWA twisting in the wind with its plan for the property owned by LAWA adjacent to Westchester Parkway that was once referred to as the "Northside" and now the "Southside."

LAWA administration has vacillated between favoring intense development, low-density development or deeding the entire property to the City and "getting rid" of it. While LAWA officials will not admit it, the Southside has always been a step-child to the larger airport mission of moving passengers and freight.

The Westchester Vitalization Corporation has been lead to believe that LAWA is once again planning a grand scheme for the Southside that the community will "love." Once again, this planning is being done from behind blackout curtains with the community having no input. Soon a new genie will pop out of the Southside bottle. Airport planners will proudly proclaim it to be wonderful for the community until local residents point out innumerable problems which LAWA did not think of. (Consider the current state of the linear part running from Vista del Mar to Pershing Avenue!)

LAWA staff might be invited to consider other major, privately built developments in the area that begin with meetings with community members and design charettes and workshops so that the local communities' superior local knowledge becomes a benefit and not a burden in the process.

#### CONCLUSION

For the reasons stated above, the Westchester Vitalization Corporation declares its opposition to the Master Plan and Draft EIR / EIS. It urges Mayor Hahn and the Board of Airport Commissioners to cease any efforts to secure its approval, and to begin the active pursuit of a regional solution giving high importance to safety, mass transit and the use of all the region's airports to absorb air traffic growth.

Sincerely,

  
Mary Lou Crockett  
President, Board of Directors

"see attached"

**Los Angeles World Airports  
November 8, 2001**

**Good evening Ladies and Gentlemen,**

**My name is Charles White, Councilman, City of Moreno Valley and Vice-Chairman of the March Joint Powers Authority.**

**The March Joint Powers Authority jurisdictions consists of the County of Riverside, and the cities of Perris, Riverside and Moreno Valley.**

**In March, 1997 the USAF & the March Joint Powers Authority signed a Joint Use Airport Agreement. Our cargo airport is now open and ready to accept cargo aircraft flights.**

**The reason for my being here this evening is to recommend that any expansion of LAX be postponed until such time as Inland regional airports are used to their fullest extent, particularly March Inland Cargo Port because it is a viable alternative to LAX expansion:**

- **We have the longest runway in California (13,000 feet) with clear airspace and no flight restrictions.**
- **We are installing a new instrument landing system that will allow aircraft to land in all weather conditions.**
- **We are a joint use airport. Our runway, air traffic control, fire fighting and rescue are maintained by the Air Force.**
- **We are adjacent to I215 and we are constructing an interchange leading directly into the airport.**
- **We have an adjacent railway and several thousand acres for development of air cargo, distribution or manufacturing buildings.**
- **We have a local population and employment base of approximately 500,000.**

- **There are several hundred trucks that pass by our airport every day on their way across our region to make deliveries to LAX. By using March Inland Cargo Airport, traffic and air pollution could be dramatically reduced in addition to providing much needed local employment.**

**In the opinion of the March Joint Powers Authority, the environmental document being provided for the expansion of LAX cannot be considered adequate until there is a complete review and discussion of the regional airport approach.**

**We therefore add our voice to the many other voices of the Inland Empire that believe it is time to think on a regional airport basis rather than on a one airport basis for the benefit of one locale.**

**In closing, the March Joint Powers Authority urges that the expansion of LAX be rethought; that the EIR/EIS be rewritten to address a regional airport approach and that consideration be given to sending air cargo carriers to March Inland Cargo Port.**

**On behalf of the March Joint Powers Authority I thank you for allowing me to make this presentation and wish you all happy holidays.**

**Charles R. White, Vice-Chairman**

**March Joint Powers Authority**

## Calkin, Kelly

---

**From:** Greenstein, Sami  
**Sent:** Monday, July 16, 2001 10:40 AM  
**To:** Calkin, Kelly; Koehler, Joshua; Lu, Sunny  
**Subject:** LAX Letters

Just wanted to let you know there were quite a few errors on the data entry - which is **TOTALLY TOTALLY** fine considering it was everyone's first project. But since the errors were consistent, I wanted to let you know what they were so they can be corrected.

1. If a person has an initial for a first name.

First, check and see if there is someone else with that initial and last name already entered in db with same address. It is safe to assume it is the same person. i.e. we can assume that D. Grandpre and Doug Grandpre at the same address are the same person and go from there.

Otherwise, in the "Salutation 1" field on the People record screen (gray screen where all info is entered) put "Friend" so the letter will say Dear Friend, instead of Dear L or whatever.

Also along those lines, names like McWwhatever, need to be capitalized on the third letter.

2. A lot of incomplete addresses - no state, no city.

After entering street address, you should go to the zip code field and enter that. Then proceed to the ? button on the right, which will cause the complete address to pop up. If it is red you know there is an error, either a typo or something. If it is green, the address is correct, hit accept and the blanks will fill in themselves. This prevents spelling errors and ensures all the blanks are completed.

Otherwise, they were great and the corrections are all going out today - so thanks again. These are easy to correct and if you have any questions, please give me a call.

Attn: Mr. Jim Ritchie

Deputy Executive Director

Los Angeles World Airports

LAX Master Plan / Room 218

P.O. Box 92216

Los Angeles, CA 90009-2216

November 9, 2001

Dear Jim Ritchie,

As longtime residents of Westchester, all of our families have put their hearts and souls into making this community comfortable to live in. With each one of the airport additions, we have tried to work them into our lives. But now, it seems like it is all going to be taken away from us, if the proposed expansion takes place. The future of Westchester and El Segundo and other heavily populated communities around us, all hang in the balance. Is there no end to it ?

Since the events of September 11<sup>th</sup>, we are even more concerned than ever. In the event of an attack on LAX, especially if there is added expansion or more air traffic, it could cost us and our nation, loss of life, even beyond that of the Twin Towers disaster in New York. Too large of an airport, with all the surrounding communities, makes us a 'sitting duck' for a terrorist attack.

If any of us were able to survive, it would become almost impossible to start all over again. Many of us here, have been dedicated to helping each other for more than 50 years now. In recent years, we have been attracting numerous younger families with their children, who are also delighted with the sense of an untroubled community, as well. They are looking forward to a comfortable place to live and grow.

It seems like the wise thing to do, would be to follow the example of several other major airports in the United States that have limited their sizes or relocated their sites. Denver, Chicago and New York, all had similar problems, and they finally moved their major facilities about 20-30 miles outside of the city limits.

The ideal spot for a major Los Angeles airport for the city, could be in Palmdale, just to the north of us, which already has good runways. It will probably never out-grow itself there. It ought to be more convenient for dispersing cargo shipments too. A short rail system could be set up to transport people, through or over the mountains, where a central receiving station could be located on the city side to disperse passengers to all parts of the Los Angeles basin. Then so many passengers wouldn't have to drive so far to get to LAX.

The Los Angeles basin has enough other airports in other outlying areas of southern California that should help to

## **PUBLIC COMMENTS**

Dear Jim:

I am a retired commercial airline pilot and also an experienced real estate consultant and believe that I could help you create a plan for a partial expansion of LAX that would be far less disruptive and costly than your alternative plan. While some air traffic should be routed to other regional airports, particularly Long Beach Airport (which I am aware you have no control over), there still needs to be a small expansion of LAX to handle more capacity. As a homeowner in the area who will be impacted by any expansion, I propose the following ideas:

1. Create an Arbor Vitae exit/entry in both directions off the 405 Freeway, however do not build a new freeway route to the proposed west terminal. Instead, widen Arbor Vitae and the Westchester Parkway from the 405 Freeway right through Westchester into the new west terminal. If necessary, build an upper roadway along this route with car pool and bus lanes. Do not destroy any businesses or take any substantial amounts of land in Westchester to accomplish this.
2. Definitely bring the light rail line into LAX and install a station where needed.
3. Extend runways 24 Left and 24 Right westward into the sand dunes across Pershing Drive. Flatten the sand dunes where necessary. Tunnel Pershing Drive underneath the extended runways. Do not extend these runways eastward.
4. Build the new west terminal and parking as proposed with people mover between terminals.

PC03533

Mr. Jim Ritchie  
Page Two  
July 15, 2001

I believe my ideas could be supported by the Westchester and Playa del Rey communities since it would only be a partial disruption with fewer adverse impacts and it would add some additional capacity into LAX. I have extensive education into land use and studied this area while a graduate student at USC's Lusk Center for Real Estate Development. I have enclosed my resume and would be pleased to assist your team in developing these ideas as either an outside consultant or as an employed member of your staff.

Look forward to talking with you soon.

Sincerely,

A handwritten signature in black ink, appearing to read "A. I. Salmonson". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

***CAREER SUMMARY***

Extensive experience in commercial property leasing and asset management. Successfully closed 270 lease transactions ranging from 500 to 140,000 square feet. Team player with excellent negotiation, communication, people management and decision making skills. Negotiated telecommunication license agreements, resurrected troubled office buildings, planned and directed project marketing and leasing programs, negotiated leases, supervised leasing agents, tenant prospecting, tenant construction, renovation programs, contracted with vendors, conducted marketing research, project feasibility studies, financial reporting, financial analysis and project management.

***REAL ESTATE EXPERIENCE 1984 - 2001***

**WIRED ENVIRONMENTS**, Los Angeles, California. Western Real Estate Manager. Responsible for negotiating and securing telecommunication license agreements to install fiber-optic T-1 lines in office projects in the western United States. Company is a national Internet service provider and Internet technology company. Secured license agreements in 23 Los Angeles Wilshire Boulevard office buildings totaling 5,500,000 square feet

**TOTAL COMPANIES**, Los Angeles, California. Vice President of Leasing for Central Plaza and Metroplex Wilshire office projects. Repositioned non-performing projects to attract tenants with heavy telecommunication needs to utilize projects various fiber optic telecommunications carriers. Prospected for tenants and negotiated leases for five Class A high rise office buildings totaling 1,200,000 square feet in the Wilshire Center district that include 100,000 square feet of retail space.

**HUNT PACIFIC MANAGEMENT**, Downey, California. Leasing Manager for the Bank of America Building. Improved performance of a non-performing office building producing negative cash flow. Redefined the target market, prospected for tenants, negotiated leases and increased rental rates while reducing tenant acquisition expenses. Oversaw tenant construction and trained property manager in office leasing and tenant renewal procedures. Reduced vacancy from 50% to less than 10% within 24 months creating positive cash flow.

**E & S RING MANAGEMENT**, Irvine, California. Vice President of Leasing for the Airport Plaza at Skypark. Resurrected failed REO office complex for new ownership. Created and executed the marketing and leasing program while training new management personnel in property management duties. Developed project renovation plan and supervised tenant construction. Instituted new rental policy and reduced operating costs. Closed 41 office leases and reduced vacancy from 75% to under 10% in 12 months. In addition, performed business development activities and secured numerous third party fee management contracts from major financial institutions on large residential income properties.

## ARTHUR I. SALMONSON

**TAISEI AMERICA**, Long Beach, California. Director of Leasing for Shoreline Square. Planned and directed the marketing program for a 1988, 21 story, 400,000 square foot Class A office project with low occupancy in an overbuilt market by emphasizing out-of-town prospecting, international marketing and skillful lease negotiation. Reduced vacancy rate from 90% to 40% primarily by importing tenants into Long Beach. Executed twelve leases and increased gross income near break even point after sixteen months. Supervised tenant contractors, conducted marketing research, prepared budgets and operating expense reports.

**MANULIFE REAL ESTATE**, Los Angeles, California. Leasing Manager for four office projects totaling 1,380,000 square feet. Directed the pre-leasing efforts for a recently completed 35-story, 700,000 square foot building at 865 South Figueroa Street. Developed the project proforma and supervised leasing agents. Managed marketing research, tenant prospecting and lease negotiation activities. Supervised tenant construction, space planning and developed the project renovation program for 9171 Wilshire Boulevard while reducing vacancy from 50% to 5% in 1987. Prepared financial reports, yield analysis, operating budgets, income property appraisals and financial analysis on acquisitions and dispositions.

**11601 WILSHIRE ASSOCIATES**, Los Angeles, California. Director of Leasing for the World Savings Center, a 25-story, 480,000 square foot, Class A West Los Angeles office building developed by Realtech Development and Olympia & York. Preleased the building during construction. Instituted national tenant prospecting campaign and directly solicited major professional service firms from coast to coast as well as insuring broker cooperation. Conducted project presentations and negotiated leases. Secured the tenancy of IBM by creating a consolidation plan for six divisions which resulted in a 140,000 square foot lease.

### *EDUCATION*

**Master of Business Administration, 1984**

**Master of Science in Business Administration, 1985**

University of Southern California. Marshall School of Business

3.74 GPA. Major in real estate finance, investment analysis and entrepreneurship.

**Master of Real Estate Development, 1988 (Completed 75%)**

University of Southern California. Lusk Center for Real Estate Development.

### *ADDITIONAL INFORMATION*

Licensed California Real Estate Broker. UCLA Certificate in Real Estate Finance. Member of U.S.C. Real Estate Alumni Association and Los Angeles Commercial Realty Association. Beta Gamma Sigma - gold key for 3.74 GPA. Proficient in Excel, Lotus 123, Word and Wordperfect. Former commercial airline pilot with Captain ratings on the Boeing 737 and Cessna Citation jets.

PC03534

October 16, 2001

Mayor James Hahn  
City of Los Angeles  
200 North Spring Street  
Los Angeles, CA 90012

We are writing to express our extreme displeasure at the recent action by the City of Los Angeles and the Los Angeles World Airport's (LAWA) Commissioners.

We are outraged the City's officials and the Los Angeles World Airport's (LAWA) Commissioners have decided to put an abrupt halt to the Manchester Square Property Acquisition/Relocation program. We own property in the Manchester Square area of Los Angeles. We were participating in the Los Angeles World Airport's Property Acquisition/Relocation program. The consequence of their decision has had a devastating effect on the property owners of this neighborhood.

Never have we experienced such blatant disregard by a government official's decision. Never have we been so severely and ruthlessly affected by such a decision. As a result of that edict, the property owners of the Manchester Square have been left with empty, vacant lots spread throughout the neighborhood negatively affecting property values. Adding insult to injury our tenants indicated they felt uncomfortable with the vacant lots and have relocated to another neighborhood. We are left with an unoccupied house with little prospect of finding suitable tenants. We are incensed that elected officials of the City of Los Angeles along with the LAWA Commission appointees felt our community so unimportant.

The LAWA offered to purchase property from homeowners in this community, and in good faith, the homeowners agreed to sell. What has happened to the integrity of government? Since when is a city allowed to invade a community, knock down houses then abruptly walk away without a word, leaving the remaining neighborhood in such a condition? This scenario is reminiscent of a third world country's government.

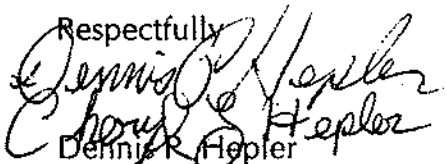

We as citizens of the United States have a responsibility to set a higher standard for other governments around the world. We realize the consequence of the World Trade Center has had a devastating effect on our Country. It has been a tremendous burden for all citizens of the United States and around the world. The results will be felt for years to come. It is important that our local government not contribute to an already appalling situation.

We believe that an effort by the City of Los Angeles and LAWA to honor the City's existing commitment to the community would be preferable to the current

PC03535

atmosphere of discontent and mistrust. We implore the City of Los Angeles and the Los Angeles World Airports to reconsider their position and reinstate the Acquisition Relocation Program. The only acceptable solution to this terrible situation is to resume immediately the LAWA Acquisition/Relocation Program.

Respectfully

RE: LAX - Master Plan.

Mayor Hahn and Airport officials started recently stressing Airport Safety & Security. Unfortunately, these considerations are pertaining mainly to Air Passengers and not to the hundreds of thousands of people living in the vicinity of the Airport.

LAX is surrounded by several highly vulnerable targets: over a dozen of schools, including four High Schools, Loyola University, Playa Vista Development, Major Chevron Refinery in El Segundo, Los Angeles Water Works, Inglewood Forum and many others. Billions of Dollars in Investments, plus life of people in densely populated Areas.

A plane can depart from its path not only because of a terrorist act, but because of human error, mechanical defect, weather, earthquake and other causes. Most reasonable people can see that this is not a place for a Major Airport; there is too much at stake around. However, since we are stuck with it, we must make the best from a bad deal.

One of the best ways of improving safety is to lengthen the distances between landing and taking off planes. Congestion in the Air causes accidents. Putting a fictitious cap upon the number of passengers, will do little good, unless alternative facilities, somewhere else are provided. Otherwise planes will still be coming if there is nowhere else to go.

Now is an excellent time to promptly develop and market Ontario, Palmdale and El Toro. Balanced uniformly distributed air traffic will automatically increase safety out and around LAX

sincerely Andrew F. Stefanski

Mr. Andrew F. Stefanski

In light of the terrorist attack's, we need additional international airports. Ontario, Palmdale and El Toro need to be developed. I live near LAX and I am concerned with safety. Many of the problems associated with LAX will become much worse

- extreme traffic congestion
- high noise pollution

Attach additional sheets if necessary.

- Air pollution

**NO LAX EXPANSION**  
PC03537

July 31, 2001

Dear Mr. David Kessler,

Mayer Jim Hahn seems fair in requesting additional hearings regarding LAX airport expansion. But the locations chosen are close enough to enjoy a short drive to the airport and not be hurt by the foul air from traffic and airplanes. San Pedro, downtown Los Angeles and Monterey Park do not put up with gridlock on 405 near the LAX airport. Neighboring communities do not have soot on their homes, trees or in their lungs.

The impact of expansion at LAX airport will be borne by those already affected.

Let's have regional airports so all people need to travel less to catch a flight.

Sincerely,  
Mrs. Charles Heath

PC03538

RECEIVED

NOV 13 2001

November 8, 2001

Mr. David B. Kessler, AICP  
U.S. Dept. of Transportation, FAA

Dear Sir,

In light of heightened security concerns for LAX after Sept. 11th's events, I support a combination of Mayor Hahn's Alternative 5 Proposal & a regional airport expansion plan for the LAX Master Plan.

The features I support in Mayor Hahn's ~~Prop~~ Proposal include:

1. Caping LAX at 78 million annual passengers
2. No ring road
3. No Western Terminal
4. Removing parking lots in the Central Termi<sup>(CTA)</sup> area.
5. Constructing a new "check-in" bldg. with parking east of CTA
6. Moving runways further apart

I do NOT support the extension of the No. runway over Sepulveda Blvd., causing the loss of some Neilson Park homes and partial loss of Westchester's Central Business district.

Secondly, <sup>since</sup> the population is growing faster near proposed regional airports (Ontario, Palmdale, Orange Cty., etc.) than near LAX (according to U.S. Census Bureau & So CA Assoc. of Governments data), it would be very sensible to have airports in these areas absorb some of the expansion proposed for LAX.

Please do your best when discussing the  
Alternative 5 Proposal & the LAX Master Plan to  
delete expansion of the No. Runway over  
Sepulveda and to promote a plan of regional  
expansion instead of a mammoth LAX expansion.

As a homeowner and voter here in  
Westchester, I want our community  
not to be spoiled with additional  
traffic and noise & air pollution  
resulting from an unwise  
LAX expansion.

Thank you for your help.

Sincerely yours,  
Jeanine K. Sheehan  
7948 Agnew Ave.  
L.A. CA 90045

# DISTRICT OFFICE

AUG 22 2001

## COUNCIL DISTRICT 6

LAX face-lift or beautification project started in summer of Democratic National Convention. The face-lift or beautification still \$12 million was spent which included 15 pylons and 3 40ft. tall letter

Since last 6-8 months, no week is passed without news about \$12 billion expansion master plan or LAX safety or LAX conq

\$82 million budgeted for developing and promoting LA against which 60 million already spent. \$65 million spent on LA contains 12000 pages and took 5 years in making. \$12 million spent on public relations, etc. \$315 million spent for sound proofing in the area. \$70,000 plus spent on ads announcing the hearings in newspaper expansion plan.

\$485,000 study, conducted by NASA as part of a continuing miss (crashes) at LAX. \$5 million spent since 1999 to install more taxiways and runways and distributed posters showing problem spots

LAX was built to accommodate 40 million annual passenger passengers traveled in 2000 and in 2001 it will be more. Studio demand at LAX will reach 92-98 M.A.P. by 2015.

Against above facts and figures, one should ponder how many computer systems which operates and controls entrance and exit computer system is 20 years old and totally worn out resulting Exit booths are in depleted condition, Due to frequent faulty performance system, lanes are closed, customers' problems arise and employees rude behavior. No proper communication from exit area to office capacity, employees are over burdened and customers are frustrated space and cannot make fast airport exit. Planes jam taxiways and to terminals and parking lots.

Is there any plan for immediate implementation to re customers/employees will have to wait till 2015 when so called completed or the present entrance/exit system of cars will

1. I have been a resident of Playa del Rey and Westchester for 34 yrs.
2. I have already lost one house to the airport and do not intend to lose another.
3. I feel the airport has lied to us the entire time I have lived in the area.
4. My perception is that this entire plan is fueled by GREED with absolutely no regard for people of this neighborhood or the environment
5. If the commissioners are so damned smart they should know that you cant put 5 lbs into a 3lb bag.
6. And finally, my sympathy goes out to the families of those who are going to lose their lives if this insane plan succeeds.

NOW IS THE TIME for all good men and women to come to the aid of their country, their cities and their airports. More than ever, we must look at a Regional Airports solution for our growing air transportation.

The devastating terrorists strikes illustrate the wisdom of not putting all our eggs in one basket. . . borrow an old cliché. To funnel the major portion of air travel through LAX is not only foolhardy, but tempting to terrorists.

The environmental impact of an expanded LAX upon our city may now be overshadowed by the need to downsize for the safety of all of Southern California. The recent terrorists attack should be an ultimatum for the FAA to refocus upon a regional airport master plan.

Attach additional sheets if necessary.

Re. LAX Master Plan Views

David Kessler, AICP, US DOT, FAA, AWP-611.2: P.O. Box 92007, Los Angeles, CA 90009-2007

6 November 2001

Dear Mr. Kessler:

The following correspondence re. Sepulveda Blvd. Expansion has some key points about LAX expansion and problem alleviation as well (**Shown in bold**). Please factor them into your plans.

From: Hobart, Jack Sent: Tuesday, November 06, 2001 12:09 AM  
To: 'mbonin@council.lacity.org'  
Subject: KEY ARGUMENTS AGAINST SEPULVEDA EXPANSION

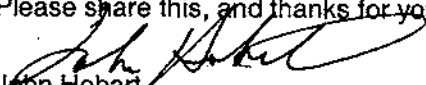

Dear Mr. Bonin (and Councilwoman Galanter).

I heard the good response to the 1985-based DOT plan for Sepulveda expansion in Westchester last week. Here are some key arguments that I didn't hear, plus several others. Please bring them up in the Council meeting this week.

- (1) Expanding from 3 to 4 lanes each way will actually create gridlock. The current 3 lanes works well without left turn lights. All 4 lane roads use left turn lights exclusively, lowering the amount of green light time in both directions a lot. **THIS IS KEY!**
- (2) The Sepulveda tunnel currently chokes traffic to 3 lanes each way. Four lanes can only serve to bring more traffic to the airport, not let more traffic go thru on Sepulveda. There is a better way to get traffic to the airport (see the following)
- (3) **The 405 and 105 freeways already meet nearby, Sepulveda doesn't connect them as DOT stated. Have the US DOT alleviate the problems by extending the 105 to dump off traffic near Pershing for entering the terminal from the west (no local access to mess up Manchester, etc.). Have them add a northbound lane at the bottleneck near La Tijera.**
- (4) **If LA DOT wants to expand a street, the one that would help Sepulveda is actually widening La Cienega Blvd between the 405 and 10, the Santa Monica Freeway. This would relieve the need to increase Sepulveda traffic and would impact far fewer residents, plus helping alleviate traffic for 10 times more people.**
- (5) **Insist that dedicated cargo aircraft traffic be moved to the outlying airports near the shippers, mainly Ontario, Long Beach, Orange County and Burbank.**
- (7) **Recommend that the government mandate that any county with an international airport carry approximately its own air traffic, not send it to another county (Orange County vs. LA County).**
- (8) **Currently, most busses and HOV's going to and from the airport are nearly empty. LA DOT is also sending busses by my side street in Westchester, even up to midnite on weekends, with 1 or 2 occupants, except when schools let out. No private business not spending our lavish sales tax dollars could ever run a business this way.**

**I live north of LAX and work just south of LAX. I wish the sidewalks were 3 feet wider so that I could travel Sepulveda to work. I wouldn't dream of sharing a high speed traffic lane with HOV's, busses, cabs and limos, even to go to a decimated Westchester shopping center. Has DOT even looked at the current race track of HOV's and cabs vying to beat each other to the Airport on side streets now? As the old adage says, Would they send their daughters on bicycles down Sepulveda? Let them cast the first stone (or bury their first heir).**

Please share this, and thanks for your attention.

