

I believe distributing air traffic to Regional airports, such as Palmdale and Ontario is a better alternative to expanding the already congested LAX area. The surrounding area, especially the Freeways, is completely saturated with traffic, pollution and noise.

June 8, 2001

Congresswoman Jane Harman  
811 N. Catalina Suite 1302  
Redondo Beach, CA 90277

Dear Congresswoman Harman,

I am against any further expansion of LAX. All future plans to expand should be stopped.

We are already affected by severe traffic congestion through the Rosecrans and Sepulveda routes as people attempt to come west and then north to the airport area. In the past it took us fifteen minutes to drive north to the airport. The drive now takes much longer, and in some cases traffic comes to a complete stop due to traffic grid lock.

More takeoffs and landings mean more noise. Airport officials are not concerned about what happens in the South Bay. All they care about is their own interests. The issues have been reviewed and LAX expansion does have a negative affect on the South Bay. Once additional expansion takes place the damage will be done. And the special interests will have what they want at our expense.

The airport will continue to push for expansion until we have the courage to say no to further development.

Sincerely,

Anne Rose  
3525 Elm Avenue

Dear Ms Harmon,

I recently received your newsletter in the mail regarding the expansion of LAX. Thank you for working hard for the people of your district. I live in El Segundo and am in the 65 + decibel range of LAX. LAX is big enough already. I agree with the idea of a regional plan incorporating the use of regional airports for the expanding population base. Your projections for the population growth in the areas surrounding LAX clearly indicates that those areas will need to expand their facilities to accomodate the growth. In the long run I hope the airlines will realize the potential for expanding their services to those communities and actually reduce the numbers of flights going out of LAX. This may help the airport be more efficient and reduce the number of delays and other problems because of over crowding.

The noise level in El Segundo makes it very difficult at times to even have a conversation. I hope that the noise abatement program offered to homeowners will continue to be available in the years to come. The actual program involving refitting of windows etc. is a very slow process. I hope that additional funding and possible low interest government loans will be available to speed up the process.

Yours truly,

June 10, 2001

Dear Jane Harman,

Congratulations on your recent election.

Can you explain to me how the Democrats let the Supreme Court get away with stealing the election in Florida??

Anyhow, we have been included in the people who want the airport in Palmdale and Octario, for over twenty years. (But we didn't buy land near the airport) We used to belong to a Democratic Party here in Venice Beach, California but it has disappeared.

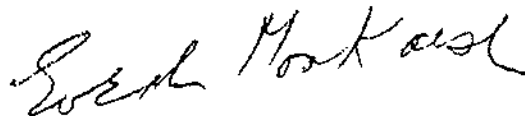

Mark Twain said he belongs to an unorganized party- the Democrats. The same is true of now. Republicans have all kinds of organizations and make sure their people are informed. In the last two elections, we did not receive voting pamphlets or any information about the election for mayor or district attorney.

We need an outpouring of people at local meeting and messengers to our congressman and any other influential people in Congress. There has to be federal funds to build super transportation to these locations but LA needs supervision or outside builders because LA doesn't know how to build anything for many billions and then they cause big problems in the city.

YES we are for Regional Airport Alternative .

Sincerely yours

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

Dear Congresswoman Harman:

Thank you for providing this easy way to reply. In MDR we are highly impacted by traffic, noise. Without any expansion, there is a good amount of noise from jets who are probably violating minimum altitude levels. Another concern is: aircraft noise are the various helicopters which fly close to our rooftops. Currently, there is no law that governs

Signature: *Lynn Ober* (written over the line)

**LEADING THE WAY TO A REGIONAL AIRPORT ALTERNATIVE**

Dear Friends,

For eight years, I have advocated a regional plan that fairly shares the benefits and burdens of air transportation across our region. I oppose the proposed LAX Master Plan because it does not impose reasonable limits on growth and fails to include an adequately developed plan for building out other airports in the region.

My view is shared by many others:

- ☛ More than 80 Southern California cities have joined a coalition opposed to the proposed expansion of LAX and in favor of a regional approach.
- ☛ Four counties—Los Angeles, Orange, San Bernardino, Riverside—have revived the Southern California Regional Airport Authority to coordinate development of a fair regional aviation system.
- ☛ Last month, 12 Southern California Members of Congress from both parties joined me to support common-sense principles for developing our airports. In a letter to Transportation Secretary Norman Mineta, we pledged to work toward a plan for Southern California that:
  - Fairly distributes the benefits and burdens of aviation needs across the region.
  - Gives priority to airports eager for more growth like Palmdale and Ontario.
  - Does not force growth on already over-burdened airports like LAX.
  - Includes ground transportation to reduce congestion and improve access to regional airports.

Now it is your turn to make your voice heard. On Saturday, June 9th, the Federal Aviation Administration and Los Angeles World Airports (LAWA) will hold official hearings on the proposed expansion of LAX. I will be submitting testimony to hearings held in the 36th Congressional District at the Furama Hotel in Westchester and the Manhattan Beach Marriott. I want my testimony to reflect the views and concerns of this district and would like to hear from you. The public comment period on the Master Plan ends July 25. If you have comments on the Master Plan that you would like me to include in the official record, you can:

- Mail or fax the response form on the back of this letter to my office.
- Go to [www.house.gov/Harman](http://www.house.gov/Harman) and click on "Comment on the LAX EIS/EIR."

You can count on my continued active involvement on this issue.

Regards,

*Jane Harman*

I strongly OPPOSE LAX Expansion. As a Westchester resident-homeowner, I don't welcome more SOUND pollution, air pollution or traffic.

LAX and the surrounding communities are overburdened with passenger & cargo traffic.

Please work to evenly distribute the above, throughout southern CA Regional airports.

The traffic is already overburden with cars, taxi cabs, buses etc. Lincoln Blvd is now always jammed w/ traffic. The noise has grown along with the traffic. I feel LAX can only handle so much air traffic going out and in and I feel it is near its peak. I agree with the regional airport plan

Subject: LAX Expansion

---

I live in Manhattan Beach, CA and the noise from airplanes over the South Bay is unbearable. We have commuter planes from Long Beach and John Wayne airports, and large commercial planes from LAX polluting the skies. I love to work in my yard and I like to enjoy my peace from intruding planes flying overhead. Traffic is relative to expansion. Sepulveda Blvd traffic is atrocious heading north. There are too many cars on the highway increasing grid lock and congestion to neighboring cities. Growth of cars bring pollution when they idle waiting for the traffic ahead to open up.

There is no economic impact to the South Bay community. Majority of the residents work for aerospace companies. They are professionals. Airport employees are mostly service oriented people. Their salaries are not affordable for them to purchase a home in the South Bay area. Service employees are sacrificial victims of the airlines, large businesses and labor organizations due to corporate greed. International trade with foreign countries help large businesses not the residences near LAX.

Solution to the problem -- distribute growth to other regional airports in the area (i.e. Palmdale, Ontario) or to other states (i.e. Denver, Phoenix). Limitation of flight departure hours 10PM - 7AM Monday thru Sunday to reduce noise and pollution at LAX.

*There is already too, too much traffic and airport noise, as well as jet fuel and auto pollution. At present the 405 freeway reaches a standstill at La Tijera at virtually any hour of the day. It is ridiculous to expand the airport here where it would so adversely congest and pollute the area, while most of the traffic would be coming from great distances, and there is really no more land. What we need is an airport outside the city (Palmdale, for instance) with high speed transit from hubs with parking in the three counties. Check in, check your luggage, and get on the airport train. The constant increase in traffic and population increase is decreasing the quality of life in the South Bay, and it has to be controlled!*

I am against LAX expansion. I already see tremendous amounts of traffic as it survives now. The small area of Playa del Rey cannot accommodate a population increase because of our small roads, and how that would affect the community. I hear enough airplane noise already. I also see people leave cars parked in our area for weeks so they can leave town without paying for parking. I know the expansion would only be worse.

*Congresswoman Jane Harman, 6/13/01  
 Everyone knows we must increase our ability to handle increased airport capacity for both people and freight. Forward, responsible people realize the challenge is larger than LAX; so a regional plan is the only responsible way to solve the problem. A solution will take many years to accomplish; so it must be started now by someone with courage and leadership - you are a good one.*

I believe LAX has reached its MAX. Capacity. we need to develop ultra fast rail road up and down the state as well as to Nevada (Los Vegas) so that one can travel between L.A. to S.F. in about 3 hours. Then people use less air flight and LAX Congestion improves. I strongly oppose LAX Master Plan. we need to expand air paths in Riverside, Palmdale and San Bernardino with fast train connection between these countries and L.A.

Given the fact that the changes proposed for the LAX in the Master Plan, once implemented and completed, will still not begin to accommodate the projected number of travelers, it seems ludicrous to put the communities surrounding LAX under so much strain when alternative measures will have to be addressed anyway. It is a "band aid" approach to a severed artery. Surrounding counties are going to have to step up and accept both the responsibilities for transporting their taxpayers, and the benefits that will also (allegedly) come with regional airports.

Redondo Beach, CA 90277

To Congresswoman Jane Harmon,

My comments and thoughts on the LA X Master Plan:

It stinks.

I have lived in the South Bay for 36 years and in the South Bay are some of the jewels of all of Los Angeles County.

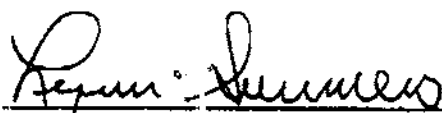

If the airport expands any more, the noise and pollution will be horrible and the additional traffic will be even worse.

My question is, why ruin/destroy one of the best parts of L.A. County and for what? The only answer I can think of is Greed.

Who benefits? The contractors, the airlines, other big businesses. Who loses? We all do.

Riordan is gone.

I truly appreciate all of your efforts to stop this madness that will do nothing but harm to the South Bay cities and its citizens.

Lynn Sumers -  
601 Herondo St. #2

**From:** RKingham  
**To:** Jane.harman@mail.house.gov

Dear Congresswoman Harman, 11 June 2001

My family and I are opposed to the current plans for the expansion of LAX. We would support your coalition for a regional approach.

We have lived in the area since the early 1950's. The noise from the airport is currently horrendous, the traffic adversely affects the area for miles surrounding us. It is time to STOP the airport expansion before more residential communities are made uninhabitable. Expansion belongs in Palmdale and Ontario.

Thank you for your effort to coordinate a fair regional aviation system.

Respectfully,  
 Richard J. Kingham  
 rkingham@aol.com

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372-1622. If you need more room, feel free to enclose additional pages with your name and address.

*There is too much air traffic in this airport (LAX), and too many people live and work around the area. The noise and air pollution affect the lives of these people are unspeakable. I support your idea of building airports or expand airports where the population grows the fastest and the need of airport is most earnest.*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371

WE WILL ALL BE AFFECTED BY TRAFFIC, NOISE,  
POLLUTION IN ONE WAY OR ANOTHER.

I RECENTLY USED LAX ON MAY 7, 2001 AND AGAIN  
ON JUNE 3, 2001. IT IS A NIGHTMARE!!! YOU  
FEEL LIKE A HERD OF ANIMALS! MANNERS OF  
PERSONNEL AS WELL AS THOSE OF US TRAVELING  
- IT'S A PUSH AND SHOVE DEAL!! IT'S A WASTE  
OF OUR TAXPAYERS DOLLARS!! IT'S INSANE!!!!  
EXPAND LAX!!!! I SHOULD SAY NOT!

I WOULD NOT BE WRITING THIS EXCEPT I HAVE  
JUST EXPERIENCED THE NIGHTMARE!

Dear Congresswoman  
I have worked at LAX for a cumulative total of  
approximately 15 years: 10 yrs. for Western Airline;  
1.5 yr. for Continental parking; and 3-5 yrs for  
Pan American Airline, during which times I lived and  
commuted from the South Bay beach cities. I support  
your position as described on the response I did  
this paper. I apologize for not responding sooner,  
please keep up your very good work. I thank you  
for it - Keep me posted please

1. greasy soot on windows 2 miles of LAX in Westchester
2. Sepulveda  <sup>Blvd</sup> like a freeway with cars, limos and shuttle buses from Valley, hotels in the area, Pasadena / Calabasas, etc. all getting off 405 South bound for LAX.
3. when it rains, airplanes take off inland at which time we hear them and fly-overs from airplanes circling due to traffic jams in the sky sound like they are going to hit us
4. Cargo planes very noisy and congestion of trucks lugging cargo away make 105 and 405 freeways even worse. Cargo planes into LAX! - this doesn't make sense!!

THERE HAVE BEEN MANY CASES OF CANCER IN EL SEGUNDO CAUSED BY POLLUTION. MY HUSBAND, FORMER COUNCILMAN, JIM CLUTTER WAS STRICKEN WITH LYMPHOMA AND DIED. LYMPHOMA IS AN ENVIRONMENTAL CANCER CAUSED BY CARCINOGENS. I HAVE HEARD THAT THERE ARE CASES OF LYMPHOMA AMONG AIRPORT EMPLOYEES.

TRAFFIC AND NOISE ARE A CONCERN FOR OUR HEALTH, HOWEVER I THINK THAT THE SILENT KILLER IS AIR POLLUTION.

*Dear Jane,*  
 I do not always agree with you but on this issue I think you are right on!!  
 a larger LAX would mean more airport congestion on the ground and both at the airport and nearby. We think that spreading out the traffic to nearby locations in Riverside, Palmdale, Long Beach and Orange County is the best solution. It would also relieve the air traffic pressure control.

Put yourself in a classroom where Plane noise drowns out the "message of the lesson". This goes on daily in many schools - public & private. No More - No Expansion. Children deserve better conditions to do their job! LAX is responsible for the most NOx emissions. They are out of compliance now. Things will be worse under the proposed plan - I say No Expansion. I perform 2 Asthma treatments daily - What could it be in the future? - No Expansion!!

6/9/01

I feel with the congestion getting to the airport via surface streets or freeway. It's almost impossible to get there in a reasonable time from Redondo Beach. Growth to areas outside of LA County should share in the burden of airport travel. San Bernardino should not have to drive to LAX or Riverside and Orange Co. Sepulveda Blvd is a nightmare to navigate through the Beach Cities. It's enough to put hokers on top of garages, businesses etc. to lighten the traffic without expanding LAX. Noise will be a factor and we already have enough helicopters flying over the beach cities along with planes from Torrance airport. Thank you

SIX YEARS AGO, FOR FAMILY REASONS, WE MOVED TO EL SEGUNDO FROM P.V. WE LIVE ABOUT 2 BLOCKS FROM IMPERIAL HWY. WE KNEW THERE WOULD BE NOISE BUT NOT THE EXHAUST, PARTICULARLY DURING SANTANAS, THAT WE ARE EXPOSED TO ON A REGULAR BASIS. WITH A PROJECTION OF DOUBLE THE TRAFFIC AND DOUBLE THE FUMES, WHICH MAY OR MAY NOT INVOLVE CARCINOGENS, LAX WILL BE PLANTING SOME SERIOUS SEEDS FOR CLASS SUITS IN 10 OR 12 YEARS. I'M 72 YEARS OLD, STILL FULLY EMPLOYED, WORK OUT DAILY AND DONT EXPECT TO BE A CANCER PATIENT, BUT — LAX BETTER COVER THEIR BETS WITH HUGE UMBRELLA INSURANCE COVERAGE.

*It makes little sense to push for expansion of LAX, located in an area of Southern California that is already over-built, over-congested, and becoming daily less viable as a livable community. Palmdale and Ontario are both areas that show vigorous population growth and have the capacity for even greater expansion. It makes eminent sense to expand airport facilities that will provide these growth communities.*

*Dear Congresswoman*  
*LAX is absolutely impossible for driving now — we can't stand more traffic there. And the parking also is impossible. Planes fly over our city constantly — they're loud. The idea of adding more to that airport — with such a small area — appalls me. Good luck to you!*

## FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport; Alliance for a Regional Solution to Airport Congestion

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

Dear Jane Harman —

6-10-01

Why are we spending so much time on this subject?  
 We can not put every damn aircraft in the country in the same place at once, so lets get off the damn or whatever and get the job done. Spread it out over all 4 counties.  
 Put a stop to those people around El Toro airport and make it a regional airport also right now, if not sooner.

The LAX Master Plan would be a disaster to quality of life in the area (I live in Marina del Rey - since 1970 - and have already experienced excessive traffic, noise + pollution). The regional plan is definitely in order, and you are to be commended for being such a strong advocate - Thank you! I think that Orange County should be obligated to allow an international airport development as part of the plan - why should it be almost escapable?

LAX should be viewed as having the same fundamental problems that Denver's former Stapleton and Dallas's Love Fields share... built decades ago within an existing municipal area on relatively small parcels and with intensive ~~pop~~ growth surrounding it. LAX should be constrained to its existing size or smaller & growth in passengers & flights should be migrated to other, regional airports.

*Expansion of other airports within the region expands capacity where population is growing. Expansion of other airports will provide greater choice for carriers and passengers. LAX is a valuable regional resource - don't stretch it beyond the limits of an airport already constrained by urban encroachment.*

*I do not believe that LAX should be expanded. The congestion and lack of parking facilities already create a critical problem. Access to LAX along I am already stressed Lincoln Blvd through Marina Del Rey will further tie up traffic. Noise east of the airport negatively affects residents. I am in favor of the Regional Plan, more smaller airport!*

*Traffic is horrible now on Sepulveda & Lincoln Blvds. We should be concerned with reducing growth size of LAX, not increasing it. I used to work as an Immigration Inspector at LAX. I quit because of the forced overtime to accommodate all the needs of the air port. Extra growth forces other agencies to meet the demands of the airport before they have adequate personnel. 75% of the passengers are going to other places in the L.A. area. I know this first hand after admitting them for six years. ~~Regional airports should be equipped to handle international flights or make LAX-international flights only.~~*

*We live right in the heart of LAX flight & traffic problems; they can't handle the existing air traffic - there is no expansion design that could solve existing problems - it ~~can~~ will only get worse. We have a coalition of So. Bay cities presently fighting FEA & LAX re flights not following flight patterns - pilots taking "shortcuts" over residential areas after midnight. We concur that regional control is the only plausible way to offer air traffic growth, which is needed now. ("Not in my backyard") To make this happen, Orange Co. needs to turn El Toro into an International Facility - that alone would take a tremendous load off of LAX. Long Beach could help, but is too close & could create flight safety problems.*

4/10/01 An International Airport should be located at Palmdale with adequate ground transportation from the outlying airports which would service domestic routes. The quality of life for anyone near the LAX area is truly nonexistent if expansion occurs. The traffic & noise pollution will truly be out of control. Our Blog has never been retrofitted yet.

*Has a study been done on whether people are coming from where they use LAX? What is of the passengers are from here, from Orange County, from Orange County, etc?*

*We were out of town when this arrived so our response is late. I feel that LAX should not be responsible for all of (much!) southern Calif. had other areas share in the noise and profits. I never was aware of airplanes noise from LAX jets until the last year or so. Sometimes the noise is continual and sometimes quite loud. I'm sure weather has a bit to do with that, but we don't need to ruin any more neighborhoods with noise. And traffic has intensified with the increase in housing density with no real open space or real parking as part of the increase plans.*

June 9, 2001

Congresswoman Jane Harman  
811 No. Catalina, Suite 1302  
Redondo Beach, Ca. 90277

Dear Mrs. Harman:

I want to thank you so very much for your work in trying to prevent the further expansion of this nightmare which Los Angeles calls LAX.

I moved to the East side of Manhattan Beach in 1975 from a townhouse in Cypress because of the nearly constant Helicopter/Police presence in adjacent Hawaiian Gardens night after night. Previous to that I was living in the house in which I was raised, West of the Long Beach Airport, where I clearly remember the terrible noise of war plane production flying directly overhead at very low altitude day after day during World War II and subsequently the Douglas Aircraft Jet noises. I tell you this so you will understand I tried to find a house without night airport noise, and I came to this house several nights prior to purchase to check for similar problems before signing on the dotted line!

Now, I wish I'd stayed in Cypress. In the past 25 years there has been a tremendous increase in Jet noise day and night. There are times when climate conditions are "right" that the house actually vibrates with the rumble coming from LAX. Rarely is there a night which goes by without interruption of sleep by an unusually low flying jet craft or Twin engine PropJet. Add to this the Coast Guard helicopter two or three times a day passage, or the Lifeguard helicopter taking the "boss" to lunch (just kidding) while flying about 150 feet over the house, and the weekend pilots in training coming from the Hawthorne Airport who don't know how to feather their prop and they buzz the entire area one after another. Oh yes! I nearly forgot. We not have a new menace; a few private, twin engine jets which probably take off from the small Hawthorne Airport and fly directly over the house at a very low altitude, climbing at full throttle.

The Airport Expansion will exacerbate these problem a thousand times and since Manhattan Beach is over 1 mile from the airport, we'll have little if any chance to receive city sponsored noise reduction as have my friends living closer to LAX. But even with noise reduction by friends can't go outside and carry on a conversation or just sit quietly reading in their own yards, listening to the birds! (unless those birds are silver) .

You completely correct that regional expansion will reduce pollution in the basin, provide quicker access to flights by the burgeoning population in the outlying counties, and give people lower fares. My coworkers in Orange County are all fighting the conversion of El Toro into a new regional airport. They clearly admit they do not want to deal with the noise increase flights from El Toro might have on their neighborhoods. Yet when they fly somewhere and pay personally - not with company money - they all want to fly from LAX where a \$400.00 ticket at John Wayne Airport in Orange County can be purchased for \$320 or less from LAX - same class. Naturally they drive to the airport, usually on the already overloaded 405 Fwy, and all complain at how bad traffic is on the "405" and how badly sections of the highway are deteriorating. Needless to say I'm really steamed about that whole situation. I just don't see the need to further damage the LAX, South Bay area with a needless increase in traffic and plane noise for persons who drive right past El Toro and John Wayne in Orange County and are clearly engaging in NIMBY at it's worst.

We do, Mrs. Harman, really need your help and I want to urge you to keep up the excellent work to develop alternatives to LAX expansion. As a citizen of this area I have been feeling helpless to do anything to stop the LAX powerful corporate interests who obviously thought they could cram this expansion down our throats. With you working for us there may be hope. I'm honored to say I voted for you and will do so again! Thank you, thank you, thank you.

Kindest Regards

FBS

July 17, 2001

The Honorable Jane Harmon  
229 Cannon Office Building  
Washington, D.C.

Re: LAX Expansion

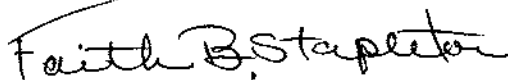

Dear Congresswoman Harmon:

Noise due to aircraft flying Northeast from LAX continues to adversely impact the quality of my life and well being. There is no way to sleep without interruption from jet as well as commuter type planes. The periods most intolerable are from ten pm to 2am and then from 5:45am to 9:30am.

Obviously I am OPPOSED to LAX expansion for these personal reasons as well as crowded skies, additional freeway traffic, and worst of all the excessive pollution which jets generate, and of course property devaluation.

Thank you for your continued support of Opposition to Expansion of LAX which is so totally propelled by greed.

Yours in Good Health,

Faith B. Stapleton

**Re: Comments on the Draft Los Angeles International Airport Master Plan and Draft Environmental Impact Statement/Environmental Impact Report**

Dear Mr. Ritchie and Mr. Kessler:

On behalf of the Natural Resources Defense Council ("NRDC") and its over 500,000 members, we submit these comments on the documents cited above.

In light of significantly changed circumstances since the draft EIS/EIS was circulated for public comment, we believe that the document should be withdrawn and a new EIS/EIR prepared. In the alternative, we request that a supplemental environmental impact report/statement addressing the implications of the September 11 attacks for the planned expansion of LAX be prepared before any decision on the project is made. Without any doubt, this extraordinary event constitutes significant new information that may fundamentally alter the plan as proposed and, indeed, may ultimately dictate a changed result. The implications of the attack for air travel and security issues are fundamental, as is the importance of meaningful public input on a project as significant as the proposed LAX expansion. Under these circumstances, additional environmental review and public comment is unquestionably required.

Without waiving these requests, we submit as an Attachment brief comments on the air quality and health assessment portions of the draft EIS/EIR as previously circulated for public comment.

Respectfully submitted,

Joel R. Reynolds  
Senior Attorney

## ATTACHMENT

The Air Quality and Human Health Risk Assessment portions of the LAX EIS/EIR raise a number of concerns:

### ***LAWA Should Not Take Credit for Mitigation Measures It Cannot Ensure***

LAWA cannot include or take credit for measures over which it has no control or enforcement, such as a requirement of all construction deliveries to be made with clean fuel vehicles. The modification of airplane operating procedures, which would contribute some of the largest emissions reductions, requires FAA approval. Other proposed measures, such as Intelligent Transportation Systems and traffic management programs require cooperation from MTA and Caltrans. LAWA's commitment to and control over the list of mitigation measures needs to be clarified. Finally, the Technical Report 4, Attachment X, which contains details about air quality mitigation measures, should be redone in a legible electronic rather than scanned form.

### ***The No Action/No Build Scenario Does Not Necessarily Mean Greater Public Risk***

We disagree that the No Action/No build scenario would generate greater air quality risks to the public. Most of the air quality improving measures included in the mitigation and Environmental Action plans could be implemented under this scenario without any changes to current runways. Therefore, the EIS/EIR statements, such as "All of the Master Plan build alternatives would be better, producing lower overall emissions, than the No Action/No Project alternative,"<sup>1</sup> are misleading and false. The appropriate comparison would be with a project that included air quality improvement measures but did not add any changes to the current runways.

The Human Health Risk Assessment goes one step further and states that the No Action/No Project Alternative "would cause maximally exposed individual cancer risks and non-cancer hazards to increase in all areas near LAX in both horizon years."<sup>2</sup> This statement could only be true if the mitigation measures were only applied to the three build alternatives. Again, most of those mitigation efforts could also be implemented without any new runway construction or expansion. In fact, health risks from the No Action/No Project Alternative may be significantly over stated, if the recent Fleet and Commercial Airport Ground Access rules were not incorporated into the emission inventory projections.<sup>3</sup>

### ***1997 Air Quality Standards Should Be Included in the Analysis:***

The air quality analysis in the EIS/EIR should include the ozone and fine particulate standards passed by the US EPA in 1997. The standards were unanimously upheld by the Supreme Court in February of this year. Regardless of the previous uncertain legal status of these standards, LAWA should have included analysis under the more protective standards, as a

<sup>1</sup> On-Airport Emissions Key Conclusions, page 4-460, LAX EIS/EIR

<sup>2</sup> 14a Human Health Risk Assessment Technical Report (HHRA), page 2, LAX EIS/EIR

<sup>3</sup> [http://www.aqmd.gov/news1/Fleet\\_Rule\\_Home.htm](http://www.aqmd.gov/news1/Fleet_Rule_Home.htm) and <http://www.aqmd.gov/rules/rulesreg.html>

conservative precaution. Now that these standards are slated for implementation, they must be used in the EIS/EIR.