LAX Master Plan  
Los Angeles World Airport - Room 218  
Attention: Jim Ritchie  
P. O. Box 92216  
Los Angeles, CA 90009-2216

REFERENCE: LAX Draft Master Plan and Draft EIS/EIR

The following comments are submitted to be included in the public record of the captioned proposals.

Although Alternative 5 is too nebulous to be seriously considered as a viable plan, the proposed extension of the North Runway is specifically unacceptable. This would make an entire residential neighborhood uninhabitable, and wipe out half of the shopping district of Westchester.

Now is the time to delete the referenced Los Angeles World Airports plan and all its options: Alternative A, B, C, 5 and No Action/No Project. LAWA needs to present a completely new plan that deals effectively and humanely with the realities of the 21<sup>st</sup> century.

PC03543

TO DAVID KESSLER

I have lived here in Westchester  
1951. I have seen L.A. LAX expand  
Each time many homes have been removed, the  
land has not been used to solve the main  
problem. The main problem as I see it is that  
the design of LAX is bad creating a total  
bottle neck. You can't solve a problem by adding  
to the bottle neck. buying land and not using  
it to the best advantage.

Why not totally rebuild the layout of  
L.A. LAX. You can do this without destroy-  
ing a neighborhood

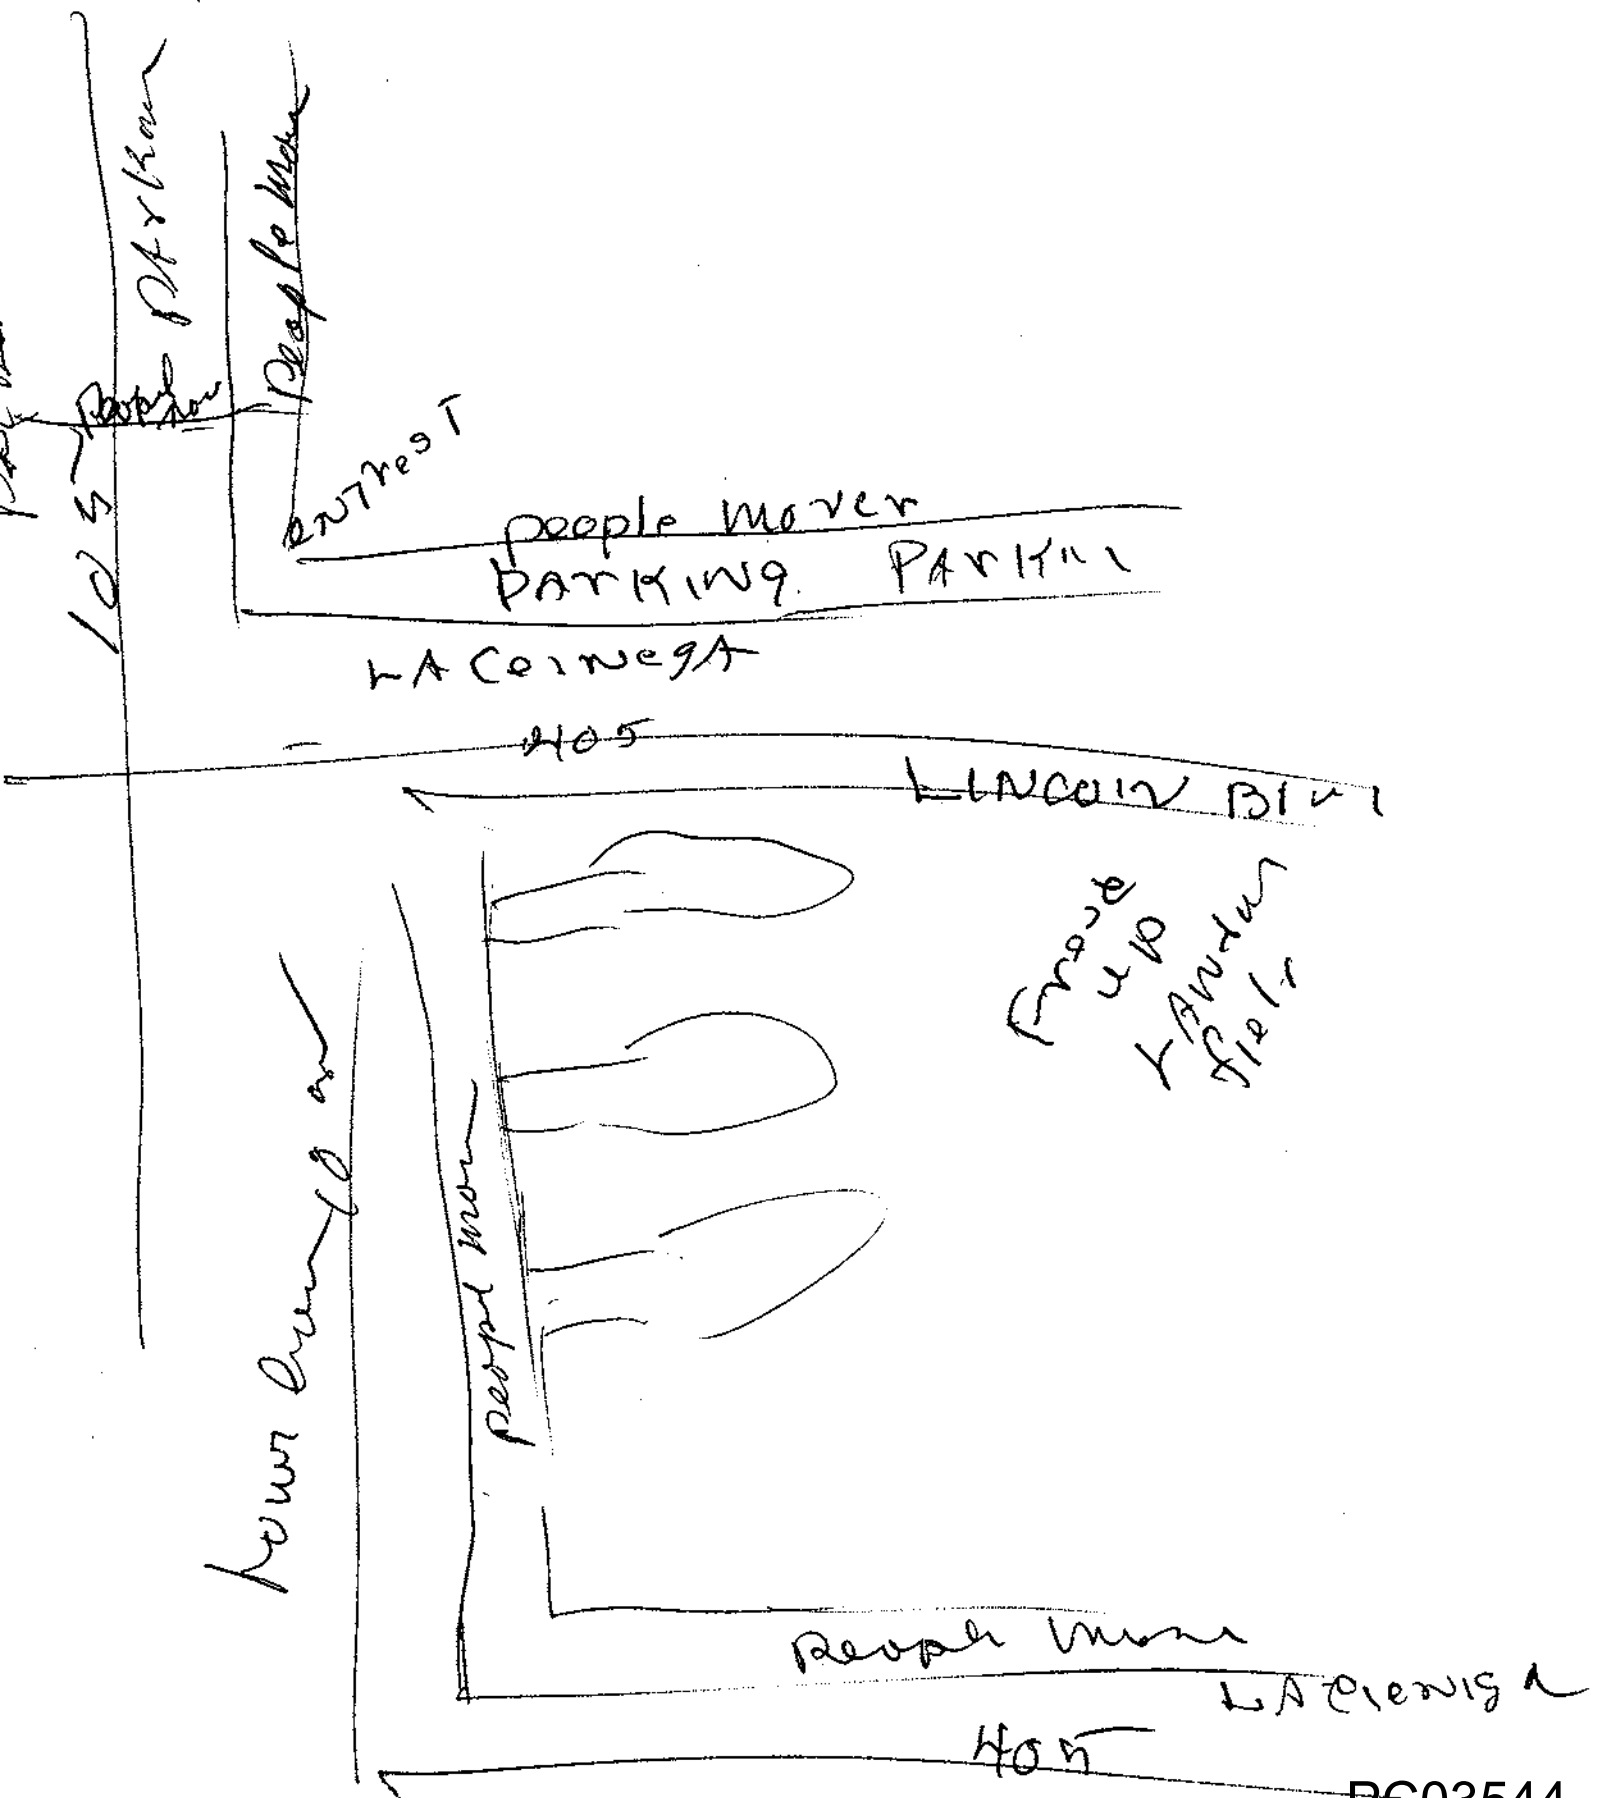

My suggestion is to use LA Clearex Blvd  
I could be the main street a better choice  
is to widen it and extend it north.

By putting the main entrance on the  
southeast corner between 105 and 405  
or LA Clearex widened, you could have the  
entrance over people moving something  
like Las Vegas. Parking could be here  
also with connection to main entrance  
cars could come off freeways by

the many existing exit & entrance  
This would take traffic totally out  
of this neighborhood, creating also  
a direct route to entrance & leaving room

for more LANDING SPACE. Also There (2)  
would NOT need to change other STREETS  
IT would be something like this

Mr.David Kessler US. Dept. of Transportation

Sir:

As A long time resident of the ANtelope Valley and a Retired Postal Police officer That worked at Los ANgeles International Airport area durings its growth period from the 1970sthru 1980s. I always maintained that LaX. would do everything in its power to insure that no other decent sized airport be allowed to compete , simple as that.

I moved to Antelope Valley in 1978 and com<sup>m</sup>uted to work at World Way Postal Center for years before the big Boom. I was told by someone that was in the know up here that we would never see a decent sized Airport up here for another (30) thirty yaers, and He was correct. There is always some reason to delay and this has been going on for over thirty years. All we get is political wind every once in a while and then it dies down to the next time and the next excuse.

From a logical standpoint due to the Security problems that will always haunt air service at LAX. it would seem logical to move some passenger service up here since access to the Public is far superior than crowded LAX., Also maintaining better Security would not only be cheaper but more efficient! But like I said this is not governed by logic, its politics that controls the situation and money!

The Postal Service used to have a Mail Service from LAX. to Palmdale years ago with private planes. This was eliminated and then we had a Sectional Center built in MOjave to expidite Mail so our mail then began to come a day later, NOW thats real efficie ncy?

After After almost twenty four years of hearing all the stories and arguements PRO and CON, I get the feeling its the same old whoeey the public gets from its commisions and Politicians all over again, Its the same LAX. doesnt want to loes any money to outlying areas if it can help it, despite the logic of expanding outlying air ports.

The only way it seems that we will get some action up here is for the City of Palmdale to by the Airport and whatever surround- ing are belongs to L.A.W.A. and then there will be progress in this area any other way will bring the same old Hot air every so Often.

Thank You

Anthony Edward Mazza

Mr. Jim Ritchie  
City of Los Angeles  
Los Angeles World Airports  
Master Plan Update  
P.O. Box 92216  
Los Angeles, CA 90009-2216

REF: LAX MASTER PLAN AND DEIS/DEIR

Dear Mr. Kessler and Mr. Ritchie:

The North Westdale Neighborhood Association (NWN) is an Association that is made up of approximately 550 homes which are directly under the flight approach to Santa Monica Airport. Two schools in our community, Richland Elementary School and Daniel Webster Middle School, are also directly under the flight path.

The North Westdale Neighborhood Association's comments on the LAX Master Plan and Draft Environmental Impact Statement/Draft Environmental Impact Report follow:

- The LAX DEIS/DEIR is inadequate and should be withdrawn. A new regional air transportation master plan should be developed to include the 11 other southern California commercial airports along with LAX.
- Population and job growth in southern California is projected to occur primarily in areas distant from LAX. Airport capacity in those areas should be expanded to meet local needs. This would have the added benefit of reducing the traffic and air pollution created by travelers and freight from all over southern California using already congested surface transportation to get to LAX. This must be addressed in the Final EIS/EIR.
- The Master Plan and Final EIS/EIR must look at the combined effects of LAX expansion and development of the Playa Vista project.
- The LAX Master Plan is not consistent with the regional transportation plan developed by the Southern California Association of Governments (SCAG).
- The Final EIS/EIR must thoroughly study and address the effects of jet fumes (non-combusted and combusted) on the health of the people who are exposed to jet exhaust.
- The Final EIS/EIR must thoroughly address the effects of jet exhaust on the environment.

PC03547

- Reliever Airports must be addressed in the LAX Master Plan. Comprehensive studies must be done on current air quality, noise levels, and safety in the communities and schools surrounding the reliever airports. Projections of the effects of implementation of the LAX Master Plan must be made to address the effects on these communities and schools. Mitigation measures must be proposed for negative impacts on these areas.

NWNA requests that the Final LAX EIS/EIR look at the impact that Richland Elementary School and Daniel Webster Middle School would be exposed to in regards to safety, air pollution and noise pollution.

The NWNA also requests that adequate noise monitors be installed to more accurately compile data in order to give a true picture of the noise impact on the schools and homes in our community.

- The four future LAX improvement concept plans (including the "No Project" alternative) currently being considered do not include the development and enhancement of general aviation Fixed Base Operator (FBO) Facilities at LAX. If Fixed Base Operator Facilities are diminished in the LAX Master Plan, SMO will experience an increase in corporate jet aircraft activity creating additional noise and pollution adversely affecting the neighbors living in West Los Angeles and Santa Monica. Corporate and business aircraft operators frustrated by the lack of facilities at LAX will search out alternative airports such as Santa Monica, Hawthorne and Torrance. Santa Monica Airport currently bears an unwarranted burden of relocation jet traffic due to its proximity to downtown Los Angeles, Century City, and the West Side.

The LAX Master Plan needs to increase facilities and services for non-commercial small jets (private jets and business jets, including those under fractional ownership) and helicopters. We would like to see 3 fixed base operator facilities (FBO's) at LAX. Use of small jets is increasing at a dramatic rate. Without facilities at LAX to service these jets, they will be forced to use Santa Monica Airport and other surrounding airports.

The Los Angeles Department of Airports should include, maintain, and expand facilities for General Aviation aircraft (jets and helicopters) in addition to providing for expansion of full service Fixed Based Operator(s) in the LAX Master Plan. If that is not provided for, a full analysis must be made of the impact the exclusion of such facility enhancements would have on SMO and the surrounding general aviation airports and the surrounding communities, and appropriate mitigation measures recommended.

- LAX should not be allowed to grow beyond the capacity of its existing facility.
- Due to the recent events in New York and Washington, DC, we strongly recommend that all general aviation business and private jets (including those under fractional ownership) use LAX and other airports which have adequate security procedures in place.

- Another important advantage to developing a truly regional airport expansion plan is the decentralization of airport facilities. With several airports in the region, disruption of services due to a catastrophic event at one will not have as devastating an affect on air transportation to the region.
- What is the IFR (Instrument Flight Rules) Clearance Capacity at the Reliever Airports of Santa Monica Airport (SMO), Hawthorne Airport (HHR), Torrance Airport, and Long Beach Airport?
- A full and complete analysis must be made of the impact on Visual Flight Rules (VFR) and Instrument Flight Rules (IFR) of aircraft arrivals and departures at Santa Monica Airport (SMO) as a result of the projected increase in flight operations that occur in the course of the full build out of LAX and appropriate mitigation measures to negate negative impacts must be recommended.
- The residents who live in North Westdale and other areas surrounding Santa Monica Airport (SMO) believe that any increase in air traffic at LAX will lengthen delays of IFR and VFR operations at SMO due to an increase in air space congestion. These delays will adversely affect the residential areas of West Los Angeles and Santa Monica surrounding the airport by subjecting them to an inordinate amount of air and noise pollution, as aircraft await departure release.

Santa Monica Airport has already experienced a tremendous increase in IFR (instrument flight rules) departure delays as a direct result of the severely congested air space at LAX. These delays affect homes in WLA which are within one-half mile of the end of the runway on takeoffs. These residents and residents further to the east including the two previously mentioned schools are exposed to jet fumes on a daily basis. Some residents can not have their windows or doors open and can not even sit in their yards because of the noise and air pollution. These problems must be addressed in the Final EIS/EIR.

- The LAX Master Plan EIS/EIR analysis must fully explore the impact of developing El Toro Marine Corps Air Station in Orange County, and Point Magu Naval Air Station in Ventura County, into fully operational air-carrier airports capable of serving domestic and international flights. The EIS/EIR must also justify why developing these valuable airports should or should not occur and quantify the impacts accordingly.

The development of Point Magu and El Toro will reduce traffic congestion on Los Angeles freeways, reduce air pollution and noise impact in and around LAX, reduce air traffic and improve air safety within the LAX airspace, and provide improved and expanded air service to the people living in Ventura and Orange County. Enhanced air carrier service at these airports will also diminish the need to expand LAX by developing capacity at airports within the region to accommodate the projected future growth in passenger activity.

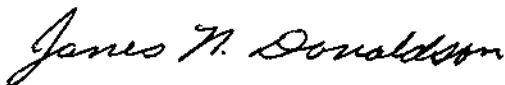

- Any expansion of LAX will negatively affect the quality of life in our community, either directly or indirectly. The 405, 105 and the 10 freeways are near capacity and additional traffic will force people off the freeways and onto the surface streets, thereby severely impacting the surrounding communities. It is because of this that we request that these concerns be addressed in the Final EIS/EIR.

We also request that various types of transportation be looked at, such as a Monorail or Green Line for people to use when arriving or departing LAX instead of driving by car.

- The LAX Master Plan does not include funding or assurances for funding for infrastructure improvements (freeways, surface streets, etc.) that are required to transport passengers and freight to and from the expanded airport. Funding for these projects is not guaranteed. No airport expansion construction should begin until infrastructure improvements are completed.

Thank you for this opportunity to comment on the LAX Master Plan and DEIS/DEIR.

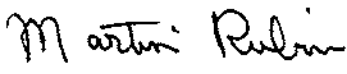

Sincerely,

James N. Donaldson, Vice President

RE: LAX Expansion of the North Runway Opposition

Dear Mr. Kessler,

I am opposed to extending the North Runway over Sepulveda Boulevard. I am not directly affected by the proposal, however, I do not now see the need to continue with this plan.

If 78 million is LAX's current maximum capacity, there is no need to alter the runway to accommodate more aircraft landings and takeoffs.

I grew up in Inglewood during the '50's and '60's, so I am aware of the attrition of housing and business in Westchester over the past 40 years. I have been living here in Westchester since 1974 and have seen housing removed during the late '70's to make way for a business/industrial complex between Sepulveda Westway and Emerson Avenue that never materialized.

The Westchester business district has been suffering an economic depression since the closing of J.C. Penney's in the '80s. Now that the area is finally being revitalized with a new Ralph's, Blockbuster, Petco and now a remodeled Trader Joe's and Sav-on's and a brand new Home Town Buffet, it would be another economic blow to take out some more businesses and doctor's offices.

If LAX cannot handle an increased passenger load, perhaps it is time to start expanding at John Wayne, Burbank and Ontario. People favor life going on, not being taken away.

Sincerely,

Mrs. Linda Murata

Subject: No Arbor Vitae Exit

Living in San Bernardino, I assume that you are not a native of this = area so I would like to provide a piece of history for your benefit. LAX = has been a part of our community for years. Each expansion removes = hundreds more homes and impacts thousands of lives. Our community is = already descimated by this overdevelopment but it is a condition that = exists--we will never turn back the clock and make our town "Mayberry." = Most of us accept that LAX is an important part of our community. We do = not oppose LAX, but it's time to spread the impact throughout Southern = California to the areas that need (and use) the service. =20

There was a time when the Arbor Vitae interchange activities was = practical and maybe even desirable to mitigate local traffic. That time = is LONG PAST. The LAX situation is in total flux and I would venture to = say that NO ONE can state with any assurance what is in store for = us--even Mayor Hahn or the LAWA Airport Commissioners. =20

The environmental (and social) impacts of concentrating the airport = activity is unprudent at best. A regional solution is essential! =20

WHO KNOWS HOW LAX WOULD LIKE TO DIVERT TRAFFIC UNDER ITS NEW "SAFETY" = THEME ... IT APPEARS, HOWEVER, IT WANTS TO DIVERT SIGNIFICANT AMOUNTS = THROUGH OUR COMMUNITY. WE NEED YOUR HELP TO PRECLUDE IT.

The big arguement in favor of this AV project was traffic mitigation of = the local streets in our area to justify LAX expansion. We are told = that LAX expansion plans are dead. The expansion master plan, however, = is still holding six hearings over the next two weeks! =20

Long ago it was recognized that our steets are overburdened. Make no = mistake--they still are! BUT the real constraint in the area is the San = Diego Freeway and this activity DOES NOTHING TO HELP IT! It only works = for future LAX expansion.

I am enclosing an analysis from the LAX North Side Development Project = Final EIR Report. This already approved project is above and beyond the = present Master Plan. =20

PC03549

The attached EIR pages cast doubt in my mind as to the degree of traffic = improvement (if any) on the San Diego Freeway that would be achieved by = this project. Table 15 shows no anticipated improvement north of = LaTijera where we presently endure almost constant bottlenecks. =20

The report also states "If the Arbor Vitae interchange is constructed, = future use of the I-405 would be slightly increased by both project = traffic and total traffic as noted in the table. In general, total = future traffic demands on this important north-south regional = transportation facility would be about 40 percent greater than existing = traffic volumes. This section of the San Diego Freeway is operating = presently in excess of design capacity during peak usage periods. The = future site volumes will add incrementally to congestion to the north = and south of this section but not in a significant manner..."

Thank you for your time and efforts. Feel free to call on me at any = time if I may be of assistance.