Though the EIS/EIR included California Ambient Air Quality Standards (CAAQS), which are slightly more stringent than older national standards, the new national standards are even more protective of human health. Additionally, LAWA should be more sensitive to these concerns given the current "Extreme" nonattainment status of the Los Angeles area with respect to ozone and "Serious" status with respect to particulates.<sup>4</sup>

### ***The "Preferred Alternative" Would Violate Standards for Particulate Matter***

In the General Approach and Methodology section, it is stated that the current method to account for PM<sub>2.5</sub> is to use PM<sub>10</sub> as a surrogate.<sup>5</sup> If this is so, then both the construction and operational unmitigated emissions from all alternatives would exceed the new PM<sub>2.5</sub> standards by significant amounts ranging up to 550% for Alternative A during the peak of construction.<sup>6</sup> With the menu of mitigation efforts in place, all alternatives are still predicted to violate the new particulate standards. The preferred alternative is predicted to be at more than twice the standard during construction and full operation.<sup>7</sup> Nowhere in the EIS/EIR are these issues addressed.

### ***Proposed Mitigation for Particulate Matter and Ozone is Utterly Insufficient***

Despite the large problems with particulate emissions without mitigation, the mitigation efforts included in the plan reduce particulates the least of all the criteria pollutants, a nominal 5 to 7 percent compared to the up to one third reductions in carbon monoxide (CO). Estimates of particulate reductions are conspicuously missing from Table 4.6-16, which lists the reductions of NO<sub>x</sub>, VOC, and CO from mitigation measures. According to Table 4.6-6, stationary sources at LAX contribute significantly to total particulate emissions, accounting for 54 of the 159 tons per year of baseline (1996) emissions, however no mitigation measures are offered to address this large source category. LAWA should focus more attention on mitigation measures that lower particulates.

The EIS/EIR also fails to address the impacts of any alternatives on ozone, a major air quality problem in Los Angeles, in terms of meeting state and federal standards.

### ***Conformity Budgets Should Be Included:***

The emission levels predicted in the EIS/EIR from the preferred alternative are stated to trigger conformity requirements. However, the conformity analysis including these figures will not be available to the public for some time. Without this analysis, it is impossible to assess the feasibility of any alternatives. LAWA should, at a minimum, include in the EIS/EIR the

<sup>4</sup> "PM10" or PM with average diameter less than or equal to 10 microns.

<sup>5</sup> PM<sub>2.5</sub> are particulates with diameters less than or equal to 2.5 microns; page 4-462, LAX EIS/EIR

<sup>6</sup> Based on Table 4.6-13, LAX EIS/EIR; Calculation: (98 ug/m<sup>3</sup> - 15 ug/m<sup>3</sup>)/15ug/m<sup>3</sup>, Annual Arithmetic Mean (AAM)

<sup>7</sup> Based on Table 4.6-20, LAX EIS/EIR; 39 ug/m<sup>3</sup> and 34 ug/m<sup>3</sup> versus 15ug/m<sup>3</sup>, AAM

conformity emissions budget listed in the California State Implementation Plan (SIP), and compare the overall emissions projected in the LAX Master Plan to this budget.

***Questionable Emission Estimates for Toxic Air Pollutants:***

Although the consultants used a wide variety of referenced sources to construct emission profiles for all of the sources at LAX, the "surveys" that were used to obtain operational factors for all of the equipment were not referenced. It is unclear why a phase I set of emissions estimates was constructed for all sources and then later revised as phase II, only changing emission estimates for aircraft.

The report states that the Phase II emission estimates were "refined based on inspections at LAX and interviews with LAX tenants identified by LAWA." It is not clear how these inspections and interviews could cause emission estimates for some of the most toxic chemicals, such as 1,3-butadiene, acetaldehyde, acrolein, arsenic, benzene, cadmium, formaldehyde, lead and styrene to be adjusted downward, while other less toxic chemicals such as hexane, copper, nickel and zinc were increased. Lead, for example, was adjusted from an estimated 1,253 kilograms emitted per year from aircraft to 29 kg per year, with no footnoted explanation of anticipated jet fuel changes or any other such possibility. It is implausible that operational parameters could drastically decrease emission estimates for certain chemicals while increasing others.

***Emissions of Lead from Airport Activity Must Be Better Addressed:***

In the state of California, airports are the largest source of lead, accounting for 149 of the estimated 175 to 182 tons emitted per year.<sup>8</sup> Lead was listed by the state as a Toxic Air Contaminant (TAC) in 1997, and the Office of Environmental Health Hazard Assessment (OEHHA) recently selected lead as one of five TACs that may cause infants and children to be especially susceptible to illness.<sup>9</sup> OEHHA is currently reviewing lead standards to determine whether they are protective of children's health. The agency has already concluded that even airborne lead levels at one third of the current state standard could result in 10 percent of children having lead blood levels above official levels of concern set by the Center for Disease Control and Prevention.<sup>10</sup>

Considering these developments, the exclusion of lead from the air quality and human health risk assessment (HHRA) portions of the EIS/EIR is inappropriate. The EIS/EIR states that emissions of lead are "relatively low and would not contribute to a violation of the Pb NAAQS or CAAQS."<sup>11</sup> However, it is known that harmful effects of lead can occur from exposures below the ambient air quality standard. Since the lead standard was put in place over 20 years ago, it

<sup>8</sup> Proposed Identification of Inorganic Lead as a Toxic Air Contaminant, California Air Resources Board, March 1997.

<sup>9</sup> Under the Children's Environmental Health Protection Act (Senate Bill 25, Escutia; chaptered 1999) and (Health and Safety Code Sections 39669.5(a)); the five TACs were reviewed and endorsed by the Scientific Review Panel.

<sup>10</sup> OEHHA, Lead: Evaluation of Current California Air Quality Standards With Respect to Protection of Children, September 2000.

<sup>11</sup> Section 4.6.6 Environmental Consequences, page 4-482, LAX EIS/EIR

has become clear that lead is a potential human carcinogen and a strong neuro- and developmental toxicant at low levels.<sup>12</sup>

The screening report attached to the HHRA actually named lead as a "significant community health concern... released in significant quantities (2,941 kg/yr) from LAX."<sup>13</sup> It also stated that lead would be "retained as a TAP of potential concern," and the Air Quality report directs the reader to the HHRA for further analysis of lead. However, there it is stated that lead is predicted to be below the ambient standards and therefore eliminated from the analysis.<sup>14</sup> Because lead does not have a Reference Exposure Level (REL), as with other chemicals for which "toxicity criteria are not available," a quantitative toxicity screen was not conducted.<sup>15</sup> In fact, The California Air Resources Board has not yet set a REL for lead because they could not identify a threshold value below which exposure to lead is safe.<sup>16</sup>

The final risk analysis completely excludes noncancer effects of lead as well as cancer risks from lead despite the availability of cancer potency factors.<sup>17</sup> The EIS/EIR for LAX is unacceptable without further analysis of such a major threat to public health.

#### ***Health Risks are Underestimated:***

The Executive Summary of Human Health Risk Assessment states that "methods are used that are more likely to overestimate than underestimate possible health risks" and "risk estimates represent upper-bound predictions of exposure, and therefore health risk, that may be associated with living near, and breathing emissions from, LAX during and after implementation of the Master Plan." The risk assessment, however, upon closer examination, actually underestimates risk in many instances.

The assessment states "cancer risks were estimated for people who grow up and spend most of their adult life near the airport."<sup>18</sup> Consequently, the analysis was based on exposure durations of 30 years for adults and six years for children. This is counter to common risk assessment guidance recommending exposure durations of 70 years for lifetime cancer risk.<sup>19</sup> The resulting assessment, based on these low exposure duration values, underestimates exposure by over one half.

Inhalation Rates used in the analysis were also at the low end of the spectrum.<sup>20</sup> The US EPA Exposure Factors Handbook<sup>20</sup> recommends an average inhalation rate of 1.07 m<sup>3</sup>/hr, more

<sup>20</sup> Chapter 5, Table 7

than 70 percent higher than the 15 m<sup>3</sup>/day rate used in this assessment. The assessment also selected the highest average adult body weight, 70 kilograms (kg), which leads to further underestimates in weight-adjusted exposure. Guidance indicates that lifespan exposure analysis (0 to 70 years) should use an average body weight of 62-63 kg, depending on the source.<sup>21</sup> Additionally, if this assessment represents the most sensitive populations, it should use body weight factors for adult females, which range from 62-68 kg, according to EPA's Exposure Factor Handbook.

### ***Health Risk Assessment Based on Alternative C May Underestimate Risks from Other Alternatives***

The risk was also underestimated for the build alternatives under 2005 post-mitigation conditions, because it was based on Alternative C, which the assessment states is "essentially identical" to alternatives A and B.<sup>22</sup> Alternative C, however, would include the least construction activity of the three alternatives and therefore would represent the lowest risk of any alternative. Pre-mitigation analysis for 2005 did not state which alternative the modeling was based on; it was simply noted that all three build alternatives were "predicted to be similar."<sup>23</sup> Alternative B seems to produce the highest modeled concentrations of TAPs in 2015 for both pre- and post-mitigation conditions. Therefore, it would seem to be the logical choice as a conservative estimate for all three alternatives.

### ***Particulate Emissions from Aircraft Must Be Included***

Particulate emission estimates from aircraft should have been considered in the HHRA. It is merely mentioned that their exclusion leads to "uncertainty in the risk estimates presented";<sup>24</sup> it should have been clearly acknowledged that it led to a significant underestimation of risk. The Air Quality analysis stated that "The major sources of PM<sub>10</sub> emissions are aircraft engines (32 percent)..." while the HHRA states that aircraft are expected to emit "relatively little" PM.<sup>25</sup> This later statement is a contradiction and serves to minimize the impacts of the build alternatives which would include more aircraft activity.

Finally, the last section of the HHRA concedes that "incremental cancer risks after mitigation could be underestimated by about 60 percent." This is inconsistent with previous statements that this assessment represents the upper-bound of risk. Assumptions regarding mitigation measures should have been the most conservative, eliminating the uncertainty of underestimation of risk on such a large scale. Uncertainty regarding risk from diesel particulates, which account for a majority of the cancer risk, was not directly addressed. In fact, assumptions were buried in footnotes to two tables.<sup>26</sup>

<sup>21</sup> The CalTOX Model uses a body weight of 62 kg for child/adult combined analysis; OEHHA's Exposure Assessment and Stochastic Analysis uses 63 kg for age 0-70 analysis, according to Practices, Needs and Methodologies for Human Exposure Assessment at Cal/EPA, Table 4-4, February, 2001

Comments: I live by Sequoia Park in Monterey Park, which is situated on the highest hill in Monterey Park. The flight pattern has the planes flying directly over this area. When this happens, the noise is as loud as the planes approaching over Century Blvd. What compounds the noise is that my backyard over looks Monterey Pass Road, a Cañon below which amplifies this noise. The noise is non-existent if the planes fly about a mile south, over the Pomona Fwy (CA-60) which the planes ~~usually~~ sometimes do. If you can limit the plane to fly <sup>over</sup> ~~along~~ the CA-60 Fwy in MPK, the noise will be greatly reduced and affect a lot less people.

ANTELOPE VALLEY WILL GROW JUST AS THE CITY OF LOS ANGELES AND ALL THE LOWER LOS ANGELES AREA HAS GROWN IN MY LIFETIME THAT I HAVE LIVED HERE IN ANTELOPE VALLEY SINCE THE DORSETT FAMILY MOVED FROM INDIANA BACK IN 1913 AND SETTLED ON A HOMESTEAD 20 MILES WEST OF LANCASTER - WHEN THE LOS ANGELES REQUEDUIT WAS CONSTRUCTING THE NORTH PORTAL DAM AT FAIRMONT OAK F. THE REQUEDUTE WAS TO BRING WATER TO LOS ANGELES FROM SWENS VALLEY. THE PROJECT WAS COMPLETED AND THE WATER IS FLOWING TO LOS ANGELES TO THIS VERY DAY. IT WAS A VERY WONDERFUL PROJECT APPROVED BY A REKATION SMALL TOWN OF LOS ANGELES IN COMPANION WITH THE LOS ANGELES + SURROUNDING TOWN TODAY - THE ANTELOPE VALLEY DURING THE YEAR OF 1913 WAS ALMOST A AREA OF LARGE DRY FARMS AND CATTLE HEAD NUMBERING IN THE THOUSAND AND THOUSAND OF RANGE CATTLE. AT 18 YEARS OF AGE I WAS RIDING WITH THE COWBOYS NUMBERING INTO 20 TO 30 COWBOYS DRIVING CATTLE TO BE BRANDED AND AKTORD TO BE STEARS - THERE WAS NO NEED OF THE PALMDALE AIRPORT THEN AN SOME PEOPLE CAN NOT UNDERSTAND WHY WE DO NOW - SO I WOULD LIKE TO EXPLAIN

Comments: BACK IN THE EARLY DAY THERE WERE VERY FEW PEOPLE IN COMPARISON OF THE POPULATION TODAY - TO ILLUSTRATE THE GROWTH I WILL REHATE A STORY OF ONE OF THE BOY'S HORSE WAS IN NEED OF SHOES SO HE ASK THE PRICE FROM A OWNER OF A BLACKSMITH SHOP IN THE VERY SMALL TOWN OF LANCASTER IN 1913 - THE PRICE THE OWNER WAS \$8<sup>00</sup> FOR THE 4 HORSE SHOES - BUT IF HE WOULD RATHER PAY 1 PENNY THE FIRST NAIL AND DOUBLE IT FOR THE 32 NAIL HE COULD PAY THAT. WELL THAT SOUNDED GOOD TO THE COWBOY SO THAT WAS HIS CHOICE UNTIL HE FOUND OUT IT WAS IN THE MILLIONS.

IN LOS ANGELES + ALL THE CITIES THAT DEVELOPED SO FAST LIKE LONG BEACH + COASTAL CITIES AS WELL AS SAN FRANCISCO. AND ALL THAT AREA ONE PERSON CONVINCED A FRIEND THAT WAS THE PLACE TO GO - AND THAT IS WHAT HAS HAPPENED IN OUR GREAT ANTELOPE VALLEY AND LIKE ALL THE OTHER IN LAND CITIES. IT WILL DEVELOP AS EVERYONE TELLS OTHERS WHAT A WONDERFUL PLACE ANTELOPE VALLEY IS - AND AT THE WE ARE BUILDING ROADS AND FREEWAYS WE NEED THE PALM DATE AIRPORT NOW AND TIME IS OF THE IMPORTANT

The Honorable James K. Hahn  
Mayor of Los Angeles  
Los Angeles, CA

Dear Mayor Hahn:

The purpose of this letter and accompanying copy of my response to the Public Comments to LAX Master Plan and Draft EIS/EIR document is to acquaint and sensitize you to the impact that the over expansion of LAX has had on Inglewood, and how the proposed expansion will further destroy our already over burdened communities and their people.

I would hope that you will continue to be sensitive and compassionate to the people and the environment and will do what is just and right; showing courage and integrity when making decisions concerning further expansion of LAX.

Sincerely yours,

  
Martha Tiddle

cc; Lydia Kennard, Executive Director Los Angeles World Airports  
Congresswoman Maxine Waters (D-35)  
W. Withycombe, Regional Administrator FAA  
Ruth Galanter (D-6), L.A. City Council President  
Supervisor Yvonne Burke (Dist. 2)

Document:  Draft Master Plan  Draft EIS/EIR

Subsection (if applicable):  
 Number: Title: DRAFT LAX MASTER PLAN & EIS/EIR REPORT

Comments:

The Draft LAX Master Plan & Draft EIS/EIR Report for expansion of LAX presents the same concerns.

I. The Draft EIS/EIR does not satisfy Environmental Justice requirements.

A. It does not consider alternatives and other locations that would shift or distribute burdens of expansion more equitably and reduce risks to human health.

B. It unfairly and disproportionately burdens minority and low income communities that lie under the primary arrival flight path with significant impacts of noise and toxic air emission.

II. The Draft EIS/EIR fails to satisfy existing law because alternatives to LAX expansion have not been adequately explored or considered.

III. The Draft EIS/EIR improperly measures human health risk.

IV. The Draft EIS/EIR improperly measures noise increases.

A. LAWA's assertions regarding nighttime, "over-ocean" operations are wrong!

B. LAWA's noise exposure contours are understated.

C. It fails to consider the economic impact of the LAX Master Plan on continuous suffering of housing value due to the aggravation of existing and future noise; the decrease in recreational value of local parks and residential back yards.

V. The Draft EIS/EIR improperly analyzes the health effect of aircraft noise on human health.

A. It must consider the health effects of aircraft noise.

B. It needs to address aircraft noise interference and interruptions on human sleep.

C. It needs to address the negative impact on schools under the flight paths.

Attach additional sheets if necessary.

Official comments on the Draft LAX Master Plan and/or Draft EIS/EIR must be received no later than July 25, 2001.

The Draft LAX Master Plan and Draft EIS/EIR Report makes it clear that the expansion of LAX would unjustly, unfairly and unmercifully magnify the already over burdened conditions that have been imposed on Inglewood and surrounding communities over the last eight years because of the excessive increase in passenger and cargo air traffic.

Aircrafts are presently disproportionately flying over Inglewood neighborhoods, overly exposing its residents to noise and jet fuel that contains the carcinogen benzene, among other chemicals, resulting in undue health risk in our minority and low-income communities.

Mrs. Kennard stated, "Airplane engines run quieter now and we have directed that all take offs between midnight and 6 AM must be over the ocean to the west." The above is only true on paper. The "over-ocean" night time operations curfew is frequently ignored, almost none existing.

In the last four months there have not been more than ten nights when "over-ocean" night time curfew operations were observed. Most mornings, cargo planes start flying over around 2 or 3 AM. This is what a typical night is like for us; July 3, 01 - cargo planes started flying over at 2:44---4:19, 4:27, 4:37, 4:43, 4:48, 4:50, 5:09, 5:11, 5:17, 5:20, 5:29, 5:31, 5:35---on. It is impossible to sleep under these conditions. The noise hotline number has become a joke! The phone is usually off the hook, there is no answer or like this AM, 7/19/01, 3:20 I called. The phone was answered. I was immediately put on hold. I was treated as if, I am the problem! Jason, was very curt. I was told, "Yes, planes are coming in and this is normal operations, nothing out of the ordinary." After being on the phone for almost 20 minutes I hung up the fourth time I was put on hold because I could feel my blood pressure going up.

Quieter engines? These aircraft engines are quieter only if one does not live under these conditions twentyfour/seven. Over the last eight years these airplanes are sometimes three levels coming and going. Therefore, they are flying lower, they are noisier (you can hear every one) and they are closer together, lined up coming in. They are flying in all directions, in other than designated flight paths. I am supposedly not in a flight path, however, more and more planes are flying directly over my home. In addition to this constant over-head noise, more and more we are getting this continuous unbearable deep roaring, rumbling vibrating noise coming from the airport shaking windows during the day and at night. This is already a very stressful, troubling and dangerous situation; very deteriorating to the body, mind and spirit. This is much more than anyone should have to try to cope with. Where is the justice in all of this?

In regards to regional expansion. "Our decisions about whether LAX should be expanded or whether air traffic should be based

on environmental and transportation congestion impacts rather than the future economic impacts. The economic benefits to Southern CA are pretty much the same, no matter where in the region demand is met." City Councilwoman Ruth Galanter

"LAX cannot stand alone, every airport in the region, both existing and planned must do their fair share." Mrs. Kennard

"LAX is already one of the top three worst airports in the state of California when it comes to air pollution and noise."

"Expanding LAX would pound surrounding neighborhoods with pollution, noise and traffic gridlock."

"Constructing new cargo facilities, adding to the already cargo cult in and around the airport would increase traffic congestion and new cargo flights over the already over burdened city of Inglewood, would expose its residents to increased air pollution, including toxic dessal emissions."

"LAX isn't critical to the health of the regional economy. rather, the region should look to expan airports in other areas, such as Orange County's El Toro site." The wall Street Journal

El Toro still has one of the largest no housing noise buffer zones in Southern CA. Yet, El Toro airport opponents said that their neighbrohoods would be ruined by an airport at El Toro. They said that a "Great Park" is needed to keep a regional airport out of their back yards. "The average person here makes \$90,000 a year and lives in a \$400,000 home." Gordon

I say to you; It is all too sad that Gordon and those with like counciousness just don't get it. You need to look much deeper and know that the journey is truly about much more than "me, myself and I" and getting and having "material stuff". Even though it is not clear to you that one life (your's) is no more special or important, in the sceme of things, than another (mine). And whether you can believe it or not we in Inglewood, too; enjoy, desire and are just as deserving of peace, beauty, quality of life and being as anyone of you in Orange County in your \$400,000 homes and \$90,000 annual salaries.

I ask this question in all sincerity; Would this issue, LAX expansion, be on the table at this time if "we", people of color in Inglewood were living in Orange County and "they" were living here in Inglewood? I feel very strongly that if that was the case, Lax would have been constrained in its then current foot print years ago and El Toro Airport would now be developed and thriving.

Then L.A. Mayor Riordan stated; "it all comes down to if you want LAX to be competative. If you want LAX to be the leader of the trade in the next century, then you have to do it." He also said that the region would loose the opportunity for business growth. The region? Regional expansion immediately comes to my mind.

What I find missing here is compassion, sensitivity and care about other human beings or the very environment that sustains us all. His only concern is economic success. Did anyone ask the question; Is this the kind of success that is going to matter in the long run? What kind of glory is obtained and for how long when economic success is achieved at the expence of a people and the environment?

I say to Mr. Riordan and those with like consciousness, wiping out a people is wiping out a people whether at Auschirtz or a slow destruction of residents in communities around LAX by means of all the additional ill effects that already out grown, over taxed LAX would bring to our already over burdened communities.

What is happening to America? "More and more we are seeing greed and power replace principles and integrity in America's character, and there is less and less room for compassion. Increasingly we see America helps others when it serves America's power structure, America's richest elite and their collective assets. Loss of compassion is followed by loss of consciousness and this breeds indifference and a false superiority, whereby the plight of others come to be ignored. We forget that the egotistical and vain actions of man, individually and collectively, carries with it a sense of personal responsibility and impending disaster." America needs to wake-up before it is too late.

It was not coincidence that this nation rose to become the most prosperous on earth. If we don't wake-up soon we can loose all that so many worked so hard to create. Is it that collectively we are starting to turn to, "In power and money we trust", rather than, "In God We Trust?" Which is worst, knowledge without wisdom or power and money without understanding? We need a change of consciousness. We need good strong leaders with principles and integrity who are not afraid to stand-up for and do what is just and right.

I don't think anyone, coming from a common<sup>sense</sup> and just position, can honestly feel that this should be happening at all, (further expansion of LAX).

In closing, I ask you to think on the following:

Do you think that you would mind if you...

- . bought a beautiful home in Inglewood 34 years ago. maintained and improved it with the intention of retiring and enjoying your home and life. You take early retirement, take good care of yourself physically, mentally and spiritually then you realize that the quality of your life is being totally destroyed and the value of your property is being so depreciated you can't afford to sell and move even if you want to. This is all happening because of the over expansion of LAX over the last eight years
- . could no longer sit on your patio and enjoy the simple pleasure of reading the newspaper with a cup of tea

- . could no longer enjoy an outing in your large, beautiful back yard with family and friends
- . could no longer open your windows and doors and enjoy the cool ocean breeze, because of the excessive increase in aircraft noise over the last eight years
- . were no longer able to sleep nights with your bedroom window open (or closed) because of aircraft noise all through the night
- . could not function sometimes for days because of loss of sleep caused by noise from aircrafts flying over all through the night
- . have to leave your home some days just to get some relief from the constant aircraft noise
- . could no longer walk daily in your once beautiful neighborhood park because of the excessive increase in aircraft noise over the last eight years (there are two flight paths directly over the park and one on either side)
- . had the exterior of your home painted and a few months later it is blacken with aircraft fall-out
- . could go on and on; excessive health problems in our communities, learning problems in our schools, etc.

Do you think that you would mind living under these conditions 24 hours a day, seven days a week? YES, you would mind and so do we!

We do not need one more aircraft flying over Inglewood, nor do we need one more cargo facility added to the already "cargo-cult" in and around Inglewood. ENOUGH IS ENOUGH! What is going on here is unconscionable! Our communities are already overburdened and are carrying much more than any community should be burdened with. This is environmental injustice to the hilt! And it is asked; Why are we, people of color, angry?

Comments:

The Master Plan/EIS/EIR Report indicates noise and fudge stops and 118th Street. My pool is covered with fudge along w/ our vehicles. It should be mandatory that fuel organizations along with the City of Inglewood state on all documents to potential residence the conditions they will live in. The City of Inglewood has the worst, or, is in the top ten for terrible air qualities in the Countries. People are not educated to the fact what they think is smoke from the plane is actually fuel being dumped on us. I would have never moved here. Planes, meaning airlines, and stuff.

showing local government, with the exception of  
one, have sold England out. Apologizing for over  
the ocean take-off and landings. Please fly  
at 2:00 or 3:00 am, anytime they please. There is no  
regulation - especially since the 9/11 tragedy. That  
number to call makes me feel self-protecting. Yet  
my families health is at risk. Kids, and older  
people need quality sleep, and fresh air to breathe.  
I am ~~fully~~ against expansion.

We are also at higher risk for planes being shot  
down in our backyards to the 9/11 situation.

How can anyone think about expansion.

Comments:

In any state of a national economy and security, it is always a great beneficial to the public to have an airport that is well-planned for both air + ground traffic. An ideal airport should provide both convenience + safety measure.

Although, as far as I understand, safety is not your coverage, but I think it should be your utmost concern and you should be able to give maximum input of suggestion to the Government.

**RE: Comments on the Draft EIS/EIR for LAX**

Dear Mr. Ritchie and Mr. Kessler:

Heal the Bay is an environmental group with over 10,000 members dedicated to making Santa Monica Bay and Southern California coastal waters safe and healthy again for people and marine life. Although the preferred alternative for LAX will change dramatically based on the events of September 11<sup>th</sup>, the following comments should remain pertinent regardless. For the record, Heal the Bay strongly believes that additional environmental review and a detailed description of Mayor Hahn's LAX proposal is necessary to assess the environmental impacts and the adequacy of proposed mitigation. We believe that this review is required under CEQA and NEPA.