Sincerely,

Denny Schneider

LOS ANGELES INTERNATIONAL AIRPORT  
FINAL  
ENVIRONMENTAL IMPACT REPORT  
LAX NORTH SIDE DEVELOPMENT PROJECT

Prepared for:

City of Los Angeles  
Department of Airports

by

WILLIAMS-KUEBELBECK AND ASSOCIATES, INC.  
330 Washington Street Suite 710  
Marina Del Rey, California 90291

APRIL 1983

PC03549

TABLE 14

FUTURE PM PEAK HOUR VOLUME/CAPACITY COMPARISONS

INTERSECTION	FUTURE ICU/LOS VALUES(a)		% Increase In ICU Values (LADOT v. RC&A)
	RC&A Study	LADOT Study	
Lincoln/Manchester	1.29/F	1.62/F	+25.6%
Sepulveda/Manchester	1.03/F	1.29/F	+25.2
Sepulveda/LaTijera	1.19/F	1.33/F	+11.8
Sepulveda/Lincoln	1.42/F	1.39/F	- 2.1%

(a) Based upon future traffic condition with site traffic but without Arbor Vitae interchange

of service F in the future, with Lincoln/Manchester receiving the greatest impact according to the LADOT study. Principle contributors of additional traffic to that intersection would be the Playa Vista project and the Marina Del Rey expansion.

(8) San Diego Freeway Impacts

Displayed in Table 15 are the estimated existing and future design year site/total daily traffic demands for the San Diego Freeway (Interstate route 405) from north of La Tijera Boulevard to Imperial Highway. The existing average daily traffic volumes (ADT's) were estimated based upon traffic count data obtained from CalTrans. The design year daily traffic demands shown are for the projected traffic conditions with/without a new interchange on I-405 at Arbor Vitae Street.

TABLE 15

SAN DIEGO FREEWAY TRAFFIC DEMAND PROJECTIONS

I-405 LOCATION	AVERAGE DAILY TRAFFIC VOLUMES W/ AND W/O ARBOR VITAE I/C (a)			PERCENT OF SITE TO TOTAL FUTURE TRAFFIC DEMANDS
	EXISTING	FUTURE DESIGN YEAR (b)		
		Site	Total	
N/O La Tijera Interchange	183	12.0/12.0	295/295	4.1/4.1
Between La Tijera and Manchester	178	8.2/3.0	283/278	2.9/1.1
Between Manchester and Arbor Vitae	221	7.7/0	298/290	2.6/0.0
Between Arbor Vitae and Century	221	4.3/0	294/290	1.5/0.0
Between Century and Imperial	224	7.0/2.6	282/278	2.5/0.9

(a) All ADT's listed are in 1,000's of vehicles per day

(b) Future ADT's shown (000/000) are those projected with/without the construction of a new interchange at Arbor Vitae Street

If the Arbor Vitae interchange is constructed, future use of the I-405 would be slightly increased by both project traffic and total traffic, as noted in the table. In general, total future traffic demands on this important north-south regional transportation facility would be about 40 percent greater than existing traffic volumes. This section of the San Diego Freeway is operating presently in excess of design capacity during peak usage periods. The future site volumes will add incrementally to congestion to the north and south of this section but not in a significant manner.

(9) Impact on City of Inglewood Streets

In addition to the volume/capacity analysis of existing and future traffic conditions on Manchester Avenue at Airport Boulevard-Florence Avenue and at La Cienega Boulevard, site traffic impacts on the Inglewood street system were evaluated.

As noted in Table 10, the principle impact of site traffic on Inglewood streets involves about 10 percent of the total project volume oriented to and from the east. It was estimated that Manchester Avenue would carry about 4 percent of the total, Arbor Vitae Street 2 percent and Century Boulevard 4 percent. This represents a total site volume east of the San Diego Freeway of about 6,000 vehicles per day. Such a traffic volume spread over three streets such as those noted would not have a significant impact upon Inglewood streets. When the Century Freeway (I-105) is constructed, it will reduce traffic volumes along these streets and correspondingly reduce the volume of site traffic which would be using local streets oriented to and from the east. Thus, it is concluded that the project will not have a significant impact upon Inglewood City streets.

The volume of site traffic attracted to Inglewood streets east of I-405 would be relatively unaffected whether or not a new interchange is provided at Arbor Vitae Street. If the additional access to I-405 is provided, approximately 20 percent of the site volume (12,000 vpd) would use Arbor Vitae Street west of I-405 for freeway access rather than the La Tijera and Century Boulevard interchanges. As noted previously, the construction of I-105 (Century Freeway) also would reduce east-west volumes on Inglewood streets.

A detailed analysis of the future traffic impact of constructing a new interchange on the San Diego Freeway at Arbor Vitae Street is well beyond the scope of this analysis. Such a study would be conducted as part of an environmental assessment of that specific project.

October 12,2001

David B. Kessler, AICP  
U.S. Department of Transportation  
Federal Aviation Administration  
P.O. Box 92007  
World Way Postal Center  
Los Angeles, CA 90009-2007

Dear Mr. Kessler:

I am writing this letter to support the acquisition of the West Bluff of the Ballona wetland ecosystem as mitigation for any loss of habitat for the endangered Riverside Fairy Shrimp recently found at LAX. It is my understanding that the United States Fish and Wildlife Service has approved this mitigation.

The West Bluff has what is probably the very last vernal pool left in the City of Los Angeles. It is shown on the historical maps, and in recent photographs. It is also a critical component of the last large coastal wetland system left in Los Angeles County.

In writing this letter, I am not supporting the expansion of LAX. I am supporting the acquisition of the West Bluff in regards to the impacts of the current operations of LAX.

Thank you very much,

*Patricia K. Dey*

Comments:  
 Councilwoman Galanter,

I am writing this in response to the draft environmental impact statement/environmental impact report (EIR/EIS) regarding the expansion of Los Angeles International Airport (LAX). I believe that the needs of the airlines and not those of the people in Los Angeles drive the entire project. The report is based on many rosy and faulty assumptions that will lead to more noise and traffic in the local area than the EIR/EIS admits to. Finally, the plans outlined do nothing to address the regional travel issues in Southern California. Rather, it represents a band-aid approach. In sum, I strongly urge you to reject the LAX expansion plans outright and choose the No Action/No Project Alternative.

In reading the EIS/EIR one thing becomes clear: LAWA and the FAA are more concerned about airlines profits than the quality of life of people in Los Angeles. Just because the airlines want to fly more into LAX does not mean that they have the right to. The airlines' legitimate desire and ability to make a profit must be balanced with the rights of the people who live in the LAX area. We have a free-market economy of supply and demand. If LAX demand exceeds the projected supply then the airlines can make their money at the under utilized airports in the region, such as Ontario and Palmdale. The citizens of Los Angeles should not have to sacrifice their quality of life to expand LAX when the airlines have existing alternatives. If LAWA and the FAA were truly concerned about the citizens of Los Angeles (note that all of the supporters of the expansion plan listed on the LAWA only includes groups that will profit from the plan and not any citizen groups) they would have supported!

! the No Action/No Project Alternative that tells the airlines that LAX is "full" and the airlines will have to change their schedules (e.g., more flights in/out of Ontario, Long Beach, Palmdale, SFO, etc.). Table 1-10 in the report shows that the percentage of airport use will go down in LA County, but rise in Orange and Riverside counties. Doesn't it make sense (for the City and the airlines) to increase capacity where the demand is rather than at LAX?

The report seems to think that if LAX doesn't expand that the Southern California economy will wilt away. This is clearly preposterous. However, after this assumption is accepted, then it is easy for the FAA and LAWA to insist that the airlines have the right to use LAX to meet their needs, then the expansion plan becomes a fait accompli. All LAWA has done in this document is provide a set of false choices as to how the people living near LAX have to take their medicine.

Of these false choices the report suggests that Alternative C is the best one. However, it is based on the overly optimistic projection that only 5% more aircraft will be needed to service 40% more passengers. One example of how this assumption is clearly absurd when one considers how many 737 aircraft are used by Southwest and Shuttle by United. Their business models (quick turnarounds, standard maintenance, etc.) rest on being able to use an entire fleet these (or similar) aircraft. I doubt that they will replace so many aircraft with larger ones in such a short period of time to handle more passengers with the same number of planes. The reality is that they will fly more of the same sized planes if given the gate space, hence increasing the number of takeoffs and landings. Basic algebra and economics tells you that the percentage of new generation planes designed for transcontinental flight will not be enough to offset the increase in passengers LAWA wants to fit into!

the airport. A more than 5% increase will be required.

Even if we take LAWA's recommendation, the EIR/EIS says, "However, by 2015, the lowest total exposure levels would be achieved by the No Action/No Project Alternative followed by either Alternative A or C." So, even by LAWA's estimates, even the "best" alternative will have negative effects on the surrounding areas. Imagine the negative effects if the projections of the number of flights are wrong! It is not as if the airport will be contracted to fit the noise and pollution estimates. Once the expansion is built those in the LAX area will have to live with the consequences. Why do these need to have their quality of life compromised so the airlines can make more money? Also, many of the supposed noise reductions are based on the phasing out of noisier jets. What's the point of making planes quieter if LAWA wants to add flights and more noise?

It is important to consider that LAX does not need these changes to improve safety. Rather, the EIR/EIS states, "...these [current] conditions do not create an unsafe environment..." Additionally, the FAA resources allocated to improved air traffic control systems will improve the efficiency of the airport without the proposed changes. These improved efficiencies will also reduce the pollution generated at the airport (unlike Alternative C, which the report says will lead to significant emissions of CO, VOC, NOx, SO2, and PM10 in 2015.).

I would also like to respond to two of the issues presented by those who support the expansion:

1. The region needs to expand the airport to maintain the economy. If passenger traffic is spread among the region's airports there will be no effect on the economy. In fact, given more choices people may find it more convenient to come to Southern California. Spreading more traffic to Ontario, Palmdale and Riverside airports will help those regions develop...that's why they want their airports to expand rather than LAX. The unions and construction companies will get their jobs no matter where airport construction occurs.

2. The Green Line extension and other highway improvements will mitigate the increased traffic near LAX. When you consider this argument think about how much traffic on the Harbor Freeway has improved since the introduction of the Blue Line and carpool lanes. While the number of Blue Lines riders is significant it is only a drop in the bucket compared the number of people who drive so the traffic is just as bad. There's no possible way that the extension of the Green Line and/or building the airport ring will handle the additional number of LAX users proposed in the EIS/EIR. The report claims a traffic reduction based on the expansion alternatives and traffic mitigation efforts unrelated to the expansion. Why not just implement the non-expansion related improvements (e.g., expand the Green Line, reduce Century Boulevard closures, etc.) to help reduce pollution and noise in the LAX area?

In sum, I strongly recommend that the proposed LAX plans be rejected in favor the No Action/No Project Alternative. Doing so will protect the quality of life in Los Angeles without having a significant impact on the economy. So doing will also force the FAA and the airlines to consider regional solutions to Southern California's transportation needs.

The voters of the LAX area are depending on you to stand up to the federal government and the airlines. We need you to protect our quality of life.

Sincerely,

Warren Bobrow

Dear David Kessler,

Without a doubt the Master Plan for LAX needs a total rework, with passenger safety and security being priority number one. The large decrease in air traffic will continue, unless people can be guaranteed that they will be safe from terrorist actions, or from the danger of being shot down by our military forces. Denying passengers penknives, manicure implements, tweezers, and hair spray just won't get the job done. Police, bomb-sniffing dogs, National Guardsmen, can handle ground problems. Air Marshalls are a good idea, but could one Air Marshall have subdued four or five terrorists?

The threat of terrorism needs to be kept off the planes, and out of the airport. One suggestion would be to rebuild the interior parking structures into customs-like facilities. No one gets on the plane without a background check, or previous background clearance. Anyone smelling of alcohol, or appearing impaired by any substance, must undergo testing: either breathalyzer, or urine screening. (These testing methods are non-invasive.) Anyone under the influence is a potential danger to other passengers, and possibly to the aircraft.

Passenger drop-off, pick-up, and parking should be off-site, with shuttles, or people-movers for interior transportation. In addition clean, high-speed efficient transportation is needed, rather than building more freeways, or widening the existing routes. Bullet trains to Orange County, San Diego, Ontario Airport, Palmdale, San Fernando Valley, San Francisco, Seattle, and Las Vegas, would greatly supplement airport operations.

The expansion of LAX would increase security problems exponentially. More vehicular traffic, more passengers, more cargo, would demand more security expense. The logical solution is to make existing facilities more efficient, and more secure. Streamline operations with safety first, and the public will fly again. From a personal point of view, I have flown to Anchorage, Dallas, Little Rock, Newark, JFK, La Guardia, and Mc Carran, feeling safer in the air than on our crowded freeways. Now I would think about taking three hours waiting for a 30-40 minute flight to Las Vegas, a 2 ½ hour flight to Dallas, or boarding a fuel-loaded 767 for the East Coast. I'm SCARED!!!

Very truly yours,  
Lucille Mashburn

Mr. Jim Ritchie  
Los Angeles World Airports  
LAX Master Plan / Room 218  
P.O. Box 92216  
Los Angeles, CA 90009-2216

Dear Mr. Ritchie:

We wish to reiterate our objection to the expansion of LAX. Not only would it destroy more of Westchester's business district and homes, but also the additional traffic and air pollution would affect the quality of life and health for Westchester residents.

Since the terrible events of September 11, 2001 led to the closing of the airport and subsequent increased security needs, we feel "all the eggs should not be in one basket." Make better use of Palmdale and Ontario airports. We also believe Orange County should carry its share at El Toro perhaps, instead of adding to the traffic at LAX.

Our city has done its share already and we should not be expected to sacrifice more.

Thank you for your consideration.

Sincerely,

Katharine E. Fickenschner

RE: Proposed LAX Expansion

Mr. Kessler:

To move forward on any of the proposed alternatives in the Master Plan would create unbelievable negative affects to the community of Inglewood, LAX's immediate neighbor.

The risks, to which everyone who takes the time to write you will point out, are increased pollution, traffic, both by automobiles and trucks carrying the major increase in cargo and let's not forget the adverse affects of noise. The massive EIR/EIS address these issues but in many cases not well enough. My concerns are as follows:

**Pollution:** The daily tonnage of pollution already created by current airport use is astounding. The black oily residue on my home and foliage cannot be a good thing, and most certainly is dangerous if breathed in its vaporous form. The increase of this by-product of commerce will take an even larger toll on the residents of Inglewood.

**Traffic:** Most certainly, the adage, "if you build it, they will come" would apply here. No matter how much you widen the major street corridors that flow into and around the airport, these so called improvements will not alleviate traffic. It shouldn't be lost on anyone who lives in the Los Angeles basin that there are far more cars/traffic than street capacity - no matter how many streets with extra lanes, there are just too many people driving. One answer here would be to require people to take mass transit of any form into and out of the airport. Off site parking could be provided. One could use Denver's DIA as an example for off site parking. This kind of parking situation could assist in your concern for security measures regarding unattended parked automobiles.

**Arbor Vitae:** By providing mass transit into the airport it removes the need for the multi-million dollar Arbor Vitae interchange and Airport Boulevard connector road projects. These two projects alone would dissect and destroy communities established long before LAX was created. Inglewood and Westchester would carry that burden.

**Flight Trajectories:** One of the more important items is the haphazard nature of aircraft flight trajectories flying over Inglewood since the September 11<sup>th</sup> disaster. Pre 9-11 there was some discernable order to incoming and outbound flights over Northwest Inglewood with the occasional variance from traditional flight paths. But since that date there are several flights a day from the north that turn over my home trying to catch the north runway by flying down La Brea Avenue or just east thereof.

PC03557

Mr. David B. Kessler  
November 6, 2001  
Page two

That doesn't even count the number of flights that take off over the ocean and fly across my rooftop or use Slauson Avenue as a sight line to the east. Northwest Inglewood takes on this NEW burden.

**Security:** Increased flights coupled with the appearance of non-controlled airspace over North Inglewood creates several questions on the subject of air safety. Since the Master Plan proposes to increase the number of flights, in turn, it will increase the likelihood of a catastrophic error over Inglewood. Again, Inglewood bears this burden.

**Noise:** Lengthening the north runway to the 405 freeway and moving it north to accommodate all the new flights would mean certain madness by noise. As it is now the noise from incoming jets flying over my rooftop can be deafening and I'm not even in the designated noise contour. The outbound jet noise is annoying. Another aspect of the noise is the run-ups and maintenance that takes place on the tarmac. This noise rattles my floors and windows, and as I've said, I live in Northwest Inglewood, a place fairly distant from LAX. These tympanic vibrations are disquieting to say the least. And who at LAWA or the FAA can assure me that the constant vibration to the earth from current airport activity now and from the additional proposed flights from bigger, heavier jets would not do damage to my home?

**Population base:** Demographic projections show that the population, out of need or desire, are choosing to move to places other than Los Angeles. Riverside, San Bernardino and Orange Counties due to the burst of anticipated population growth within the next 15 years, need easier access to airports. Why is it that the communities surrounding LAX have to pay such a severe price, take on an unprecedented burden to accommodate an airport facility that's day has passed it by? LAX is virtually locked into its present footprint. Why is it the powers that run this airport cannot and will not look forward to a truly regional plan? The people of LAWA already own Ontario and have upgraded that facility but somehow they turn away from that airport's true potential, to serve the inland empire. LAWA will not acknowledge the possibilities of developing the Orange County El Toro airport. Perhaps a joint venture could be struck between Orange County and LAWA. It would appear that much money could be made at these two facilities if developed properly.

Mr. Kessler, before this plan or any semblance of the plan were to commence, I request that LAWA, the FAA and the City of Los Angeles rethink this expansion. That you provide new realistic alternatives that incorporate the entirety of Southern California versus just Los Angeles commerce. And these alternatives need to consider LAX's neighbors more thoroughly and incorporate the reality of LAX being constrained to its current footprint by the surrounding communities and not the other way around.

I look forward to your response.

Sincerely,

Dawn Scott

## Statement of Ontario City Council Airport Liaison Paul Leon

### LAWA Public Hearing

Wednesday, November 7, 2001

Good evening. I'm Paul Leon an Ontario City Councilmember and the Airport Liaison for the Ontario City Council. I am here this evening to speak in support of Los Angeles Mayor James Hahn's recently articulated plan to upgrade security at LAX and to express appreciation for his statements and actions in support of a regional approach to the air passenger and cargo needs of Southern California. We are especially appreciative of his efforts to expand service at Ontario International Airport and his recent marketing trip to Mexico which resulted in daily Aeromexico flights between Ontario and Hermosillo beginning in January 2002. The City of Ontario values our partnership with the City of Los Angeles and LAWA and stand ready to work with the entire region to accommodate our share of Southern California air traffic at Ontario International Airport.

###

Mike Gordon  
LAX Public Hearing  
Ontario, CA  
November 7, 2001

- Good evening. I'm Mike Gordon, Mayor of the City of El Segundo
- The City of El Segundo is pleased that Mayor Hahn has agreed to set aside the Riordan Master Plan for the expansion of LAX
- And is now committed to developing a new plan for LAX that limits growth at LAX to 78 million annual passengers
- For the first time since LAWA embarked on this Master Plan odyssey, the mayor of Los Angeles has committed to being a full partner with the region in developing a truly regional airport plan that serves the aviation needs of all of Southern California.
- Inland Empire airports need to be the first priority in the development of our regional system.
- Ontario International Airport is itself the most important component of the regional airport plan.
- We are pleased that Mayor Hahn recognized and embraces the role Ontario must play in the regional airport system and
- We applaud Mayor Hahn's successful negotiation with Aeromexico to bring more flights into Ontario.
- Ontario is ready today to play an enhanced role in our regional aviation system. — it has significant unused capacity
- ~~It is situated in one of the fastest growing areas of the region.~~
- ~~It has significant unused capacity that can be used today and the ability to expand in the future.~~
- ~~Ontario Airport is positioned to be the launch point for the regional plan that will develop over the next 20 years.~~

- Now the City of Los Angeles must make sure that this airport fulfills its role in the region.
- We are particularly encouraged that Mayor Hahn has recognized the pivotal role of Ontario Airport
- ~~And has negotiated with Aeromexico for additional flights to Ontario~~
- ~~But more flights to more destinations at competitive prices are needed~~
- ~~Along with~~ a well funded, comprehensive campaign<sup>15</sup> designed specifically to market Ontario Airport, locally as well as nationally and internationally, as a convenient alternative to LAX.
- But Ontario isn't the only regional airport opportunity in the Inland Empire.
- Former military bases at March, Norton and George are now available for commercial aviation
- Now called San Bernardino International, Southern California Logistics and March Inland Port ~~in place~~, these airports are planning their entry into the Southern California marketplace.
- Southern California Logistics is already operating commercially.
- All these airports have strong community support for further development.
- As specialty cargo airports, these airports can relieve much of the cargo burden at LAX.
- Perhaps more importantly, Inland Empire airports and others in the region are poised to play an increasingly critical role in post 9/11 security efforts
- You will recall, the Secretary of Transportation temporarily banned the carriage of mail and cargo on passenger planes following the events of 9/11

- Anthrax-tainted mail and cargo continue to be a weak links in aviation security
- As specialty cargo airports, San Bernardino International, Southern California Logistics or March Inland Port can easily facilitate the separation of mail and cargo from passengers should it be necessary to ensure the safety and security of the aviation system
- Developing a truly regional airport system reduces vulnerability at LAX and reduces the vulnerability of our regional economy.
- It will reduce vulnerability in our airports system by adding regional airports in Southern California that can handle significant passengers and cargo - and ~~thereby~~ create flexibility and redundancy in the region's aviation system.
- A truly regional plan will help to ensure that security will not take a back seat to passenger throughput.
- It will help to ensure that LAX receives only as much air traffic as it can safely handle.
- We are grateful to Mayor Hahn for setting aside the previous ~~four~~ <sup>RIDROAD</sup> Master Plan alternatives for LAX expansion.
- We are pleased to offer this preliminary public input for the Mayor's new plan.
- ~~But the public expects and deserves the opportunity to review the details of the new plan once completed,~~
- ~~and the opportunity to comment on an entirely new environmental impact review that must be undertaken for this entirely new plan.~~
- We look forward to participating in future public hearings once the details of the new plan are drafted and LAWA completes the new EIR that must be undertaken.

I am Mike Salk, District Deputy to Councilmember Ruth Galanter who chairs the Committee on Commerce, Energy, and Natural Resources, which oversees the airport.

Thank you very much for being here today. In light of the events of September 11<sup>th</sup>, the entire LAX master plan is most likely obsolete. The assaults on the World Trade Center and the Pentagon have demonstrated that airports must operate differently or they may not be able to operate at all.

Even before September 11<sup>th</sup>, trends within the airline industry have been unclear. While the LAWA proposed master plan includes in all its alternatives runways to accommodate planes carrying 600 passengers or more, airlines have in fact been flying (and buying) more 757's and 767's. Certainly, demand has fallen off the charts and the demand forecasts that the entire master plan is based on are no longer useful. In fact, the EIR is so flawed in its conception and current relevance, that the environmental assessment is inherently flawed as well.

I am concerned that we are now being asked to comment on a fifth alternative that is conceptual at best, with no opportunities to inspect any analysis on its impacts on the surrounding communities, businesses and residents.

I am concerned that as long as this EIR process is on the table, the door is still open for incremental expansion later in this decade.

Finally, I am concerned that nowhere in the existing master plan document or in the proposed fifth alternative is there an overarching plan to address projected aviation demand in the Southern California region using LAWA's other airports -Ontario and Palmdale.

I urge you to reject this planning process and begin anew with a true regional plan assessed with a new environmental document that adequately addresses impacts on a regional basis.

November 1, 2001

I'd like to thank Supervisor Don Knabe for his leadership in exploring a regional solution for air travel in Southern California.

In the air and on the streets, in almost every corner of Southern California, we are facing a transportation crunch. To ensure that our cities are attractive to live in and our region is prosperous, to ensure that we aren't wasting our lives stuck in traffic and in long lines at the airports, we need to explore a comprehensive transportation solution.

With new technologies knocking on our door, and especially after the tragedy of September 11th, we need to look under every planning rock: security, convenience, diversity, competition, economics, technology, restructured management, redistricting, power-sharing, livable communities and the environment so that we find good answers that work locally and regionally.