**1. The draft EIR/EIS fails to consider metal pollutants of concern in the stormwater pollutant loading analysis.**

The two water bodies that receive stormwater from LAX include the Santa Monica Bay and Dominguez Channel, both of which are too polluted to support their beneficial uses due to excessive amounts of metals. The Santa Monica Bay is listed on the 303(d) list as impaired due to excessive amounts of metals including cadmium, chromium, mercury, copper, lead, nickel, silver, and zinc. The Dominguez Channel is listed as impaired due to metal loadings of chromium, copper, lead, and zinc. Although the draft EIR/EIS discusses the stormwater loadings of zinc, copper, and lead, the document fails to assess the additional pollutant loadings of cadmium, chromium, mercury, nickel, and silver. Cadmium, chromium, mercury, nickel, and silver are highly toxic to marine life. The California Toxic Rule<sup>1</sup>, promulgated by the U.S. EPA, sets concentration limits for these metals along with lead, copper, and zinc,

<sup>1</sup> The CTR sets toxicity limits for freshwater and saltwater waterbodies for cadmium, chromium, nickel, silver, lead, copper, and zinc. 40 CFR Part 131.

above which there is a significant risk to aquatic organism in water and their uses. Given the various airport activities that are potential sources of these metals such as wear-down of airplane brake pads, metal engine parts, and airplane and vehicle tires, the draft EIR/EIS must estimate the loadings of these metals and assess the environmental impacts associated with the discharge of these pollutants into the receiving waters.

The reason for not assessing these pollutants provided in the draft EIR/EIS is inadequate. The document states only zinc, copper, and lead were considered because these were found in higher concentrations relative to other metals in the stormwater monitoring data collected by the County of Los Angeles Department of Public Works as part of the municipal stormwater permit requirements (page 22 of Part 6 -Hydrology and Water Quality Technical Report). This reasoning is faulty for three reasons. First, the municipal stormwater monitoring results do not characterize runoff from airport- associated land uses and cannot be considered to represent the runoff discharged from LAX. Second, the detection limits of the analytical methods used to obtain the Los Angeles County stormwater data were typically many times greater than the levels at which these metals are toxicity to aquatic life and humans, and are greater than the minimum levels defined as acceptable detection limits in the State Implementation Plan for the CTR<sup>2</sup>. And finally, because metals can accumulate in sediment and bioaccumulate in aquatic organisms, the total loading of these constituents is equally important to the concentration found in the stormwater. Thus, even if the concentrations of cadmium, chromium, mercury, nickel, and silver were lower than the concentrations of copper, lead, and zinc, because of the large amount of impervious surface associated with the alternative projects and the large volume of stormwater runoff, the total loadings of these constituents to the receiving waters must be considered in addition to their concentrations in stormwater.

**2. The draft EIS/EIR failed to estimate the stormwater loadings of polycyclic aromatic hydrocarbons (PAHS) and benzene, toluene, ethyl benzene, and xylene (BTEX), and to assess the water quality impacts associated with the discharge of these pollutants to the receiving waters.**

The primary source of PAHs to stormwater is likely aerial deposition of the products of incomplete combustion associated with car, truck and jet engines. Given the large amount of combustion engines associated with the project alternatives, the activities associated with the proposed project will significantly increase the loading of PAHs to the Santa Monica Bay and Dominguez Channel. Dominguez Channel is already too pollutant to support it's designated beneficial uses due to excessive amounts of PAHs.

PAHs are of a significant concern because they are toxic to humans at very low levels and can bioaccumulate in aquatic organisms. The California Toxic Rule sets limits

---

<sup>2</sup>Policy for Implementation of Toxics Standards for Inland Surface Waters, Enclosed Bay, and Estuaries of California, State Water Resources Control Board. May 2000.

water quality limits for the human consumption of water and organisms, and for organisms. The Dominguez Channel Estuary and Santa Monica Bay are used for fishing and the Santa Monica Bay is used for shellfishing. The draft EIR/EIS should estimate the PAH concentrations and total loading in the stormwater discharge from the proposed alternatives and assess the impacts to aquatic life and human health, and to commercial fisheries and shellfishing areas located within the receiving waters.

The draft EIS/EIR also did not estimate the stormwater loadings of BTEX, constituents found in gasoline and jet fuel. Clearly, the proposed project will be a source of these pollutants through the discharge of stormwater. These pollutants are toxic to humans and marine life. Clearly, to adequately assess the environment impacts of the proposed project, the impacts associated with the discharge of these pollutants to the receiving waters must be assessed.

**3. The draft EIS/EIR fails to consider the impacts of the cumulative pollutant loadings associated with the storm water discharge to the receiving waters.**

Metals and PAHs accumulate in sediment and bioaccumulate in aquatic organisms. Both Santa Monica Bay and Dominguez Channel are listed on the State's 303(d) list as impaired due sediment toxicity and benthic community effects, respectively. In addition, the Dominguez Channel is listed as impaired due to the excessive buildup of metals in fish tissue. The draft EIS/EIR does not consider the cumulative loading of these pollutants over of the expected life of the various project alternatives. For example, if Alternative C has an expected life of 20 years beyond 2015, the total loading for copper, lead, and zinc into the Santa Monica Bay is estimated to be 4,400 lb., 1,420 lb., and 28,000 lb, respectively. What is the impact of these large pollutant loadings to the benthic communities in the Santa Monica Bay and the human health impacts associated with consuming fish and shellfish harvested from the Bay? What are the impacts of these loadings to Dominguez Channel, a waterbody already severely impaired due to excessive amounts of metals?

**4. The estimates of stormwater pollutant loadings are inadequate because only the average rainfall amounts were considered.**

A complete analysis of the stormwater pollutant loadings should include estimates of pollutant loadings from the 90<sup>th</sup> percentile storm. The EIR/EIS should assess the impacts associated with these loadings.

**5. The Master Plan commitment HWQ-1 appears to be inadequate to mitigate the impacts associated with pollutant stormwater runoff because pollutant concentrations are not addressed.**

The proposed mitigation (Master Plan Commitment HWQ-1) of the increase in stormwater pollutant loading is to implement BMPs to ensure no net increase in pollutant loadings above baseline levels. Limiting pollution loading to pre-project levels will not mitigate the water quality impacts associated with the stormwater runoff because the concentrations of lead, copper and zinc in the stormwater are

estimated to be many times greater than the toxicity levels set in the California Toxic Rule for aquatic organisms. Thus, as proposed, the stormwater runoff may cause toxicity in the receiving waters, both of which are already impaired due to excessive levels of copper, lead, and zinc, despite any mitigation efforts to ensure no net increase in stormwater pollutant loadings.

As shown in the table below, based on the information on annual runoff and metal pollutant loading provided in the draft EIR/EIS, the stormwater runoff discharged from the preferred alternative C project is estimated to contain concentrations of lead, copper, and zinc many times over the level at which these pollutants are toxic to aquatic organisms. For example, concentrations of copper estimated to be in the stormwater discharge from alternative C are estimated to be 476 times greater than the concentration that will cause toxicity to aquatic organisms in the Santa Monica Bay. Clearly, even if the alternative C includes BMPs that reduce that result in no net gain of pollutant loadings, the stormwater runoff leaving the project site will have metal concentrations that will contribute to toxicity in the receiving waters.

### Comparison of Estimated Metals Concentrations in Stormwater Discharge from Alternative C 20015

Pollutants	Loads(lb/yr) <sup>1</sup>	Runoff(ft <sup>3</sup> /yr) <sup>2</sup>	Estimated Stormwater concentrations (ug/l)	CTR toxicity level (ug/l) <sup>3</sup>	Stormwater - to-CTR ratio
<b>Santa Monica Bay</b>					
copper	222	80387162	1474	3.1	476
lead	71	80387162	472	8.1	58
zinc	1399	80387162	9292	81	115
<b>Dominguez Channel</b>					
copper	139	50071549	1482	9	165
lead	46	50071549	490	2.5	196
zinc	907	50071549	9671	120	81

1. Pollutant loads from draft EIR/EIS Table 17, page 38 of Part 6 – Hydrology and Water Quality Technical Report.
2. Annual Stormwater runoff from Table D-19, Part 6 – Hydrology and Water Quality Technical Report.
3. California Toxic Rule, 40 CFR Part 131. Saltwater values used for Santa Monica Bay. Freshwater values used for Dominguez Channel.

### 6. The current description of the BMPs that will be implemented to fulfill the Master Plan Commitment HWQ-1 is woefully insufficient.

The draft EIS/EIR states the Master Plan Commitment HWQ-1 is to design the storm water system to meet

- a) The requirements in Los Angeles County's SUSMP through incorporation of source control, structural, and treatment control BMPs, and
- b) these BMPs will be designed to achieve "no net gain in pollutant loads discharged to receiving water bodies."

Given the significant size of the proposed project alternatives and the number of different types of land uses the project will encompass, design and implementation of

3220 Nebraska Avenue  
Santa Monica CA 90404

ph 310 453 0395  
fax 310 453 7927

info@healththebay.org  
www.healththebay.org

BMPs will be a significant part of the project. However, there are no details provided on the specific types of BMPs that will be installed, their locations in the project, who will maintain them and how they will be monitored to determine whether the HWQ-1 goals are met. In addition, there is no discussion of how the "no increase in net loading" promise will be kept during years of high rainfall.

Since the pollutant loadings from the proposed alternatives are large and the potential impacts to the receiving waters significant, the EIS/EIR cannot adequately assess the water quality impacts of the proposed alternatives without a more comprehensive and detailed discussion of the feasibility to design BMPs that will ensure no net increase in pollutant loadings.

#### **7. The draft EIS/EIR fails to assess the water quality impacts associated with the aerial deposition of contaminants from the project operations.**

One of Heal the Bay's biggest concerns is the lack of a scientific analysis on the impacts of LAX expansion on aerial deposition of contaminants in the Los Angeles Basin. Heal the Bay is greatly concerned about the impacts of LAX expansion on pollutant loadings to Santa Monica Bay and the tributaries discharging to the Bay. Aerially deposited contaminants can either land in the Bay directly or on hard surfaces that get scoured during a rain. All of these contaminants get discharged to Santa Monica Bay without any treatment whatsoever. The Southern California Coastal Water Research Project has performed numerous studies over the last twenty years that have demonstrated that both dry-weather and stormwater runoff from Ballona Creek (adjacent to LAX) is toxic to marine life. In fact, both Ballona Creek and Santa Monica Bay are listed on California's S.303d list as impaired water bodies for a wide variety of pollutants including heavy metals, PAHs and toxicity. In addition, all land east of Sepulveda Blvd. drains to Dominguez channel, the most polluted water body in the Los Angeles/Ventura County region.

Recently, UCLA and SCCWRP researchers released a report entitled *Measuring and Modeling of Atmospheric Deposition on Santa Monica Bay and the Santa Monica Bay Watershed* to the Santa Monica Bay Restoration Project (Stolzenbach et al., 2001). Researchers found that the annual rate of atmospheric deposition of trace metals was significant (up to 50% for some metals) in comparison to other inputs of metals (sewage treatment plants, the Chevron refinery) to the Bay. They also found that the annual total of atmospheric deposition of metals to the Santa Monica Bay watershed and the Bay was predominantly the result of daily dry deposition throughout the year, not the result of Santa Ana conditions or wet deposition.

This was the first significant study of aerial deposition of contaminants in the Southern California. Due to funding constraints, the study focused on the Santa Monica Bay watershed as a whole, and not on individual point sources of contaminants. Also, the study focused on metals with very little effort to assess the aerial deposition of organics to the watershed and the Bay. Both of these issues are of

3220 Nebraska Avenue  
Santa Monica CA 90404

ph 310 453 0395  
fax 310 453 7927

info@healthebay.org  
www.healthebay.org

great concern because LAX is a major source of aeriaily deposited contaminants to Santa Monica Bay and the watershed.

Within this D-EIS/EIR LAX should have assessed their current impacts on aerial deposition within the Santa Monica Bay watershed, the Bay, and the Los Angeles Basin as a whole. While the UCLA-SCCWRP aerial deposition study was being designed, LAX was approached to provide funding to assess the role of the airport on aerial deposition in the watershed and to the Bay. For whatever reason, LAX chose not to provide additional funding for the study so the impacts of the airport, arguably the largest single source of aeriaily deposited contaminants to the Bay, was not assessed. Unfortunately, without data on the current contribution of aeriaily deposited contaminants to the Bay and watershed, it is impossible to accurately estimate the impacts of LAX expansion on pollutant loadings to the watershed and the Bay. Heal the Bay strongly urges LAX to fund a specific component of UCLA's follow-up study in order to assess LAX's environmental impacts on pollutant loadings to Santa Monica Bay. Phase II of the study will begin very soon.

As you know, Santa Monica Bay, Ballona Creek and Dominguez Channel are all listed as impaired for a variety of contaminants on California's S.303d list. As such, Total Maximum Daily Loads (TMDLs) must be developed for all contaminants in these waterbodies. Estimates of pollutant loads from LAX to these receiving waters will be a critical portion of these TMDLs. There is a strong possibility that LAX will get assigned Waste Load Allocations for heavy metals, PAHs and maybe even toxicity as part of these TMDLs. The TMDL approach leads to reductions in pollutant loads to impaired water bodies, not increases. Any alternative for LAX expansion must take in to account the TMDL process, loadings from aerial deposition, and the need to reduce contaminant loads to impaired waters. The D-EIS/EIR does not take any of these issues in to account and certainly does not include an assessment of the impacts of any of the LAX alternatives on these critical water quality issues.

Sincerely,

Mitzy Taggart

Re: LAX Expansion

Gentlemen:

My husband and I are 20-year residents of Westchester, and as concerned neighbors of LAX, we've been involved in one way or another in the battle against the continuing onslaught by LAX to completely swallow up our community. There are many technical inaccuracies in the Riordan LAX Master Plan, most of which have been articulated by people far more knowledgeable than me.

Nevertheless, I would like the record to reflect our disapproval of the referenced EIR/EIS, as well as the naïve approach taken by our newly-elected Mayor James Hahn. Former Mayor Riordan's 12,000 page report does not adequately address safety issues, even pre-terrorist attacks. The placement of National Guard Troops at our airports are merely for good PR, and offer little deterrent to determined suicidal zealots. Unless and until all baggage, including that which is placed in the cargo hold of the plane, is thoroughly examined by whatever means is necessary (CT scan, human checking, etc.), and every bag is matched to a passenger boarding the plane, our safety is in jeopardy.

There has been talk about "renovating" LAX for security purposes. PLEASE... Everyone is aware that renovation is a euphemism for expansion!

We cannot understand the reasons behind proposing the federalization of baggage screeners. The public finds little comfort in that fact for the simple reasons that the "FEDERAL" Aviation Administration (FAA) has whined about LAX's poor safety record vis-à-vis near misses on runways, yet it has not had the will to regulate flights into and out of LAX. Unless the FAA and LAWA have the courage to stop pandering to the airlines, our airport will never be safe because at the rate we've been going, if the terrorists don't get us, we'll get ourselves!

And by the way, wasn't it the "FEDERAL" Bureau of Investigation (FBI) that has had major security breaches within its own ranks due to complacency?

What about increased traffic, both in the air and on the ground, which of course translates into more noise and pollution?

PC02595

Mr. Jim Ritchie, Deputy Executive Director  
and Mr. David B. Kessler, AICP  
November 6, 2001  
Page Two

Mayor Hahn's commitment to limit growth at LAX flies in the face of his appointments to the Board of Airport Commissioners, having reappointed several of Former Mayor Riordan's appointees, who by the way, have been PRO-LAX Expansion, but who now claim to have abdicated their convictions about the necessity to expand LAX in order to follow their new leader. Why do we have Airport Commissioners if they are there simply to do the bidding of the Mayor?

Further, Mayor Hahn's expectation that any meaningful dialogue can be engaged in with respect to his new alternative proposal when only an abstraction has been presented to the public. Incidentally, we may not have the clout or credentials of constituents in certain other parts of Los Angeles, but we should not be underestimated and insulted.

California has always been a leader... we led the movement towards cleaner car emissions, and the nation as well as other countries followed. Because smoking was banned on flights originating in and bound for California, other states and countries have followed our lead.

Now it's our turn to follow the standards set by other countries in the area of airport security.

We respectfully request that the existing EIR/EIS be declared obsolete, and we welcome the opportunity to become involved in real dialogue with any and all agencies who would be willing to explore a truly regional solution to our air traffic dilemma.

Sincerely yours,

November 9, 2001

Dear Jim Ritchie,

As longtime residents of Westchester, all of our families have put their hearts and souls into making this community comfortable to live in. With each one of the airport additions, we have tried to work them into our lives. But now, it seems like it is all going to be taken away from us, if the proposed expansion takes place. The future of Westchester and El Segundo and other heavily populated communities around us, all hang in the balance. Is there no end to it ?

Since the events of September 11<sup>th</sup>, we are even more concerned than ever. In the event of an attack on LAX, especially if there is added expansion or more air traffic, it could cost us and our nation, loss of life, even beyond that of the Twin Towers disaster in New York. Too large of an airport, with all the surrounding communities, makes us a 'sitting duck' for a terrorist attack.

If any of us were able to survive, it would become almost impossible to start all over again. Many of us here, have been dedicated to helping each other for more than 50 years now. In recent years, we have been attracting numerous younger families with their children, who are also delighted with the sense of an untroubled community, as well. They are looking forward to a comfortable place to live and grow.

It seems like the wise thing to do, would be to follow the example of several other major airports in the United States that have limited their sizes or relocated their sites. Denver, Chicago and New York, all had similar problems, and they finally moved their major facilities about 20-30 miles outside of the city limits.

The ideal spot for a major Los Angeles airport for the city, could be in Palmdale, just to the north of us, which already has good runways. It will probably never out grow itself there. It ought to be more convenient for dispersing cargo shipments too. A short rail system could be set up to transport people, through or over the mountains, where a central receiving station could be located on the city side to disperse passengers to all parts of the Los Angeles basin. Then so many passengers wouldn't have to drive so far to get to LAX.

The Los Angeles basin has enough other airports in other outlying areas of southern California that should help to carry their own load, in order relieve our terrible congestion. Also, March Air Force Base, in the inland empire, has good runways too, which is still sitting empty.

LAX is long over due for a location change, in order to allow for expansion !

PC02596

Most of us have felt comfortable with an airport that was a reasonable size. But as LAX keeps expanding, we have been forced to tolerate each new addition and our concerns and requests have been completely ignored. This final push for another runway will eventually take away all we have worked for, as well as our sanity. The latest expansion plans for the airport will completely destroy our communities !

Our loss will be great, at least 250 businesses will be taken from us, and we will be forced to drive greater distances to buy food and other necessities. We will be left with only about a two city blocks wide downtown district. And if the LA Department of Transportation gets it's way to widen Sepulveda Boulevard to 8 lanes, and remove more businesses, Westchester will almost be wiped out !

With more jumbo jets arriving and taking off, 'around the clock', and almost on top of us, it will be extremely difficult for our schools and universities, to operate, and church services to be held. The few shops that will be left, will have a hard time trying to survive. So many people will be out of jobs. Sound proofing our homes hasn't help a lot either, and we might as well forget about relaxing in our back yards. Presently, sound levels already reach 65 decibels.

Many long time residents have been driven out of their homes and forced to relocate, due to this continual expansion all along the airport corridors. The surrounding communities are also affected by a constant spray of a soot and oily residue from the jets exhaust. It settles on cars, pitting the paint, and on homes and plants, even floating on the water in swimming pools and fish ponds, causing damage and excess upkeep.

Trying to breathe fresh air is often difficult, adding to the residents Asthma and other respiratory problems, partially caused by this exhaust residue, which saturates the air around us. Before recent events, traffic was already beginning to be a major problem, also, with so much congestion on all the highways by people driving from all over the city to catch flights.

As far as the noise at night goes, I wish someone from the Airport Commission would come to my house, just to hear the roar of engines that we have to put up with during a 24-hour period. It's bad enough now, but can you imagine how unbearable it will be with closer runways and more aircraft over our neighborhoods, especially for those people who live closest to the north runway? Not much attention is paid to the night curfew issue, either. Of course, during this tragic time, I can understand why flight schedules are very unusual.

Why can't we just be good neighbors and have a community, friendly airport (without the latest north runway)? Everyone would happier and healthier again. Palmdale could be a life saver !

Re: Draft EIS/EIR Comments

After careful consideration, and review of several portions of the extensive Draft EIS/EIR document, on September 20, 2001 I submitted an eight-page letter presenting my comments and criticisms of LAWA LAX expansion proposals. I have since read that, motivated by the change in our world caused by the September terrorist attacks, fundamental changes in the proposals are now under consideration. I am not aware that details of any such changes have been made public. LAWA cannot proceed with major airport modifications or expansion without providing the public an opportunity to review and comment. LAWA must offer a new, detailed, and complete plan for public comment. To do otherwise would violate the trust placed in our governing bodies, and might well be illegal. I do not want my tax dollars spent in court trying to justify a program that I've not even had an opportunity to review.

Sincerely,

Russell A. Lund, Ph.D., P.E.

# Los Angeles Business Advisors

**SAM P. BELL**  
President

November 8, 2001

Mr. Jim Ritchie  
Deputy Executive Director  
Los Angeles World Airports  
P.O. Box 92216  
Los Angeles, CA 90009-2216

Dear Mr. Ritchie;

The Los Angeles Business Advisors considers adequate air transportation capacity in Southern California to be a very high priority. Clearly we are one interdependent economy that must engage in a competitive global economy where convenient and accessible air transportation is a vital necessity. Regardless of the ultimate configuration of a regional airport system, LAX will remain the primary international hub in Southern California.

We support prioritizing security and safety as the modernization process of LAX progresses. When the final details of the revised project are unveiled we will respond more specifically. In conclusion, we are pleased that the Mayor and Los Angeles World Airport staff has moved expeditiously in responding to a crisis in civilian aviation.

Sincerely,

Sam P. Bell

SPB/kg

November 8, 2001

Mr. Jim Ritchie  
LAX Master Plan

Dear Sir:

In light of heightened security concerns for LAX after Sept. 11th's events, I support a combination of Mayor Fahn's Alternative 5 Proposal + regional airport expansion Plan for the LAX master Plan.

The features I support in Mayor Fahn's proposal include:

1. Capping LAX at 78 million annual passengers
2. No ring road
3. No western Terminal
4. Removing parking lots in the Central Terminal area
5. Constructing a New "check-in" bldg. with parking east of CTA
6. Moving runways further apart

I do not support the extension of the No. Runway over Sepulveda Blvd, causing the loss of some Neilson Pk. homes + partial loss of Westchester's Central Business District.

Secondly, since the population is growing faster near proposed regional airports (Ontario, Palmdale, Orange Cty., etc.) than near LAX (according to U.S. Census + SO. CA. Association of Governments data), it would be very sensible to have airports in these areas absorb some of the expansion proposed for LAX.

Please do your best when discussing <sup>the</sup> Alternative 5

**RECEIVED** <sup>the</sup> LAX Master Plan  
Proposed with Mayor Hahn to delete expansion  
of the ~~North~~ runway over Sepulveda and to  
promote a plan of regional expansion  
instead of a mammoth LAX expansion.  
As a homeowner and voter here in  
Westchester, I want our community  
not to be spoiled with additional  
traffic and <sup>noise</sup> air pollution, resulting  
from an unwise LAX expansion.

Thank you for your help.

Sincerely yours,  
Jeanine F. Sheehan  
7948 Agnew Ave.  
Los Angeles, CA 90045

P.S. My husband & I voted for Mayor Hahn.

City of Los Angeles  
Los Angeles World Airports  
AWP-611.2  
Post Office Box 92216  
Los Angeles, CA 90009-2216

Dear Mr. Ritchie -

I have already written to you, opposing the LAX Expansion, but I am writing again, because additional considerations have evolved as a result of the September 11<sup>th</sup> World Trade Center attacks. Many people in this area feel as I do, that expanding LAX would make our area more of a target for terrorists, which is the last thing we want! In addition, with the airlines doing so poorly, and people being reluctant to fly, expanding at a time like this would be ridiculous.

Mayor Hahn has tacked on an "Option 5" plan, which he claims focuses on security, rather than expansion. However, his plan would still allow for raising capacity to 78 million, when the all-time high was 67 million, or 27 million over current capacity! If we raise capacity by almost 100%, how many people will REALLY be coming through our airport? How will the increase in jet fuel and car exhaust affect those of us who breathe this air every day? Why should our neighborhood bear the weight of more pollution and traffic congestion, not to mention more lost homes, when there are outlying areas eager to share in a plan for a regional solution?

I strongly resent the fact that Mayor Hahn has tried to push this fifth plan through at the last minute, tacking it onto the Master Plan - without an EIR, or any consultation with members of the community this will affect most. Last-minute hearings on the plan were scheduled for this week, but not one was held in Westchester. I feel he has shown a complete lack of consideration for our community, and I find it hard to believe that throwing in this eleventh-hour plan is even legal!

Please listen to our voices, even though our mayor won't.

Sincerely,

*Cathy Lindsay*

And

REFERENCE: U.S. EPA's Detailed Comments on DEIS/R for LAX Master Plan Improvements - September 24, 2001 with Letter dated September 24, 2001 from Enrique Manzanilla, Director, Cross Media Division, U.S. Environmental Protection Agency to William C. Withycombe, Regional Administrator, FAA Western-Pacific Region.

The following comments are submitted to be included in the public record of the LAX Draft Master Plan and Draft EIS/EIR.

The September 24<sup>th</sup> letter from Mr. Manzanilla to Mr. Withycombe states that:

1. All three action alternatives, as well as No Action, cause violations of the National Ambient Air Quality Standards;
2. The DEIS/R acknowledges high adverse impacts from aircraft noise;
3. There are potential adverse health effects from air pollution increases, especially diesel particulates;
4. The LAX Master Plan proposals fail to fully analyze a regionally-based alternative.

These serious objections, as well as others specified in the cited documents, should be given full consideration.

A new plan for LAX must be prepared based on a regional Southern California solution encompassing a three-county or a five-county area.

P. O. Box 92216  
Los Angeles, CA 90009-2216

REFERENCE: LAX Draft Master Plan and Draft EIS/EIR

The following comments are submitted to be included in the public record of the captioned proposals.

Los Angeles International Airport is endangering public health and safety in at least two major ways.

Surface streets near LAX are gridlocked already, so expansion of the airport is more than impractical, it is foolhardy. Also, the 405 Freeway, the main multi-lane highway to LAX, is already at capacity. After the September 11<sup>th</sup> terrorist attacks during the several days LAX was closed or offering limited service, traffic on the local streets and the 405 Freeway was vastly reduced. Local street traffic was reduced by 60% and 405 Freeway traffic by 40%, according to one estimate.

It is obvious that LAWA cannot handle more passenger and cargo planes at LAX because access to the airport is gridlocked already.

Similar congestion exists in the airspace over the central and western part of Los Angeles because of excess volume flying into LAX.

The congestion on the streets, highways and in the air are putting thousands of citizens at risk daily from airplane crashes, traffic accidents, air pollution and noise impact.

Withycombe, Regional Administrator, FAA Western-Pacific Region.

The following comments are submitted to be included in the public record of the LAX Draft Master Plan and Draft EIS/EIR.

The pollution produced by LAX can injure and kill people. The referenced documents from the EPA prove that LAX, even with no expansion, inflicts upon residents of the area dangerously unhealthy air.