We should scrap our current plans for LAX and take a deep breath. We need time after September 11th to develop perspective on important issues, so we can act with enough understanding to avoid overreaction or missing points that might not yet be obvious.

Hasty action may commit us to spending that doesn't pay off. Mayor Hahn has proposed facial-recognition systems be used at LAX. We should take time to explore major projects like this. England has been using such systems for years now, and not one terrorist has been caught. Two reasons are given. First, the systems are easily fooled by changing hair, dress and makeup. Second, the identity of most terrorists aren't known until after they commit a terrorist act.

We should look at diversity and good distribution as key planning points. For the sake of security, both against natural disasters and terrorist strikes, it makes sense to distribute our air travel use fairly evenly throughout Southern California. If we do this, travelers may find airports conveniently close to home or work. On the other hand, economies of scale for airlines may suggest greater service consolidation. Some airport neighborhoods may welcome expanded travel and others may reject it. We need to explore these issues to find optimal answers.

As part of our travel needs, we should explore a high-speed rail network that links San Diego, Los Angeles, Las Vegas, San Francisco and Sacramento. This could provide more diversity than air transit alone, and hence more convenience and security. We cannot study our airports in a vacuum that does not consider this option.

Our planning should also be comprehensive. We should consider all of our air and sea ports as part of a transportation network that serves Southern California. Business passengers, vacationers, tourists and cargo should move easily between these facilities and major destinations.

We should look at an automated, electric-rail system for moving cargo between our air and sea ports and key industrial locations. Such a system could speed up cargo transit, improve security, help government inspections, improve street traffic and help clean up our air. It could be a vital cog in a powerful Southern California economic engine. Exploring such an option will also impact how we

plan individual ports.

We must also modernize planning authority over our ports. The City of Los Angeles is too small to be inclusive enough to be a good regional planning authority. And, it is too large and geographically disjointed to serve local need properly. The City of Los Angeles is not a good authority to manage such regionally-important facilities.

The City should transfer its land and sea ports to the County. The County should run them as part of a regional system in a framework with other Southern California counties. Each individual facility should be administered by a joint powers authority in which the County is one partner and local neighborhoods near the facility are another.

The quality of our lives, our prosperity and the environment depend on what we do here. Let's take the time and develop the leadership and vision to move us wisely into a future that will serve us well.

STATEMENT BY COUNCILMEMBER RUTH GALANTER FOR LAX  
MASTERPLAN EIR PUBLIC MEETINGS

Thank you very much for being here tonight. In light of the events of September 11<sup>th</sup>, the entire master plan is most likely obsolete. The assaults on the World Trade Center and the Pentagon have demonstrated that airports must operate differently or they may not be able to operate at all.

Even before September 11<sup>th</sup>, trends within the airline industry have been unclear. While the LAWA proposed master plan includes in all its alternatives runways to accommodate planes carrying 600 passengers or more, airlines have in fact been flying (and buying) more 757's and 767's. While the overall loss of life on September 11<sup>th</sup> was beyond horror, it is a sign of some drastic changes in demand that the four hijacked planes carried fewer than 400 total passengers and crew. Certainly since then, demand has fallen off the charts and the demand forecasts that the entire master plan is based on are no longer useful. In fact, the EIR is so flawed in its conception and current relevance, that the environmental assessment is inherently flawed as well.

I am concerned that we are now being asked to comment on a fifth alternative that is conceptual at best, with no opportunities to inspect any analysis on its impacts on the surrounding communities, businesses and residents.

I am concerned that as long as this EIR process is on the table, the door is still open for incremental expansion later in this decade.

And I am concerned that nowhere in the existing master plan document or in the proposed fifth alternative is there an overarching plan to address projected aviation demand in the Southern California region using LAWA's other airports -Ontario and Palmdale.

I urge you to reject this planning process and begin anew with a true regional plan assessed with a new environmental document that adequately addresses impacts on a regional basis.

**Statement of Congressman Maxine Waters**

**November 8, 2001**

**Public Hearing held by Los Angeles World Airports and  
the Federal Aviation Administration**

**Airtel Plaza Hotel, Van Nuys, CA**

Thank you for the opportunity to speak and submit a statement regarding the proposed Los Angeles International Airport Master Plan and the Draft Environmental Impact Statement/Environmental Impact Report.

As Congressman of the 35<sup>th</sup> Congressional District, I represent over 600,000 constituents including residents, business owners, schools, and many more, located in cities such as South Los Angeles, Inglewood, Gardena, Hawthorne, Lennox, and portions of Westchester.

PC03564

With the numerous phone calls, letters, and people whom I have spoken with directly, we are in agreement that there should not be any expansion of the Los Angeles International Airport.

While there has been over \$60 million wasted in preparing the draft EIS/EIR, the document is deeply flawed and contains numerous omissions, ambiguous or misleading information and a number of faulty assumptions.

Specifically, our objections to the plan proposed expansion hinges on the following: 1) The draft EIS/EIR states that the environmental, noise and health burdens of the airport's operations and expansion are, and will be, borne by low income and minority populations, yet it offers no commitments to recognize and address this imbalance; 2) Air quality is already horrible. The current operations at LAX already constitute the largest single source of air pollution in the nation's worst air quality region. Any proposed expansion will further decrease the air quality in the surrounding communities and the LA Basin; 3) In regard to traffic, LAX constitutes one of the largest single destinations for vehicular traffic in the Los Angeles region. The draft EIS/EIR concludes that construction activities from any of the proposed

alternatives will result in increased traffic congestion, potentially affecting the local communities during the next fifteen years and beyond. It further states that these traffic impacts to citizens living and working in the communities surrounding the airport will be "significant and avoidable". Calculations show that with the increase in cargo volume alone will require over six semi trucks per hour, or one every ten minutes, to support this increase. This is not acceptable.

Given the events that took place on September 11<sup>th</sup>, there should be more of a focus on safety and security rather than expansion. However, we will not be fooled into expansion under the guise of "safety and security".

I strongly support a regional approach to air travel so that other airports such as Ontario and Palmdale begin to accept their fair share of air traffic.

My name is Kathleen Burr and I am the executive manager of the Los Angeles County Farm Bureau. As you know Palmdale Regional Airport sits on approximately 17,000+ acres of land which according to the airport agriculture people - 8 to 10,000 acres could be potential agricultural leases. Even though our area is growing by leaps and bounds, we are still a rural community with a huge emphasis on agriculture. Agriculture jobs in Los Angeles County comprise jobs in production, transportation, processing, marketing, and the farmer and rancher. The State of California produces half of all the nations' fruits and vegetables. Not to forget the best alfalfa in the United States is produced right here in the Antelope Valley. 78% of wildlife species occupy private lands with over 90% of all listed species relying partially on private lands for survival. And a vast majority of these private lands are owned by the farmers and ranchers. No one is more interested in maintaining the integrity of the land and health of our water resources than those who directly rely on these resources for their livelihoods! The farmers and ranchers - who in some cases are 2<sup>nd</sup>, 3<sup>rd</sup>, & 4<sup>th</sup> generation preserving this integrity for their children.

Maintaining an adequate water source is utmost on everyone's minds. But there are options that have been on the planning table for several years. It is a shame to let the potential income for not only the airport but the farmers and ranchers who provide a multitude of jobs, go to waste because those that make the decision may not fully comprehend the issues facing agriculture and/or the potential they hold in their hands. They do not realize the regulations that each grower must adhere to. They do not realize that just because it is cheaper to import a crop from another country - that country does not impose the same safe growing regulations that are imposed on us. They do <sup>not</sup> adhere to the same health standards we do. And I feel these are issues that need to be looked into and understood fully before a finger is always pointed at agriculture stating, "You are the problem". The loudest proponent is the one that does not fully understand the issue.

I can only see the potential for the agriculture leases. I would be happy to host the LAWA members to spend the day with me talking to the farmers and ranchers in the area. If there are issues, problems, or unknown financial factors - compromises can be reached, issues worked out, and problems solved. I think you would be surprised at the number of farmers/ranchers/agricultural related business in Los Angeles County. It is a shame not to promote agriculture and promote it here. Thank you for the time to speak and I look forward to hosting the airport board in the near future.

PC03565

The Antelope Valley Chamber of Commerce supports a regional approach to resolving the issue of increasing the air capacity in Southern California.

A Regional Airport approach that would include the utilization of this facility here in Palmdale, could better serve the flying public than any type of expansion of LAX.

There is a legitimate concern that adding additional air traffic, arriving and departing from LAX, could infringe on the safety of those flights. No matter what changes are made on the ground, there is still a fixed amount of airspace available and by adding more traffic into this fixed area, the odds of a major catastrophe will increase. Palmdale is capable of managing an increase in air traffic, without decreasing safety, and utilization of our airport could provide the airspace around LAX some much needed relief.

Palmdale Regional Airport features this newly refurbished 9,000 square foot terminal and is capable of handling up to 300,000 passengers annually. This facility could be used to establish a pattern of airline service into Palmdale and, as passenger traffic increases, Los Angeles World Airports already owns just under 18,000 acres of adjacent land that is available for development.

Palmdale Airport would serve a far greater geographic area than just the Antelope Valley. According to a study by the Los Angeles International Airport Expansion Task Force, using Palmdale Airport could save an average of 35 minutes for passengers that live an equal distance from Palmdale and LAX. Flight delays and airport closures due to fog would be virtually eliminated. Palmdale would quickly become the Airport of choice for the millions of people that reside within a proximity that would allow them to take advantage of our airport.

A regional approach that includes Palmdale Airport is vital to improving passenger and cargo movement in Southern California. If the Los Angeles World Airports continues to defer the utilization of their Palmdale Airport, we would urge their consideration of a "friendly takeover" of this facility by the Southern California Regional Airport Authority. This action could allow Palmdale Airport to become part of the solution rather than an idle asset.

On behalf of the Antelope Valley Chambers of Commerce, and the millions of people that could utilize Palmdale Airport, I urge you to focus on a regional approach in resolving the need for increased air capacity in Southern California.

Thank you

**REGIONAL AIRPORT vs. EXPANSION OF LAX**

The Terrorist attacks of September 11, 2001 had a profound impact on the airline industry and the flying public.

I understand the LAX expansion priorities have shifted from Expansion to Safety and Security elements as identified by Mayor Hahn.

However, caution needs to be exercised when considering any changes to the existing LAX - EIR proposing fundamental changes without public and professional input.

As a private citizen, I find it difficult to rally around any proposed changes to the changes proposed for the LAX expansion plan without first having an opportunity to review details of the proposed changes.

Without seeing details of the proposed changes to the LAX plan, there really is nothing much to discuss.

On the other hand, the option that includes the proposed Palmdale Regional Airport is a logical alternative and requires your serious consideration.

The traffic getting to and from LAX using the 405 (San Diego Fwy.) awful say nothing about the difficulties of getting in and out of LAX itself.

As an example, I hosted a dinner at the Downtown LA Biltmore Hotel last month and one of my guests spent 1½ hours just getting from Brentwood to Downtown LA. Another of my guests traveled from Encino using the 405 and had a similar horror story.

Traffic congestion on the 405 at any time of day or night requires that I consider other Airport location for my personal or business travel.

I believe the ever expanding borders of the San Fernando, Santa Clarita and Antelope Valley's would support a more conveniently located Regional Airport located in Palmdale.

Long term Major Airline lease agreements and a commitment toward future growth would be essential to the success of a Regional Airport

EXHIBIT	4
Deponent	Heard
Date	11-5-01
Repr.	Olise

In addition, the FAA or appropriate Airport authority needs to make commitments to construct and operate a safe and modern airport facility.

I would recommend an aggressive advertising campaign promoting the benefits of traveling from the Palmdale Regional Airport vs. navigating the uncertain freeways leading to LAX.

The Antelope Valley with its available land and receptive communities would welcome and support Regional Airport.

With few exceptions, Los Angeles County has run out of available open space that qualifies for airport construction.

In conclusion:

Taking into account:

- The Lockheed-Martin JSF contract agreement
- The existing Enterprise Zone benefits
- The availability of an aerospace savvy labor force
- The expanded and improved I-14 (Antelope Valley Freeway)
- A receptive Community and Local Governments
- And the existence of the Plant 42 airport facilities at the proposed airport location site

*Stopped Here*  
A decision to select Palmdale as the site for a Regional Airport will be in the public's interest relieving LAX congestion while supporting profitable and sustained future growth within Los Angeles County.

Any long or short-term plan targeting Southern California **must not** overlook the obvious geographic and other fundamental advantages the cities of Palmdale & Lancaster and the entire Antelope Valley offer as the site for a Regional Airport.

Thankyou

**Statement of Mayor James K. Hahn  
LAWA Public Hearing  
October 30, 2001**

- Mr. Kessler, Mr. Ritchie. As the Mayor of the City of Los Angeles, I appear before you this evening to reaffirm my request that you fully develop a Fifth Alternative to the LAX Master Plan that focuses on increased safety and security at LAX.
- As you may know, I have historically supported a regional approach to accommodating growth in aviation demand. I favor expanding air service at Ontario and restarting service at Palmdale. In order for a regional plan to work, other airports in the region must also take their fair share of future traffic.
- However, the tragic events of September 11<sup>th</sup> have shown us that our nation's aviation system continues

to be a vulnerable target. Those events have caused me to focus my attention, first and foremost, on the changes that must be undertaken immediately to ensure safe and secure operations at LAX.

- As the third busiest airport in the Country, LAX is a unique and vital asset for the Southern California region. Immediately following the terrorist attacks and the FAA mandate that our national aviation system be shut down, it became abundantly clear how important LAX is to the City of Los Angeles.
- More than 400,000 regional jobs have been associated with the airport and LAX has generated \$60 billion of economic activity annually. However, in the wake of September 11<sup>th</sup>, the shipment of goods and the course of business operations dependent on aviation services came to a stunning halt, placing the benefits of a strong LAX beyond our immediate grasp. Our travel and tourism industries were gravely impacted. Most importantly, hundreds of Angelenos

found themselves out of work or in real danger of losing their jobs. Although I am sure all Angelenos had some sense of LAX's value to our City, the events of mid-September made clear that its contribution to our livelihoods can never be disputed.

- In the aftermath of the terrorist attacks — and after conferring with Federal authorities — we took some immediate steps to protect the safety of passengers and employees at LAX. We made a difficult decision to keep the Central Terminal Area and parking garages at LAX closed.
- That very necessary decision resulted in the loss of jobs for numerous airport workers. Thankfully, with new security guidelines, we have now relaxed some of the restrictions that were in place and many people have been able to return to work.
- But as airport employees return to their jobs, we must continue to remain diligent about protecting LAX. We

can never allow the events of September 11<sup>th</sup> to be repeated, and I believe that the first line of defense for safe and secure airplanes is safe and secure airports.

- That is why a few weeks ago, I announced a new vision for LAX, one that would create safe and secure terminals as well as a safer airfield that would accommodate 78 million annual passengers. I would like to take this opportunity to outline some of that vision to protect LAX employees, passengers and neighboring airport communities.
- First, our terminals must be as safe and secure as we can possibly make them. My vision is to move all ticketing and baggage check-in facilities to a location away from the existing terminals. This facility would allow passengers to park, check their bags and then pass through security checkpoints away from LAX's central terminal area. Once passengers and their baggage are thoroughly checked, they would board secure transportation to the terminal areas. This

separate facility will eliminate the need for cars inside the Central Terminal Area, providing maximum protection from the threat of explosives inside a car being near the terminals.

- Second, concerns of airport communities need to be addressed. To avoid disruptions to communities close to the airport, my vision would eliminate the need for a Ring Road around LAX. This costly project, part of the current Draft LAX Master Plan, would only serve to disrupt traffic patterns in these communities.
- Third, the LAX airfield needs to be reconfigured to increase safety. Airfield safety problems, that existed before September 11<sup>th</sup>, continue to plague LAX. My vision would seek to reduce so-called runway incursions and create safer conditions on the airfield. I am also hopeful that the new alternative to the Master Plan would not move any of the runways closer to the communities around the airport, thereby

avoiding increased noise over our neighborhoods surrounding LAX.

- My intent is to help restore confidence to the flying public so that Los Angeles and LAX become, once again, a destination of choice for business and leisure travelers.
- Along with the public comments you receive about the LAX Master Plan, I would ask that you also consider my vision for a safe and secure LAX that would serve to grow our economy and create thousands of needed jobs in our region.

Thank you.

**Mike Gordon  
LAX Public Hearing  
Monterey Park, CA  
October 30, 2001**

- Good evening. I'm Mike Gordon, Mayor of the City of El Segundo
- The City of El Segundo is pleased that Mayor Hahn has agreed to set aside the current LAX Master Plan
- And is now committed to developing a new plan for LAX that
  - Limits growth to 78 MAP
  - Eliminates the airport ring road,
  - the new west terminal, and
  - the new cargo facilities
  - And focuses on security and safety at the airport
- We agree that ensuring security and safety should be the highest priority in planning the future of LAX.
- truly regional system is the best way to secure these objectives.
- We know with certainty that LAX was a terrorist target even before the events of September 11.
- Common sense tells us that continuing to concentrate aviation activity at LAX will continue to provide an inviting target for terrorists.
- Developing a truly regional airport system reduces vulnerability at LAX and reduces the vulnerability of our regional economy.
- We also know with certainty that LAX has had more runway incursions than any other US airport for the last two years.
- Here, common sense tells us that preventing taxiing aircraft from crossing active runways by employing end-around taxiways will go a long way to reducing the incursion risk.
- Although we applaud Mayor Hahn's shift in focus, we have several key concerns

- First and foremost, the heavily impacted communities under and near the LAX flight path must be assured that the new plan will not permit LAX to grow beyond 78 MAP.
- Unfortunately, the new plan comes with few specifics and few assurances, particularly about runway modifications.
- Press reports indicate that LAWA may still plan to separate runways and may include extending a north side runway to 12,000 feet.
- Such runway modifications will create significant additional capacity at LAX and, therefore, are a cause for concern.
- **Mayor Hahn cannot constrain LAX to 78 million passengers and also increase runway capacity. You cannot have it both ways.**
- We also question the need to modify runways and gates to accommodate larger aircraft.
- The events of September 11 have seriously affected airlines and aircraft manufacturers.
- Airlines are canceling orders for new aircraft and delaying delivery of new aircraft that have already been ordered.
- New projections of fleet mix must reflect the financial downturn within the aviation industry
  - which is poorly positioned to acquire larger aircraft,
  - and unlikely to clamor for the next generation of Super Jumbo aircraft soon.
- This hearing is being held in the midst of some of the most heavily impacted communities under or near the LAX flight path.
- These and more than 100 cities, counties, transportation agencies and others in the region believe that a decentralized, *truly* regional airport

plan that absolutely constrains LAX to 78 MAP is the right plan for Southern California.

- More than 80% of the families living under the flight path are members of a minority community. Many are low income.
- A truly regional airport plan improves environmental justice by reducing the share of the aviation burden borne by low income and minority communities in the region.
- **We can have it both ways: A truly regional airport system with LAX constrained is both a more fair system, it is also a safer and more secure system.**
- It will reduce vulnerability in our airports system by adding regional airports in Southern California that can handle significant passengers and cargo - and thereby create flexibility and redundancy in the region's aviation system.
- It will reduce our vulnerability by allowing greater opportunities to separate passengers from mail and cargo by using specialty cargo airports in the Inland Empire.
- A truly regional plan will help to ensure that security will not take a back seat to passenger throughput.
- It will help to ensure that LAX receives only as much air traffic as it can safely handle.
- We are grateful to Mayor Hahn for setting aside the previous four Master Plan alternatives for LAX expansion.
- We are pleased to offer this preliminary public input for the Mayor's new plan.
- But the public expects and deserves the opportunity to review the details of the new plan once completed,

- and the opportunity to comment on an entirely new environmental impact review that must be undertaken for this entirely new plan.
- We look forward to participating in future public hearings once the details of the new plan are drafted and LAWA completes the new EIR that must be undertaken.

Thank you.

**Airport Chief Wilson Notes**

- I'm Airport Police Chief Bernard Wilson. I've been chief for the last two and one half years and have 26 years of experience in law enforcement. *22 YEARS @ EMPLOYED IN AVIATION SINCE 16, LICENSED WITH LAX SINCE 15*
- I am not here to endorse any particular option of the LAX Master Plan under study.
- Am here to provide an update on major security steps we have taken at LAX and areas of concern for the future.
- I'm sure you are aware of the stepped up security measures that have been implemented since Sept. 11.
  - There is increased scrutiny of carry-on baggage
  - The ban on curbside check in continues to apply to private vehicles, though buses, shuttles, limos and taxis may unload passengers curb side.
  - After a period of closure, we have reopened all but one of the parking structures inside the Central Terminal Area while keeping the open-air parking lots and one other parking structure closed.
  - Private vehicles may only enter LAX from Century and Sepulveda Blvds.
  - Commercial vehicles must use the 96<sup>th</sup> St. entrance where there is a security checkpoint.
  - Random vehicle searches may be conducted.
  - LAPD Police canine patrols capable of detecting explosives are deployed at LAX with additional canine units for Airport Police under review.

*BY AIRPORT POLICE*

- California National Guard troops are monitoring baggage check in and have been requested to be used for patrol and other duties.
- There is an increase in the presence of LAPD officers beyond our normal complement in and around the airport.
- These steps and others have been taken to make LAX safe and secure for its passengers, employees and visitors. The leadership at LAWA is determined to do its part to make this airport the safest in America so passengers will again feel comfortable flying again.
- But we fully expect new federal regulations relating to safety and security to be issued in the coming weeks and months and much more needs to be done looking to the long term.
  - We expect in the coming months to be working even more closely with federal agencies, including U.S. Customs, Immigration and Naturalization, U.S. Marshal Service and the FBI regarding possible new security procedures.
- Chief Parks has raised the issue of better technological surveillance of the perimeter of the LAX. *AND WE ARE ENGAGED IN DAILY DIALOGUE WITH LAPD*
- Mayor Hahn has asked LAWA to review removal of all the parking structures in the Central Terminal Area in the long term and a new terminal built east of the current facility that would serve as the check in point for all passengers and baggage.
- The Airport Police stand ready to work with all these agencies to make LAX the safest airport in America.

Testimony of Dick Stanford, Councilmember, City of Azusa, California  
[1023 Lakeview Terrace, Azusa, CA 91702, 626/334-7335]  
Re: the Draft EIS/EIR for the Draft LAX Master Plan  
At the hearing by Los Angeles World Airports and the Federal Aviation Administration  
Baldwin Park, California  
October 30, 2001

**REGIONAL AIRPORT SYSTEM STILL BEING SHORTCHANGED**

Honorable Hearing Officers, my name is Dick Stanford. Thank you for the opportunity to testify.

Although I am a member of the Southern California Association of Governments' Regional Council and Transportation and Communications Committee, my testimony is presented solely in my capacity as a City Councilmember of the City of Azusa and for the City of Azusa.

Azusa is one of some 100 cities and other entities that respectfully request the City of Los Angeles to terminate plans for LAX expansion and concentrate, instead, on developing a truly regional airport system.

I hope I speak with some credibility. I helped build D/FW. I coordinated Friends of Mueller Airport in Austin, TX. I served on Ontario's Blue Ribbon Airport Committee,. And, I am a former Marine Corps fighter pilot.

In 1988, my friend, Don Ameche, now deceased, starred in a movie called "Things Change." In the movie, his life was changed drastically.

Well, since we last met, things have changed drastically in our own lives. Mayor Hahn, whom I believe is no friend of LAX expansion, has replaced Mayor Riordan, who championed LAX expansion.

The events of September 11, by extension, ended our trust in major hub airports. We are now well aware that grouping our air transportation assets makes its easier for terrorists to impact than if our air transportation system is regionalized into several airports.

Quite simply, if you put your eggs all in one basket and drop that basket, you are truly out of luck

The local example is overpowering. LAX is still trying to deal with security issues. Meanwhile, ONT almost overnight installed its hard and soft security measures and is now operating well.

That is one of the results almost all Southern California air travelers would be enjoying had regionalization of our airport system occurred long ago.

It was specifically because of the exclusion of the alternative of regionalization that the original draft EIR/EIS for the LAX expansion was inadequate. All alternatives are to be seriously addressed in an EIR; regionalization of the airport system was not.