The LAX Master Plan and all five of the Alternatives are totally unacceptable. They should be completely removed from consideration on the basis of environmental evidence alone.

A new plan for LAX, conforming to existing clean standards, must be prepared.

REFERENCE: LAX Draft Master Plan and Draft EIS/EIR

The following comments are submitted to be included in the public record of the captioned proposals.

Alternative 5 patches some revisions on the LAX Master Plan in a feeble attempt to redeem it.

The Los Angeles area needs a safe airport, with a guaranteed cap of no more than 65 MAP. The 78 MAP in Alternative 5 will not relieve the over-crowded airspace. Therefore, Alternative 5 is unacceptable.

Alternatives A, B and C are unworkable. The No Action/No Project Alternative wrongly allows existing projects and excessive MAP.

Thus, it is obvious that the LAX Master Plan is a flawed concept. The LAX Master Plan and all of its five alternatives should be completely abandoned.

JIM RITCHIE  
City of Los Angeles  
Lawa  
Master Plan Office  
P.O. Box 92216  
Los Angeles, CA 90009-2216

Dear Mr. Ritchie,

Comments pertaining to the EIS/EIR

#1. Project the number of passengers, number of aircraft operations, amount of cargo tonnage, etc. that would exist in the year 2015 if no LAX expansion takes place.

#2. Project the number of potential job losses or gains if one of the four expansion project is not adopted.

FAA regulations require that the 'total proposal' be considered. The regulations state the "total proposal includes the proposed action and all other actions reasonably related to it in time and probability." On this basis I have the following questions and comments. The EIR/EIS should address any mitigation activity they might incorporate as a result of the LAX Master Plan evolution.

#3. What will be the landing and takeoff patterns for all alternatives?

#4. What will be the impacts and mitigation measures for any change in landing and takeoff flight paths?

#5. What will the environmental impact be when more commuter planes are jets and carry 50 or more passengers on any proposed runway used for primarily commuter aircraft? What mitigation measures will be implemented?

#6. What affect will the increase capacity of LAX have on over ocean takeoff and landing procedures from 12:00 a.m. to 6:30 a.m.? Will this over ocean window be decreased as a result of increased operations?

#7. What affect will increased aircraft traffic have on preferential runway utilization of 24R and 25L?

#8. Will a potential new Primarily Commuter Runway be used for west to east takeoffs in inclement weather? If so what will be the landing and takeoff flight path patterns?

What will be the mitigation procedures?

A. How about flyovers and wave offs of possible west to east landings?

What will be the mitigation procedures?

B. How about flyovers and wave offs of east to west landings? What will be the mitigation procedures?

C. Where will the air traffic controller direct those aircraft to fly? Where will the flight paths be located?

D. What size planes would be able to use the so-called commuter runways? (727, A320, 757, etc.)

#9. What effect will the changing of the landing and takeoff thresholds have in changing the noise contours and the distribution of polluted air if any of the existing runways are

extended to the east and/or north and/or south?

(The thresholds will no doubt change if any runway is extended especially toward the east has been presented on some of the alternatives.)

#10. How will the FAA improve on the methods to enforce its own rules and regulations pertaining to:

A. no turns until the aircraft crosses the shoreline,

1. Under what conditions may this rule be changed?

B. utilization of the inboard runways at all possible times instead of outboard runways,

1. Under what conditions may this rule be changed?

#11. What changes in your 'Rules and Regulations' could be anticipated with the expansion of LAX?

#12. What potential flight paths, for take offs and landings, will be used for all existing runways and all potential new runways in each concept?

#13. What effect will 'single' event noise have on the adjacent neighbors as a result of LAX expansion? Please include in your answer this very important item of single event noise.

#14. What impact would the increase of minimum flying elevations to 2000' of all helicopters in the LAX area have on any expansion program. Where is this mentioned in the EIS/EIR.?

#15. This concept should have been included in the EIS/EIR. The FAA should have considered 60 DNL (CNEL) as a new measuring standard since single event operations will increase at LAX as well as most every major airport in the U.S.A., over time, and we know people complain about single event noise not DNL (CNEL) noise.

#16. If the FAA is no longer involved in the 'promoting of air commerce, then I suggest you allow LAX to use the ARTS III system of reporting procedures of aircraft operations to be used for enforcement purposes of FAA and LAX Rules and Regulations. This should be included as a mitigation measure to lessen negative environmental impacts as a result of increased aircraft operations.

#17. Will one of the mitigation measures be to have the ATC hold an aircraft in a landing pattern longer in order to avoid a wave-off when there may be congestion on the runways? This should be considered.

#18. What impact will reducing the separation of independent parallel instrument approaches below 4500' or even going as low as 2500'?

#19. Consideration should be given for the FAA to help LAX enforce their Rules and Regulations to mitigate noise?

The Master Plan Brochure states on the first inside page, first paragraph, "The purpose of the LAX Master Plan process is to allow the Los Angeles Department of Airports the best means possible to determine: How best to ensure (my highlight) that the impact of LAX improvements will also improve (my highlight) the environment and quality of life." It appears that this is a commitment by the LAX Department of Airports to the local communities. Is it??

#20. Include in the EIR/EIS materials the methods you plan to use to ensure and improve the environment and quality of life.

#21. Explain how you plan to ensure and improve the environment and quality of life if of the approximate 91 'Initial Study Checklist' items 20 say no impact and the other 71 say yes there is an impact or maybe there will be an impact.

#22. Please give all the potential new runways an identifying number such as 26, etc.

#23. Provide the exact boundaries by street name and number of dwelling units, businesses, hotels, etc. in each concept that may be included in any land acquisition program.

#24. Describe commuter aircrafts that may be using a potential new 'commuter' runway.

#25. Prepare noise contour maps to project the noise contours for five year periods for all Lax Master Plan Project concepts.

#26. All direct and indirect impacts of the proposed actions and their alternatives must be considered. Amongst these are:

1. Air space.
2. Water quality
3. Social impacts
4. Land use
5. Air quality
6. Hazardous waste
7. Flight safety
8. Noise

#27. Did the EIR/EIS address the noise impacts resulting from the combination of the Airside expansion proposed, such as constructing new runways and extending and moving existing runways?

#28. Did the EIR/EIS address the increased noise impacts resulting from the increase of operations, as well as the dispersion of the noise over a larger area to the east, north, and south?

#29. Did the EIR/EIS should address single event noise analysis? (The FAA specifically has agreed to include single event analysis at Minneapolis-St. Paul International Airport, Memphis International Airport, Detroit City Airport, Philadelphia International Airport, and Baltimore International Airport.)

#30. Did the EIR/ EIS must not only examine the combined effects of the actions proposed in the Master Plan, but also consider the combined effects of the proposed actions with other projects both on and off airport property?

#31. Consider another Master Plan option of expanding the airport without adding any new runways.

#32. Consider limiting the new runways to turbo prop aircraft only.

#33. Consider the availability of other airports when their existing restriction expires such as Long Beach and John Wayne Airports.

#34. Consider the mitigation measure of expanding the existing airports or building a new airport in the distant future.

#35. Consider mitigation measures pertaining to the health of children and adults as a result of air and noise pollution.

#36. Considered mitigation measures which will lessen the harmful effects of noise and air pollution in the learning process of young people.

Thank You,

Roy Hefner

Comments Re: LAX Master Plan

1. The recent terrorist attack on WTC will likely reduce demand for air travel significantly for an extended time period due to the increased cost of security as well as passenger fears. **Therefore, all plans for LAX expansion should be suspended pending further demand and security evaluations.**

2. There are three components of surface traffic to/from LAX that need to be addressed in better ways, even at the present traffic levels.

(a) Passengers: There is now and in all LAWA proposed LAX expansion alternatives too great a concentration of surface traffic into the terminal areas. The proposals to build added parking facilities at the west end of the LAX property will add to rather than reduce surface traffic congestion. **Therefore, all private vehicles should be banned from LAX and the passenger parking structures eliminated. Remote parking east of LAX with people movers should be used.**

(b) Cargo: The principal regions within Greater Los Angeles which are the destinations/sources of most air cargo are remote from LAX. There appears to be inadequate assessment of the impact of any increases in truck traffic and the huge costs of providing necessary freeway and other infrastructure improvements that would be required if LAX air cargo were increased. **All cargo-only flights should therefore be banned from LAX and relocated to Ontario and Orange County airports.** This will require adding Federal Customs capabilities at those other airports, which is much lower cost than road improvements and should be done anyway.

(c) LAX Employees: People who work at the airports constitute a major fraction of the surface traffic in/out of the LAX area. **There should be much greater use of incentives to these people to use mass transit and people movers from remote locations.** The ban of private vehicles from LAX should include those of people who work at LX. This will also improve airport security.

3. **Landing fees, parking fees, and other incentives should be used to eliminate small private aircraft from LAX and to shift much of the short haul passenger traffic to other regional airports.** This will make runway and taxiway time available for long haul passenger aircraft and so

Los Angeles World of Airports  
Master Plan Office

Dear Mr. Ritchie:

I am opposed to the proposed expansion for Los Angeles International Airport. I have been a homeowner at the above address since 1970 when the air traffic was far less than what it is today. The homes in our tract are spacious and well built. Many of our neighbors have nice yards, patios, decks, spas and pools. We are at a point of retirement, having paid for our home, as are many of our neighbors. We are concerned that our property values will decrease in our community due to increased airport traffic.

Despite the no fly time between **midnight and 6:30 a.m.**, many airplanes are flying over our home. When I called to complain about airplane noise, I was told that the overcast conditions at LAX do not permit the landing and taking off of airplanes over the ocean. The coastline is very frequently overcast which means that **our nights are frequently violated by airplane noise.** Please see attached letter from the Aircraft Noise Complaint Hotline at LAX.

I do not believe that your Environmental Impact Study accurately documents the effects of increased aircraft emissions on the air quality, health of residents, and property in the flying zones. Since I have been living at my home I have seen a black sooty residue collecting on my home, my cars, plants and trees and it has increased since 1970. Surely this increase in residue is a direct result of aircraft emissions. The color of the paint on my home does not last as long as it did in times past. Additionally, we have been wondering if airplane emissions caused two orange trees and a grapefruit that were in our yard to die.

My son and daughter who were born while we have been living at this home both have been asthmatic since they were children. My other children who were older when we moved to our home do not have asthma. Did the environmental study responsibly document the effect of airplane emissions on the health of the children who attend the schools under the landing path of LAX? Has the environmental study responsibly documented the effect of airplane emissions on the health of residents of all ages?

I firmly believe that the increase in air traffic must be shared by Palmdale and Ontario airports and by developing the site at El Toro in Orange County. The skies over Inglewood and South Central Los Angeles are already over crowded, polluted and noisy.

Sincerely,

  
Elaine Barnett

*Los Angeles World Airports*

July 16, 2001

Ms. Elaine Barnett  
10518 5th Avenue  
Inglewood, CA 90303

Dear Ms. Barnett:

Thank you for contacting Los Angeles International Airport (LAX) on Saturday, June 23, 2001, regarding six aircraft noise event(s) on Saturday, June 23, 2001. As part of our program of examining aircraft operations that result in community noise complaints, we have investigated the following noise incident you reported using flight track data from Federal Aviation Administration (FAA) radar:

- \* The airport was not in Over-Ocean procedures during the reported time period due to fog at the shoreline. This means that aircraft were arriving to LAX from the east instead of west, over the ocean. Regrettably, the FAA flight track radar data for this particular time period is not available, and therefore specific flight track information cannot be provided.

Los Angeles World Airports (LAWA) staff is committed to operating the airport as quietly as possible consistent with safety, and we place great emphasis on reducing noise from aircraft using the airport. To that end we have implemented noise abatement procedures. The LAX Over-Ocean operations procedure, which is in effect from midnight to 6:30 am, direct all aircraft traffic to fly over the ocean when arriving into and departing out of LAX, weather and safety conditions permitting. The run-up of aircraft engines for maintenance is prohibited between the hours from 11 p.m. to 6 a.m. The preferential runway use procedures maximize the use of the inner runways during the evening/early morning hours of 10 p.m. to 7 a.m.

Other noise abatement programs seek and receive voluntary compliance. Jet airplane operators conducting westerly departures are to avoid early turns before reaching the shoreline. LAWA monitors in-flight procedures such as the "loop departure" for minimum elevation and landfall requirements. Helicopter operators are advised to minimize their impact on nearby residential areas by using established routes and altitudes to approach and depart LAX.

LAWA monitors all departures and arrivals through the use of FAA radar flight tracks. When an aircraft deviates from a noise abatement procedure, an appropriate notification is triggered. However, airports do not have the authority to regulate aircraft in flight. FAA Air Traffic Controllers, along with

November 5, 2001

Dear Sir

As a former LAWA Airport Commissioner, I want to voice my opposition to any expansion of LAX.

First, there have not been any adequate studies on aircraft capacity, either in the air or on the ground.

Second, The current ground access is totally inadequate for the current 80 MAP

Mayor Hahn's proposal, what ever it is, is based on "safety and security" If one was interested in safety and security, the answer would be in expanding the other airports in the region. There would not be the current congestion in the air and on the ground at LAX. Terrorists would have to destroy two or three airports to impact air transportation instead of one. Increasing the distance between the runways has nothing to do with safety or security. It will allow the giant Airbus to land. Neither customs or immigration can handle 600 passengers at one time. Ten days ago, I returned from Australia. Due to increased tail winds, we were ahead of schedule. There were several overseas flights arriving at the same time. Due to the number of people, it took a half an hour to clear immigration and another half an hour to clear customs. Instead of further destroying Westchester for the sake of a European Airbus, Ontario airport could be expanded to handle this larger plane. Even though the Sepulveda tunnel has been strengthened, will it support this monstrosity?

I do not believe that it is legal to consider Mayor Hahn's proposal without knowing exactly what it is and then having public hearings on that specific plan.

There are so many "errors of fact" in the current EIR, it should be scrapped.

Sincerely

D. A. "Curt" Curtiss

Dear Mr. Ritchie:

Transportation California, a non-profit coalition dedicated to highway improvement and safety, wishes to go on record in support of continuing the LAX Master Plan process. Both LAX and ground transportation access to the airport must be improved to avoid gridlock and inconvenience for LAX travelers and the surrounding communities.

In light of the events of September 11, the Master Plan must be looked at from a new perspective, while keeping in sight the realities that have not changed. The people of Southern California and the state's economy depend on LAX and will not be well served if the airport and its access infrastructure remain inadequate and inefficient.

Certainly, security and safety must now take center stage with regard to LAX, but the problem of traffic congestion must also remain a central concern. The likelihood is that passenger and freight levels at LAX will "normalize" within a matter of years, if not months. This will happen whether or not the airport is improved.

Before September 11, the recommended LAX Master Plan called for significant ground transportation improvements, including a ring road, a 405 Expressway and bringing the Green Line directly into the airport. Obviously, some of these elements will change as the plan is reconfigured, but it would be unfortunate if the emphasis on upgrading ground access is lost in the process.

The 405 is one of the most congested highways in California. While LAX is by no means a principal culprit in creating this congestion, there is no question that more efficient access to LAX from the 405 would ease the burden on this freeway. Likewise, the 105 and surface streets around LAX will all flow more freely if the LAX Master Plan includes major commitments to ground transportation.

We look forward to commenting on the revised LAX Master Plan as it evolves.

Sincerely,

*Lawrence W. Fisher*

<b>Document:</b> <input type="checkbox"/> Draft Master Plan <input type="checkbox"/> Draft EIS/EIR			
<b>Subsection (If applicable):</b> Number:		<b>Title:</b>	

Comments: I was unable to attend the public hearing held at Palmdale Airport last evening (5 Nov2001). The following comments are submitted concerning possible development/expansion of air service at Palmdale Regional Airport. The comments are personal opinions and do not necessarily reflect those of the USAF and aerospace contractors of which I have served with and been employed for over forty years.

1. Numerous attempts at providing commercial air service out of the Antelope Valley (both PMD and WJF) have failed through the last three decades. The demand for airline service and/or excuse to relieve traffic at LAX, in my humble opinion, simply does not exist at Palmdale.
2. Palmdale Airport is located at a relatively high elevation. The high pressure altitude coupled with the high outside temperatures common at Palmdale yield very high density altitudes. Those that are familiar with aircraft performance are aware of the limitations and possible safety implications especially when operating a heavy airplane in those adverse conditions.
3. A complex of Restricted Areas exist to the immediate north and northeast of Palmdale Airport. These areas include R2515, R2508, R2505, 2524, 2502, among others. Military test activities, which could include the live firing of missiles and other weapons, are conducted on a routine basis. The areas would preclude direct departure and arrival routes for aircraft to and from the north or northeast.
4. As far as I know, PMD is a military installation with respect to the runways and most of the surrounding facilities. Has consideration been provided for the military production and test activities that are currently conducted and planned for at Palmdale? For example....who would have priority.....a military or contractor test mission or arriving or departing commercial airline flight?

Items 2,3, and 4 above are provided in that they have never been addressed to my knowledge.

David A. Kerzie

Los Angeles, CA 90009-2007

Dear Mr. Kessler,

We wish to reiterate our objection to the expansion of LAX. Not only would it destroy more of Westchester's business center and homes, but also the additional traffic and air pollution would affect the quality of life and health for Westchester residents.

Since the terrible events of September 11, 2001 led to the closing of the airport and subsequent increased security needs, we feel "all the eggs should not be in one basket." Make better use of Palmdale and Ontario airports. We also believe Orange County should carry its share at El Toro perhaps, instead of adding to the traffic at LAX.

Our city has done its part already and we should not be expected to sacrifice more.

Thank you for your consideration.

Sincerely,

LAX MASTER PLAN UPDATE

Nov. 5th, 2001

Please notify me of the next meeting.

Last Saturday's meeting at L.A. High School I heard about on the radio and my car was in the shop. The announcement on the radio was too late for me to get a bus to that location.

Please notify me at the address below:

Mary E. Booth  
1019 Ozone Ave.  
Santa Monica, CA 90405

I work as a Travelers Aid every Saturday night at Terminal 1. I have come by bus since Sept. 11's event until allowed to park at T-1 parking and even last Sat. showed up by bus because my car was in the shop.

I am deeply concerned with the LAX MASTER PLAN .

I am encouraged with the rerouting of traffic into the airport since Sept 11; it is very good.

Much unfoldment and good is coming forth at LAX.

Sincerely,

*Mary E. Booth*  
*retired teacher*

Mr. Jim Ritchie  
City of Los Angeles  
Los Angeles World Airports  
Master Plan Office  
P.O. Box 92216  
Los Angeles, CA 90009-2216

Dear Mr. Ritchie,

Enclosed with this letter are comments from more than 1,000 residents of the 36th Congressional District on the proposed expansion of Los Angeles International Airport.

As you know, I expressed serious concerns about the proposed LAX Master Plan. I and many other residents of the South Bay and communities impacted by LAX expansion concluded that the plan would greatly increased noise, air pollution and traffic in our neighborhoods and ill-serve residents in other parts of our region. In July of this year, I led a coalition of Members of Congress, local elected officials and community leaders from Southern California who met with Transportation Secretary Norman Mineta and Federal Aviation Administrator Jane Garvey to urge them to work toward a regional approach to our air transportation needs. Secretary Mineta committed to the establishment of an inter-modal task force on aviation in Southern California.

Since September 11, Mayor Jim Hahn has proposed development of a new master plan that focuses on aviation security and safety. The Mayor has discussed incorporating a regional approach and taking steps to limit the volume or air traffic at LAX. I applaud the direction he has taken and look forward to studying the details of that plan once they are available.

While LAX priorities have changed, the community's views on the airport are still an important factor in any decisions about airport expansion. I urge you and the FAA to review these comments carefully and provide responses as directed by the EIR/EIS process. I have also attached a summary of those comments and the text of my public comments on the plan.

Sincerely,

JANE HARMAN  
Member of Congress

## **SUMMARY OF COMMENTS** **LAX MASTER PLAN EIR-EIS**

Congresswoman Jane Harman  
November 9, 2001

### **Against expansion**

#### **Overview**

After review of nearly one thousand constituent responses about the proposed LAX expansion, it is evident that a great majority (over seven hundred) of those who responded opposes the proposed "LAX Master Plan." Constituents throughout the district replied, and their concerns covered a broad range of issues related to the airport. Most frequently, issues with increased noise, traffic congestion, transportation, air and water pollution were raised, and most respondents favored a regional approach to the congestion problems at LAX. Some additional comments included safety and property value concerns relating to the proposed expansion of LAX.

#### **Noise**

One of the most frequently cited issues among constituents responding to the June mailer was that of increased noise in the areas surrounding the airport. Many respondents included in their opinions the fact that noise levels in their areas have become increasingly noisy and unbearable in the past years. Some constituents complained that noise from planes overhead wake them in the middle of the night, and that flights disturb them throughout the day. Other constituents even took the time to record the number of noisy flights over their homes and passed the information on to our office. The following are some assessments of the noise problem in the areas surrounding LAX, written by constituents:

- "We now have flights from LAX over our homes all day. The most annoying flights are from 1 AM, 2 AM- 4 AM which have increased the last year. The planes are extremely large, very noisy, and very low and still climbing. We are awakened and the whole house shakes. It sounds as if the planes are going to crash into our homes. We can't get back to sleep."  
- Clara Delperdang  
Torrance, CA
- "I have been scared out of bed in the middle of the night by

commercial aircraft, by sound levels I believe greater than 100 decibels, flying very unusual flight patterns. Although these have subsided in recent months, I have a grave concern these disturbances would resume if expansion is allowed."

- Tom Pacheco  
Redondo Beach, CA

- \* Our community is already plagued with air pollution and noise pollution. We are planning on moving from the area because of the air and noise pollution. But for our neighbors' sake, we want no more growth."

- Marianne and Gary Peattie  
Westchester, CA

- "As an Audobon Program docent at the Ballona Wetlands for the past nine years, I have noticed a constantly increasing amount of air traffic noise. It is now so bad that we must shout to be heard by the school children who are trying to have an outdoor learning experience. Airport noise pollution is ruining the wetlands for people."

- Barbara O. Courtois  
Redondo Beach, CA

- "Last night I laid sleepless in bed listening to the endless sound of jets taxiing...Unfortunately, this has been typical of late night noise, which has been on the increase over the past two years. That airport is maxed out, and so is the surface street traffic in the South Bay area."

- James Kokalj  
Hermosa Beach, CA

### Traffic

Another issue of major concern to constituents is the congestion and traffic in and around the LAX area. Many of those who responded referred to an increase in traffic both on the surface streets surrounding the airport and on the 405 and 105 freeways. Several made mention of literal gridlock on the streets, and the increase in time that it takes them to get to and from the airport and destinations in surrounding areas. Others also cited the increase in congestion at LAX itself, with long delays in finding parking and other issues. Some of the comments on the LAX traffic are as follows:

- "We live near Lincoln Boulevard in Venice where traffic has become increasingly dense in recent years. Currently it takes 40 minutes to travel less than 5 miles during peak traffic hours. For this reason

alone, the impact of further airport expansion does not make sense."

- Joan J. Miner  
Venice, CA

- "I commend you for a job well done! I work at LAX. I work for the INS as an Immigration Inspector. I see firsthand the millions of people suffering at LAX due to over-congestion. It has taken me 2 hours to find a parking space. Tom Bradley Terminal can not accommodate any more passengers. Please, hear me, do not expand LAX."

- Marissa Leong-Solano  
Redondo Beach, CA

- "Many times it takes longer to get to the airport (coming from Torrance) than to get to your destination by air. We need other facilities where people can fly from, not only LAX."

- Nora Holm  
Torrance, CA

- "It seems like LAX is 'maxed out' already!"

- Patricia Murphy Johnson  
Palos Verdes Estates, CA

### Transportation

Another frequently cited issue in the responses to the LAX mailer was the issue of transportation to and from the airport. Many constituents, while mentioning the traffic and congestion issues around the airport, also mentioned improving public transportation options to also help alleviate some of the congestion and pollution issues. Most frequently, responses included suggestions of building a metro station closer to LAX to allow resident to take the light rail trains into the airport. Other suggestions included the use of high-speed trains in the southern CA area to alleviate some of the freeway traffic concerns and lessen the need for short commuter flights from LAX. Another suggestion that was received more than once was the idea of expanding a train system from San Diego to the San Francisco area, and perhaps including Las Vegas, to further decrease traffic at LAX.

### Environmental Concerns

Very frequently, residents of the area responding to the mailer discussed concerns with LAX's impact on the environment in the area. There were many complaints of black soot covering constituents' yards, and several even claimed that their health has already been negatively impacted by the air pollution in the area. Complaints about the air pollution caused by the airport were very

frequent, and many residents had concerns about the future impact that such pollution may have on their health.

- “The environmental impact of the LAX expansion cannot be overstated. The residents in this community have in the most cases invested their lives working to develop a community that is safe and healthy to live and retire in...it is now one of the most desirable areas in the LA area to raise a family. To ask us to quietly relinquish this to allow LAX to expand would be cheating our children of their future homes.”
  - Jim Westhoff  
El Segundo, CA
- “I am a pilot and feel that LAX is at capacity. I live here in Westchester and clean the black fallout off of my patios, windows, cars, and I breathe it!”
  - Nancy Reed  
Los Angeles, CA
- “I concur with Congresswoman Jane Harman’s position statement on the reverse side of this form. In particular, the air pollution for more fly-overs to this area concerns me as a medical provider. After living in Los Angeles County for 23 years, I’ve been treating an increasing number of new asthma cases, including adult-onset in nonsmokers. Unfortunately, I have also become one of those health statistics. In addition to its many other attributes, my husband and I chose to buy our single family house in Manhattan Beach because of its relative lack of air pollution and its unusual presence of ocean breezes. I breathe easier here. Why should we pay so much to live in a place where this vital health aspect can be destroyed at LAX expansionists’ whims?”
  - Vickie Ruch, MSN, RN-CS,  
ANP, FNP  
Manhattan Beach, CA

### **Safety**

Several respondents showed concern with safety at LAX. There were some comments citing LAX as one of the more dangerous airports in the country when it comes to accidents and near- accidents on the runway. Incursions were often cited as major concerns to those who frequently use the airport and have experienced the increase in runway traffic first-hand.

- “The critical problem is runway incursions. LAX has the highest and growing number of near-collisions on the ground. Twice within the last year we have had to go around at the last moment due to

an incursion...the accidents will happen and probably soon.  
Construction will only increase accident probability."

- John McGuire  
Torrance, CA

- "Also forgotten- nearly every other major city in the US has more than one major airport...This area knows all about safety issues. We are the ones who live with the knowledge that at some point, a plane unable to land properly could do so in our own living rooms. We are the ones who could hear the crash of the one plane landing on another a few years back. Not one of my neighbors want to relive that again....In my opinion, you can't put an elephant in the middle of a playground. It looks great and you may be able to stay out of its way for a while, but sooner or later, it's going to step on someone."