Now, it is terribly disappointing that even though LAX expansion has been pronounced DOA, there are still projects which are part and parcel of expansion that keep popping up. Hydra is active right in Los Angeles. You cut off the LAX expansion head only to turn around and find another head that is Sepulveda widening, or another head that is changing rules to reinstate the Arbor Vitae intersection.

We respectfully ask Mayor Hahne to indicate to his many staffs that **NO LAX EXPANSION** means **NO LAX EXPANSION**...please ask the LAWA staff to quit trying to bring pieces of the expansion in via various and sundry back doors.

Remember, the Ontario Airport serves a population mass that would make that airport much more profitable for many more airline flights than presently operate there. Many more passengers would spend considerably less time on the freeway and concurrently less time fouling the air if their ground travel was to ONT instead of LAX.

But, the beautiful terminal there tends to be a ghost town because the flights are not there because the more convenient schedules are given to LAX, and because relative fare pricing deliberately forces passengers to use LAX.

LAWA, despite its protestations, can massively impact scheduling and which flights serve the Los Angeles area from which airport. We ask that they act accordingly.

Thus, we respectfully request that LAWA and the FAA join the many cities, Mayor Hahn, the Los Angeles County Board of Supervisors, a number of Members of Congress, and the Southern California Association of Governments in supporting a truly regional system which would be more efficient and less polluting for air travel in the greater Los Angeles region.

Thank you.

Comments of Robert L. Rodine, Chairman, Aviation Committee, Valley Industry and Commerce Association ("VICA") at public hearing for LAX Master Plan before FAA and LAWA, October 30, 2001

I am Robert Rodine, speaking before you tonight as the Chairman of the Aviation Committee of the Valley Industry and Commerce Association, a business advocacy organization representing approximately 325 member companies.

In 1999, following numerous analyses, expert presentations and extensive discussion, VICA adopted a position supporting a Master Plan for LAX insuring capacity for 92 Million Annual Passengers.

With all due respect for those who hold visions for the need of less capacity, we must impose upon you to recognize two immutable facts -

We are a resilient and resourceful society, and with our economy intact, we have rebounded from far worse disasters than the Al Qaeda threat,

and,

The demographic factors fueling the need for improved facilities at LAX are ever present and will relentlessly challenge the capacity of that facility on into the future.

The only thing that has changed in the Al Qaeda era is the need for significantly heightened focus on safety and security.

Local self interest driving airport constraint is choking air commerce and the freedom of all citizens to travel expeditiously in our once proud air commerce system. This region suffers not less than three major regional commercial airports so constrained, and another has yet to be established due to the same forces. If we fail to modernize LAX, to serve the ever growing demand, and to compensate for the refusal of regional airports to serve the full demand of their constituents, then we will all be the losers, and that loss will be the equivalent of the planned capacity of LAX today and all of the benefits accruing to that capacity.

VICA strongly urges you to accept only a plan that will fully service this region's needs, and to reject any plan based on non-existent, unrealistic and phantom alternatives.

Regional Airport Capacity Analysis

 Subject: PUBLIC TESTIMONY

GOOD EVENING!

I am Merry Norris, Executive Director of GATEWAY TO L.A.

which is a property-based Business Improvement District.

Our offices are located at 6151 Century Boulevard, Los Angeles.

The GATEWAY TO L.A. BID is comprised of properties along Century Boulevard between the 405 Freeway and Sepulveda Boulevard at LAX, as well as several properties on Airport and Aviation Boulevards between Century and 98th Street.

GATEWAY TO L.A. is comprised of 13 hotels, 7,200 hotel rooms, several million square feet of office and commercial space and contains over 15,000 parking spaces

GATEWAY TO L.A.'s goal is to revitalize the properties and businesses within our borders and to create a meaningful and recognizable "GATEWAY" to the city of Los Angeles.

We have worked successfully with LAWA on improvements to the LAX Gateway area. I am sure you are aware of the beautiful enhancements including lighted pylons and majestic palm trees which have quickly become a dramatic landmark for Los Angeles.

11/4/01

PC03573

Since well before September 11th, the GATEWAY BID has been working with the architecture firm of DMJM to develop a vibrant new vision for our area. We are hoping to partner with LAWA on these plans.

It is now very clearly time to take a different approach at LAX.

In considering a new approach, we all know that the assurance of safety and security is of paramount importance for all travelers

Any future changes are an opportunity for a win-win situation for businesses in and around LAX and for our neighbors- these opportunities would create new jobs, provide large scale entertainment, develop more parking and produce safer modes of transportation.

In collaboration with DMJM we have been developing BIG IDEAS which we call: AEROTROPOLIS - a gateway, a destination point which exemplifies and proliferates the brightness, the grandness and the bigness of the city in which we live: LOS ANGELES.

We look forward to sharing our vision with you.

Thank you for your time.

WWW.DEPOBOOK.COM

Good evening ladies and gentlemen ~~\_\_\_\_\_~~ My name is Luis ~~\_\_\_\_\_~~ Cabrales, I am Assistant Director of Outreach at the California League of Conservation Voters Education Fund.

~~\_\_\_\_\_ today, I speak on behalf of the underrepresented communities of color \_\_\_\_\_~~

According to the Coalition for Clean Air, the Los Angeles International Airport is the second largest industrial smog source in the Los Angeles area.

For many years low income communities and communities of color located under the airport's flight path have endured this source of pollution. The proposed expansion, ~~\_\_\_\_\_~~ will intensify the airport's environmental impact in those communities.

<sup>ALSO</sup>  
~~\_\_\_\_\_~~ I am a resident of Pico Rivera, one of the many communities of color located under the proposed LAX expansion plan's path way. But I have also lived all my life in Southeast L.A. For many years I too, had to endure the noise and air pollution created by the airplanes that flew just above my home, school and parks where I lived, studied and played.

The proposed expansion of LAX, which according to the environmental impact report, acknowledges significant impacts from aircraft noise and pollution on low income communities and communities of color, ~~\_\_\_\_\_~~ of the most important issues the communities under the airport's flight path face.

Thus, it is time for L.A. officials to pay attention to the environmental justice implications that the LAX has had, and how its expansion will exacerbate the pollution rates of the communities of color under its path way.

IT IS IMPORTANT TO MENTION THAT MANY OF THE PEOPLE WHO HAVE BEEN IMPACTED BY HEALTH PROBLEMS DUE TO POLLUTION ARE THE CHILDREN, ~~THE~~ SPOUSES & PARENTS OF UNION MEMBERS AND EVEN UNION MEMBERS THEMSELVES.

SO FAR THE JOBS & MONEY CREATED BY THE LAX HAVE NOT IMPROVED THE HEALTH STATUS OF THE LATINO & AFRICAN AMERICAN COMMUNITIES THAT SURROUND THE AIRPORT, AND THE INCREASE IN POLLUTION RATES THAT WILL RESULT FROM THE EXPANSION WILL ONLY EXACERBATE THOSE HEALTH PROBLEMS.

**Comments:**

I respectfully request that the air traffic over Monterey Park be re-routed to an industrial area where noise pollution is not a concern.

Over-flights over Monterey Park are a nuisance and disturbance to our once quiet city. The noise from these aircraft drown out conversations and cause airwave interruptions. Local schools in the Monterey hills are also disrupted because of the loud noise.

As a parent and resident of Monterey Park, I am concerned about the noise and air pollution caused by the planes flying over our city. Students in local schools are often interrupted by the increase in noise caused by the low-flying planes over the hills.

Conversations, as well as television reception is interrupted, and it seems that the traffic has greatly increased over the years. Please consider our concern and re-route the air traffic.

Thank you.

1 Dr. Alexander Weir, III  
2 8180 Manitoba Street  
3 Unit 125  
4 Playa Del Rey, CA 90293

5  
6 My name is Alexander Weir, III. I live at  
7 8180 Manitoba Street, Playa Del Rey, California, 90293,  
8 unit 125.

9 I am concerned about the airport expansion. I  
10 live approximately two miles from the airport now, I  
11 think, and I am hearing airport noise after  
12 11:00 o'clock at night when airplanes fly over my house  
13 outside of the expected flight paths.

14 I think the expansion would be unnecessary and  
15 would increase the noise that I hear now, plus, I  
16 understand that the proposed expansion is going to  
17 disrupt traffic on Pershing Drive, which I use to drive  
18 to work and to pick up my daughter, who is handicapped,  
19 at a downtown school -- she goes to a downtown school.  
20 And it will also destroy the heart of Westchester, where  
21 I shop sometimes.

22 I see no need for this plan when the airport  
23 itself isn't going to handle a substantial number of  
24 passengers but simply accommodate cargo planes that  
25 could go to other airports as easily -- more easily.

1 Plus, I have seen exceedingly increased traffic through  
2 the airport on Sepulveda Boulevard that backs up, making  
3 it impossible for me to drive south of the airport. Or,  
4 if I am south of the airport, to go home going north.

5 I also think it's a bad idea to place a car  
6 rental facility at the back end of the airport, as the  
7 plan now proposes, next to the sewage treatment plant  
8 for the entire city of Los Angeles and next to the  
9 butterfly wilderness area.

10 That's about all I can think of for now. I  
11 live with my wife and daughter in a condominium. I grew  
12 up in Playa Del Rey. It so happens that I spent time in  
13 Washington, D.C., but I am now living approximately half  
14 a mile from the elementary school I graduated from. And  
15 I have seen a number of changes in the area, but I can't  
16 think of any improvements to this area or to the city of  
17 Los Angeles that would come from an expansion of the  
18 airport. I see only detriment.

19 Thank you very much.  
20  
21  
22  
23  
24  
25

1 Dorris Parsons  
2 6305 West 77th Place  
3 Los Angeles, CA 90045  
4  
5

6 Dorris, D-O-R-R-I-S, Parsons, P-A-R-S-O-N-S,  
7 6305 West 77th Place, Los Angeles, California, 90045.

8 I've lived in Westchester for 50 years. I've  
9 seen a lot of changes. Some I like, some I don't like.  
10 Most of them I don't like, but this is the coup de  
11 gras. I'm very unhappy about it because now I'm retired  
12 and the airport has become more noisy. When I clean my  
13 windows on my house, there is a film that's oil and I  
14 have to work really hard to get it off. And the only  
15 thing I can think of, it must be from the airport.

16 I'm very unhappy because when my grandchildren  
17 come, I think it's an unhealthy environment, and I have  
18 10 grandchildren. I'm worried about all the noise.  
19 Where I live, I have helicopters over my house. I live  
20 near Sepulveda Boulevard, and they follow the west side  
21 of Sepulveda Boulevard to the airport. And I have  
22 constant helicopters, but I do have noise. And some of  
23 the planes are so big, they make even more noise. I  
24 don't know which ones they are, but they are very  
25 awful. And I'd like to have peace and quiet in my

1 retirement.

2 I've been a good citizen. I raised four good  
3 citizens. They are all people who have contributed to  
4 the community. They are political, they are doctors,  
5 and I really think that you have a -- you really have an  
6 obligation for families who have been good citizens of  
7 America. I love our country and I think we should have  
8 a good place for families to live, which has been ruined  
9 by this airport. And I don't want it to grow. I've  
10 seen it grow, and I've seen them come with bulldozers  
11 and bulldoze down hundreds of homes, beautiful rose  
12 bushes, swimming pools. And it's all destroyed for the  
13 airport, and I want it to stop, please.

14

16

17

18

19

20

21

22

23

24

25

1 Randall Starr  
2 7813 Cowan Avenue  
3 Los Angeles, CA 90045  
4

5 Randall Starr, address is 7813 Cowen Avenue,  
6 Los Angeles, California, 90045. Phone, (310) 645-1068.

7 So I'm opposed to this for the following  
8 reasons: As a homeowner, I need to repaint my house due  
9 to pollution that I feel is more than any other  
10 neighborhood. And the expansion of this airport would  
11 only increase that. In addition, I need to replace  
12 landscaping due to pollutants that fall on these  
13 plants. And I think it's unfair to expand the airport.  
14 I had to install double-paned windows throughout my  
15 house for noise pollution. And that was an added cost  
16 that I think is unfair.

17 At night my children are kept up and woken  
18 past 11:00 o'clock as large cargo planes come up and  
19 dump off their cargo.

20 And most specifically is traffic. There has  
21 been an increase in traffic already, and to go to 98  
22 million passengers would only increase that.

23 that's why I'm opposed. I would like to have  
24 a response for the following questions: Why does this  
25 EIR claim a baseline of 78 million passengers versus 68

1 million passengers that seems to be the capacity of the  
2 airport? Where did 10 million passengers go? Does the  
3 EIR give an impact in case the MAP goes beyond 98  
4 million passengers?

5 I'm concerned that there will be more than 98  
6 million passengers that will be the actual capacity of  
7 the airport. I think 98 million is not a right number.

8 And lastly, I don't believe that there are  
9 very good alternatives presented in the EIR that  
10 proposed something less than 98 million passengers.

1 Harry Wilson  
2 7728 Toland Avenue  
3 Westchester, CA 90045.  
4

5 Harry Wilson, 7728 Toland Avenue, Westchester,  
6 90045.

7 The airplanes dump fuel when they land,  
8 they -- I get fuel on the windshields of my cars. And  
9 the noise at night wakes me up, wakes my wife up.

10 And I live near Midfield, and they want to put  
11 a ramp there which would -- Midfield. And my sister  
12 lives across the freeway, so the ramp leaving the new  
13 airport area may destroy her house. They may have to  
14 buy her house and destroy it. She's concerned about  
15 that. She can't make it today.

16 That's what we're concerned with: The ramp --  
17 the on-ramps and off-ramps that they would need to  
18 build. And just -- the pollution. I have kids and I  
19 don't want them breathing the exhaust from the planes.  
20  
21  
22  
23  
24  
25

1 Lisa Clark  
2 1851 Holmby Avenue  
3 Los Angeles, CA 90025  
4

5 Lisa Clark, 1851 Holmby Avenue, Los Angeles,  
6 90025, and I've written down some things.

7 I have several questions regarding this  
8 expansion. How will L.A.X. handle, specifically, the  
9 energy needs of this expansion? Have there been any  
10 studies conducted on this question? Who paid for the  
11 studies and how could this be manageable when the state  
12 of California is already in a long-term energy crisis?

13 Two: What studies have been done in regard to  
14 environmental impact of large capacity airplanes who  
15 would then come into the airport? Has there been public  
16 discussion on this subject? How many runways would have  
17 to be moved solely for the purpose of these large  
18 capacity airplanes?

19 L.A. has a shortage of open spaces, parklands,  
20 and green areas, and is full of concrete and asphalt.  
21 How many feet of new roads will need to be built for the  
22 expansion? Has there been any public discussion in  
23 regards to this?

24 Number four: In the last several years, by  
25 national newspapers, the 405 and the I-10 intersection

1 has been rated as one of -- as the worst intersection in  
2 the nation. Playa Vista has now been allowed to go  
3 forward, increasing the number of automobiles on these  
4 freeways. How many more additional cars, both minimum  
5 and maximum, will be added, one, to the 405; and, two,  
6 to the I-10. I would like -- I would ask to see these  
7 studies and full disclosure of who paid for these  
8 studies.

9           Number five: How will quality of life be  
10 affected by this expansion? How has this been studied?

11           Number six: How many schools are in the  
12 vicinity of the airport and how will they be affected,  
13 both the health of the children as well as their ability  
14 to learn under increased noise and stress in the area?

15           Number seven: What are the health  
16 ramifications of the increased expansion to people  
17 living within a 20-mile radius? What are the  
18 ramifications to the children and what are the  
19 ramifications to adults in regards to stress levels and  
20 their short-term and long-term health? Have there been  
21 studies done on this? How long was the study conducted  
22 and how was the study shaped? I would like a copy of  
23 this study.

24           Number eight: What is the effect on property  
25 values of people living in the L.A.X. expansion area?

1 How many families will be displaced or need to move?  
2 How many historically registered homes will be affected  
3 by this?

4 And, number nine: How will the currently  
5 congested skies and bottlenecked air control traffic  
6 towers be able to now handle even higher capacity  
7 flights? What will the effect be of on-time arrival?  
8 Will there be an increased risk of mid-air crashes?

9 And then I guess I would end by just saying,  
10 you know, these are serious questions said with  
11 heartfelt thought, and that I hope that for their  
12 families' sakes and for the sakes of their communities,  
13 they will reconsider this airport expansion.

14  
15  
16  
17  
18

25

1 Marie D. Preyer  
2 7525 Manchester Avenue  
3 #522  
4 Los Angeles, CA 90045  
5

6 My name is Marie Preyer. My address is 7525  
7 Manchester Avenue, apartment 522.

8 I am a college student in this area, and I  
9 also attended elementary school and had all of my  
10 primary schooling in the area of Westchester. As a  
11 resident of Westchester, I'd like to ask you a question  
12 for the children who are still in school, and that is:  
13 How will the expansion of the L.A. airport negatively  
14 impact the local schools here? Those schools being  
15 Westchester High School, St. Bernard's school,  
16 Westchester Lutheran School, and St. Anastasia.

17 Will the expansion contribute negatively to  
18 the air pollution and noise pollution? If it will, how  
19 are those schools going to be financially compensated  
20 for the negative impact of the expansion upon the  
21 students?

22 In the wake of the recent school violence  
23 across America, many people are asking what can be done  
24 to help our children? Perhaps the greatest thing we can  
25 do for our children is a simple one: To honor them

1 enough to give them a safe, non-polluted place where  
2 they can study and learn.

3 Please respond to my questions.

4

5 My name is Andrew Stefanski,  
6 S-T-E-F-A-N-S-K-I, 7296 West 85th Street, Westchester.

7 I am a licensed civil engineer and Realtor.  
8 By training and experience, I am qualified to talk about  
9 housing. It is a bad idea to build a major airport in a  
10 densely populated area, and it is even worse to keep  
11 expanding it.

12 Some 30 years ago, the airport condemned  
13 approximately 3,000 homes and displaced 9,000 people in  
14 Westchester and Playa Del Rey. We were told this was  
15 the end. By year 2000, we are going to have Palmdale  
16 International Airport and all big jets are going to land  
17 there. Now, in 2000, the airport is taking some 2,500  
18 homes and apartment units. It is not direct  
19 condemnation. People came to them saying we had enough,  
20 take us. This is not the end. To deliver people to  
21 San Diego Freeway is not enough to make them move  
22 further.

23 The 405 Freeway has to be widened by an  
24 additional two lanes each way, as recently proposed by  
25 CalTrans. This means thousands more properties taken.

1 If the master plan for airport expansion is implemented,  
2 many more people may come to the airport and ask to be  
3 taken from an untenable situation.

4 In addition to direct taking, there are  
5 thousands of homes in airport approaches up to the  
6 Harbor freeway and beyond which are depressed by airport  
7 operations. People do not want to build units, maintain  
8 their homes. Vacant lots remain idle as there are no  
9 volunteers to develop them. This costs the city  
10 millions in lost taxes.

11 It is a bad idea to build an airport in a  
12 densely populated area, and it is even worse to keep  
13 expanding it.

1 Dr. Howard Sofen  
2 8930 Sepulveda Boulevard  
3 Los Angeles, CA 90045  
4

5 My name is Dr. Howard Sofen, and my address is  
6 8930 Sepulveda Boulevard, Westchester, California, and I  
7 have two comments -- actually, two questions.

8 Number one: Is there any possible way to  
9 realign the new Westchester Parkway so as not to disrupt  
10 the 8900 block of Sepulveda? There are numerous  
11 businesses that would be disrupted, including my own,  
12 and it seems that for the minimal extra block they take  
13 there is an incredible amount of disruption.

14 Point number two: Is there any possible way  
15 that the Board of Airports can offer assurances that new  
16 office buildings could be built in the new L.A.X. Office  
17 Park North at -- in north L.A.X. area prior to the  
18 destruction of the buildings on Sepulveda?

19 Thank you.  
20  
21  
22  
23  
24  
25

1 James T. McCutcheon  
2 7732 Midfield Avenue  
3 Los Angeles, CA 90045  
4

5 My name is James T. McCutcheon. I live at  
6 7732 Midfield Avenue, Los Angeles, California, 90045,  
7 right next to the Centinela Adobe which is being  
8 proposed to be taken for a connector road to take care  
9 of the influx of people and the growth of the airport as  
10 it's expanding.

11 The proposed connector road will run north and  
12 south on both sides of the freeway, 20 feet or more in  
13 the air from the Howard Hughes Parkway past the  
14 interchange of Arbor Vitae. Due to the 20 foot plus  
15 elevation above the freeway, this will cause the taking  
16 of some 300 feet of residential and business properties  
17 on both sides of the connector road, including the big  
18 donut at the intersection of La Cienega and Manchester.

19 The Centinela Adobe is a national monument and  
20 will be taken. That's the place where Inglewood was  
21 founded. So nothing seems to be sacred.

22 I do not want to move. I will lose my  
23 property. My family does not want to move. We want to  
24 stay in Westchester. I'm an engineer. I was in the  
25 Army Corps of Engineers. I know the freeway is wide

1 enough now to handle the existing traffic and future  
2 traffic if the airport is not expanded.

3           So it's necessary that the freeway not be  
4 expanded so that -- I mean, the airport not be expanded  
5 so the freeways won't have to be expanded. And there  
6 is -- other than that, I join the group in all the other  
7 objections, but I personally am involved in this  
8 objection. Thank you.

1 Jean Rezzo  
2 165 Culver Boulevard  
3 Playa Del Rey  
4

5 My name is Jean Rezzo, and I live in Playa Del  
6 Rey.

7 Just for this record, I'm going to limit my  
8 comments to the pollution, not noise, air quality. I  
9 have a son that's 10 that was born at this address right  
10 bordering the airport. And myself and my two sons, the  
11 one that is 10 and the one that is 17, when we do get a  
12 common cold, virus, it takes us weeks to get rid of it.  
13 The bronchitis lasts and lasts until we end up on  
14 antibiotics or the virus has turned from viral to  
15 bacterial. And it's because of the soot and dirt and  
16 pollution that is constantly at our house, which happens  
17 to be white that turns black within -- you know, dark  
18 color -- within a year or two. Has to be repainted. My  
19 car is white. Within two days after washing, it's got a  
20 gray color to it. It's just not healthy. And I can  
21 prove it by our health: We don't smoke, but you would  
22 think we did. And dirt. And I can -- I'm a scientist,  
23 I can get -- prove it. So anybody that needs it, I'll  
24 do samples. I'll show you what it looks like. I have a  
25 pool that gets dirtier than it should be, that needs

1 more chlorine than it should be, even times of the year  
2 that we're not in the water. The water is cold. It  
3 shouldn't be getting dirty. So the main issue for me is  
4 the pollution coming down from the exhaust from the  
5 airplanes, you know.

6           And I guess -- I estimate there is a couple  
7 hundred an hour going over our home. So that's it.

1 Paul Maloutos  
2 7502 Midfield Avenue  
3 Los Angeles, CA 90045  
4

5 Paul Maloutos, M-A-L-O-U-T-O-S, 7502 Midfield,  
6 M-I-D-I-F-I-E-L-D, Avenue, Westchester, 90045.

7 Okay. So the main thing is -- very  
8 appropriate at this point -- my comment is that  
9 Mrs. Ruth Galanter is doing an excellent work and we  
10 have to focus how to protect the Manchester Square  
11 rezoning to be OS so we will prevail and not become a  
12 PF, which is public facilities.

13 A good way will be if possibly something  
14 nice -- it's been built there, with the cost of few  
15 millions, so it will be very difficult to change -- and  
16 become a nice park for the area.

17 Secondly, the Westchester area, it is a  
18 residential area with a lot of children and there is  
19 about seven schools in the area. Did they ever think  
20 about the pollution, the effect it will have in the  
21 schools? Two schools are public, and the rest -- five  
22 schools -- the private schools. So the children, they  
23 need to be in a good environment, not in a polluted  
24 environment. So we should be concerned over those  
25 things.

1 Lisa Hammer  
2 6136 West 85th Place  
3 Los Angeles, CA 90045  
4

5 My name is Lisa Hammer. My address is 6136 West  
6 85th Place, and I own a business at 6216 West Manchester  
7 Avenue.

8 So I am a resident and a business owner in  
9 this area. I've lived here all my life. I'm 38. And  
10 therefore in 1970 whatever, I watched my friends move  
11 away because their houses were taken by the airport. At  
12 the time I was young, I didn't understand it. I, you  
13 know, grew up and it was done. But then I watched our  
14 business district deteriorate into what it is today,  
15 finally rebounding to almost something presentable,  
16 maybe, and then this comes.

17 Another example is a friend of mine whose  
18 house was taken and actually moved to another house in  
19 Westchester -- so we still remained friends for, you  
20 know, all 30 years -- recently came to visit from  
21 Ventura County. And it took her, on the 405 from the  
22 Valley, almost an hour to get to my house, because of  
23 the traffic on a Saturday night, to get to Westchester.  
24 That's it.

1 Diane Kirksey  
2 8243 Billowvista Drive  
3 Playa Del Rey, CA 90293  
4

5 I'm Diane Kirksey, 8243 Billowvista Drive, Playa  
6 Del Rey, California, 90293.

7 Expanding L.A.X. to 98 million passengers and  
8 expanding cargo will create unsafe conditions for the  
9 airport, its passengers, and the residents surrounding  
10 the airport. Alternatives: Regional airports such as  
11 Palmdale, Ontario, and March Air Force should be  
12 expanded to handle increased passengers and cargo.

13 If L.A. insists on expanding L.A.X. to a  
14 hundred million passengers per year, then they need to  
15 go ahead and purchase all of the residential homes in  
16 Playa Del Rey, Inglewood, El Segundo, and other severely  
17 impacted areas at full market value because these areas  
18 should not bear the full burden of noise, pollution,  
19 traffic, danger of mid-air collision, or other impacts,  
20 which an expanded L.A.X. would bring.  
21  
22  
23  
24  
25

1 Lee Roozen  
2 7420 Dunfield Avenue  
3 Los Angeles, CA 90045  
4

5 My name is Lee, L-E-E, Roozen, R-O-O-Z-E-N.  
6 Address is 7420 Dunfield Avenue, that's D-U-N-F-I-E-L-D,  
7 Avenue, Los Angeles, 90045.

8 Now, what do you want to know? I have several  
9 health problems, as many others do in my neighborhood.  
10 One is I have sleep apnea, which is greatly exacerbated  
11 by all the noise from increased air traffic, especially  
12 night traffic. I cannot leave my windows open, and in  
13 summertime, that is very, very discomforting.

14 And I also have chronic pulmonary disease with  
15 severe allergies which have only increased over the  
16 years as the air traffic has increased and air pollution  
17 has increased, and not only from the airplanes, but also  
18 from all the increased traffic that has come into the  
19 Westchester area.

20 Another -- this is in the form of a question.  
21 I would like to know where all the comments regarding  
22 studies that have been -- regarding health studies that  
23 have been made as a result of the airport pollution and  
24 increased cancer -- greatly increased cancer incidences  
25 for those that live within a four, five-mile radius of

1 the airport, and also increased respiratory diseases.

2 This is a health consideration as much as it  
3 is anything else. Traffic is, of course, horribly  
4 worse, and there have been people killed -- more people  
5 killed along the Sepulveda corridor there on the way to  
6 the airport by far than there used to be. More traffic  
7 accidents.

1 Marcus Huff  
2 10820 South Burl Avenue  
3 Lennox, CA 90304  
4

5 My name is Marcus Huff. My address is 10820 South  
6 Burl Avenue. It's in the city of Lennox, California,  
7 90039-0304.

8 In Lennox, we suffer from a lot of air  
9 pollution from the airport, which includes the trucks  
10 that go to the airport. Our roads are very torn up by  
11 those big trucks, as well as our kids are in grave  
12 danger of being hit by those big trucks. The trucks  
13 come and park on our small streets in Lennox, which  
14 means there is less room for all of our residents to  
15 park. The planes fly over our homes until 1:00,  
16 2:00 o'clock in the morning sometimes, and they start up  
17 again at roughly 5:00 A.M. in the morning. L.A.X. is  
18 not making my life very livable in Lennox because I both  
19 work and live in Lennox. That's all.  
20  
21  
22  
23  
24  
25

1 Anton Acherman  
2 6055 West 75th Place  
3 Los Angeles, CA 90045  
4

5 My name is Anton Acherman. I live at 6055 West  
6 75th Place in Los Angeles, 90045. My phone number is  
7 (310) 645-8528.

8 My comment is about time. Last year during  
9 the summer it was already impossible to find parking  
10 space on or around L.A. So people, even my own family  
11 members, went to the hotels and rented -- and went to  
12 park the cars in the parking lots in the hotels. If the  
13 traffic increases a little more, then all those hotel  
14 parking lots are full also. Where do we then put our  
15 cars so that we can maybe walk? We may have to go on  
16 the bike.

17 The traffic has been increasing in the last  
18 four, five years in a tremendous rate, especially in the  
19 405. The airport has been growing very fast. All the  
20 mediation that goes on right now may take another five  
21 years before it's resolved. In the meantime, the  
22 airport keeps on expanding uncontrolled, and we have  
23 reached a hundred million passengers MAP, and what are  
24 we going to do then? They even cannot limit them  
25 anymore to what they talk about now, the 76 million, and

1 they are not going to turn them back either.

2 So in other words, we are completely stuck and  
3 we have not managed to try to do what we really wanted  
4 to do. The traffic will have to be taken away from the  
5 airport, and the only way to do that is the regional  
6 approach. If we start bringing the passengers and the  
7 freight to, like, Ontario and Palmdale, then a lot of  
8 traffic will go that way instead of going to L.A. That  
9 will relieve L.A. tremendously.

10 A major construction job, if that would start  
11 here at L.A., will create a complete choke up because it  
12 will bring in an awful lot of trucks and additional  
13 traffic and all the work has to be done while the  
14 airport is in full operation. And that may not be  
15 disturbed. So they have to -- they have to work around  
16 all those activities, that makes it extremely  
17 expensive.

18 And one example I can give to you is that for  
19 30 million new people going through the airport, they  
20 want to spend \$12 billion. That is an equivalent of  
21 \$400 per person. If they will go to Palmdale, for  
22 example, and build a hundred million passenger airport  
23 there, they can do that for \$4 billion, and it will  
24 bring the price per person down to \$40. This shows very  
25 clearly that they really start wasting the money at

1 L.A.X. and they should think twice before they do that.

2           What they can do is start immediately  
3 expanding in Ontario and refer as much freight as  
4 possible to Ontario. Ontario is fully equipped to  
5 handle that. There have been transport companies around  
6 in place in Ontario who would love to have the  
7 business. So that is one thing that can be done  
8 immediately to relieve the pressure on L.A.X. An  
9 airport in Palmdale can be built in a matter of possibly  
10 two years. So we may have problems for another two  
11 years, and then they can start gradually taking over and  
12 take the pressure off here at L.A.X.

13           So I hope that people will use common sense,  
14 especially city council will use common sense, and start  
15 reading the reality and start doing the right thing.

16 Thank you

1 Virginia Renfro  
2 8443 Truxton Avenue  
3 Los Angeles, CA 90045  
4

5 My name is Virginia Renfro. I live at 8443  
6 Truxton Avenue, Los Angeles, 90045.

7 My comments are I'm a resident of Westchester  
8 and I work as a school teacher in Van Nuys, and so I  
9 make the 20-mile trip every day from L.A. to Van Nuys.  
10 Five years ago -- as recently as five years ago -- it  
11 took me 25 minutes to drive that 20 miles. Now, in year  
12 2001, it takes me 45 minutes to drive 20 miles, and  
13 twice a week it's about an hour and a half to drive.  
14 The traffic is horrendous on the 405, and Sepulveda is  
15 no better.

16 Expanding the airport would increase traffic  
17 on the 405 and Sepulveda. Those are the entry points to  
18 the airport. And the 405 as well as Sepulveda cannot  
19 support any more traffic. About last year, over  
20 Dockweiler Beach in Playa Del Rey, debris from an  
21 airplane -- pieces from the airplane fell on the beach.  
22 Luckily, the beach was deserted and all the debris  
23 missed the nearby houses, but it could have been a  
24 tragedy if stuff from an airplane fell and hit people in  
25 the communities around the airport.

1           Without my glasses, at night I have counted 13  
2 airplanes up in the sky waiting to land. Any more air  
3 traffic would make more airplanes in the sky much  
4 greater danger for the safety of the people in the air  
5 as well as the people on the land.

6           The proposed ring road will not reduce traffic  
7 because people from outlying areas who have to come to  
8 the airport will still have to come via the 405 or  
9 Sepulveda. So the ring road is nonsense. It will not  
10 decrease traffic. Thank you for your attention.

1 David Brown  
2 8021 Champion Drive  
3 Los Angeles, CA 90045  
4

5 My name is David Brown. My address is 8021  
6 Champion Drive, Los Angeles.

7 My comment has to do with visitor parking at  
8 the airport. The master plans that -- all three  
9 concepts of the master plan do not provide adequate  
10 parking for visitors. Under the current approved master  
11 plan adopted in 1980, the plan provides for one parking  
12 space for every 750 visitors. Currently they are  
13 operating at approximately one parking space for every  
14 1,750 visitors. And under the master plan concept C,  
15 they are going from approximately 35,000 parking spaces  
16 to 39,000 parking spaces, which is equivalent to about  
17 one parking space for every 2,500 visitors. That's not  
18 adequate.

1 John Hoebink  
2 8727 Lilienthal Avenue  
3 Westchester, CA 90045  
4

5 My name is John, J-O-H-N, and I live at 8727  
6 Lilienthal, L-I-L-I-E-N-T-H-A-L.

7 I am for the expansion of the south runways  
8 for the already acquired airport property and for the  
9 cargo -- for south side runways, but we want a third  
10 north side runway for commuter planes. Don't expand, I  
11 guess, over 1,000 feet. I mean, that's limited  
12 commuters, I guess. We want -- I want -- our family,  
13 I'm speaking for my family -- the connection from Arbor  
14 Vitae to the parkway only through airport parking, the  
15 parking lots -- I think it's C and B. We're for the  
16 west side terminal. That's about all for the expansion,  
17 and that's all.

1 James Donaldson  
2 2666 Barry  
3 Los Angeles, CA 90064  
4

5 James Donaldson, 2666 Barry, B-A-R-R-Y,  
6 Avenue, that's West Los Angeles, California, 90064.

7 And what I'd like for -- what I'd like for  
8 them to do is build as many fix-based operators at  
9 L.A.X. to service all of the small business jets and  
10 non-commercial small jet traffic rather than force them  
11 out of the airport and make way for the large cargo  
12 jets. Currently they only have one fixed-base operator,  
13 it's Garrett Corporation. And from the meetings I've  
14 been to at the FAA, whoever is doing the L.A.X.  
15 expansion, they have made comments that they are going  
16 to force the small jet traffic out on the smaller  
17 airports and bring in large jets. But what we need to  
18 have them do is to build more small fixed-base operators  
19 to handle the commercial jets and business jets.

1 Anne Backes  
2 7034 Vista Del Mar Lane  
3 Playa Del Rey, CA 90293  
4

5 My name is Anne Backes. My address that I'm  
6 speaking for is 7034 Vista Del Mar Lane, Playa Del Rey,  
7 90293.

8 And I have the following comments: One,  
9 regarding the website. The access to the Environmental  
10 Impact Report document should have been more easy to  
11 find. There should have been a shortcut leading  
12 directly to it. That way people who are not as  
13 comfortable on the web could find it more easily.

14 After finding that and looking through it, I  
15 don't understand why the mitigation monitoring plan is  
16 not included. I was told that it will be included in  
17 the final EIR. I used to write EIR's in 1998, and at  
18 that time we had to include it in the draft. I'd  
19 like -- I find it interesting that Palmdale and the --  
20 or the regional approach was not included as an  
21 alternative. I don't think that's correct.

22 And also, I'd like to know why there are no  
23 standards for airplane emissions or jet aircraft  
24 emission.  
25

1 Wendy Gauthier  
2 8812 Glider Avenue  
3 Los Angeles, CA 90045  
4

5 Wendy Gauthier, 8812 Glider Avenue,  
6 Westchester.

7 I'm extremely concerned about the harmful  
8 effects of jet fuel, fumes in our area. It's already so  
9 hard to breathe during the day. And it's been this way  
10 for the last several years. And I'm extremely concerned  
11 that any further expansion will only make it worse,  
12 although I'm even more concerned we're going to lose our  
13 community that is so important to ourselves and our  
14 friends and our children.  
15  
16  
17  
18  
19  
20  
21  
22  
23  
24  
25

1 Mary Jane Ludwig  
2 6373 Riggs Place  
3 Westchester, CA 90045  
4

5 I'm Mary Jane Ludwig, and I live in  
6 Westchester at 6373 Riggs Place, and I've been a  
7 resident over 20 years.

8 And basically comments that I have relate to  
9 the fact that traffic is going to increase beyond  
10 anything that we can possibly imagine. The roads today  
11 are so congested, people are frustrated as it is, and  
12 they are -- literally there are no mitigations that  
13 would really alleviate the traffic.

14 Approximately 15 years ago, as a solution to  
15 the congested arteries into L.A.X., the airlines had  
16 developed a contractual agreement with a helicopter  
17 charter service from Burbank to L.A.X. so that  
18 passengers could drive into Burbank, park in Burbank,  
19 and the airlines subsidized their helicopter flight  
20 bringing them into L.A.X. So the businessman who was  
21 short on time and short on patience could drive into  
22 Burbank with the intention of flying out of L.A.X. and  
23 pay \$3 to be taken by helicopter over our homes in  
24 Westchester. Flights were coming and going every five,  
25 ten minutes. It was unbearable.

1           Through a long, protracted process, the  
2 community was able to work with -- with the  
3 councilwoman, who was Pat Russell at the time, and with  
4 the FAA, and with the airport commissioners, and  
5 eventually the charter service did go out of business.  
6 However, helicopter flights have increased over the last  
7 several -- I'd say over the last year, and I've noticed  
8 that they continue to increase.

9           And I've read recently that a new charter  
10 service has been established at the airport. I don't  
11 know what the arrangements are as to whether or not the  
12 airlines are subsidizing them, but it is a great concern  
13 to me because if -- they have already increased what is  
14 going to happen when -- if the airport is going to  
15 expand beyond its present capacity.

16           The other comment I have is that my  
17 understanding is that the noisy planes that were  
18 typically retired by the airlines were sold to the cargo  
19 carriers. So while the public was led to believe that  
20 planes were getting quieter, what they neglected to let  
21 the public in on was that the planes were still being  
22 flown. And what the attorney said was that the cargo  
23 carriers basically put a retrofit on the planes similar  
24 to -- what do they call it? -- similar to like a  
25 muffler, but all that was muffled was the sound to a

1 small degree, just so that it would be in acceptable  
2 levels, meaning that the planes are still noisy.

3 That was basically it. I also had commented  
4 about what the Costal Commission's role would be and was  
5 told that unfortunately the airport was gerrymandered  
6 out of the Costal Commission's boundaries. So that's  
7 it.

1 Stacy Brown  
2 2727 Butler Avenue  
3 Los Angeles, CA 90064  
4

5 My name is Stacy, S-T-A-C-Y, Brown, B-R-O-W-N,  
6 2727 Butler, B-U-T-L-E-R, Avenue, Los Angeles,  
7 California, 90064.

8 My comments are that the notification to the  
9 mailing list of EIR availability was inadequate. The  
10 mailing had no identification on the outside. It looked  
11 like joke mail. And the price for the EIR information  
12 is too expensive for individuals. This sent a clear  
13 message that public input is not welcome.

1 Martin Rubin  
2 2822 Barry Avenue  
3 Los Angeles, CA 90064  
4

5 Martin Rubin, 2822 Barry Avenue, Los Angeles,  
6 90064.

7 I'm very concerned, as are a lot of people  
8 around where I live, about the air pollution that is  
9 coming from Santa Monica's airport, which indirectly  
10 correlates with Los Angeles Airport in that the jets  
11 that take off from Santa Monica airport wait for  
12 clearance from L.A.X.

13 And the number of corporate jets at  
14 Santa Monica Airport have doubled in three years. And  
15 if there are more jets taking off from L.A.X. and more  
16 jets coming into Santa Monica, they will be waiting  
17 there, idling to take off, more and more in the air.  
18 It's unbelievable. And no one is looking into it at  
19 this time. There is no EIR that goes on around jets  
20 because they are exempt from the pollution standards of  
21 the governmental agencies.

22 And this cannot go on this way. It's bad  
23 for -- for local and world air situation. And I could  
24 go on and on about individual instances, but it's just  
25 intolerable and it needs to be cut back. And the

1 expansion of L.A.X. I'm against for this reason and  
2 other reasons that go around that -- the traffic, which  
3 also needs to be looked into.

7 Number one, I'm opposed to the master plan,  
8 but I am also proposing that -- a new master plan that  
9 includes Palmdale as a hub with the rest of Southern  
10 California as distribution centers, similar to what  
11 several European airports have done. And for example,  
12 in Goldenberg, Sweden, they are now talking about  
13 electric distribution of all cargo from the airport  
14 throughout the city. In the little country of Norway,  
15 they have moved the airport from Oslo to about 60 miles  
16 outside and installed a bullet train. Why can we not do  
17 that in Los Angeles? Simple.

18 A good master plan with that as a hub and  
19 distribution both of cargo and personnel or passenger is  
20 what I would propose. Innovative.  
21  
22  
23  
24  
25

1 Robert Acherman  
2 6055 West 75th Place  
3 Westchester, CA 90045  
4

5 Robert Acherman, last name A-C-H-E-R-M-A-N, at  
6 6055 West 75th Place, Westchester, 90045. And my  
7 comments are that 30 years ago the Department of  
8 Airports made a promise to the people of Westchester  
9 during the last major expansion that they would go out  
10 to Palmdale. They bought 17,000 acres of land out  
11 there, and all they are using it for now is to grow  
12 pistachios.

13 For the same 8- to \$12 million that they want  
14 to spend on expanding L.A.X., they could very well build  
15 three new airports in Palmdale. The former executive  
16 director of the airport, John Driscoll, he even admitted  
17 that after 2015, which is what the L.A.X. expansion is  
18 supposed to cover up through, then they go out to  
19 Palmdale. So it begs the question: Why wait?

20 And when I ran for State Assembly in 1998 in  
21 this area I posed that question. It's like the longer  
22 we wait, the more difficult, the more expensive it will  
23 be to build Palmdale and other outlying airports and to  
24 accommodate all the incoming traffic and also make it  
25 more difficult to connect them with high speed rail and

1 freeways in order to make them work.

2           The Department of Airports is trying to buck  
3 history in that almost every other city in the world,  
4 when they wanted to build the larger airport, that they  
5 had to build it outside the center of town. And what  
6 happens with airport development is true, after L.A.X.  
7 was opened, when L.A.X. was opened in 1946 as it was  
8 designated as L.A.'s official airport, there was nothing  
9 out there but bean fields and a couple homes. Now there  
10 is development completely encircling the airport, which  
11 prevents further expansion.

12           The opportunity that Palmdale offers is that a  
13 whole new facility can be built, and there can be a  
14 buffer around it. And the ring road that they are  
15 proposing around L.A.X. would be well-suited to be  
16 around Palmdale airport as a barrier road to prevent  
17 further encroachment around the airport. So when they  
18 want to expand in the future, they can do so in the  
19 future without being too disturbing to the neighbors  
20 because they already staked out enough land to have  
21 enough of a cushion between the airport facility and the  
22 surrounding community.

23           Another point is that all of the major cities  
24 of the world -- like London and Paris and Tokyo and  
25 New York and Chicago -- all have more than one major

1 airport -- in some cases, more than one international  
2 airport. And why not Los Angeles? The city of  
3 Los Angeles is really in the driver's seat for resolving  
4 these -- this current air capacity crises that we're  
5 having. And they can't rely on El Toro and they can't  
6 rely on other airports. They don't control -- they can  
7 rely on the airports that they do have and that they can  
8 build up because then it can be completed.

9 With regard to Palmdale, also there is a  
10 population base there to support the airport. A number  
11 of companies that need to fly their employees to Seattle  
12 and the Bay area, Las Vegas, Phoenix, Washington, D.C.,  
13 New York, Chicago, Dayton, and that was all published in  
14 a report that the Los Angeles County Board of  
15 Supervisors had paid for just last month.

16 I am fully opposed to the expansion efforts as  
17 proposed, and I fully support a regional solution to  
18 meeting Southern California's airport capacity needs.  
19

3 Playa Del Rey, CA 90203  
4

5 Arlene Fisher, 7030 Vista Del Mar Lane, Playa  
6 Del Rey, 90293.

7 Questions, comments, both together. My  
8 question is they at one point said that the capacity  
9 that had been reached was 68 million, I believe, then  
10 they are bandying about a number of 78 million about a  
11 year later. Which is it? And of course, if they  
12 actually, quote, hold things to any of those numbers,  
13 are they really going to be holding things? Years past,  
14 back in John Wayne, they exceeded beyond the capacity,  
15 but that was okay. They just allowed that to happen.  
16 Where do we know for sure that they are not going to do  
17 that? In other words, who is going to show up in court  
18 with their toothbrush ready to go to jail when this --  
19 when that does occur, if it does occur?

20 My other, I guess, comment would be to say we  
21 are -- I am for a regional solution. My husband, who is  
22 not here, is for a regional solution. Every neighbor  
23 that I have spoken to is for a regional solution. I  
24 would hope that all this information gets to every  
25 political person around that is involved with this to

1 know that at least I do not plan on voting for anyone  
2 that says that they are for the expansion of the  
3 airport. Soboroff, I don't believe you.

4 Let's make this a regional solution for real:  
5 Palmdale, Ontario, John Wayne, El Toro, and anything  
6 else I've left out.

7  
8  
9  
10  
11  
12  
13  
14  
15  
16  
17  
18  
19  
20  
21  
22  
23  
24  
25

1 Barry Weiss  
2 241 Rees Street  
3 Playa Del Rey, CA 90203  
4

5 Okay. I'm Barry Weiss at 241 Rees, R-E-E-S,  
6 Street, Playa Del Rey, 90293.

7 I was concerned about reports I'd heard of  
8 about documents being drafted that would allow the  
9 Westchester Square to be declared public facility land,  
10 and another document -- which Ruth says is not true --  
11 that would allow airport use of that land. So that --  
12 and what Mark Stevens was saying at this meeting a few  
13 weeks ago was that they intend to take Westchester  
14 Square, and then the values of adjacent property will go  
15 down. They will condemn those and take those at reduced  
16 prices and work the airport expansion, which is what I  
17 think they intend to do all the way out to 405.

18 Now, the big factor is in none of the studies  
19 that I've seen do they show an environmental impact  
20 report that takes into account, let's say, traffic  
21 congestion and ties it together. Because there is the  
22 airport expansion, there is Playa Vista, there is the --  
23 what they are going to do with the Ballona Wetlands,  
24 which hopefully will attract people for recreational use  
25 and not as big a draw for traffic congestion.

1           And there is also the expansion that is going  
2 on in the Marina with these large apartment complexes  
3 and a number of hotels that they are trying to arrange  
4 to get built that couldn't be built in the past  
5 because -- I know there was a fellow, I forgot his name,  
6 who went bankrupt holding land because he couldn't do  
7 anything with it and the costs were eating him up.

8           So when you add the impact of the traffic from  
9 just all of those, and of course the associated exhaust  
10 pollution, you have really a real untenable situation  
11 which needs to be addressed overall so that we don't  
12 look at just this part and just that part and say, well,  
13 it's not so bad and go willy-nilly ahead for profit  
14 reasons when we should be taking into account people's  
15 needs.

1 Eileen Corliss  
2 6931 West 85th Street  
3 Los Angeles, CA 90045  
4

5 My name is Eileen Corliss. I live at 6931  
6 West 85th Street, 90045.

7 And I am concerned that we just considered  
8 tonight one environmental impact report and not the  
9 seven that are currently impinging on one small  
10 four-mile geographic area. We have environmental  
11 impacts for the Howard Hughes Spectrum, the Vista Del  
12 Mar, the new marina, Playa Vista, L.A.X., and for the  
13 Culver Boulevard-Lincoln expansion. We cannot tolerate  
14 any more expansion in our neighborhood. Because we are  
15 the last piece of coastal available space does not give  
16 them the right to build every last inch.