- David Mamann  
Redondo Beach, CA

### **Property Value and Economic Concerns**

Another part of expansion heavily opposed by respondents was the forced relocation of many homes in the area of LAX. Some older residents who have lived in the area for years have written about how many people have been negatively affected by the expansion and have been asked to move from their homes to make way for the airport. One respondent has had to move twice for expansion of the airport in the years she has lived in the area, and she revealed that the money that was given to her was never comparable to the resale value of her home. Others also complained about loss of property value due to the increase in traffic, noise and pollution in the area.

- "I've looked over the area surrounding LAX, and I see no way to expand it without moving a lot of people out at a great inconvenience and astronomical expense."  
- Edward H. Johnson  
Rancho Palos Verdes, CA
- "LAX expansion not only drives down property values but is a deterrent to an upscale community in the beach towns that is in need for more services- more traffic impacts local traffic to local services and will drive local businesses out."  
- Shiela Hoff  
Rancho Palos Verdes, CA
- "As an employee of a major airline with a major presence at LAX... keep in mind that I for one would certainly benefit from LAX expansion since more flights would arrive and depart creating more

premium flying at my airline...however, I am not willing to sacrifice the quality of life issues that surround an expansion of this size only to benefit from personal job growth at my airline."

- Anonymous  
Redondo Beach, CA

### A REGIONAL Approach

Nearly all of the respondents who opposed the LAX Master Plan also offered their support on a regional solution to the impacted LAX situation. Many constituents provided suggestions of ways to make a regional approach to alleviating LAX congestion more feasible. One of the most frequent suggestions was to make use of existing airports in the area to take on some of the air traffic normally channeled through LAX. A large frustration among constituents responding is the "not in my backyard" sentiment that has contributed to the blocking of the use of regional airports such as El Toro. Some suggested prohibiting all cargo from flying in and out of LAX, suggesting Palmdale for those purposes. Others suggest the use of all regional airports in the area to help spread the burdens and benefits of air travel throughout the region. Overall, the regional approach was overwhelmingly the favorite solution of respondents in order to avoid the need and impacts of an expansion at LAX.

- "The site at the Long Beach Naval Shipyard should be considered. Take offs and landings are over water instead of residential areas. The surrounding space that would be impacted is commercial and industrial. Easy access to freeways and Blue Line transit!"
  - Dorothy Hall  
Torrance, CA
- "A system of regional airports encompassing all of Southern California is the only way to go. LAX is as big as it ever should get. LAX handles a huge volume of air traffic on a relatively small piece of land. The traffic problems at LAX already resemble a zoo. To enlarge LAX will create a situation bordering on chaos! It is already not a pleasure going there. The increasing volume of air traffic must be spread around to other airports!"
  - Kermit Olson  
Rancho Palos Verdes, CA
- "I know of friends who drive over 100 miles just to take a flight out of LAX. They live in developing areas where there is room for population growth, and they deserve regional access to air travel."
  - Jean Takara  
Los Angeles, CA
- "The airline industry needs to rethink its 'spoke and hub' system

which forces 90% of the US air traffic through a few large hubs. There needs to be more point to point service which better utilizes the nation's total airport capacity."

- Jerry Lockenour  
Manhattan Beach, CA

- "We are pleased to know of your strong opposition to the proposed LAX expansion, our view is that one positive way to solve some of the problems is to completely eliminate all air freight from LAX. In so doing, there can be added terminal space, much less air traffic, and considerable easing of traffic on the 405 caused by trucks that deliver and pick airfreight from and to LAX. Move all freight to an air freight terminal in Palmdale. Add more passenger space to Ontario, and push hard for the opening of an Orange County major terminal at El Toro."

- Richard Dickens  
Westchester, CA

- "Expanding regional airports would not only alleviate the burden from LAX itself, but would lessen traffic on all LAX bound freeways. In turn, this could have a positive effect on our air quality. Please consider expanding regional airports instead of going forward with the LAX Master Plan."

- Tate Lundy  
Los Angeles, CA

- "As 27 year residents of the Palos Verdes Peninsula, we strenuously object to ANY further expansion of the Los Angeles International Airport...the time has come to develop regional airports and for the FAA to admit it has increasingly allowed expansion without any representation by voters."

- Mary Lu and Glenn Swartz  
Palos Verdes Estates, CA

### **Pro Expansion**

While the constituent responses to the mailer were overwhelmingly against expansion, there was a group of approximately 300 who did support expanding LAX. There were various reasons for which these respondents supported expansion, but the most commonly cited issues were the positive impact expansion would have on the economy, and the convenience of LAX to the South Bay. Other constituents felt that the problems of LAX were ours, and should not be shifted to other areas in an attempt to alleviate those around this area.

## Economic Concerns

There were quite a few constituents who felt that an expanded LAX would be a positive force for the economy in the South Bay. Many cited a need for the increase in jobs created by an expansion, and some felt that expansion would be good for existing local businesses. The sentiment that LAX is a driving force in the economy of the South Bay area was repeated by several respondents, and many hoped that expansion would boost the area's economy. Some constituents responded that LAX was the "gateway to the Pacific" and is economically successful because of its popularity as a travel hub to and from Asian nations.

- "I'm a small business owner operating from Redondo Beach. I think that the business opportunities that this expansion brings to our community far outweigh the negative short-term impact due to the added construction and traffic. The business that is generated impacts out entire community and it gives our community a much-needed facelift...I know that there are a lot of cities that want the business- let's not give the business and opportunity away. There are solutions to these challenges."
  - Stella W. Samples  
Redondo Beach, CA
  
- "We have our good economy because LAX is the gateway to the Pacific. Companies locate here for that reason. We must expand LAX to remain the gateway to the Pacific."
  - Alvis Johnson  
El Segundo, CA
  
- "I favor expansion of LAX as it is vital to the economic welfare of the LA area. The people complaining of the noise moved in after LAX was opened and knew of the noise."
  - Fredrick Newman  
Marina Del Rey, CA

## Convenience

For many of the respondents favoring expansion of LAX, convenience was one of their main reasons for supporting growth at LAX. For most constituents, having an international airport so close to home is a very positive thing, and many are willing to endure noise and other problems in exchange for the convenience that LAX offers. Some cited the fact that the South Bay area is growing and expected to expand further to support the expansion of the airport. In order to account for population growth in the area, many felt that LAX needs to be expanded and modernized. Additionally, constituents responding in favor of

expansion stated that they would be unhappy and unwilling to make use of regional airports, with LAX so close by. Another issue cited by several respondents is the current state of LAX. Some felt that in order to best serve the area, LAX should be expanded, modernized and improved to better reflect the Los Angeles area.

- "[LAX] is convenient to millions of passengers and is well established. It is easy for us to get to LAX by taxi, bus, shuttle, etc"
  - Alan Carlan  
South Bay resident
- "I probably will not be affected by the LAX Master Plan except to give me a closer, bigger, more modern airport. I do not relish the idea of having to go to Ontario or Palmdale."
  - Kathleen Quadrato  
Torrance, CA
- "Everyone wants to travel from big hub airports."
  - David Talbot  
Marina Del Rey, CA
- "LAX's overcrowding and conditions are an embarrassment to LA. I want the world's greatest city to have the greatest airport."
  - Robert Miller  
Torrance, CA
- "Los Angeles is a major city and must have a major airport. LAX must be expanded if Los Angeles is to stand proud in the eyes of the world. Today LAX is a disgrace for a city the size of Los Angeles."
  - Irving Levine  
Carson, CA

### **Against a Regional Plan**

While many of those who responded in favor of expanding LAX had regional reasons for their positions, there were some who felt that LAX is an entity belonging to the South Bay region, and that its issues should be dealt with in the region. Several respondents were opposed to a regional plan because it meant more traveling time for them to reach the airports. Others, however, felt that the LAX situation was ours alone, and expansion should occur so as not to burden other areas with the problems that come along with a major international airport.

- "I don't believe we should attempt to solve our noise problems by shifting them to another area."
  - Bradley Fox

**Summary**

For many of those responding in favor of expanding LAX, the choice seemed to be simple- for them, expansion is worth the problems it may cause, as long as the airport undergoes what they feel are long overdue improvements.

Constituents are proud to have such an airport in their neighborhoods, and some wished to see it improved upon despite other concerns. Constituent Tim Ihle stated a position that seems to be widely held by those in support of an expansion, by stating:

- "I believe the benefits far exceed any negative impacts that may result."

- Tim Ihle  
Redondo Beach, CA

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000 2020	Region	Pop. Growth 2000 2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport; Alliance for a Regional Solution to Airport Congestion

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*(Home owners)*  
 We live in Venice Beach. We would be affected by the LAX Master plan in: Volume of traffic. Increase traffic on Pacific ave. <sup>(a 2 lane road)</sup> of people trying to get around traffic on Lincoln Blvd. Noise - We currently can hear the plane take-offs. More planes may push the air passages close to us. Economic - The above mentioned could decrease the value of our property.

Re: LAX Expansion

Dear Honorable Jane Harman:

Thank you for allowing me to submit my view on the subject of LAX Master Plan. In addition, I like to take this opportunity to present my ideas also on telecommunication and the concept of global warming.

- I. **LAX Master Plan** - I have not seen the Master Plan, and I don't see how the Plan can relieve the problem of ground transportation to the airport, let alone the future growth. Further expansion of LAX without accommodating the number of cars commuting to the airport would be an expensive failure in terms of time, money and aggravating the situation. Developing regional airports will certainly be an achievable solution. Metropolitans such as New York, San Francisco and others have demonstrated the success of regional airport system. Please also consider the idea of regional check-in stations more than twenty miles away. Each bus connecting the airport and the regional check-in stations will replace over thirty cars. I have seen regional check-in stations in Paris and New York more than thirty years ago, and I believe that it will relieve the immediate traffic congestions of present days in LAX.
- II. **Global Warming** - I have not seen any scientific data on Global Warming. For the flooding in one region, there is the draught in another region. Los Angeles had an unusually long cold Winter and delayed Spring and Summer. Before we will sacrifice our living for the unknown consequence of Global Warming, there ought to be scientific examinations of the contribution of CO<sub>2</sub> to the green house effect. Less than 1% of our atmosphere is CO<sub>2</sub>. It is easy to experiment the composition of our atmosphere to determining how much the temperature will rise for how much increase of CO<sub>2</sub>. If the earth is indeed warming, could it be the change of sunray intensity or the deviation of earth's rotation axial? There was Glacial era of the earth. The relative warming of the earth since the Glacial Era was certainly not contributed by human generation of CO<sub>2</sub>. If the ocean is indeed warming, would not the cloud be increased, which will shield the sunray and counter balance "total temperature" of the earth? I hope that the Congress will fund *scientific studies* in the issue of Global Warming before the hype goes too far.
- III. **Information Highway and our telephone system.** - As population grow and technology advances, our telephone area code keeps changing. We are loosing contact with our old friends. Major reason for the change of the area code is the multi-telephone numbers in many households. More than ten years ago,

we had made simple analysis to determine that an 8-wire coaxial cable entering our house will accommodate multi-channel telephone, FAX, internet, and interactive high definition TV. The trunk line transmission speed will be 100 Megabyte per second. For people who desire such broadband system, they will place in their home a simple box of concentrator/distributor, costing about couple hundred dollars. Each house will need only one telephone number. But such a system will require a Federal standard. Then, the commercial applications will be designed according to the system standard. Following will be another era of technology development and economic expansion. Ten years ago, when Clinton called for the development of Information Highway, I hoped in vain that such a system was in his plan. Now, I hope that Congress can take the initiating action by requiring the establishment of a national Broadband communication Standard.

Sincerely,

  
Edwin Yu

I am opposed to these loaded questions. Aren't there other impacts that are relevant besides economic? Los Angeles develops (read spreads) like a cancer; I see no reason to 'develop' airports in the same fashion. When a cancerous tumor is centralized in one area, it is much simpler to treat via amputation (local) than it is to treat a cancer that has spread throughout the system. It is a mistake to create more noise, pollution, traffic throughout L.A. Rather, castrate the burden at its source before it gets more out of hand. Introduce a dialogue of conservation, as a life of realized art so that travel becomes unnecessary, so that consumption that plagues American society is drastically curbed. Local production, local consumption. Strong community bonds. Elimination of alienation from work, each other. This is what will reduce our reliance on LAX.

7-17-01

*I am in favor of LAX Master Plan to some extent. I also favor a regional airport at the closed El Toro facility. I oppose any priority given to Palmdale. In a hot summer day, I doubt that an airplane could take off from Palmdale with full fuel tanks and a full load of passengers.*

*I strongly disagree with your opposition to LAX's expansion. You can't stop progress, only screw it up by trying. Example: Our old P.E. Red car rail system - best in the west until the politicians tried to "improve it". The most ironic part is that the majority of the people "bitching" are employed by airport related businesses; wait until their job goes to Arizona or Nevada. But then, this type person has "tunnel vision" - "I've got mine. As it change anything", "Not in my back yard", "No I didn't vote couldn't find time". Believe me! many people will vote, if their jobs disappear.*

I don't have no comments for LAX Master Plan. I think it's good to expand LAX. to avoid air and ground traffic and also cars traffic. Also it is good for tourist to see that we have a nice International Airport better than the others all over the world.

THE COMPARISON OF LAX AND DENVER DO NOT MAKE ANY SENSE. LAX WAS HERE BEFORE ALL OF US. DENVER WAS BUILT IN THE PAST FEW YEARS IN THE MIDDLE OF NOWHERE. I AM A RESIDENT AS WELL AS A INCOME PROPERTY OWNER AND BUSINESS OWNER IN WESTCHESTER. THERE IS NOTHING WRONG, IN MY OPINION, WITH THE EXPANSION PLANS. MY LIFE IS MORE IN WESTCHESTER WITHOUT LAX - WE ARE DEAD!!

LET IT GROW!

The traffic near the airport, at the airport and parking will only get worse + it is bad enough now. That only affects me when I go to the airport or near it. Don't know of any other affect on my life but, since others will, other sites should be used.

# UNITED NATIONS Fiscal Accountability

## Petition

Mr. Annan,

**Whereas**, you claim that the United Nations building in New York City needs \$1 billion in repairs; and

**Whereas**, you have demanded that the United States pay for these \$1 billion so-called repairs; and

**Whereas**, this comes on top of dozens of other demands for U.S. tax dollars; and

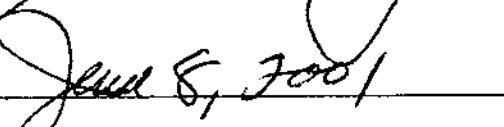

**Whereas**, you have thus far refused to say exactly what this \$1 billion is needed for.

**Therefore**, before you make any further demands on the United States and its people, I demand that you give the American people a full accounting of every dollar you say you need and why.

Respectfully

Date

I believe the  
UN. is going  
far beyond the  
original ideas  
for its being.

Do not believe

President + Treasury

would permit.

This to happen.

10 JUNE 2001  
521 3A ST  
MANTHATA, CA  
90266

THE HONORABLE CAROL ANN HANCOCK  
811 N. CATALINA, SUITE 1302  
HERMONDO BEACH, CA 90277

Dear Congresswoman Hancock:

Your constituent mailed asked for comments on the LAX expansion plan. I favor a well-planned approach to meeting future LAX passenger growth, I do not favor trying to force Palmdale and/or El Toro to be something they are not and can not ever be; airports that would abrogate passenger growth at LAX.

The result of your approach is that passenger growth at LAX will continue, but ad hoc, after-the-fact, catch-up infrastructure improvements will be required after the added passenger load gridlocks us.

Noise is not a factor. LAX is among the quietest I've lived near. Quieter than National Airport when I lived 3 miles north of Mt Vernon. Commercial airplanes will continue to get quieter. Recently I stood on the "Granbelt" between Valley and Ardmore; motorcycles, regular traffic, and crowd made more noise than commercial air traffic out of LAX. Most annoying to me are helicopters and light aircraft flying out of Hawthorne and Torrance. If you want to stop the banner flyers over the beach, being quiet.

Traffic will be the biggest impact. Especially if we back the improvements the master plan offers. Even if drive the Van Wyck expressway between I-4 and

PC02624

g. more 18.7, LAX -2-

La Guardia? The bit of NY has for years tried to force more air traffic to JFK, but customers want La Guardia, so vehicle traffic crowds. Nothing of the sort in LA matches that!

The reason I like Manhattan Beach is proximity to LAX. I have no desire to drive to El Toro or Palmdale. (Especially not Palmdale where the combo of temperature and altitude conspire to make aircraft engine-out operation quite interesting. While an instructor pilot in the Air Force, I used to take my students there to demonstrate effects.) (No, I'm not an airline pilot. Never was.) If the legislation or court case denying LAX expansion would require that all opponents drive to your touted "regional" airport, the vocal opposition might mute.

I have planned expansion of LAX for a few other reasons, but this is too long already. I know, as a Democrat, that you must respond to the majority. Just wanted you to know that it's not a 100% possibility.

Sincerely,

Harold J. (Tony) Moore

P.S. You might find ~~Denver~~ Denver as a comparison. I fly into there at least once a month. For choice - very poor - for a comparison!

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372-1622. If you need more room, feel free to enclose additional pages with your name and address.

*I live in El Segundo and I voted for you - Can you explain why it is impossible to extend the airport through the dunes out part way onto the ocean? It would stop noise and be safer. Are we afraid of hurting a few moths? I have never heard this discussed. This isn't Denver that has huge open areas around it!*

I support limited expansion of LAX. Specifically, Alternative 'A' which has a limited increase in the number of residences subjected to airport noise (this according to the draft EIR). I feel as though LAX is already too crowded. The problems I see are the increased taxi time that I spend when I travel. Also, it is not realistic to expand the other regional airports to relieve the increase in passengers that Los Angeles can expect.

*Yes Expand LAX as much as possible. A regional approach is unworkable! I fly frequently in my job. Nothing is more of a pain than airports that are spread out all over the place. How the hell do you get from one airport to another when you need to connect? Answer: You don't. And little local airports are always more expensive w/ less flights to choose from. I promise the spread out regional approach will be hated by all who have to use it. I say make LAX as big as possible!! one stop shopping is always easier. Noise? who are you kidding?*

- Senior Cit., Regist Democrat, 36<sup>th</sup> District.
- Residence: El Segundo adjacent to South runways LAX
- Ignorant of Details of Master Plan e.g.
- Systems Engineering Study + Plan
- Statistical Risk Analysis (Murphy's Law)
- South runways now considered dangerous relative to near collisions + potential strays.
- Sound frequencies equally of concern as decibel level.
- Ground auto traffic. Major impact on feeder freeways (405, 105, 91) Sepulveda, Imperial, Century, Blvd's etc. These routes overworked now. What is in Plan for RE-Engineering; Congestion could be unbelievable.

- A "time-scaled" expansion would seem warranted to better define the choke points in the execution of the plan.
  - A limiting factor could be something seemingly benign such as the inability of A/C to taxi within the runways to maintain a flight schedule.
- ...I assist in a review of any Consultation

PC02629

as one may  
a flight schedule.

• Would be most happy to assist in a review <sup>of</sup> any Consulting  
Engineering firm's preparation + analysis of a Master Plan.

1. Like Denver, if Palmdale was the only airport, everyone would need to drive there. But today, Denver is much too far from the people of Denver and there is poor public transportation (taxi fare excessive).
2. LAX can be made more efficient & effective. Why fight that for currently other 'pic in the sky' plans? Surely, LAX can expand to some extent - let that happen - NOW! vs. Plan I
3. Where and what is your plan? What are the details that "everyone" agrees on? Our political (pol. friction) plans to remove mass transportation in LAC, etc have done a very poor job in the past. Why expect anything different?

Jane -

Personally, I think the expanded LAX plan is the best. It reduces -  
 the redundancies and provides for a modern facility - with mass transit options -  
 for the people of L.A. & surrounding communities.

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372-1622. If you need more room, feel free to enclose additional pages with your name and address.

1. LAX NEEDS TO BE EXPANDED. WE DO NOT MIND AN INCREASE IN AIR TRAVEL DELAYS IF AIR TRAVEL DELAYS ARE IMPROVED FROM/TO LAX. LAX IS OUR MAJOR TRAVEL HUB AND WE TRAVEL FREQUENTLY. WE LIVE ONLY 4 MILES FROM AIRPORT. ECONOMIC IMPACT ON SOUTH BAY COMMUNITY FOR LAX IS ENORMOUS AND AIR TRAVEL FOR LAX NEEDS TO BE IMPROVED WITH EXPANSIONS AND WHATEVER IT TAKES. ALSO RECOMMEND THAT ONTARIO AIRPORT BE MADE A PRIMARY HUB TO LAX WITH HIGH SPEED TRANSPORTATION (CRD) BETWEEN THE TWO. FORGET PALMDALE FOR ANOTHER 15 YRS

*I live in Marina del Rey - 10 minutes from LAX.  
I hope never to have to travel to outlying areas for flights. I do believe if better areas are developed - a very rapid transit system should be available. Ex. LAX is OK.*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

6-10-01

Dear Congressman Harman,

In regards to the proposed "expansion of LAX," we in the South Bay badly need the improvements proposed by this plan. Expanding the roadways and transit system directly into the airport would greatly reduce the congestion on Sepulveda + other nearby boulevards. Your attempts to stop the completion of these thoroughfares in front of the airport is a disservice to those of us who live near it + it will not prevent other expansions of LAX which appear to be your reason. Additionally, the airport is very handy to the area, unlike Denver (your example) where you think you are driving clear to the Mississippi River before you get there. I do not want a half day's trip to Palmdale before getting to the airport. As far as noise pollution, we live quite close to LAX and rarely hear airplane noise. This is because take off (when noise is produced) is out over the ocean.

**•Comments:**

Thank you for making an outreach effort to your constituents with regards to this issue. Unfortunately your mailing was not delivered in a very timely manner. I just received it today Friday, June 8, 2001, so therefore my comments will be very brief since I'm not even sure that you will receive them in time.

First of all, I'm a small woman owned business operating from Redondo Beach. I think that the business opportunities that this expansion bring to our community far outweigh the negative short term impact due to the added construction and traffic. The business that is generated impacts our entire community and it gives our community a much-needed facelift.

Secondly, I must applaud LAWA for their outreach efforts,, unfortunately quite a few residents do not feel that it is their responsibility to become involved or informed. LAWA has been very proactive in setting up forums for the public to be involved.

Third, what I as a constituent would like to see is better traffic and noise controls implemented and perhaps a share of the tax revenue generate by the tariffs imposed on using LAX. We have just begun to understand the requirements for developing an infrastructure plan that will allow for continued non-invasive growth and be able to accommodate the neighboring communities need for controls on the noise and traffic impact from this expansion.

I know that there are a lot of cities that want the business let's not give the business and opportunity away. There are solutions to these challenges. I know a lot of people are frustrated due to the traffic, this is a short-term problem – they just don't have the patience to envision what can be.

Thank you for this opportunity to express my thoughts. If you have any questions please feel free to contact me.

Sincerely,

Stella W. Samples

HONORABLE CONGRESSWOMAN  
JANE HARMAN  
811 N. CATALINA, SUITE 1302  
REDONDO BEACH, CA. 90277

HONORABLE CONGRESSWOMAN:

CONGRESSWOMAN HARMAN, I BELIEVE THAT AN EXPANSION FOR THE LAX AIRPORT IS A GREAT IDEA. IT SHOULD HAVE BEEN DONE TWENTY TO THIRTY YEARS AGO. THE AIRPORT WAS HERE LONG BEFORE MOST OF THE PEOPLE WERE HERE. IF THEY DIDN'T WANT TO BE NEAR AN AIRPORT THEY DIDN'T HAVE TO BUY OR RENT THAT CLOSE TO AN AIRPORT. WHEN THEY WERE LOOKING TO RENT OR BUY, I'M SURE THEY WERE IN THE AREA LONG ENOUGH TO BE AWARE OF AIRPLANES FLYING OVER OR NEAR WHERE THEY WERE LOOKING. LAX COULD EXPAND AND THE OTHER AIRPORTS IN SOUTHERN CALIFORNIA COULD ALSO EXPAND, BUT WE STILL NEED THE EXPANSION FOR GROWTH IN ALL AREAS BECAUSE OF THE POPULATION GROWTH.

SINCERELY

Honorable Jane Harman:

I think that expansion of LAX is the way to go. It is convenient to millions of passengers and is well established. It is easy for us to get to LAX by taxi, bus, shuttle, etc.

Industry in the south bay depends on LAX. It creates many jobs and enriches our communities. With improved aircraft, pollution will be reduced.

*How Jane Harman,*

*It is a little tough to oppose something not described. I use LAX a lot in my travels. If the airport I use becomes better - great! But without knowing what the expansion is all about - how can I endorse or oppose it? Luckily, I found [HTTP://www.laxmasterplan.org](http://www.laxmasterplan.org). Now I endorse the expansion. LAX's overcrowding and condition is an embarrassment to LA - I want the world's greatest city to have the greatest Airport! (Get more money, and expand the all!!!)*

Los Angeles is a major city and we must have a major airport. LAX must be expanded if Los Angeles is to stand proud in the eyes of the world. Today LAX is a disgrace for a city the size of Los Angeles.

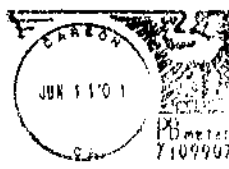

Regional airports are a necessity, but will not and cannot be the substitute for a new LAX. I urge you to support an expanded and improved LAX.

Hello -

At the risk of being in the minority, I feel compelled to indicate that I SUPPORT the proposed expansion of WAX as currently defined. WAX must be further modernized to support growing area needs. The proposal put forth by the WAX staff should be approved if we are to be prepared for the days ahead.

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*How great it is to have LAX so handy to the South Bay. You have again identified with a non-issue that will be resolved by market forces. When Palmdale Ontario ect can support more traffic it will happen. We would be better served in the 36th by a representative who reduces taxes and worked on the massive immigration problems in So Cal*

THE ERRONEOUS COMPARISON WITH DENVER IS APPLES & ORANGES  
WHILE I UNDERSTAND THE PC OF CATERING TO YOUR  
CONSTITUENTS, THE ONLY PRACTICAL SOLUTION IS TO EXPAND  
LAX, AS I AM SURE YOU KNOW. THE SMOKE ABOUT  
EXPANDING TO PALMDALE HAS BEEN GOING ON FOR 30 YEARS AND  
STILL JUST TALK, BECAUSE IT IS JUST NOT PRACTICABLE  
OR IN THE LONG RUN COST EFFECTIVE. YOUR PANDERING &  
DELAYING WILL ONLY MAKE THAT \$12 BILLION ESTIMATE  
GO HIGHER AND THAT'S MY OPINION.

I HAVE SUPPORTED JANE HARMAN FOR A NUMBER OF YEARS, BUT I TOTALLY DISAGREE WITH HER ON THIS ISSUE. I HATE TO SEE HER GIVE IN TO A VERY VOCAL GROUP REPRESENTING A SELECT, SPECIAL INTEREST GROUP OF HOMEOWNERS. THEY KNEW THEY WERE NEAR AN AIRPORT WHEN THEY BOUGHT THEIR HOMES, WHICH IS PROBABLY WHY THEY PURCHASED THEIR HOMES AT A DISCOUNT. WOULD THESE NIMBY'S PROMISE NEVER TO USE LAX EVER AGAIN. I DON'T THINK SO!

I believe that LAX definitely needs improvement. If that means expansion - so be it. Top priority public transportation to the airport to alleviate congestion. Also, a separate approach for Super Shuttle type vehicles, would help.

I whole-heartedly support the expansion/modernization of LAX. I believe the benefits far exceed any negative impacts that may result. I have lived in the South Bay for six years and I hardly ever see or hear any large passenger aircraft flying overhead. Anyone driving on L.A.'s freeways see the need to improve L.A.'s transportation infrastructure now. I do not want to see the gridlock that occurs daily on the freeways also occur at LAX. Especially since we have the opportunity to mitigate the gridlock before it occurs.

PLEASE JANE DON'T PLAY WITH US, WE BOTH KNOW THAT THIS IS NOT AN "EITHER-OR" CHOICE. WE WILL NEED BOTH "LAX" EXPANSION AND MORE REGIONAL AIRPORTS. YES I KNOW ANTI-LAX EXPANSION GETS VOTES BUT THE EXPANDING DEMAND FOR AIR TRAVEL WILL DETERMINE THE FUTURE. IT IS TIME FOR A HIGH SPEED RAIL SYSTEM FROM UNION STATION DOWNTOWN DIRECT TO PALMDALE AIRPORT THROUGH THE SAN GABRIEL MOUNTAINS. (20 MINUTES). THEN THE PALMDALE AIRPORT CAN BE DEVELOPED. WITHOUT THIS FORESIGHT WE WILL BE IN THE SAME SITUATION AS WE ARE NOW WITH THE ELECTRIC MESS.

Comments, Draft EIS/EIR, Los Angeles International Airport Proposed Master Plan Improvements, Ca;of/ State Clearinghouse No.: 1997061047

Dear Sirs:

The Master Plan proposal for expansion of Los Angeles International Airport is a profoundly and inherently flawed document that never should have been brought forward for approval. While it promises expansion of regional airport capacity, its true impact would be to devastate surrounding communities, generate horrendous environmental consequences, and perpetuate a needless chokehold in regional transportation.

The result of years of labor and millions of dollars, the Draft Environmental Impact Report is insulting. It practically ignores the potential for a regional plan for airport expansion that would share the many burdens of air transit throughout Southern California.

Crafting sound and responsible public policy is about making choices. Yet the choices presented by the DEIR are flawed because they answer the wrong question. LAWA does not ask: "How does Southern California handle the anticipated growth in air traffic in the region?" Instead, LAWA asks the far more restrictive question: "How does LAX handle the anticipated growth in air traffic in the region?"

The answer is predictable. The choices are narrow. The consequences are dire.

#### DEVASTATION OF THE SURROUNDING COMMUNITY

As proposed in the DEIR, the expansion of Los Angeles International Airport would continue a generations-old assault on the communities of Westchester and Playa del Rey, as well as El Segundo, Inglewood and Lennox. Over the past decades, large swaths of Westchester and Playa del Rey have been lost to airport expansion. With proposed runway extensions, a new ring road and other features, large stretches of a residential community and a large chunk of the Westchester business community would be displaced. This is clearly unacceptable.

In addition to lost homes and businesses, remaining elements of the community would be constantly under siege by dramatic spikes in noise and traffic congestion. Talk in the DEIR of mitigations means little to Westchester and Playa del Rey. Commitments of traffic mitigations and pledges of noise reductions from LAWA ring hollow to those with lengthy lists and accurate memories of unkept or broken promises.

In the sprawling metropolis that is Los Angeles, Westchester and Playa del Rey are small towns, true neighborhoods, with "mom and pop" stores, weekend barbecues, Little League games, Elks and Rotarians. For generations, residents have tried to coexist peacefully with the airport. With each passing year, with increased noise, with more planes and passengers, that relationship has suffered. This expansion plan would surely kill that relationship. More significantly, it threatens - perhaps promises - to kill the spirit and small-town quality that makes Westchester and Playa del Rey

special.

#### THE TRANSPORTATION CHOKEHOLD

By concentrating airport expansion predominantly at LAX, the DEIR would continue, exacerbate and stimulate a phenomena that has been surely and rapidly undermining the quality of life in Los Angeles: congestion.

Millions of additional passengers at LAX each year means considerably more traffic - regardless of mitigations that might tinker at the margins of the problem. The 405 Freeway, already a traffic nightmare for most commuters, will grow ever worse. As a result, frustrated motorists will seek speedier routes on the few remaining north-south thoroughfares: Lincoln and Sepulveda. As those roads grow more congested, a domino effect takes hold, forcing drivers onto residential streets throughout the Westside: Motor Avenue, Centinela Avenue, Inglewood Avenue, and Walgrove Avenue.

The impacts of increased traffic throughout residential communities are myriad and virtually impossible to measure. How does one mitigate the impacts of a parent who loses precious time with a growing child because of a two-hour commute home from work? How does one mitigate the impacts of a child unable to play Frisbee or catch in the street because his or her road has been clogged with traffic? How does one mitigate the peace and quiet lost to honking horns, automobile accidents, increased levels of frustration?

Clearly, the impacts of LAX expansion are far greater than those contemplated by the DEIR.

#### ENVIRONMENTAL IMPACTS

The environmental impacts from the DEIR are profoundly frightening. The proposed plan does not adequately address the significant threat to air quality in the Los Angeles area.

Air pollution would result from two sources: increased air traffic and increased automobile traffic. The proposed plan underestimates both.

**Air traffic:** LAWA's projections assume LAX will handle 98 million passengers annually. But there is no way for LAX to cap that figure or limit the number of flights. Air traffic could - and likely will - exceed the projected number of passengers and flights. As a result, there will be more delayed flights, more planes idling on the ground or circling the skies waiting for landing clearance. Those air pollution impacts are not considered.

**Automobile traffic:** The LAWA proposal does not mitigate pollution; it merely redistributes it within the same area through new or expanded roadways. That is not a solution; it is barely a magician's cheap card trick.

The question of environmental justice gets little more than lip service from the DEIR. The worst impacts from LAX fall disproportionately on those communities under the landing pattern: South Los Angeles, Inglewood, and Lennox - communities with predominantly African-American or Latino populations. Increasing capacity and operations at LAX will unavoidably exacerbate this situation. The only way to approximate environmental justice is to distribute the burdens more equitably across the region.

Moreover, the potential impact of human health in these communities from the increased pollution gets short shrift in the LAWA proposal. The DEIR fails

to comment specifically on the impacts to seniors and young children - who make up larger than average percentages of the population in the areas near LAX. LAWA should be more vigilant, not less, when it comes to our most vulnerable residents.

A further concern is the threat to the several federally protected endangered species in the El Segundo Dunes Preserve. Development of a Ring Road and increased use of LAX's Westside would threaten many of the 30 species, which would have to be relocated - a risky and a likely unsuccessful proposition.

#### JOBS

An argument in favor of LAX expansion has been that it will generate jobs, particularly construction jobs. That is a most worthy goal. But like most else in the fight over airport expansion, the myopic focus on LAX alone obscures greater opportunities -in this case for more jobs.

Granted, expansion of LAX will mean more jobs. But it seems logical that expansion of several regional airports -- less constrained by geography or nearby residential communities - would mean more and larger projects -and therefore even more jobs. Moreover, since the population of Southern California is growing at faster rates in outlying areas than in the communities near LAX, the jobs created would be closer to the homes of working people.

#### REGIONAL SOLUTIONS

LAWA insists repeatedly that it is without power to influence the decisions of the airline industry. LAWA claims it can no more create regional air transportation than human beings can make the sky open up and rain. The experience of other cities and other airport agencies tells us otherwise.

My family lives in Massachusetts, an hour outside of Boston. Ten years ago, a holiday visit meant an expensive flight to Logan International Airport, a long commute in heavy traffic for my family, and a fierce battle for parking.

Today, after an aggressive marketing campaign by Massport and a commitment to regional airport expansion by local officials, easier, quicker - and far cheaper options - are available at any number of outlying airports. Hartford, Providence, Manchester are all much further away, but cheaper destinations and easier to access by car.

LAWA has even greater opportunities to develop, market and build for regional expansion. Palmdale and Ontario, owned by LAWA, are merely two of the options. The region has 12 airports available for commercial use. Many would welcome the opportunity to develop passenger and cargo service and absorb their fair share of the 157 million annual passengers expected to flood Southern California skies by 2015. Many have strong community support in part because buffer zones help keep airport impacts a safe distance from residential areas.

Nowhere in this proposal can I find evidence that LAWA gave serious or thorough consideration to a truly regional plan for airport expansion.

#### SECURITY

This DEIR is by-product of a world and a way of thinking about air travel that no longer exists. The tragic events of September 11, 2001 require an entirely new plan that makes as its chief concerns security and safety.

Thank you for your consideration. I look forward to your responses to these concerns.

**Re: Comments on the Draft Los Angeles International Airport Master Plan and Draft Environmental Impact Statement/Environmental Impact Report**

Dear Mr. Ritchie and Mr. Kessler:

On behalf of the Natural Resources Defense Council ("NRDC") and its over 500,000 members, we submit these comments on the documents cited above.

In light of significantly changed circumstances since the draft EIS/EIS was circulated for public comment, we believe that the document should be withdrawn and a new EIS/EIR prepared. In the alternative, we request that a supplemental environmental impact report/statement addressing the implications of the September 11 attacks for the planned expansion of LAX be prepared before any decision on the project is made. Without any doubt, this extraordinary event constitutes significant new information that may fundamentally alter the plan as proposed and, indeed, may ultimately dictate a changed result. The implications of the attack for air travel and security issues are fundamental, as is the importance of meaningful public input on a project as significant as the proposed LAX expansion. Under these circumstances, additional environmental review and public comment are unquestionably required.

Without waiving these requests, we submit as an Attachment brief comments on the air quality and health assessment portions of the draft EIS/EIR as previously circulated for public comment.

Respectfully submitted,

Joel R. Reynolds  
Senior Attorney

## ATTACHMENT

The Air Quality and Human Health Risk Assessment portions of the LAX EIS/EIR raise a number of concerns:

### ***LAWA Should Not Take Credit for Mitigation Measures It Cannot Ensure***

LAWA cannot include or take credit for measures over which it has no control or enforcement, such as a requirement of all construction deliveries to be made with clean fuel vehicles. The modification of airplane operating procedures, which would contribute some of the largest emissions reductions, requires FAA approval. Other proposed measures, such as Intelligent Transportation Systems and traffic management programs require cooperation from MTA and Caltrans. LAWA's commitment to and control over the list of mitigation measures needs to be clarified. Finally, the Technical Report 4, Attachment X, which contains details about air quality mitigation measures, should be redone in a legible electronic rather than scanned form.

### ***The No Action/No Build Scenario Does Not Necessarily Mean Greater Public Risk***

We disagree that the No Action/No build scenario would generate greater air quality risks to the public. Most of the air quality improving measures included in the mitigation and Environmental Action plans could be implemented under this scenario without any changes to current runways. Therefore, the EIS/EIR statements, such as "All of the Master Plan build alternatives would be better, producing lower overall emissions, than the No Action/No Project alternative,"<sup>1</sup> are misleading and false. The appropriate comparison would be with a project that included air quality improvement measures but did not add any changes to the current runways.

The Human Health Risk Assessment goes one step further and states that the No Action/No Project Alternative "would cause maximally exposed individual cancer risks and non-cancer hazards to increase in all areas near LAX in both horizon years."<sup>2</sup> This statement could only be true if the mitigation measures were only applied to the three build alternatives. Again, most of those mitigation efforts could also be implemented without any new runway construction or expansion. In fact, health risks from the No Action/No Project Alternative may be significantly over stated, if the recent Fleet and Commercial Airport Ground Access rules were not incorporated into the emission inventory projections.<sup>3</sup>

### ***1997 Air Quality Standards Should Be Included in the Analysis:***

The air quality analysis in the EIS/EIR should include the ozone and fine particulate standards passed by the US EPA in 1997. The standards were unanimously upheld by the Supreme Court in February of this year. Regardless of the previous uncertain legal status of these standards, LAWA should have included analysis under the more protective standards, as a

<sup>1</sup> On-Airport Emissions Key Conclusions, page 4-460, LAX EIS/EIR

<sup>2</sup> 14a Human Health Risk Assessment Technical Report (HHRA), page 2, LAX EIS/EIR

<sup>3</sup> [http://www.aqmd.gov/news1/Fleet\\_Rule\\_Home.htm](http://www.aqmd.gov/news1/Fleet_Rule_Home.htm) and <http://www.aqmd.gov/rules/rulesreg.html>

conservative precaution. Now that these standards are slated for implementation, they must be used in the EIS/EIR.

Though the EIS/EIR included California Ambient Air Quality Standards (CAAQS), which are slightly more stringent than older national standards, the new national standards are even more protective of human health. Additionally, LAWA should be more sensitive to these concerns given the current "Extreme" nonattainment status of the Los Angeles area with respect to ozone and "Serious" status with respect to particulates.<sup>4</sup>

#### ***The "Preferred Alternative" Would Violate Standards for Particulate Matter***

In the General Approach and Methodology section, it is stated that the current method to account for PM<sub>2.5</sub> is to use PM<sub>10</sub> as a surrogate.<sup>5</sup> If this is so, then both the construction and operational unmitigated emissions from all alternatives would exceed the new PM<sub>2.5</sub> standards by significant amounts ranging up to 550% for Alternative A during the peak of construction.<sup>6</sup> With the menu of mitigation efforts in place, all alternatives are still predicted to violate the new particulate standards. The preferred alternative is predicted to be at more than twice the standard during construction and full operation.<sup>7</sup> Nowhere in the EIS/EIR are these issues addressed.

#### ***Proposed Mitigation for Particulate Matter and Ozone is Utterly Insufficient***

Despite the large problems with particulate emissions without mitigation, the mitigation efforts included in the plan reduce particulates the least of all the criteria pollutants, a nominal 5 to 7 percent compared to the up to one third reductions in carbon monoxide (CO). Estimates of particulate reductions are conspicuously missing from Table 4.6-16, which lists the reductions of NO<sub>x</sub>, VOC, and CO from mitigation measures. According to Table 4.6-6, stationary sources at LAX contribute significantly to total particulate emissions, accounting for 54 of the 159 tons per year of baseline (1996) emissions, however no mitigation measures are offered to address this large source category. LAWA should focus more attention on mitigation measures that lower particulates.

The EIS/EIR also fails to address the impacts of any alternatives on ozone, a major air quality problem in Los Angeles, in terms of meeting state and federal standards.

#### ***Conformity Budgets Should Be Included:***

The emission levels predicted in the EIS/EIR from the preferred alternative are stated to trigger conformity requirements. However, the conformity analysis including these figures will not be available to the public for some time. Without this analysis, it is impossible to assess the

<sup>4</sup> "PM10" or PM with average diameter less than or equal to 10 microns.

<sup>5</sup> PM<sub>2.5</sub> are particulates with diameters less than or equal to 2.5 microns; page 4-462, LAX EIS/EIR

<sup>6</sup> Based on Table 4.6-13, LAX EIS/EIR; Calculation: (98 ug/m<sup>3</sup> - 15 ug/m<sup>3</sup>)/15ug/m<sup>3</sup>, Annual Arithmetic Mean (AAM)

<sup>7</sup> Based on Table 4.6-20, LAX EIS/EIR; 39 ug/m<sup>3</sup> and 34 ug/m<sup>3</sup> versus 15ug/m<sup>3</sup>, AAM

feasibility of any alternatives. LAWA should, at a minimum, include in the EIS/EIR the conformity emissions budget listed in the California State Implementation Plan (SIP), and compare the overall emissions projected in the LAX Master Plan to this budget.

***Questionable Emission Estimates for Toxic Air Pollutants:***

Although the consultants used a wide variety of referenced sources to construct emission profiles for all of the sources at LAX, the "surveys" that were used to obtain operational factors for all of the equipment were not referenced. It is unclear why a phase I set of emissions estimates was constructed for all sources and then later revised as phase II, only changing emission estimates for aircraft.

The report states that the Phase II emission estimates were "refined based on inspections at LAX and interviews with LAX tenants identified by LAWA." It is not clear how these inspections and interviews could cause emission estimates for some of the most toxic chemicals, such as 1,3-butadiene, acetaldehyde, acrolein, arsenic, benzene, cadmium, formaldehyde, lead and styrene to be adjusted downward, while other less toxic chemicals such as hexane, copper, nickel and zinc were increased. Lead, for example, was adjusted from an estimated 1,253 kilograms emitted per year from aircraft to 29 kg per year, with no footnoted explanation of anticipated jet fuel changes or any other such possibility. It is implausible that operational parameters could drastically decrease emission estimates for certain chemicals while increasing others.

***Emissions of Lead from Airport Activity Must Be Better Addressed:***

In the state of California, airports are the largest source of lead, accounting for 149 of the estimated 175 to 182 tons emitted per year.<sup>8</sup> Lead was listed by the state as a Toxic Air Contaminant (TAC) in 1997, and the Office of Environmental Health Hazard Assessment (OEHHA) recently selected lead as one of five TACs that may cause infants and children to be especially susceptible to illness.<sup>9</sup> OEHHA is currently reviewing lead standards to determine whether they are protective of children's health. The agency has already concluded that even airborne lead levels at one third of the current state standard could result in 10 percent of children having lead blood levels above official levels of concern set by the Center for Disease Control and Prevention.<sup>10</sup>

Considering these developments, the exclusion of lead from the air quality and human health risk assessment (HHRA) portions of the EIS/EIR is inappropriate. The EIS/EIR states that emissions of lead are "relatively low and would not contribute to a violation of the Pb NAAQS or CAAQS."<sup>11</sup> However, it is known that harmful effects of lead can occur from exposures below

<sup>8</sup> Proposed Identification of Inorganic Lead as a Toxic Air Contaminant, California Air Resources Board, March 1997.

<sup>9</sup> Under the Children's Environmental Health Protection Act (Senate Bill 25, Escutia; chaptered 1999) and (Health and Safety Code Sections 39669.5(a)); the five TACs were reviewed and endorsed by the Scientific Review Panel.

<sup>10</sup> OEHHA, Lead: Evaluation of Current California Air Quality Standards With Respect to Protection of Children, September 2000.

<sup>11</sup> Section 4.6.6 Environmental Consequences, page 4-482, LAX EIS/EIR

the ambient air quality standard. Since the lead standard was put in place over 20 years ago, it has become clear that lead is a potential human carcinogen and a strong neuro- and developmental toxicant at low levels.<sup>12</sup>

The screening report attached to the HHRA actually named lead as a "significant community health concern... released in significant quantities (2,941 kg/yr) from LAX."<sup>13</sup> It also stated that lead would be "retained as a TAP of potential concern," and the Air Quality report directs the reader to the HHRA for further analysis of lead. However, there it is stated that lead is predicted to be below the ambient standards and therefore eliminated from the analysis.<sup>14</sup> Because lead does not have a Reference Exposure Level (REL), as with other chemicals for which "toxicity criteria are not available," a quantitative toxicity screen was not conducted.<sup>15</sup> In fact, The California Air Resources Board has not yet set a REL for lead because they could not identify a threshold value below which exposure to lead is safe.<sup>16</sup>

The final risk analysis completely excludes noncancer effects of lead as well as cancer risks from lead despite the availability of cancer potency factors.<sup>17</sup> The EIS/EIR for LAX is unacceptable without further analysis of such a major threat to public health.

***Health Risks are Underestimated:***

The Executive Summary of Human Health Risk Assessment states that "methods are used that are more likely to overestimate than underestimate possible health risks" and "risk estimates represent upper-bound predictions of exposure, and therefore health risk, that may be associated with living near, and breathing emissions from, LAX during and after implementation of the Master Plan." The risk assessment, however, upon closer examination, actually underestimates risk in many instances.

The assessment states "cancer risks were estimated for people who grow up and spend most of their adult life near the airport."<sup>18</sup> Consequently, the analysis was based on exposure durations of 30 years for adults and six years for children. This is counter to common risk assessment guidance recommending exposure durations of 70 years for lifetime cancer risk.<sup>19</sup> The resulting assessment, based on these low exposure duration values, underestimates exposure by over one half.

Inhalation Rates used in the analysis were also at the low end of the spectrum. The US

<sup>12</sup> Agency for Toxic Substances and Disease Registry, ToxFaqs, June 1999

<sup>16</sup> Consolidated Table of OEHHA/ARB Approved Risk Assessment Health Values, July 2001.

<sup>17</sup> Consolidated Table of OEHHA/ARB Approved Risk Assessment Health Values, July 2001.

<sup>18</sup> HHRA, page 19, LAX EIS/EIR

<sup>19</sup> Office of Environmental Health Hazard Assessment, Exposure Assessment and Stochastic Analysis Technical Document, Chapter 11: Exposure Duration, December, 1996; California EPA, Practices, Needs and Methodologies for Human Exposure Assessment at Cal/EPA, Table 4-4, February, 2001; US EPA Exposure Factors Handbook, ORD, August, 1997.

EPA Exposure Factors Handbook<sup>20</sup> recommends an average inhalation rate of 1.07 m<sup>3</sup>/hr, more than 70 percent higher than the 15 m<sup>3</sup>/day rate used in this assessment. The assessment also selected the highest average adult body weight, 70 kilograms (kg), which leads to further underestimates in weight-adjusted exposure. Guidance indicates that lifespan exposure analysis (0 to 70 years) should use an average body weight of 62-63 kg, depending on the source.<sup>21</sup> Additionally, if this assessment represents the most sensitive populations, it should use body weight factors for adult females, which range from 62-68 kg, according to EPA's Exposure Factor Handbook.

***Health Risk Assessment Based on Alternative C May Underestimate Risks from Other Alternatives***

The risk was also underestimated for the build alternatives under 2005 post-mitigation conditions, because it was based on Alternative C, which the assessment states is "essentially identical" to alternatives A and B.<sup>22</sup> Alternative C, however, would include the least construction activity of the three alternatives and therefore would represent the lowest risk of any alternative. Pre-mitigation analysis for 2005 did not state which alternative the modeling was based on; it was simply noted that all three build alternatives were "predicted to be similar."<sup>23</sup> Alternative B seems to produce the highest modeled concentrations of TAPs in 2015 for both pre- and post-mitigation conditions. Therefore, it would seem to be the logical choice as a conservative estimate for all three alternatives.

***Particulate Emissions from Aircraft Must Be Included***

Particulate emission estimates from aircraft should have been considered in the HHRA. It is merely mentioned that their exclusion leads to "uncertainty in the risk estimates presented";<sup>24</sup> it should have been clearly acknowledged that it led to a significant underestimation of risk. The Air Quality analysis stated that "The major sources of PM<sub>10</sub> emissions are aircraft engines (32 percent)..." while the HHRA states that aircraft are expected to emit "relatively little" PM.<sup>25</sup> This later statement is a contradiction and serves to minimize the impacts of the build alternatives which would include more aircraft activity.

Finally, the last section of the HHRA concedes that "incremental cancer risks after mitigation could be underestimated by about 60 percent." This is inconsistent with previous statements that this assessment represents the upper-bound of risk. Assumptions regarding mitigation measures should have been the most conservative, eliminating the uncertainty of underestimation of risk on such a large scale. Uncertainty regarding risk from diesel particulates, which account for a majority of the cancer risk, was not directly addressed. In fact, assumptions

**Meryt McGindley - Pleasant chat with Jim Ritchie regarding the Green Line and LAX**

After attending and speaking briefly at a sparsely-attended LAX expansion hearing at San Pedro earlier tonight (I'm gonna guess about 30 people showed up total), I had the pleasure of talking at-length with Jim Ritchie, who is the deputy executive director of LAWA (LA World Airports).

After hearing my little 3-minute input, Mr. Ritchie jokingly told me after the hearing that I could have a "plant" having attended the recent transportation meetings conducted between LAWA and the MTA. In other words, our goals are quite similar with respect to the Green Line, and certainly Mr. Ritchie held a great deal of respect and sympathy for our efforts to revive rail as a way to improve Southern California living.  
Green Line in the future.

Although Mr. Ritchie asked me not to elaborate on any specific details (because they are still a work in progress and cannot be confirmed yet), I got the idea that those of us in Friends of the Green Line will appreciate the compromise, security-minded LAX modernization plan supported by Mayor Hahn.

To summarize:

1) Any people mover plans on the part of LAWA to connect the Green Line to the LAX terminals would be like a connecting rail line and NOT a busway. Furthermore, it would NOT be mutually exclusive from any long-term plans to connect the Green Line with any future Crenshaw Line.

2) And speaking of the Crenshaw Line, both Mr. Ritchie and a Robert Gilbert (Deputy Program Manager of URS, which I guess is affiliated with the LAX expansion/modernization plans) mentioned that the MTA and LAWA were both excited at the prospect of the heavy rail/freight line MTA-owned right-of-

-of-way to connect with the Blue

3) Mr. Ritchie and I agreed that it was important to distinguish between short-term solutions (which the voting, taxpaying public wants NOW) and the longer-term, more expensive and legally-difficult solutions of connecting light rail to LAX. Since the latter might take 20 years or more to fund and build, it was critical to focus on short-term solutions that would provide immediate relief but which would NOT preclude future MTA rail connections.

4) Distant parking/passenger and luggage check-in using the Green Line is NOT fantasy, but already being actively considered by LAWA--who is trying to emulate the successful and popular Valley Flyaway Shuttle program. I emphasized to Mr. Ritchie that a "win-win" scenario of LAWA constructing parking structures along the Green Line to enhance both Green Line ridership and LAX access was one that offered LAWA a deserved o

**Subject:** Linking LAX Modernization with LAX Access

Good morning:

As promised to Mr. Ritchie of LAWA and Airport Commissioner Mahala Walter, I am forwarding a summary of my statements at the San Pedro LAX Expansion Hearing last night. Although opinions abound as to what the future of LAX should be, I feel a greater emphasis of simultaneously improving our local infrastructure to enhance access to LAX and decrease freeway congestion requires more attention.

I am forwarding a copy of this E-mail to MTA and local city governments, in that I sincerely hope they will cooperate more in the future to address one of Southern California's greatest problems: congestion and the lack of mass transit to mitigate this congestion.

We all wear many hats in addressing the different issues in our jobs and lives (I wear a few of my own!), and I feel this issue is too critical to ignore.