17 Limiting the number of individuals that can  
18 land at L.A.X. is only part of the problem, because  
19 there are other roadway extensions that we need to  
20 consider such as the Culver Boulevard-Lincoln  
21 expansion. It is unconscionable to me that in the next  
22 five to ten years we're going to increase not only our  
23 passenger traffic to L.A.X., but we're going to add to  
24 that 29,000 new residents, 2 million square feet of  
25 office space, 13,000 condominiums and mixed retail

1 office use space -- all of that concrete built on a  
2 sand-silt base.

3 I cannot in good conscience say that we need  
4 any more development in Westchester other than improving  
5 what we currently have. That means no L.A.X. expansion,  
6 no Playa Vista, no Vista Del Mar, no new marina.

Re The Expansion of LAX

Dear Michael D. Antonovich,

Thank you for your fine work as the Chairman of the Board of Supervisors of the County of Los Angeles.

I am concerned about the infrastructure of the County of Los Angeles.

At the present time I am focusing in on the expansion of LAX, but a full scale expansion of LAX may not be feasible financially or with the condemnation of certain homes and the related problems of passenger aircraft noise over the northern part of

Inglewood.

What does make sense to me is to expand the freight terminal infrastructure of LAX westward along the southern end of LAX.

(2)

If such a project could be done for say about \$2.1 billion, there might be a good chance of having this phase of the LAX expansion effort approved in the Congress.

Does this idea make sense to you too?

Sincerely yours,

RICHARD S. JENSEN  
21818 S. FIGUEROA ST. #20  
CARSON, CA 90745

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

Title:

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

Draft Master Plan

Draft EIS/EIR

Subsection (If applicable):

Number:

Title:

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

**Comments:**

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise;** impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues.** A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

Title:

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**, impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

Draft Master Plan

Draft EIS/EIR

Subsection (If applicable):

Number:

Title:

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues.** A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds from the expansion of other airport facilities where future population growth is located.**

*Attach additional sheets if necessary*

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues.** A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds from the expansion of other airport facilities where future population growth is located.**

Draft Master Plan
  Draft EIS/EIR

Subsection (If applicable): Number:	Title:
----------------------------------------	--------

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

*Attach additional sheets if necessary.*

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise;** impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues.** A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

**Document:**

Draft Master Plan
  Draft EIS/EIR

<b>Subsection (If applicable):</b>	<b>Title:</b>
<b>Number:</b>	

**Comments:**

**I oppose LAX expansion because it would:**

- Increase air pollution due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- Increase air safety risks with more planes operating in close quarters.
- Create more airport noise; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- Dramatically worsen traffic congestion on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- Aggravate environmental justice issues. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- Destroy local homes, schools, libraries, parks and businesses to provide room for more airport support facilities.
- Divert attention and funds from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.

Draft EIS/EIR

Subsection (If applicable):

Number:

Title:

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**, impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues.** A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

*Attach additional sheets if necessary.*

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

**Document:**

Draft Master Plan
  Draft EIS/EIR

<b>Subsection (If applicable):</b> Number:	<b>Title:</b>
-----------------------------------------------	---------------

**Comments:**

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues.** A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

*Attach additional sheets if necessary.*

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues.** A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

Title:

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.

- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues.** A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.

<b>Number:</b>	

**Comments:**

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise;** impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues.** A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

<b>Subsection (If applicable):</b>	<b>Title:</b>
<b>Number:</b>	

**Comments:**

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues.** A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of **other airport facilities where future population growth is located.**

- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of **other airport facilities where future population growth is located**.

Draft Master Plan
  Draft EIS/EIR

<b>Subsection (If applicable):</b> Number:	<b>Title:</b>
-----------------------------------------------	---------------

**Comments:**

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues.** A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Title:

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

Title:

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.

Subsection (If applicable): Number:	Title:
----------------------------------------	--------

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues.** A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of **other airport facilities** where **future population growth is located.**

Attach additional sheets if necessary.

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

<b>Subsection (If applicable):</b> Number:	<b>Title:</b>
-----------------------------------------------	---------------

**Comments:**

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Subsection (If applicable):

Number:

Title:

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of **other airport facilities where future population growth is located**.

Attach additional sheets if necessary.

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

Title:

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues.** A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds from the expansion of other airport facilities where future population growth is located.**

Attach additional sheets if necessary.

- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues.** A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds from the expansion of other airport facilities where future population growth is located.**

Attach additional sheets if necessary.

Title:

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.

Subsection (If applicable):

Number:

Title:

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds from the expansion of other airport facilities where future population growth is located.**

Attach additional sheets if necessary.

- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

Title:

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.

Subsection (If applicable):

Number:

Title:

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues.** A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.

Draft EIS/EIR

Subsection (If applicable):

Number:

Title:

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues.** A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds** from the expansion of other airport facilities where future population growth is located.

Attach additional sheets if necessary.

These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.
- **Dramatically worsen traffic congestion** on I-405, I-105 and local arterials from thousands of passenger cars, vans and cargo-carrying trucks.
- **Aggravate environmental justice issues**. A disproportionate share of low income and minority populations are subjected to increased health and safety impacts and/or displaced from their homes.
- **Destroy local homes, schools, libraries, parks and businesses** to provide room for more airport support facilities.
- **Divert attention and funds from the expansion of other airport facilities where future population growth is located.**

Attach additional sheets if necessary.

Comments:

**I oppose LAX expansion because it would:**

- **Increase air pollution** due to traffic (both air and cars/cargo-carrying trucks) would cause. The 5 identified major air pollutant species from this traffic and operations are volatile organic compounds (VOCs), nitrogen oxides (NOx), soot or particulate matter (PM), carbon monoxide (CO), and sulfur dioxide (SOx). These 5 air pollutants are present in airplane, automobile and truck exhaust gases.
- **Increase air safety risks** with more planes operating in close quarters.
- **Create more airport noise**; impacting a larger population, causing stress, illness, reduction in children's learning ability and degradation in property values.

PFA00495

June 8, 2001

To Whom It May Concern:

We are a concerned Westchester family. The expansion of LAX into our neighborhood would drastically effect our lives. As it is we deal with the increased traffic from the airport shuttles, hear the flights that come in late at night and others that fly at times when they are not to be flying. If the need for more space is in question I do not understand why Lancaster/Palmdale or even El Toro are not be considered more seriously. It seems to me that the expansion of LAX into this neighborhood is only a temporary solution for a problem that demands a more permanent solution. Before you take much more time debating about expanding LAX, don't you need to think more long-term growth to make a better decision?

Thank you,

*Georgina Kears*

June 8, 2001

To Whom It May Concern:

I would like to express my concerns about the proposed expansion of LAX. The surrounding family communities have continually had to bear the increased traffic, noise and air pollution that the airport currently brings into our community. The surrounding communities are at their wits end putting up with these dangerous circumstances. By expanding the airport it will increase all factors mentioned and will make the surrounding communities even more miserable.

I actually do not understand why the expansion at LAX is being considered. I thought there were plans for an airport in the Lancaster/Palmdale area. What about the El Toro Air Force Base? It already has the space, not to mention the runways. It seems to me that expanding LAX into the surrounding communities is a temporary solution for a much larger problem. How long will it be before LAX needs to expand again? Shouldn't a more permanent solution be considered before much more time and money is wasted and the quality of lives if the community members is brought to a deplorable level?

Thank you,

CONGRESSWOMAN

**MAXINE WATERS**

35<sup>TH</sup> CONGRESSIONAL DISTRICT

# LAX EXPANSION SURVEY

Dear Neighbor,

After months of delay, Los Angeles International Airport officials have finally submitted their plan for the expansion of the airport. We are in the public comment phase of this proposed expansion. I fought to force LAX to expand the comment period from the normal 45 days to an unprecedented 180 days. As your Congresswoman, I intend to submit comments and want to be sure that your opinions are included. The voice of our community must be heard. To do this, I need your help. Please fill out the following questionnaire and return it to my district office right away.

Thank you for your assistance.

Sincerely,

Congresswoman Maxine Waters

---

*Instructions: Please check the box to the left of the choice that best fits your answer.*

- 1) Are you currently aware of the plans for the expansion of LAX?  
 Yes    No
- 2) How did you find out about the plans for the expansion of LAX?
- |                                                                                               |                                                          |
|-----------------------------------------------------------------------------------------------|----------------------------------------------------------|
| <input type="checkbox"/> Radio reports                                                        | <input checked="" type="checkbox"/> Read local newspaper |
| <input type="checkbox"/> Information from<br>Congresswoman Waters                             | <input checked="" type="checkbox"/> TV news/shows        |
| <input type="checkbox"/> Attended<br>community/neighborhood<br>meetings put on by the airport | <input type="checkbox"/> Other (please explain)<br>_____ |
- 3) Have you done anything to learn more about the expansion plans?  
 Yes    No

As you may know, LAWA (the organization which operates LAX) plans to expand the airport so they can increase the number of flights per day that can land at the airport. Along with increasing the number of flights, LAWA is planning construction, which includes a ring road from the 405 freeway and expanded warehouse space.

- 4) Do you feel the expansion of LAX will have a positive, negative, or no effect on the following?

PFD00001

- |                              |                                   |                                   |                                               |
|------------------------------|-----------------------------------|-----------------------------------|-----------------------------------------------|
| Your health                  | <input type="checkbox"/> Positive | <input type="checkbox"/> Negative | <input checked="" type="checkbox"/> No effect |
| Your children                | <input type="checkbox"/> Positive | <input type="checkbox"/> Negative | <input checked="" type="checkbox"/> No effect |
| Your quality of life         | <input type="checkbox"/> Positive | <input type="checkbox"/> Negative | <input checked="" type="checkbox"/> No effect |
| Traffic in your neighborhood | <input type="checkbox"/> Positive | <input type="checkbox"/> Negative | <input checked="" type="checkbox"/> No effect |
| Your community overall       | <input type="checkbox"/> Positive | <input type="checkbox"/> Negative | <input checked="" type="checkbox"/> No effect |

5) Using a scale of one to ten, where one is never and ten is very frequently, how often do you or anyone in your household hear airplane noise in an average day? (Please circle number)

1 2 3 4 5 6 7 8 9 10

6) Do you believe the expansion of LAX will worsen, lessen or have no effect on the current level of airplane noise?

Worsen       Lessen       No effect

7) How often, if ever, are you or is anyone in your household awakened by airplanes?

- |                                                            |                                                |
|------------------------------------------------------------|------------------------------------------------|
| <input type="checkbox"/> Never                             | <input type="checkbox"/> Weekly                |
| <input type="checkbox"/> A few times a year                | <input type="checkbox"/> More than once a week |
| <input type="checkbox"/> Monthly                           | <input type="checkbox"/> Nightly               |
| <input checked="" type="checkbox"/> More than once a month | <input type="checkbox"/> Several times a night |

8) Do you believe the proposed expansion of LAX will increase, decrease or have no effect on the number of times you are awakened by airplanes?

Increase       Decrease       No effect

9) Does airplane noise inhibit you and/or your family from enjoying outside activities?

Yes       No

10) Do you feel the expansion of LAX will negatively, positively or have no impact on your future enjoyment of outside activities?

Negatively       Positively       No impact

11) Do you notice airport traffic (i.e. large trucks, airport shuttles, etc.) in your neighborhood?

Yes       No

12) Do you feel this traffic will increase, decrease or stay the same after the expansion of the airport?

Increase       Decrease       Stay the same

13) Has your home ever been retrofitted with sound insulation?

Yes       No

14) If yes, would you say these improvements have helped or had no effect?

Helped       Had no effect

15) Do you or does anyone in your household have any of the following medical conditions?

- Asthma
- Other respiratory problems Please explain

Cardiovascular problems Please explain  
Heart Failure

16) How many people live in your home?

- 1
- 2
- 3
- 4 or more

17) How many are children under the age of ten?

- 1
- 2
- 3
- 4 or more

18) Do you or anyone in your household currently work for LAX or associated businesses (i.e. freight forwarders, warehouses, local car rental agencies, local hotels, importers/exporters, etc)?

- Yes
- No

19) How often, if at all, do you or does anyone in your household use LAX for travel?

Never \_\_\_\_\_ times per year \_\_\_\_\_ month \_\_\_\_\_ week  
*not daily* (please circle appropriate time frame)

20) What is your zip code? 90045 - 4110

jolene kurt

Your children	Positive	<input checked="" type="radio"/> Negative	No effect
Your quality of life	Positive	<input checked="" type="radio"/> Negative	No effect
Traffic in your neighborhood	Positive	<input checked="" type="radio"/> Negative	No effect
Your community overall	Positive	<input checked="" type="radio"/> Negative	No effect

5) Using a scale of one to ten, where one is never and ten is very frequently, how often do you or anyone in your household hear airplane noise in an average day? (Please circle number)

1 2 3 4 5 6 7 8 9  10

6) Do you believe the expansion of LAX will worsen, lessen or have no effect on the current level of airplane noise?

Worsen  Lessen  No effect

7) How often, if ever, are you or is anyone in your household awakened by airplanes?

Never  Weekly

A few times a year  More than once a week

Monthly   Nightly

More than once a month  Several times a night

8) Do you believe the proposed expansion of LAX will increase, decrease or have no effect on the number of times you are awoken by airplanes?

Increase  Decrease  No effect

9) Does airplane noise inhibit you and/or your family from enjoying outside activities?

Yes  No

10) Do you feel the expansion of LAX will negatively, positively or have no impact on your future enjoyment of outside activities?

Negatively  Positively  No impact

11) Do you notice airport traffic (i.e. large trucks, airport shuttles, etc.) in your neighborhood?

Yes  No

12) Do you feel this traffic will increase, decrease or stay the same after the expansion of the airport?

Increase  Decrease  Stay the same

13) Has your home ever been retrofitted with sound insulation?

Yes  No

14) If yes, would you say these improvements have helped or had no effect?

Helped  Had no effect

15) Do you or does anyone in your household have any of the following medical conditions?

Asthma

Other respiratory problems  Please explain

Cardiovascular problems  Please explain

16) How many people live in your home?

1  2  3  4 or more

17) How many are children under the age of ten?

1  2  3  4 or more

18) Do you or anyone in your household currently work for LAX or associated businesses (i.e. freight forwarders, warehouses, local car rental agencies, local hotels, importers/exporters, etc)?

Yes  No

19) How often, if at all, do you or does anyone in your household use LAX for travel?

Never  4 times per  year  month  week

(please circle appropriate time frame)

20) What is your zip code? 90245

**CONGRESSWOMAN MAXINE WATERS 35TH CONGRESSIONAL DISTRICT LAX  
EXPANSION SURVEY  
10124 S. Broadway  
Suite 1  
Los Angeles, CA 90003**

Dear Neighbor,

After months of delay, Los Angeles International Airport officials have finally submitted their plan for the expansion of the airport. We are in the public comment phase of this proposed expansion. I fought to force LAX to expand the comment period from the normal 45 days to an unprecedented 180 days. As your Congresswoman, I intend to submit comments and want to be sure that your opinions are included. The voice of our community must be heard. To do this, I need your help. Please fill out the following questionnaire and return it to my district office right away.

Thank you for your assistance.

Sincerely,

Congresswoman Maxine Waters

Instructions: Please circle the item that best fits your answer.

1) Are you currently aware of the plans for the expansion of LAX?

Yes  No

2) How did you find out about the plans for the expansion of LAX?

Radio reports                      Read local newspaper

Information from Congresswoman Waters

TV news/shows

Attended community/neighborhood meetings put on by the airport

Other (please explain) *office meetings + emails*

3) Have you done anything to learn more about the expansion plans?

Yes  No

As you may know, LAWA (the organization which operates LAX) plans to expand the airport so they can increase the number of flights per day that can land at the airport. Along with increasing the number of flights, LAWA is planning construction, which includes a ring road from the 405 freeway and expanded warehouse space.

4) Do you feel the expansion of LAX will have a positive, negative, or no effect on the following?

Your health	Positive	Negative	No effect
Your children	Positive	Negative	No effect
Your quality of life	Positive	Negative	No effect
Traffic in your neighborhood	Positive	<u>Negative</u>	No effect
Your community overall	Positive	<u>Negative</u>	No effect

5) Using a scale of one to ten, where one is never and ten is very frequently, how often do you or anyone in your household hear airplane noise in an average day? (Please circle number)

1 3 4 5 6 7 8 9 10

6) Do you believe the expansion of LAX will worsen, lessen or have no effect on the current level of airplane noise?

Worsen Lessen No effect

7) How often, if ever, are you or is anyone in your household awakened by airplanes?

Never Weekly

A few times a year More than once a week

Monthly Nightly

More than once a month Several times a night

8) Do you believe the proposed expansion of LAX will increase, decrease or have no effect on the number of times you are awakened by airplanes?

Increase Decrease No effect

9) Does airplane noise inhibit you and/or your family from enjoying outside activities?

Yes No

10) Do you feel the expansion of LAX will negatively, positively or have no impact on your future enjoyment of outside activities?

Negatively Positively No impact

11) Do you notice airport traffic (i.e. large trucks, airport shuttles, etc.) in your neighborhood?

Yes No

12) Do you feel this traffic will increase, decrease or stay the same after the expansion of the airport?

Increase Decrease Stay the same

13) Has your home ever been retrofitted with sound insulation?

Yes No

14) If yes, would you say these improvements have helped or had no effect?

Helped Had no effect

15) Do you or does anyone in your household have any of the following medical conditions?

Asthma

no

Other respiratory problems Please explain

Cardiovascular problems Please explain

16) How many people live in your home?

1 2 3 4 or more

17) How many are children under the age of ten?

1 2 3 4 or more none

18) Do you or anyone in your household currently work for LAX or associated businesses (i.e. freight forwarders, warehouses, local car rental agencies, local hotels, importers/exporters, etc)?

Yes No

19) How often, if at all, do you or does anyone in your household use LAX for travel?

Never 1-2 times per year month week

(please circle appropriate time frame)

Mr. Jim Ritchie  
City of Los Angeles  
Los Angeles World Airports  
LAX Master Plan Team  
P.O. Box 92216  
Los Angeles, CA 90009-2216

Dear Sir:

I am against any Plans to end or curtail services for General Aviation at LAX. LAX must continue to provide runways, terminals and services to support all small aircraft, both small jets and propeller planes. To reduce these services which are currently available at LAX will put an unfair burden upon all the communities at other airports in the Los Angeles area.

Forcing General Aviation to airports other than LAX will impact the surrounding communities with excesses of noise and pollution, threatening resident's health and safety. Increased air traffic will adversely effect automobile traffic in these areas. The noise and sight of the jets roaring low overhead will impair the learning of children in schools near these airports. The natural environments of theses communities must be protected, too. Shifting any LAX air traffic to neighboring Los Angeles airports is disruptive and is not an acceptable consequence of the Plan.

LAX should remain the central point for ALL TYPES of air traffic in the Los Angeles area. I believe three, or more, FBO (fixed base operator) facilities at LAX to service non-commercial small private and business jets and propeller planes are necessary to support General Aviation at LAX.

As for the large commercial jets, the LAX Master Plan should continue to view LAX as the central focus of commercial air traffic for the Los Angeles area and should be responsibly improved or expanded as necessary to accommodate increased traffic demands. LAX is good for the city economy and improvements have been made to mitigate the problems the airport creates. Meanwhile Ontario, Palmdale and El Toro can be expanded to efficiently spread the air traffic around Southern California in ways that enhance the lives, environment and economies of these other communities.

Sincerely,

2812 Westgate Ave.  
Los Angeles, Ca. 90064

LAX Master Plan Team  
P.O. Box 92216  
Los Angeles, CA 90009-2216

Dear Sir:

I am against any Plans to end or curtail services for General Aviation at LAX. LAX must continue to provide runways, terminals and services to support all small aircraft, both small jets and propeller planes. To reduce these services which are currently available at LAX will put an unfair burden upon all the communities at other airports in the Los Angeles area.

Forcing General Aviation to airports other than LAX will impact the surrounding communities with excesses of noise and pollution, threatening resident's health and safety. Increased air traffic will adversely effect automobile traffic in these areas. The noise and sight of the jets roaring low overhead will impair the learning of children in schools near these airports. The natural environments of these communities must be protected, too. Shifting any LAX air traffic to neighboring Los Angeles airports is disruptive and is not an acceptable consequence of the Plan.

LAX should remain the central point for ALL TYPES of air traffic in the Los Angeles area. I believe three, or more, FBO (fixed base operator) facilities at LAX to service non-commercial small private and business jets and propeller planes are necessary to support General Aviation at LAX.

As for the large commercial jets, the LAX Master Plan should continue to view LAX as the central focus of commercial air traffic for the Los Angeles area and should be responsibly improved or expanded as necessary to accommodate increased traffic demands. LAX is good for the city economy and improvements have been made to mitigate the problems the airport creates. Meanwhile Ontario, Palmdale and El Toro can be expanded to efficiently spread the air traffic around Southern California in ways that enhance the lives, environment and economies of these other communities.

Sincerely,

*Samantha Gagnon (In the flight path.)*

Ocean Park Community Organization and other  
Residents of Santa Monica, Venice, Mar Vista and  
West Los Angeles

Subject: **Endorsement of Santa Monica City Council's Position on the LAX Master Plan Alternatives**

We the undersigned endorse the following points approved by the Santa Monica City Council on July 10, 2001:

1. Opposition to all of the LAX Master Plan Alternatives, as currently proposed, due to the significant and unavoidable environmental impacts associated therewith;
2. Opposition unless the DEIR (Draft Environmental Impact Report) fully analyzes the environmental consequences of the Master Plan and provides acceptable mitigation for impacts on Santa Monica;
3. **Opposition unless the Master Plan provides for guaranteed infrastructure, facilities, and airside acreage to fully support transient business aircraft and fixed-base business operations, including a minimum of three fixed-base operations for business jets and an exclusive runway for small to mid-size jets;**
4. Opposition unless the Master Plan phasing provides for surface transportation enhancements to coincide with or precede any air transportation enhancements; and
5. Opposition unless the relocation and expansion of the LAX Transit Center is included as a Master Plan commitment at a location that will promote the use of transit.

As residents directly impacted by an increase of jet traffic at the Santa Monica Airport, we are particularly concerned about the proposed LAX Master Plan Alternatives 62% REDUCTION in acreage dedicated to General Aviation Operations. In the last three years, Jet Operations have doubled at Santa Monica Airport. Our local airport was never intended to accommodate the type of jet aircraft currently using its facilities. There is NO Safety Zone at the ends of the runways. Only the width of a street separates residences from both ends of the runway. The closest home is only 220ft from the runway terminus. Two gas stations are across the street from the east side of the runway. Aircraft control hours end at 9:00pm even though aircraft are allowed to depart until 11:00pm and arrive 24 hours a day.

Diverting additional Business Jet Operations to small general aviation Airports on the Westside, including Santa Monica, Torrance, and Hawthorne is NOT a solution to LAX's overcrowded runways if the ramifications of this option is to create safety hazards and additional problems at other airports.

Subject: **Endorsement of Santa Monica City Council's Position on the LAX Master Plan Alternatives**

We the undersigned endorse the following points approved by the Santa Monica City Council on July 10, 2001:

1. Opposition to all of the LAX Master Plan Alternatives, as currently proposed, due to the significant and unavoidable environmental impacts associated therewith;
2. Opposition unless the DEIR (Draft Environmental Impact Report) fully analyzes the environmental consequences of the Master Plan and provides acceptable mitigation for impacts on Santa Monica;
3. **Opposition unless the Master Plan provides for guaranteed infrastructure, facilities, and airside acreage to fully support transient business aircraft and fixed-base business operations, including a minimum of three fixed-base operations for business jets and an exclusive runway for small to mid-size jets;**
4. Opposition unless the Master Plan phasing provides for surface transportation enhancements to coincide with or precede any air transportation enhancements; and
5. Opposition unless the relocation and expansion of the LAX Transit Center is included as a Master Plan commitment at a location that will promote the use of transit.