**To LAWA and the Los Angeles City Council:**

- 1) To improve LAX security and our local economy, we must update/improve/modernize LAX, especially with respect to access.
- 2) Both Mayor Hahn and the MTA have committed to connecting LAX with the Green Line, in particular via an Inglewood Intermodal Transportation Center from which a people-mover would connect to LAX airport terminals.
- 3) A direct LAX-to-downtown rail line, particularly in the form of the proposed Crenshaw-Prairie light rail line (which enjoys overwhelming support by the business community and the government of the City of Inglewood), would be extremely helpful both for the local economy and for LAX access.
- 4) Connecting LAX to Orange County, and potentially Ontario airport, by linking the Green Line to the Norwalk Transit Center, would enhance a truly regional approach to Southern California air travel.
- 5) LAWA should assist in constructing distant parking structures and passenger/baggage check-in in lots along the Green Line, Blue Line and Red Line should LAX be connected to our growing mass transit system--and would therefore deserve to profit financially by operating these parking lots.
- 6) Our elected local, state and federal representatives should lobby to garner citizen support and state/federal funding to expedite the expansion of the Green Line to LAX and the Norwalk Transit Center. Such connections between LAX and both Los Angeles and Orange Counties are years, if not decades overdue.

Sincerely,

Re: LAX Master Plan

Dear Sirs,

We are writing to voice our strong opposition to the expansion plans proposed for Los Angeles International Airport (LAX) and the EIR/EIS prepared in connection therewith. Any proposed expansion or addition of runways beyond the existing airport perimeter will be seriously detrimental to all of the surrounding communities, and the additional passenger and flight traffic created thereby would adversely impact both adjacent and remote communities.

We are longtime residents of the Westchester community, adjacent to LAX. We enjoy living in an environment that still maintains a "small-town" feel despite the surroundings of a sprawling metropolis. Our two young children attend school in the community and we are active participants in local YMCA, church, park, AYSO and numerous other activities that bring our community together. Part of what makes

this community so special is the large number of families and others of all ages who are willing to patronize local businesses in our revitalized business district, as well as live and play in the neighborhood without great fear for personal safety.

An increase in passenger and airline traffic at LAX, and/or the expansion, in any manner whatsoever, of LAX facilities beyond the existing airport boundaries (we do not, for example, support inclusion of any Manchester square property), would severely and detrimentally impact our community by bringing added noise, air and ground commuter traffic and pollution. Additionally, since the events of September 11, it has been suggested that expansion of LAX to accommodate more passengers, planes and cargo would only serve to increase its potential as a target for terrorist activity. Finally, but not any less significant, the expansion of LAX would destroy the ability of our community to exist peacefully next to LAX. Thriving businesses would be eliminated, requiring residents to shop elsewhere (adversely impacting remaining businesses and ultimately inconveniencing the consumer); residents would become frustrated by unbearable noise and pollution levels !! from ground and air traffic; ground traffic transversing our community, without stopping to patronize any businesses and in great haste to make airline connections would raise great safety concerns for pedestrian traffic and neighborhood tranquility; and the increase in transient and/or temporary visitors does little to enhance the feeling of security and safety that comes with knowing your neighbors.

All of the above would necessarily result in the destruction of life as we know it today in Westchester (and all of the other communities surrounding LAX). The skies above Los Angeles are already too crowded and pose known safety hazards. Efforts are being undertaken to preserve and improve upon neighborhoods and quality of life throughout Los Angeles. The health, safety and welfare of Westchester residents is of paramount importance, and, fortunately, there is a viable alternative to the expansion of LAX.

We support the efforts of those groups that have promoted a "regional" approach to airport expansion. It is time to stop wasting time and money on LAX expansion and instead refocus the issue to quickly and efficiently developing regional alternatives.

In light of the September 11 events, this approach also gives the added benefit of decreasing the visibility of LAX as a possible terrorist target. While we agree, conceptually, that some safety issues with the LAX facility need to be addressed, it should be within the strict confines of maintaining or reducing current passenger, airline and cargo capacity, and be accomplished without any further destruction of homes or businesses.

Thank you for your thoughtful consideration of these important matters.

Sincerely,

Gail Y. Folan

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*The LAX Master Plan makes no sense because of the already crowded air traffic and freeway/street conditions getting to & from the airport. That relatively small area should not bear more of the responsibility for the greater LA area. Regional airports should be developed.*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.

*LAX IS MAXED*

*I oppose the LAX Master Plan. LAX is encroaching on our wonderful South Bay and West Side neighborhoods. Additional growth cannot be absorbed in this location. It affects our quality of life (air, noise, congestion) and increases flight safety concerns. We need another international airport to share the benefits + burdens. With good planning areas such as Palmdale or Riverside could see economic benefits with careful planning burdens would be minimized.*

*Thank you for the position you have taken on the Los Angeles airport issue. As a neighbor and former frequent user of LAX I have experienced its tremendous growth. Actually, one of the reasons for locating in the South Bay 30 years ago was its proximity to LAX. We still are able to enjoy its proximity for meeting visiting friends and family. Having said that, I can't for the life of me understand why in an area as spread out as Los Angeles and Orange Counties, it would not be to everyone's benefit to enlarge the other regional airports. The South Bay area with its high population density, cannot absorb any more traffic. The 405 and Sepulveda Blvd. have reached their maximum capacity which even now pushes traffic into neighborhoods ill equipped to handle it. This leads to more dust & grime, air pollution, increased noise level & even ocean pollution from run off. My neighbors and I are all opposed to further LAX expansion.*

*I am totally against any expansion of LAX airport. Aside from the additional traffic, noise & pollution, it will be even more of a nightmare to pick up or drop off someone at the airport. I live at the north end of Manhattan Beach. The normal drive to LAX is about 12 minutes. With ~~any~~ any traffic, it takes about 30 minutes. With additional traffic that expansion will bring, it will take an hour for a 12 minute drive.*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport, Alliance for a Regional Solution to Airport Congestion

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*We do not need anymore congestion in Westchester. What this area needs are regional airports that will save passengers travel time & relieve the streets and freeways of some of the traffic especially during the rush hours.*

*As for those people who are NIMBY's. Other people want a decent life too! We need to share the noise, congestion and disruption.*

Congresswoman Jane Harman  
811 N. Catalina, Suite 1302  
Redondo Beach, CA 90277

Dear Friends,

For eight years, I have advocated a regional plan that fairly shares the benefits and burdens of air transportation across our region. I oppose the proposed LAX Master Plan because it does not impose reasonable limits on growth and fails to include an adequately developed plan for building out other airports in the region.

My view is shared by many others:

- ☛ More than 80 Southern California cities have joined a coalition opposed to the proposed expansion of LAX and in favor of a regional approach.
- ☛ Four counties—Los Angeles, Orange, San Bernardino, Riverside—have revived the Southern California Regional Airport Authority to coordinate development of a fair regional aviation system.
- ☛ Last month, 12 Southern California Members of Congress from both parties joined me to support common-sense principles for developing our airports. In a letter to Transportation Secretary Norman Mineta, we pledged to work toward a plan for Southern California that:

- Fairly distributes the benefits and burdens of aviation needs across the region.
- Gives <sup>ABSOLUTE</sup> priority to airports eager for more growth like Palmdale and Ontario.
- ~~Does not force~~ <sup>FURTHER</sup> growth on already over-burdened airports like LAX. **[PROHIBITS]**
- Includes ground transportation to reduce congestion and improve access to regional airports.

*SHOULD  
COUNTERMANS*

Now it is your turn to make your voice heard. On Saturday, June 9th, the Federal Aviation Administration and Los Angeles World Airports (LAWA) will hold official hearings on the proposed expansion of LAX. I will be submitting testimony to hearings held in the 36th Congressional District at the Furama Hotel in Westchester and the Manhattan Beach Marriott. I want my testimony to reflect the views and concerns of this district and would like to hear from you. The public comment period on the Master Plan ends July 25. If you have comments on the Master Plan that you would like me to include in the official record, you can:

- Mail or fax the response form on the back of this letter to my office.
- Go to [www.house.gov/Harman](http://www.house.gov/Harman) and click on "Comment on the LAX EIS/EIR."

You can count on my continued active involvement on this issue.

Regards,

*Jane Harman*

Dear Congresswoman Harman:  
 Thank you for your interest in correcting the LAX air and ground traffic congestion by proposing a regional plan. Traffic and pollution in and around LAX has reached the limit. Let us build/expand regional airports where lots of land is available and is more economical. Am losing precious time whenever I must drive on P.C.H. or the 405 Hwy.

WE ARE ALREADY IMPACTED BY NOISE FROM LOW FLYING  
JET AIRCRAFT. HAVING LIVED IN THIS HOUSE FOR OVER  
30 YEARS WE FIND EACH YEAR THE POLLUTION ON OUR  
PROPERTY IS INCREASED YEAR BY YEAR, EVEN THOUGH  
SOUTH REDONDO IS APPROX 12 MILES SOUTH OF THE AIRPORT.  
ALSO PATH FROM TORRANCE BLVD USED TO BE AROUND  
20 MINUTES BY CAR - NOW - ESPECIALLY AT PEAK PERIODS  
TAKES AROUND ONE HOUR. WE DO NOT WANT ANY MORE  
EXPANSION OF LAX, SPREAD THE EVER INCREASING  
AIR CRAFT TRAFFIC EITHER - NORTH, SOUTH OR EAST. MAYBE  
AT MIRAMAR - PALMDALE OR ORANGE!

TRAFFIC ON THE 405 FREEWAY + SURROUNDING SOUTHBAY MAJOR ROADWAYS ~~ARE~~ CURRENTLY SO ROADBLOCKED, IT INHIBITS TRAVEL + COMMERCIAL EXCHANGE. ALL TYPES OF BUSINESS TRANSACTIONS MUST BE IMPACTED ADVERSELY. MORE + MORE, PEOPLE WE TALK TO WANT TO LEAVE THE AREA + ARE RESTRICTING THEIR TRAVEL. WE HAVE BEEN PERSONALLY AFFECTED.

AIR TRAFFIC IS CURRENTLY BREAKING INTO OUR SLEEP AT NIGHT. WE WORRY ABOUT LOSS OF SLEEP AND/OR A COLLISION OVER THE COASTLINE AS SMALL PLANES ADD TO THE CONGESTION. EMPLOYEE TRAFFIC FROM ADDED PLANES AND INCREASED PASSENGER GROUND TRAVEL TO AND FROM THE AIRPORT INCREASES POLLUTION - TRASH, FUMES, FUEL DUMPING IN A VERY SMALL, CONGESTED AREA.

Dear Congresswoman Harman,

June 8, 2001

Opinion: The size of the proposed Regional airport Plan is too large for the number of acres at LAX, and, the noise these airplanes emit has already become so bothersome I no longer enjoy or look forward to my hobby - working in the family garden.

## FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000 2020	Region	Pop. Growth 2000 2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport, Alliance for a Regional Solution to Airport Congestion

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

- BUSINESS SAVVY DEVELOPERS NOT POLITICIANS OR MAD-CAP DEVELOPERS NEED TO HEAD THIS.
- BIGGER IS NECESSARILY BETTER. AN ORGANIZED AND WELL LAYED OUT PROJECT & DEVELOPMENT OF THAT PROJECT IS REQUIRED.
- DO IT RIGHT. DON'T RE-DO IT IN TEN YEARS BECAUSE IT WASN'T THOUGHT OUT.

Playa del Rey, CA 90293

Re: No to LAX Expansion

I have lived in Playa del Rey for 11 years and have supported you in your efforts. I now understand that one of the proposed plans in the LAX expansion is to close Pershing Drive and use it for an airport entrance.

Between Playa Vista and the LAX expansion how can Playa del Rey survive?

I live on Pershing and would like to trust that my investment as well as the quality of life for my family will be intact.

DO NOT CLOSE PERSHING DRIVE.....

Thank you for your support

I feel the area is already overburdened with heavy traffic and noise. I live in Palms Verdes and dread the thought of going near the airport. Also, in this area we are besieged by Turbo prop airplanes during the early morning and late evening. Some times the jets get too close to shore and you can hear them as well. The more power the airport has, the more they will take advantage of.

Dear Congresswoman Harman:

We appreciate your stance in advocating for a regional plan rather than a dramatic expansion at LAX.

Hong Kong should serve as our model by locating the airport out of the city and providing first class transportation to and from the airport. The cut off of Century Freeway's light rail system short of LAX never made sense.

LAX and surrounding communities are already over burdened; it is only fair to share the development / peaks / burdens with other regions that presently utilize LAX, having few alternatives

Sincerely,  
Myra [Signature]

I DON'T KNOW WHY IM WRITING THIS MAYBE ITS BECAUSE  
IM NOT VERY SMART.

THE L.A. AIRPORT SHOULD NOT BE EXPANDED, BUT IMPROVED,  
THE PALMDALE DEVELOPEMENT SHOULD TAKE PLACE BY  
~~ZONING~~ THE AREA TO BUSINESS AND MANUFACTURING.  
ALLOWING FOR EXPANSION

1. IMPROVE HWY 2 NORTH OF HWY 210 TO INTERSECT  
WITH HWY N3 AND ON TO PALMDALE LOCATION  
AS A HIGH SPEED HWY

PROVIDE SERVICE FROM RECEDA, BURBANK & W COVINA  
PROVIDE UNLIMITED PARKING, SHUTTLE SERVICE AND  
BAGEAGE SERVICE TO AIRPORT AT BURBANK LOCATION  
+ RESTRUANT & TOILET FACILITIES

(NOTE) RAIL SERVICE FOR FREIGH INTERSECT AT VICTORVILLE  
COST YES BUT CONSIDER THE FUTURE AND THE  
POSSIBILITY OF CLOSING OR RESTRICTION OF THE L.A.  
AIRPORT AND THE ADVANCEMENT OF AIR TRAVEL AND  
EQUIPMENT - HIGH SPEE RAIL

THE POPULATION OF PALMDALE VICTORVILLE HISPERIA,  
APPLE VALLEY THESE AREAS WILL CONTINUE TO  
EXPOND AND WE WILL NEED A AIRPORT TO COVER  
COVER THIS AREA. I REMEMBER L.A. AS IT  
WAS IN 1926 AND MINES FIELD AS A BIG PIECE  
OF DIRT WITH A 30' TOWER. CLOVER FIELD IN  
SANTA MONICA HAD MORE TRAFFIC.

Congresswoman Jane Harman 811 N. Catalina, Suite 1302 Redondo Beach, CA 90277		

June 9, 2001

Jane Harman, Congresswoman  
811 N. Catalina Ave., Suite 1302  
Redondo Beach, CA 90277

Dear Congresswoman Harman,

We have lived in the South Bay for the last 35 years. During that time we seen a lot of growth. We are not among the people who are against growth, but there comes a time when things like the Airport have gotten as large as they should be.

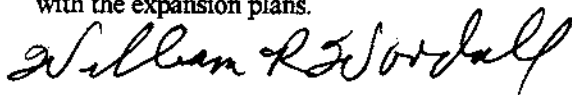

I lived and grew up in West Los Angeles, and I remember when I flew to New York City in the '50s. That is now where the freight flights are. Then they built the tunnel under the runway on Pacific Coast Highway. I remember this because my Grandma and Grandpa lived in Manhattan Beach and we would visit them. I have heard talk about the creation of the Palmdale Airport since the 1950's and nothing has been done about it. A fast rail system could be built into L.A. from there. I used to hunt rabbits out where there are thousands of houses now. If we wait any longer to start another International Airport for all of that area we will be the losers.

We cannot drive the 405 Freeway between El Segundo Blvd. and Jefferson most of the time because it is stop and go, and at peak times it is a parking lot. For example, we left Manhattan Beach recently around 5:30 on a Saturday night to go to Westwood, and it took us 1 hour to get there. When traffic is moving it usually takes about 20-25 minutes.

There are 3 airports not including LAX within an 18 mile circle of where we live -- Torrance, Hawthorne and Santa Monica airports, and a little father east, Long Beach airport. So we have not only small aircraft flying about, but also the large jets. The jets seem to take advantage of low clouds and fog, ( as we are unable to see them) and fly over our area.

We do need relief from any more airport traffic. When we go on vacation my wife and I notice that our noses do not run as they usually do. Planes drop a lot of pollution in the air and to increase flights will make it even worse. One doesn't have to be an expert to determine if more traffic should be allowed at the airport. All one has to do is go to the airport and open their eyes as to what is happening going to and coming from, and especially while one is there at the airport (as I'm sure you know).

We live about 15-20 minutes from the Airport. With the population growth you have estimated in the next 20 years, LAX will not have to worry about losing revenue to another international airport in another area. After all, what we are really talking about is money, isn't it? It is time to start thinking more about people's lives and the quality of life. We hope for once the FAA will listen to the people and use a little common sense. We hope you can convince them that they will destroy a beautiful area if they continue with the expansion plans.

Mr. and Mrs. William Woodall

William Woodall

Manhattan Beach, CA 90266

PC02695

THANK YOU FOR YOUR EFFORTS TO KEEP THE AIRPORT FROM UNREASONABLE EXPANSION.

MY PROBLEMS IN EL SEGUNDO.

1. RUNWAYS SEEM TO GET CLOSER
2. AIRPLANES MAKE EARLY TURNS (PARTICULARLY AT NIGHT) AND FLY RIGHT OVER THE HOUSE.
3. WE INSTALLED DOUBLE PAINED WINDOWS BUT THE JETS SEEM TO CREATE MORE & MORE NOISE & POLLUTION.
4. WITH THE ENERGY "CRUNCH" WE CANNOT AFFORD OR IN GOOD CONSCIENCE USE AIR CONDITIONING - YET OPENING OUR WINDOWS IS OUT OF THE QUESTION.
5. THE TRAFFIC HAS REALLY GOTTEN CONGESTED.

From my home I watch planes taking off from LAX one right after another, trailing black clouds of pollution. They fly out over Santa Monica Bay, then swing back, depending on weather and time of day (usually midnight or later) over my house, very noisily. More important, the airspace is too crowded to be safe.

I use LAX myself, hate it, don't see that enlarging it would in any way benefit anyone except whoever stands to gain financially, know people in other areas who would be happy to use an airport closer to their homes.

And I am a long-time, reasonable Republican, so fed up with arrogance in my party that I'm changing my registration. Hurrah for Jim Jeffords!  
And kudos to you, Jane Harman!

This page intentionally left blank.

This page intentionally left blank.

CLEARLY WE NEED ADDED AIRPORT CAPACITY, BUT THE CURRENT PLAN FAILS TO MEET ANY LOGICAL CRITERIA FOR ACCEPTABILITY EXCEPT INCREASED LA CITY TAX INCREASES AND MINIMUM COST TO THE AIRLINES. THE INCREASED NOISE, POLLUTION, AND CONGESTION WILL SERIOUSLY IMPACT THE ENTIRE WEST SIDE. AT A TIME OF HIGH FUEL PRICES, DOES IT MAKE SENSE TO BRING TRAVELERS FROM UP TO 50-60 MILES TO LAX!! RATHER THAN PALM DALES, ONTARIO, ETC.? NO!!

TO WHOM IT MAY CONCERN,

THE REGIONAL PLAN PUTS THE NEEDS OF ALL THE PEOPLE AND NOT THE WANTS OF A FEW.

THE POPULATION OF SOUTHERN CALIFORNIA IS GROWING AND WILL CONTINUE TO GROW.

TO CONCENTRATE THE NEEDS OF AIR TRAVELERS IN ONE SPECIFIC LOCATION IS SMALL MINDED AND SELF-SERVING TO A SMALL GROUP OF BUSINESS PEOPLE.

LOOKING DOWN THE ROAD A HUNDRED YEARS FUTURE GENERATIONS WILL SAY THAT IS WAS SMART TO DISTRIBUTE AIR TRAFFIC ALL AROUND SO. CALIFORNIA AND WILL THANK YOU FOR IT.

*I agree with the concept of developing regional airports to cope with the already serious problems at LAX and the projected growth of surrounding regions. The congestion on the field and the long lines at counters are already insupportable. As a resident of the Palos Verdes Peninsula I am also concerned with aircraft noise and pollution, to say nothing of the hair-raising sight of planes coming in for landings at chillingly close intervals. Having read James Fallows cogent article "Freedom of the Skies" in the June Atlantic Monthly, I am convinced that the 80 So. Cal. cities and 12 So. Cal. members of Congress have the right plan!*

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

I strongly support the regional airport plan and oppose the proposed LAX Master Plan which, if implemented, will substantially increase noise, pollution and traffic in my community area.

Dear Congresswoman Harman,

11 June 2001

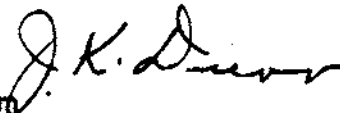

My family and I are opposed to the current plans for the expansion of LAX. We would be very interested in joining your coalition supporting a regional approach.

We have lived in Westchester since 1945 and have been "condemned and moved" twice to make room for LAX expansion. The noise from the airport is currently horrendous, the traffic adversely affects the area for miles surrounding us. It is time to STOP the airport expansion before more residential communities are made uninhabitable. Expansion belong in Palmdale and Ontario.

Thank you for your effort to coordinate a fair regional aviation system.

Respectfully,

Judy K. Dunn  
jdunn1918@aol.com

Dear Jane,  
 Thanks first of all for meeting with the PVP group this week. It really was a worthwhile meeting. Just a thought - is the Fed. government able to help states with University or community college construction costs. Might this afford more students education opportunities?  
 Now, about LAX. Already we have more noise the last 6 years since we moved here. We hear about the air traffic controllers' head problems at the present load. I hate to think how much head it would be with additional traffic. Consumers travel less time to get to and pay airports when there are several in various areas as opposed to one giant one.

*It seems obvious to me the regional plan makes more sense since the people using those airports would also have a smaller commute to the airport, lessening overall environmental impact.*

*The South Bay already tolerates a large amount of traffic and noise, the property values would be adversely affected by LAX expansion, the noise level would rise and coastal environmental concerns would also be adversely affected. NO ON LAX EXPANSION!*

Dear Ms. Harmon,

The LAX airport has been a problem concerning us for more than a year. Now take-off patterns have been changed so that planes are looping back over our home toward the ocean. I've been to many meetings concerning this and the airport expansion. I used to call all the time to the noise complaint number. Sometimes letters come a few days later explaining there were no planes at the times I called. Even the people at the noise complaint line say that it is useless to call because no one pays attention to their tally. I've given up trying to report those late night incidents (some after midnight even up to 2 AM that wake me out of sleep fearing a plane will crash because it is so loud). So expansion of LAX is out of the question for us. If they are not considerate enough to pay heed to our calls, what will they do with the excuse of more air and land traffic. What happened to the Palmdale airport location??? Even a bullet train out there from LAX??? Why doesn't the metro greenline go into the airport?? People moving will have to improve a great deal. What about extra air pollution over the South Bay??? Our opinion is a resounding NO to expansion. Help keep our home investment (which is our future retirement money) a reality and eliminate the further disruption of peace and quiet in our neighborhoods.

Sincerely,

  
Barbara J Kane

Dear Congresswoman Jane Harman,

My comment on the LAX master plan can cause major health problems, blunder same and danger of ones crossed cars and airplanes landing every 2 seconds. Please consider we Families with children have to live with the noise of plane landing and the inhalation of airplane poisonous fuels. not the business people, we choose to live here and enjoy the airport the way it is. But if expansion occur people are forced to move.

WE are strongly opposed to any expansion of LAX. The traffic, pollution and noise at current levels is excessive. We found the 6/9 hearings at the Forum Hotel to be a well orchestrated "snow job." For example, projections shown for 2015 included 20 million passengers using El Toro. Do the people in Orange County know this? Another poster stated that pollution would be reduced with the expansion. When asked the consultant replied that the reduction would be only around the current terminals and did not take into account "new pollution" at the proposed new north terminal. Misleading? Yes. STOP EXPANSION!

I have lived in Hermosa Beach for over 30 years. Quality of life is very important to me. I see the expansion of LAX as putting an unnecessary burden on the surrounding communities. I have noticed more airplane noise in the past 5 years. I understand the need for airport growth. But I believe other region of So. Calif. should share the responsibility

Dear Congresswoman Harman:

Both my wife and I believe that a higher priority should be placed on developing other airports rather than increasing the size of LAX. Admittedly, LAX is a night mare right now. Possibly the greatest problem is not the air traffic, but rather the ground traffic (over Memorial day, we spent 30 minutes just trying to get out of the parking structure at 11pm! Due to such a traffic jam!!) Since Orange County is one of the fastest growing regions, we would like to see El Toro developed into a regional and international airport. At the present growth rates of the different regions in Southern California, more people will live closer to it than to LAX in 40-50 years. Also more dollars should be placed into increasing the traffic into and out of Palmdale and Ontario.

Thanks for your consideration. Good luck at the hearings.

Senator Harman,

Please count this family as opposed to the proposed LAX expansion. We can barely drive by the airport during busy times. The infrastructure cannot handle additional airport traffic without severely impacting us at home. We don't want it!!! There's just no more room here. Please don't let it happen!

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000 2020	Region	Pop. Growth 2000 2020
North LA County	762,000 <i>PALMDALE</i>	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million <i>EL TORO DARTMOUTH</i>	Gateway Cities	386,000

• This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport

*pollution - noise - traffic already impact us in the South Bay. Expanding LAX should be limited or not allowed!*

*Already too much traffic on Sepulveda & 405 - ~~expanding~~ expanding the beach will be terrible for Pershing & Vista Del Mar - already too many planes taking off & idling. El Toro, Palmdale, etc... should be utilized.*

*Increased traffic, noise & pollution.  
When I use the LAX airport, it will be more crowded.  
This airport should be for people in this area.  
There is increased danger for residents who live here.*

**I AM AGAINST LAX EXPANSION - WE NEED AIRPORTS IN OTHER COUNTIES**

I support the Regional Airport plan and am opposed to the proposed expansion of LAX. LAX is already an over-taxed and dangerous airport. As well, the immediate neighborhoods including Westchester, Mauna Del Rey & Venice will suffer the noise consequences plus the traffic congestion consequences of an expanded LAX. We need a Regional System like NYC & Chicago.

IT IS TRUE THAT TRAFFIC AND NOISE + POLLUTION HAS INCREASED IN THE LAST YEARS NEAR THE AIRPORT. ECONOMIC IMPACT IS GOOD CONSIDERING THAT THE AIRPORT EMPLOYES THOUSANDS OF PEOPLE, MANY OF THEM ARE LIVING IN THE AREA OR CLOSE FOR THAT REASON. THERE IS ONE THING FOR SURE, IF SOMEONE HAS TO GO TO THE AIRPORT AT THE PICK OF THE SEASON WILL HAVE TO ENTER THROUGH ONLY 2 ENTRIES AND FACE AN HOUR OF GOING AROUND JUST TO PARK. THERE SHOULD BE OTHER ACES TO ENTER LAX, I BELIEVE SOMETHING HAS TO BE DONE TO AVOID MORE CONGESTION. MAYBE IF THE AIRLINES HAVE THE SAME FARE PRICE, SAY GOING TO ONTARIO, JOHN WAYNE AND OTHER AIRPORTS BESIDES LAX, THIS WOULD NOT BE A CHEAPER FARE COMING TO LAX, IN OTHER WORDS, SAME PRICE FOR COMING TO LOS ANGELES.