**As residents directly impacted by an increase of jet traffic at the Santa Monica Airport, we are particularly concerned about the proposed LAX Master Plan Alternatives 62% REDUCTION in acreage dedicated to General Aviation Operations.** In the last three years, Jet Operations have doubled at Santa Monica Airport. Our local airport was never intended to accommodate the type of jet aircraft currently using its facilities. There is NO Safety Zone at the ends of the runways. Only the width of a street separates residences from both ends of the runway. The closest home is only 220ft from the runway terminus. Two gas stations are across the street from the east side of the runway. Aircraft control hours end at 9:00pm even though aircraft are allowed to depart until 11:00pm and arrive 24 hours a day.

Diverting additional Business Jet Operations to small general aviation Airports on the Westside, including Santa Monica, Torrance, and Hawthorne is NOT a solution to LAX's overcrowded runways if the ramifications of this option is to create safety hazards and additional problems at other airports.

 West Los Angeles

Subject: Endorsement of Santa Monica City Council's Position on the LAX Master Plan Alternatives

We the undersigned endorse the following points approved by the Santa Monica City Council on July 10, 2001:

1. Opposition to all of the LAX Master Plan Alternatives, as currently proposed, due to the significant and unavoidable environmental impacts associated therewith;
2. Opposition unless the DEIR (Draft Environmental Impact Report) fully analyzes the environmental consequences of the Master Plan and provides acceptable mitigation for impacts on Santa Monica;
3. **Opposition unless the Master Plan provides for guaranteed infrastructure, facilities, and airside acreage to fully support transient business aircraft and fixed-base business operations, including a minimum of three fixed-base operations for business jets and an exclusive runway for small to mid-size jets;**
4. Opposition unless the Master Plan phasing provides for surface transportation enhancements to coincide with or precede any air transportation enhancements; and
5. Opposition unless the relocation and expansion of the LAX Transit Center is included as a Master Plan commitment at a location that will promote the use of transit.

**As residents directly impacted by an increase of jet traffic at the Santa Monica Airport, we are particularly concerned about the proposed LAX Master Plan Alternatives 62% REDUCTION in acreage dedicated to General Aviation Operations.** In the last three years, Jet Operations have doubled at Santa Monica Airport. Our local airport was never intended to accommodate the type of jet aircraft currently using its facilities. There is NO Safety Zone at the ends of the runways. Only the width of a street separates residences from both ends of the runway. The closest home is only 220ft from the runway terminus. Two gas stations are across the street from the east side of the runway. Aircraft control hours end at 9:00pm even though aircraft are allowed to depart until 11:00pm and arrive 24 hours a day.

Diverting additional Business Jet Operations to small general aviation Airports on the Westside, including Santa Monica, Torrance, and Hawthorne is NOT a solution to LAX's overcrowded runways if the ramifications of this option is to create safety hazards and additional problems at other airports.

Two gas stations are across the street from the east side of the runway. Aircraft control hours end at 9:00pm even though aircraft are allowed to depart until 11:00pm and arrive 24 hours a day.

Diverting additional Business Jet Operations to small general aviation Airports on the Westside, including Santa Monica, Torrance, and Hawthorne is NOT a solution to LAX's overcrowded runways if the ramifications of this option is to create safety hazards and additional problems at other airports.

West Los Angeles

Subject: **Endorsement of Santa Monica City Council's Position on the LAX Master Plan Alternatives**

We the undersigned endorse the following points approved by the Santa Monica City Council on July 10, 2001:

1. Opposition to all of the LAX Master Plan Alternatives, as currently proposed, due to the significant and unavoidable environmental impacts associated therewith;
2. Opposition unless the DEIR (Draft Environmental Impact Report) fully analyzes the environmental consequences of the Master Plan and provides acceptable mitigation for impacts on Santa Monica;
3. **Opposition unless the Master Plan provides for guaranteed infrastructure, facilities, and airside acreage to fully support transient business aircraft and fixed-base business operations, including a minimum of three fixed-base operations for business jets and an exclusive runway for small to mid-size jets;**
4. Opposition unless the Master Plan phasing provides for surface transportation enhancements to coincide with or precede any air transportation enhancements; and
5. Opposition unless the relocation and expansion of the LAX Transit Center is included as a Master Plan commitment at a location that will promote the use of transit.

As residents directly impacted by an increase of jet traffic at the Santa Monica Airport, we are particularly concerned about the proposed LAX Master Plan Alternatives 62% REDUCTION in acreage dedicated to General Aviation Operations. In the last three years, Jet Operations have doubled at Santa Monica Airport. Our local airport was never intended to accommodate the type of jet aircraft currently using its facilities. There is NO Safety Zone at the ends of the runways. Only the width of a street separates residences from both ends of the runway. The closest home is only 220ft from the runway terminus. Two gas stations are across the street from the east side of the runway. Aircraft control hours end at 9:00pm even though aircraft are allowed to depart until 11:00pm and arrive 24 hours a day.

Diverting additional Business Jet Operations to small general aviation Airports on the Westside, including Santa Monica, Torrance, and Hawthorne is NOT a solution to LAX's overcrowded runways if the ramifications of this option is to create safety hazards and additional problems at other airports.

**Comments:**

I am opposed to any expansion of the Los Angeles International Airport (LAX). My home is located between Lincoln Blvd., Manchester Ave., Pershing Dr. and Westchester Parkway. Due to the proximity of my home to LAX, any expansion of LAX would have dramatic impact on my neighborhood and on the value of my property.

Your web site ([www.lax2015.org](http://www.lax2015.org)) lists several alternatives to developing LAX. All of the alternatives include a proposal to develop the vacant land bordering Westchester Parkway. The interactive map on your web site refers to this area as "Westchester Southside". The "Westchester Southside" proposal includes building offices, retail spaces, restaurants, recreational areas, industrial and commercial areas. This proposal places these types of businesses and services behind my home! I feel that developing this portion of vacant land is unnecessary. Our community does not need anymore retail space, restaurants, or office space.

To the south of my neighborhood, the development of Playa Vista continues. The Playa Vista development includes 3,000 residential units, low-income housing, 3.2 million square feet of office space, retail areas, schools, and is expected to generate 57,000 new jobs. To the east of my neighborhood is the Howard Hughes Center. This development includes offices, retail, restaurants, and a movie theater. Based on this information, I feel that our community has more than enough retail space, restaurants, and office space available. We do not need any development in "Westchester Southside".

Your proposal to expand LAX would generate 425,000 new jobs. Combine this with the 57,000 new jobs in Playa Vista and this means that 482,000 people will be in my neighborhood every day. Your proposal includes building new roads and expanding the Green Line. However, you cannot build enough roads to accommodate the daily traffic generated by 482,000 people. This doesn't even include airline passengers!

Our neighborhood already has enough traffic problems. Lincoln and Sepulveda Boulevards are the main arteries in and out of Westchester. These roads are already overburdened. Any expansion of LAX, including developing "Westchester Southside" would make it impossible to get in and out of Westchester.

I urge you to not expand LAX and the "Westchester Southside" area. In closing, thank you for the opportunity to express my opinion about the proposed expansion of LAX.

Our community does not need anymore retail space, restaurants, or office space.

To the south of my neighborhood, the development of Playa Vista continues. The Playa Vista development includes 3,000 residential units, low-income housing, 3.2 million square feet of office space, retail areas, schools, and is expected to generate 57,000 new jobs. To the east of my neighborhood is the Howard Hughes Center. This development includes offices, retail, restaurants, and a movie theater. Based on this information, I feel that our community has more than enough retail space, restaurants, and office space available. We do not need any development in "Westchester Southside".

Your proposal to expand LAX would generate 425,000 new jobs. Combine this with the 57,000 new jobs in Playa Vista and this means that 482,000 people will be in my neighborhood every day. Your proposal includes building new roads and expanding the Green Line. However, you cannot build enough roads to accommodate the daily traffic generated by 482,000 people. This doesn't even include airline passengers!

Our neighborhood already has enough traffic problems. Lincoln and Sepulveda Boulevards are the main arteries in and out of Westchester. These roads are already overburdened. Any expansion of LAX, including developing "Westchester Southside" would make it impossible to get in and out of Westchester.

I urge you to not expand LAX and the "Westchester Southside" area. In closing, thank you for the opportunity to express my opinion about the proposed expansion of LAX.

**Comments:**

I am opposed to any expansion of the Los Angeles International Airport (LAX). My home is located between Lincoln Blvd., Manchester Ave., Pershing Dr. and Westchester Parkway. Due to the proximity of my home to LAX, any expansion of LAX would have dramatic impact on my neighborhood and on the value of my property.

Your web site ([www.lax2015.org](http://www.lax2015.org)) lists several alternatives to developing LAX. All of the alternatives include a proposal to develop the vacant land bordering Westchester Parkway. The interactive map on your web site refers to this area as "Westchester Southside". The "Westchester Southside" proposal includes building offices, retail spaces, restaurants, recreational areas, industrial and commercial areas. This proposal places these types of businesses and services behind my home! I feel that developing this portion of vacant land is unnecessary. Our community does not need anymore retail space, restaurants, or office space.

To the south of my neighborhood, the development of Playa Vista continues. The Playa Vista development includes 3,000 residential units, low-income housing, 3.2 million square feet of office space, retail areas, schools, and is expected to generate 57,000 new jobs. I am opposed to any expansion of the Los Angeles International Airport (LAX). My home is located between Lincoln Blvd., Manchester Ave., Pershing Dr. and Westchester Parkway. Due to the proximity of my home to LAX, any expansion of LAX would have dramatic impact on my neighborhood and on the value of my property.

Your web site (www.lax2015.org) lists several alternatives to developing LAX. All of the alternatives include a proposal to develop the vacant land bordering Westchester Parkway. The interactive map on your web site refers to this area as "Westchester Southside". The "Westchester Southside" proposal includes building offices, retail spaces, restaurants, recreational areas, industrial and commercial areas. This proposal places these types of businesses and services behind my home! I feel that developing this portion of vacant land is unnecessary. Our community does not need anymore retail space, restaurants, or office space.

To the south of my neighborhood, the development of Playa Vista continues. The Playa Vista development includes 3,000 residential units, low-income housing, 3.2 million square feet of office space, retail areas, schools, and is expected to generate 57,000 new jobs. To the east of my neighborhood is the Howard Hughes Center. This development includes offices, retail, restaurants, and a movie theater. Based on this information, I feel that our community has more than enough retail space, restaurants, and office space available. We do not need any development in "Westchester Southside".

Your proposal to expand LAX would generate 425,000 new jobs. Combine this with the 57,000 new jobs in Playa Vista and this means that 482,000 people will be in my neighborhood every day. Your proposal includes building new roads and expanding the Green Line. However, you cannot build enough roads to accommodate the daily traffic generated by 482,000 people. This doesn't even include airline passengers!

Our neighborhood already has enough traffic problems. Lincoln and Sepulveda Boulevards are the main arteries in and out of Westchester. These roads are already overburdened. Any expansion of LAX, including developing "Westchester Southside" would make it impossible to get in and out of Westchester.

I urge you to not expand LAX and the "Westchester Southside" area. In closing, thank you for the opportunity to express my opinion about the proposed expansion of LAX.

PETITION

We, the Latino residents and business owners of Lennox, Inglewood and South Central endorse this Petition that identifies our issues and needs as a direct result of our close proximity to the Los Angeles World Airport. We have chosen to address our concerns by means of this Petition in order to contribute to the planning process in a constructive and proactive manner and to ensure that Latinos are explicitly included in any and all actions considered or taken by the Los Angeles World Airports (LAWA).

Re: Los Angeles International Airport Master Plan Draft Environmental Impact Statement (EIS) /  
Environmental Impact Report (EIR)

Dear Mr. Ritchie:

I am requesting that the Federal Aviation Administration (FAA), Los Angeles World Airports (LAWA), and Southern California Association of Governments (SCAG) terminate the expansion of LAX. I oppose the LAX expansion alternatives A, B, and C.

I am requesting that the ANo Action/ No Project Alternative@ for LAX Master Plan be approved.

I am requesting that a ARegional Solution@ be developed for airline passengers and airline cargo. Centralizing all the passengers and cargo from Los Angeles County, Orange County and San Diego County into LAX is ludicrous. Centralization of all the passengers and cargo into LAX is not feasible. The LAX draft EIS/EIR does mitigate nor address the issues adequately. Now is the time that each region should develop and accept responsibility for airplane passengers and airplane cargo.

I am requesting that the ARing Road@, AArbor Vitae Interchange@, and the AAirport Boulevard Connector Road@ which are development plans for the LAX expansion be terminated. The development of the ARing Road@, AArbor Vitae Interchange@, and the AAirport Boulevard Connector Road@ will not solve nor adequately mitigate any of the issues that the LAX draft EIS/EIR proposes. The development of the ARing Road@, AArbor Vitae Interchange@, and the AAirport Boulevard Connector Road@ will destroy the residential communities of Westport Heights, Westchester, and Inglewood.

My requests are based upon the Los Angeles International Airport Master Plan Draft Environmental Impact Statement (EIS) / Environmental Impact Report (EIR).

The LAX draft EIS/EIR does not adequately address nor mitigate the following issues:

1. The EIR does not adequately address nor mitigate traffic congestion. Traffic congestion on the 405 Fwy, 105 Fwy, 10 Fwy and the 101 Fwy have not and can not be mitigated. The freeways have become parking lots due to the excess LAX passengers and the cargo. For

PFJ00001

example, the EIR states that traffic congestion on the 405 Fwy exists between 7 a.m. to 9 a.m. and 3:30 p.m. to 7 p.m. These statements are false. The traffic congestion on the 405 Fwy exists from 6:30 a.m. to 11:30 a.m. and from 2:30 p.m. to 7:30 p.m. The 405 Fwy is bumper to bumper with traffic congestion all day long due to the excess 27 million passengers and the 1.4 million tons of cargo that exceed the capacity that LAX was built to handle back in 1966.

LAX was built to handle 40 million passengers and 1 million tons of cargo per year. Currently, 67 million passengers and 2.4 million tons of cargo pass through LAX per year. All the freeways are becoming parking lots for LAX traffic.

There is no way that Los Angeles can adequately address or mitigate 98 million passengers and 4.2 million tons of cargo by 2015 via the expansion of LAX.

2. The EIR does not adequately address nor mitigate health issues. The EIR does not adequately address nor mitigate the air pollution from the passenger airplanes, the cargo airplanes and the freeway traffic due to LAX. The EIR does not address nor mitigate the increase in cancer and respiratory ailments due to jet fuel and automobile and truck exhaust.

Anyone that lives within 10 miles of the LAX airport has potential legal causes of action to sue for cancer and respiratory ailments.

3. The EIR does not adequately address nor mitigate the noise pollution due to the passenger and cargo airplanes and the freeway traffic due to LAX. The EIR limited the study of noise levels to 65 db. The EIR is inadequate. The noise levels exceed the 65db levels in all of the surrounding communities: Westchester, Inglewood, El Segundo, Manhattan Beach, and Playa del Rey.

Today the noise level in Westport Heights of Westchester exceeds 65 db twenty fours a day due to LAX excess passengers and cargo. Eight years ago the noise level dropped below 65 db after 8 p.m. to 6 a.m. due to LAX. LAX has failed to address noise pollution.

4. The EIR does not adequately address nor mitigate LAX safety of air space. The recently released FAA report indicates that LAX is the worst airport in the United States regarding near miss collisions. LAX has experienced 33 near miss collisions in the last four years. The limited airspace is dangerous. Common sense tells you that increasing the concentration of airplanes flying in and out of LAX will open the doors to civil actions against the FAA, LAWA and SCAG due the breach of their fiduciary duty to protect the passengers and the people who live in the vicinity of LAX. Expansion of LAX will only increase the liability, damages and deaths due to the concentration and centralization of airplane passengers and cargo in such limited air space.

5. The EIR did not address the issue of risk from earthquakes at LAX. If LAWA, the FAA and SCAG proceed with the expansion of LAX to centralize and concentrate the passengers and cargo from all of Los Angeles County, Orange County and San Diego County, what will happen if there is a Northridge@ size earthquake at LAX? The LAX Master Plan for Expansion puts

All our eggs in one basket@ for the entire Southern California region. This is ludicrous. This is a breach of your fiduciary duty. The ARegional Solution@ to airport expansion is the only solution to diversify the risk from catastrophic disasters. Southern California=s entire economy would be destroyed when LAX is hit by a ANorthridge@ size earthquake.

6. The EIR did not address, incorporate nor mitigate the traffic congestion, noise, health, and safety issues that are the result of the development of the Howard Hughes project, Playa Vista project, Ballona Creek project and the Marina del Rey project(s). These four (4) developments are going to have a massive impact on the entire Westside of Los Angeles and the South Bay Areas. The LAX Master Plan for expansion and the EIS/EIR have failed to address the impact of these four developments on LAX. Again, this is ludicrous.

7. The LAX Master Plan for expansion does not address the fact that two (2) billion dollars will be wasted to demolish Westchester and Inglewood prior to the expansion of LAX. LAWA owns LAX, Palmdale and Ontario airports. Since the land in Palmdale and Ontario was purchase a long time ago why waste billions of dollars?

8. Orange County (El Toro airport, etc), San Diego County and the inland empires should be held responsible to provide airport facilities for passengers and cargo that are destined for that region.

I hope James Hahn, Mayor of Los Angeles, will fulfill his promise to stop the expansion of LAX.

The FAA, LAWA and SCAG has a fiduciary duty to address all these concerns. Try the regional airport approach. Stop the LAX expansion plan.

Sincerely,

Re: Los Angeles International Airport Master Plan Draft Environmental Impact Statement (EIS) / Environmental Impact Report (EIR)

Dear Mr. Ritchie:

I am requesting that the Federal Aviation Administration (FAA), Los Angeles World Airports (LAWA), and Southern California Association of Governments (SCAG) terminate the expansion of LAX. I the LAX expansion alternatives A, B, and C.

I am requesting that the ANo Action/ No Project Alternative@ for LAX Master Plan be approved.

I am requesting that a ARegional Solution@ be developed for airline passengers and airline cargo. Centralizing all the passengers and cargo from Los Angeles County, Orange County and San Diego County into LAX is ludicrous. Centralization of all the passengers and cargo into LAX is not feasible. The LAX draft EIS/EIR does mitigate nor address the issues adequately. Now is the time that each region should develop and accept responsibility for airplane passengers and airplane cargo.

I am requesting that the ARing Road@, AArbor Vitae Interchange@, and the AAirport Boulevard Connector Road@ which are development plans for the LAX expansion be terminated. The development of the ARing Road@, AArbor Vitae Interchange@, and the AAirport Boulevard Connector Road@ will not solve nor adequately mitigate any of the issues that the LAX draft EIS/EIR proposes. The development of the ARing Road@, AArbor Vitae Interchange@, and the AAirport Boulevard Connector Road@ will destroy the residential communities of Westport Heights, Westchester, and Inglewood.

My requests are based upon the Los Angeles International Airport Master Plan Draft Environmental Impact Statement (EIS) / Environmental Impact Report (EIR).

The LAX draft EIS/EIR does not adequately address nor mitigate the following issues:

1. The EIR does not adequately address nor mitigate traffic congestion. Traffic congestion on the 405 Fwy, 105 Fwy, 10 Fwy and the 101 Fwy have not and can not be mitigated. The freeways have become parking lots due to the excess LAX passengers and the cargo. For example, the EIR states that traffic congestion on the 405 Fwy exists between 7 a.m. to 9 a.m. and 3:30 p.m. to 7 p.m. These statements are false. The traffic congestion on the 405 Fwy exists from 6:30 a.m. to 11:30 a.m. and from 2:30 p.m. to 7:30 p.m. The 405 Fwy is bumper to bumper with traffic congestion all day long due to the excess 27

PFJ00003

million passengers and the 1.4 million tons of cargo that exceed the capacity that LAX was built to handle back in 1966.

LAX was built to handle 40 million passengers and 1 million tons of cargo per year. Currently, 67 million passengers and 2.4 million tons of cargo pass through LAX per year. All the freeways are becoming parking lots for LAX traffic.

There is no way that Los Angeles can adequately address or mitigate 98 million passengers and 4.2 million tons of cargo by 2015 via the expansion of LAX.

2. The EIR does not adequately address nor mitigate health issues. The EIR does not adequately address nor mitigate the air pollution from the passenger airplanes, the cargo airplanes and the freeway traffic due to LAX. The EIR does not address nor mitigate the increase in cancer and respiratory ailments due to jet fuel and automobile and truck exhaust.

Anyone that lives within 10 miles of the LAX airport has potential legal causes of action to sue for cancer and respiratory ailments.

3. The EIR does not adequately address nor mitigate the noise pollution due to the passenger and cargo airplanes and the freeway traffic due to LAX. The EIR limited the study of noise levels to 65 db. The EIR is inadequate. The noise levels exceed the 65db levels in all of the surrounding communities: Westchester, Inglewood, El Segundo, Manhattan Beach, and Playa del Rey.

Today the noise level in Westport Heights of Westchester exceeds 65 db twenty fours a day due to LAX excess passengers and cargo. Eight years ago the noise level dropped below 65 db after 8 p.m. to 6 a.m. due to LAX. LAX has failed to address noise pollution.

4. The EIR does not adequately address nor mitigate LAX safety of air space. The recently released FAA report indicates that LAX is the worst airport in the United States regarding near miss collisions. LAX has experienced 33 near miss collisions in the last four years. The limited airspace is dangerous. Common sense tells you that increasing the concentration of airplanes flying in and out of LAX will open the doors to civil actions against the FAA, LAWA and SCAG due the breach of their fiduciary duty to protect the passengers and the people who live in the vicinity of LAX. Expansion of LAX will only increase the liability, damages and deaths due to the concentration and centralization of airplane passengers and cargo in such limited air space.

5. The EIR did not address the issue of risk from earthquakes at LAX. If LAWA, the FAA and SCAG proceed with the expansion of LAX to centralize and concentrate the passengers and cargo from all of Los Angeles County, Orange County and San Diego County, what will happen if there is a ANorthridge@ size earthquake at LAX? The LAX Master Plan for Expansion puts Aall our eggs in one basket@ for the entire Southern California region. This is ludicrous. This is a breach of your fiduciary duty. The ARegional Solution@ to airport expansion is the only solution to diversify the risk from catastrophic disasters. Southern California=s entire economy would be destroyed when LAX is hit by a ANorthridge@ size earthquake.

6. The EIR did not address, incorporate nor mitigate the traffic congestion, noise, health, and safety issues that are the result of the development of the Howard Hughes project, Playa Vista project, Ballona Creek project and the Marina del Rey project(s). These four (4) developments are going to have a massive impact on the entire Westside of Los Angeles and the South Bay Areas. The LAX Master Plan for expansion and the EIS/EIR have failed to address the impact of these four developments on LAX.

Mr. Jim Ritchie  
City of Los Angeles  
Los Angeles World Airports  
Master Plan Office  
P.O. Box 92216  
Los Angeles, CA 90009

Re: Los Angeles International Airport Master Plan Draft Environmental Impact Statement (EIS) / Environmental Impact Report (EIR)

Dear Mr. Ritchie,

I am requesting that the Federal Aviation Administration (FAA), Los Angeles World Airports (LAWA), and Southern California Association of Governments (SCAG) terminate the expansion of LAX. I oppose the LAX expansion alternatives A, B, and C.

I am requesting that the ANo Action/ No Project Alternative@ for LAX Master Plan be approved.

I am requesting that a ARegional Solution@ be developed for airline passengers and airline cargo. Centralizing all the passengers and cargo from Los Angeles County, Orange County and San Diego County into LAX is ludicrous. Centralization of all the passengers and cargo into LAX is not feasible. The LAX draft EIS/EIR does mitigate nor address the issues adequately. Now is the time that each region should develop and accept responsibility for airplane passengers and airplane cargo.

I am requesting that the ARing Road@, AArbor Vitae Interchange@, and the AAirport Boulevard Connector Road@ which are development plans for the LAX expansion be terminated. The development of the ARing Road@, AArbor Vitae Interchange@, and the AAirport Boulevard Connector Road@ will not solve nor adequately mitigate any of the issues that the LAX draft EIS/EIR proposes. The development of the ARing Road@, AArbor Vitae Interchange@, and the AAirport Boulevard Connector Road@ will destroy the residential communities of Westport Heights, Westchester, and Inglewood.

My requests are based upon the Los Angeles International Airport Master Plan Draft Environmental Impact Statement (EIS) / Environmental Impact Report (EIR).