*Mrs Jane Harman!*  
 The first thing to think about, is who the land at the airport really belongs to! The (U.S.A.F) owns the land the airport sits on. Now I'll answer the questions you asked:

1. Would not
2. Would not.
3. none

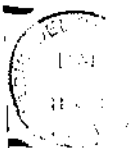

4. Talk to the (USAF) about this problem, what about a war also.

*Karl R. Scholtz*

⑤ only let military & overseas carriers land at LAX and have other airports take in small aircraft

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

If the expansion involves only LAX, that is fine. Please DO NOT try to involve Municipal Airports, including Torrance. We are already dealing with UNBEARABLE noise from the Torrance Airport, and this would make it worse.

Torrance would become an entirely industrial city if this plan involves Torrance Airport.

Dear Ms. Harman, - By the way your flyer is written you are not being open minded. LAX is critical to a strong local economy. It not only contributes but supports & enhances our competitive position in the world economy. LAX is the "gateway" to Asia. We cannot afford a weak airport infrastructure. I dont know when you last traveled through LAX but the congestion, traffic, and parking is terrible. I think your comparison above "says it all". Denver, with 10x the area has a capacity of about 1/2 of what LAX will have. Denver also has the luxury of open space within a 40min drive of downtown. We dont! We need a strong & efficient airport. I urge you to support the LAX Master Plan.

*Because 405 will be at gridlock, more traffic on PCH, then more on Valley Dr. + Hermosa Ave. noise + air pollution from this. Longer commute times due to congestion on PCH. The desirability of South Bay communities will decline because of these problems, so property values + economic development will be adversely affected.*

# CALIFORNIA CHAMBER of COMMERCE

November 2, 2001

Mr. Jim Ritchie  
Deputy Executive Director  
Board of Airport Commissioners  
P.O. Box 92216  
Los Angeles, CA 90009-2216

**SUBJECT: LAX MASTER PLAN**

Dear Mr. Ritchie:

The California Chamber of Commerce would like to submit the following comments on the Los Angeles International Airport (LAX) Master Plan.

The Chamber agrees that the decision by Mayor Hahn and the Board of Airport Commissioners to refocus the LAX Master Plan process on safety and security decisions is both responsible and prudent given the events of September 11 and their aftermath. Now, more than ever, it is important that the Master Plan process move forward, while taking into consideration the new realities and economics that have emerged since September 11.

Recent events have underscored the critical role played by airports and, particularly, LAX, underpinning California's economy. Consistent with safety and security, the LAX that emerges from the Master Plan process needs to be an efficient, user-friendly facility that accommodates business and leisure travel, as well as a significant share of cargo volume.

Decisions about the future of LAX will impact virtually every segment of the California economy—from travel and tourism to manufacturing, from entertainment to aerospace, from high tech to fast food. Confidence, comfort and convenience are essential ingredients in restoring "normalcy" to air travels. Planning for both the short and long term at LAX must factor in those considerations.

The California Chamber recognizes that no single airport can carry the whole load and that regional airport development is essential. At the same time, it is important that every airport be optimized, especially LAX, which is the West Coast's gateway to the world.

Sincerely,

Jeanne Cain, Vice President  
Government Relations

October 31, 2001

TO: JIM RITCHIE  
LOS ANGELES WORLD AIRPORTS LAX MASTER PLAN  
ROOM 218, P.O. BOX 92216  
LOS ANGELES, CA 90009-2216

FROM: RUTH C. ATTIAS  
7928 ALTAVAN AVENUE  
WESTCHESTER, CA 90045-2522

SUBJECT: INPUT COMMENTARY TO LAX MASTER PLAN PROPOSAL

1. Instead of writing a lengthy list of disagreements with the EIR, I must state as input commentary that: THE CURRENT PROPOSED MASTER PLAN FOR LAX SHOULD BE WITHDRAWN FROM ANY FURTHER CONSIDERATION !!

-- THE EIR DATA IS OUTDATED - AND FLAWED

-- THE EXISTING PROPOSED MASTER PLAN DOES NOT OFFER ANY ADDITIONAL ALTERNATIVE THAT DOES NOT INCLUDE "EXPANSION"

-- SEEMS TO USE THE TERM "MODERNIZATION" WHEN IT REALLY MEANS "EXPANSION".

-- THE PUBLIC WAS NOT GIVEN AN "EXECUTIVE SUMMARY" OF THE PROPOSAL THAT WOULD GIVE THE KEY IMPACT FEATURES OF THE EXISTING PROPOSAL. SUCH A SUMMARY SHOULD HAVE BEEN MADE AVAILABLE TO THE PUBLIC. LAWA surely knew that 12,000 pages of reading that was only accessible only on a very limited basis was not realistic. Public Libraries have limited days and hours; the Public Hearing site copy on a table surrounded with citizens trying to get a glimpse of the volumes...and no place to sit and read, etc.

2. I did hear the hours of verbal presentation made by the LAWA proponents followed by the public responses at the Hearing at Furama Hotel. From that experience and from all the other sources from which I have gleaned information, I MUST COME TO THE CONCLUSION THAT I MUST OPPOSE THE MASTER PLAN FOR LAX AS IT HAS BEEN PROPOSED AND NOW EXISTS !!

ANY FORM OF EXPANSION OF THE LAX AIRPORT IS UNACCEPTABLE, INCLUDING ACQUISITIONS OF PROPERTY IN THE SURROUNDING AIRPORT AREA THAT AS A RESULT WOULD DESTROY BUSINESSES AND RESIDENTIAL AREAS OF WESTCHESTER, INGLEWOOD, PLAYA DEL REY AND EL SEGUNDO. THIS INCLUDES INFRASTRUCTURES SUCH AS "WIDENING OF SEPULVEDA BLVD." AND "ARBOR VITAE OFF RAMP INTERCHANGE". THE COMMUNITIES ARE NOT STUPID ENOUGH TO THINK THAT SUCH VENTURES ARE NOT FOR THE BENEFIT OF ALL FUTURE PROPOSALS FOR EXPANSION !! TOO MUCH IS ALREADY DESTROYED !!

3. THE AIRPORT COMMISSIONS (AS THEY COME AND GO) HAVE NOT TAKEN ACTIONS NECESSARY TO FOCUS ON THE REGIONAL APPROACH TO ACCOMMODATE PASSENGERS AND CARGO AT THE OTHER LA-OWNED AIRPORTS. THE COMMISSION MUST TAKE STEPS NOW ... AND NOT DRAG FEET ANY LONGER !!

Respectfully Submitted,

*Ruth C. Attias*

To Jim Ritchie

I have lived in Westchester since 1951, since then I have seen the Airport expand many times, I saw whole neighborhoods disappear. I thought things only got worse.

I believe the problem of traffic is the result of not correcting the bottleneck the airport has, you can't just make wider streets and continue to acquire more land when everything still goes to the same bottleneck.

My suggestion is to change the existing problem by relocating the main ~~entrance~~ <sup>entrance</sup> and <sup>parking</sup> the total layout of the airport.

If you use the south east side that ~~is~~ is between the 105 and the 405 freeway to enter. And if you widen LA Cienega Blvd instead of Sepulveda and Lincoln Blvd. you could create a direct route for traffic.

If you would use people movers like the ones in Las Vegas to ~~from parking to~~ <sup>entrance</sup> ~~entrance~~ to terminals.

There are many exit along LA Cienega

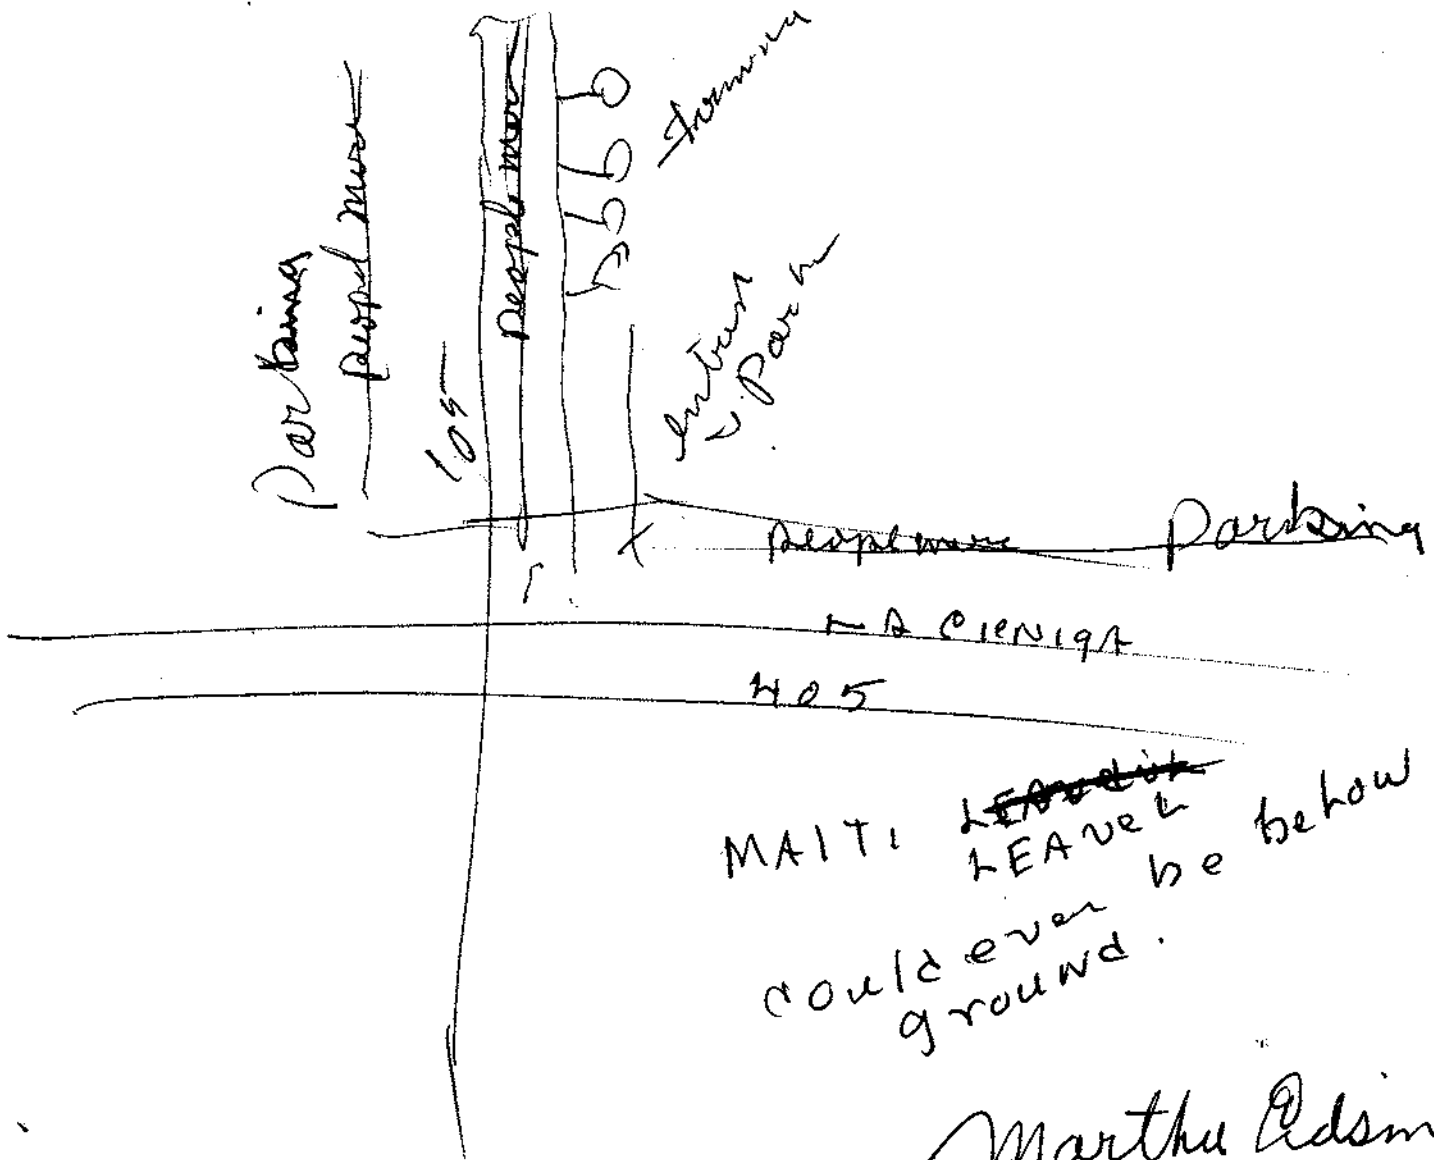

PC02745

To The 405 freeway

The freeway ARE TO move @Ang. why  
NOT use Them  
The New Airport could be something  
like This

I WAS BORN IN WESTCHESTER IN 1953 & HAVE LIVED HERE ALL OF MY LIFE - I WANT THIS RIDICULOUS EXPANSION OF LAX STOPPED! I HAVE LIVED WITH THE NOISE POLLUTION, THE FUEL POLLUTION, THE TRAFFIC POLLUTION FOR ALMOST 50 YEARS. THOSE ITEMS NEED TO BE MITIGATED - NOT ENHANCED OR EXPANDED! I DESERVE THE RIGHT TO ENJOY AS MUCH PEACE & TRANQUILITY AS POSSIBLE & IT IS THE DUTY OF OUR ELECTED OFFICIALS TO STAND UP & FIGHT FOR ~~THE~~ US! THANK YOU FOR YOUR OPPOSITION, JANE. -

Now - CAN WE ALSO COUNT ON YOU TO OPPOSE THE DEVELOPMENT OF PLAZA VISTA - A CITY THE SIZE OF CENTURY CITY - ON ONE OF OUR LAST REMAINING WETLANDS! MUST WE BE SO GREEDY TO CONVERT OVER EVERY LAST OPEN SPACE?

*Congresswoman Jane Harman*  
 I agree with your expansion concerns regarding the regional approach to accommodate the present & future growth of the air transportation system. I would like to offer what regional development may mean:

- 1) More direct / non-stop flights to other regional airports.
- 2) The revenue sharing of airport terminal facilities available to airlines linking terminal parking facilities (ie the viable dismantling of the current "Hub" system).

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Comments:

Dear Mr. Ritchie,

I am & have been a Westchester resident for over 10 yrs. I am opposed to the expansion of LAX because LAX is now a huge burden to ourselves & surrounding communities. I do not expect LAX to make just not to expand more than it has already. Past expansions & increased volume of flights & passengers has but destroyed the Westchester I grew up in. We now deal with more traffic, congestion, pollution & resulting health concerns than we can bear. I believe it would be not only unwise but truly unwise for the LAX expansion to move forward with any expansion!, which would, last but not least surely compromise the quality of life for Westchester residents & those of surrounding communities. Please ditch this flawed plan.

Sincerely, Jennifer Wycher

Comments:

IN light of the terrorist attacks, we need another International Airport in the region. Ontario, Palmdale and Fullerton should be developed and would be more convenient airport for travelers who live in those areas. I live a mile from LAX and I have to hose down my windows one a month to remove the "soot" from the air planes. The noise now wakes me up at night now - I CAN'T imagine the noise if the Airport increases.

Comments:

The fruit on the trees in my backyard is annually coated with jet fuel; I can not open my windows because of discomfort and disruption caused by the noise pollution of nearby air traffic at LAX.

Now, even more horrible than all this, is the realization that I am now living next to a gigantic Terrorist bulls-eye. One big, bloated airport. When worldwide example (and common sense) would have a true "world class" Los Angeles with at LEAST two true international airports, if not MORE.

Unforgivable, when you note that LA has other airports and residents that need and want the monetary benefit and convenience of competitive air travel at additional existing and could-be expanded LA airports. Not to mention the thousands that hate the inconvenience of a drive to LAX and the additional thousands of LAX neighbors who hate the negative consequences to their homes, health and neighborhoods.

To continue to overburden LAX, surrounded by thriving neighborhoods and built on top of/next to fragile natural resources, is not forward thinking and it is not necessary. To many of my neighbors, it is unconscionable

I ask you to Kill the LAX Master Plan. It is fatally flawed.

Attach additional sheets if necessary.

Comments:

September 11 should have spoken to LAX in way that the residents could not. Any expansion of LAX would be gross irresponsibility toward the residents and taxpayers. At present LAX is too large and has destroyed much of the quality of life for airport area residents; congestion, air & noise pollution, diminished emotional & physical health.

Trying to "shockhorn" any expansion under the guise of modernization & safety is just plain dishonesty. Safety and modernization and a little downsizing would really help and show good will. We need more airports, not bigger!

I believe that Lancaster would be the best place to build a regional airport to supplement the ~~area~~ needs of L.A. Lancaster has a huge amount of land available for such use. My guess is that it might be less expensive than land in other areas and easier to purchase.

Dear Congresswoman Harman,

I was at the LAX airport expansion meeting at the Sheraton Hotel in Westchester and saw you "in action" - Bravo!!!

Are you also aware of the Secret Security Budget that was "non-budgeted" to Seniors, due to the unfair taxes imposed on them? The L.A. Times explains it well.

We appreciate your efforts!!

# Seniors Left Behind in Rush to Cut Taxes

By KATHY M. KRISTOF  
TIMES STAFF WRITER

While lawmakers scrambled to provide a massive tax cut for Americans, senior citizens such as Lonell Spencer, a 72-year-old retired machinist who lives in Arcadia, wondered why they'd been left out.

Thanks to a 1993 law that dramatically increased the amount of Social Security benefits subject to taxation, millions of middle-income seniors—people with incomes between \$34,000 and \$75,000—pay taxes at higher marginal

rates than millionaires do.

"This bothers me considerably," Spencer said. "I had a small inheritance and it was really unbelievable how much it was diminished by the taxation. I know it sounds weird, but this does not affect the wealthy. The only people who are hurt by this are the middle class."

In fact, federal income taxes can gobble up more than half of any extra income a middle-class senior citizen might earn, said Mark Luscombe, principal tax analyst at CCH Inc., a Riverwoods, Ill.-based publisher of

# FINANCE: Seniors Left Out of Drive to Cut Taxes

Continued from C1  
tax information.

Members of Congress and the AARP—formerly known as the American Assn. of Retired Persons—have been working to get the 1993 tax law repealed for years, or at least amended to make it less onerous. But now, despite the prospect of a \$1.35 trillion tax cut, the chances for repeal have never seemed more remote.

Bills aimed at reducing the tax on Social Security benefits have been introduced in both the House and Senate, but they have stalled in committee.

Major tax legislation such as President Bush's tax cut bill is generally an ideal vehicle for eliminating unpopular taxes. But it was impractical to try to dump the tax in this go-round, said David Certner, director of economic issues at the AARP in Washington, because almost anything that would boost the cost of the tax cut would have little chance of surviving the compromises needed to pass the bill.

Sen. Tim Hutchinson (R-Ark.), author of the Senate tax repeal bill, considered proposing an amendment to the Senate version of the Bush tax cut that would have rolled back the tax on Social Security benefits to its pre-1993 level. But that would have cost the federal government some \$117 billion over 10 years. Hutchinson opted not to offer his amendment to avoid almost certain political wrangling, said D.J. O'Brien, a spokesman for Hutchinson. The AARP has even taken the repeal attempt off its current legislative agenda.

"What's happening this year [with tax legislation] is largely driven by the president's priorities, and [the Social Security tax] was not on his priority list," Certner said.

But seniors such as Earl Dover, an 84-year-old who lives in Hindsdale, Ill., aren't willing to let the issue die. Dover, Spencer and others have peppered their elected representatives with letters and phone calls, and they frequently contact reporters to complain about what they argue is a grossly unfair tax.

"I figured with all this surplus money that they're going to start giving out, they could do something about this," Dover said of Bush's tax-cutting plan. "But I am one man in the wilderness. You never hear anything about it."

Adds Spencer: "[The Social Security tax] was passed as a tax on the rich, but it's not. It specifically only affects middle-income retirees."

To understand how this happened, a little background is necessary.

When the Social Security system was created in 1933, benefits weren't taxed. That changed in 1983 when Congress slapped a tax on up to half of the Social Security payments received by many tax-

## A Growing Burden

The number of Americans paying tax on their Social Security benefits has soared since the tax was imposed in 1983. The biggest growth came after 1993, when a greater portion of benefits became taxable.

\* Most recent data available  
Source: Internal Revenue Service

Security benefits so forth—exceeded \$25,000 for singles or \$32,000 for married couples filing jointly.

For a couple with an annual income of \$35,000 in wages and pensions and \$20,000 in Social Security, that translated into a \$1,820 tax on their Social Security benefits, based on their marginal tax rate of 28%.

Things got even worse for seniors with passage of the 1993 tax bill, which increased the maximum portion of a person's Social Security benefits that could be taxed from 50% to 85%. Although the tax was advertised as a levy on "wealthy" recipients, retirees with

top marginal rate of 39.6% now paid by married couples making more than \$288,000 a year.

"It is a form of double-taxation—a heightened form of double taxation," O'Brien said.

What especially troubles Spencer is that the income thresholds that trigger taxes on Social Security income are not adjusted for inflation. If seniors simply withdraw more from their pensions to keep up with inflation, they get hit harder by the double tax.

Moreover, because of inflation, relatively poorer retirees get sucked into the Social Security tax each year. Fewer than 10% of all retirees paid tax on Social Security income when the 50% tax was first imposed, but roughly 32% of recipients find their benefits taxable today. Some 9 million retirees pay tax on 85% of benefits, O'Brien said.

"Don't ever listen to people telling you that you're going to be in a lower tax bracket when you retire," Spencer said. "I would be in a lower bracket if it wasn't for Social Security, but because of this tax, I pay more than I ever have."

If the law isn't changed, at least to index the income levels to inflation, baby boomers will be forced into the Social Security tax bubble at poverty-level incomes, Spencer said.

Still, it's tough to eliminate a tax once it's been implemented, especially one that brings in so much revenue, O'Brien said. Nonetheless, he said, Hutchinson will revive the issue later in the year.

But for now, seniors such as Spencer and Dover will wait and wonder why retirees have been relegated to second-class status when it comes to middle-class tax cuts.

"Baby boomers just don't understand. Everybody tells them to save, but there's this Catch 22," Spencer said. "If you save, you end up paying more tax on your Social Security."

Times staff writer Kathy M. Kristof, author of "Investing 101" (Bloomberg Press, 2000), welcomes your comments and suggestions but regrets that she cannot respond individually to letters or phone calls. Write to Personal Finance, Business Section, Los Angeles Times, 202 W. 1st St., Los Angeles, CA 90012, or e-mail kathy.kristof@latimes.com. For past Personal Finance columns

*'Don't ever listen to people telling you that you're going to be in a lower tax bracket when you retire. I would be in a lower bracket if it wasn't for Social Security, but because of this tax, I pay more than I ever have.'*

Lonell Spencer, a 72-year-old retired machinist

incomes as low as \$34,000 if single or \$44,000 if filing jointly were subject to the tax.

Because more of their Social Security benefits were now subject to taxation, the couple in the above example saw the federal income taxes on their benefits rise to \$1,928—or \$108 more than before.

Worse still, for each \$1,000 that the couple's income increased—say they inherited money or took part-time jobs—they could end up paying more than half of the added income in tax. That's because the \$1,000 would make an additional \$850 of their Social Security benefits (85% of \$1,000) taxable.

So instead of paying ordinary income tax on \$1,000, this couple pays tax on \$1,850. In effect, \$1,000 in extra income costs them \$818 in

The traffic on the 405 is already terrible. I have noticed increase noise over the past few yrs. The increased traffic from planes imposes a greater risk of one crashing in our back yards. We have no more room to expand. The pollution is really bad now. My screens & window sills are black in a matter of days and I live about 4 miles away from LAX.

## FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*I am against expanding LAX. I have lived in the area 50 years and worked for CAA and then FAA for many years. There was an FIR for Palmdale in the 1980's. I would hate to see more pollution, hear more noise - etc. Also, on an important point - the Airport Traffic Controllers are too busy now - how would that problem be addressed? Bigger control tower? etc etc*

\$ live 15 minutes (in "good traffic times") from the airport, therefore I'm often the designated "taxi-service" for friends. It is lunacy to consider expanding LAX, especially in light of the instant city on the wetlands, Playa Vista, that Los Angeles and the state of California insist on building congruent with the only non-freeway route in and out of LAX. Traffic on the 405 is already bumper-to-bumper at ALL times of day or night. Noise and pollution are already horrendous. San Bernardino and Riverside Counties are the fastest-growing areas in the state (I know, I was raised there and my Dad is a real-estate developer.) They need a closer airport (Ontario will be inadequate + too close to existing homes.) EL TORO is a much better solution for all counties. I don't care about the economic impact for Los

Anges, I don't think expanding LAX is the answer. Business travelers and especially private jet owners should not take precedence over quality-of-life. They can shuttle or will have limousines. Same for tourists. If people want to come to L.A., they will get here regardless.

Congresswoman Jane Harman  
 811 N. Catalina, Suite 1302  
 Redondo Beach, CA 90277

I've lived in L.A. for 37 years on my own, and visited my grandparents here all through my childhood. L.A. is becoming absolute HELL, even in my neighborhood where I'm lucky enough to live at the beach.  
 Thank you for your concern.

*LAX has a big impact on our community now without consideration of expansion. It is all negative with heavy, speeding traffic, noise and dirt all over the area from rubber to soot and jet fuel. Other than hotels, car rental and a few food outlets, I don't believe we derive that much benefit to offset all the aggravation.*

Currently ~~the~~ noise is very disturbing. You become tolerant of it but you wonder what effect does it have on you or your kids. The expanding of the airport would create more traffic and they would not do anything to the communities surrounding it. Making these communities better would help. I do not agree with it. This proposition or expansion would only push the people who live here out of the area.

**Re: Airport expansion**

**Despite the fact that I am a registered Republican, I am one of your supporters regarding social issues and I voted for you.**

**I totally agree with your position on regional airport expansion. It makes very good sense for a city such as Los Angeles with its enormous sprawl. Your plan would offer convenience to L.A.'s residents while at the same time relieving the burden to the residents around LAX. I applaud your intelligent, incisive and accurate thinking on this issue.**

*I drive from my home in Fullerton Hills to LAX and it takes me 20 minutes to get to LAX. I have a job on the Long Beach, E.S. now and take from 40 to 60 minutes. I would have to leave at 3-4 days a week and miss the traffic and auto fumes, this form of transportation, which was really good for a while & was environmentally friendly is no longer possible. I would have to leave my community and the Long Beach area, my way of life and the Long Beach area and drive further north, fumes, traffic, etc. Glenda Urmacher*

*Living in Westchester we would definitely be affected by an expanded LAX. More traffic congestion noise and pollution from both cars and planes. Westchester has been a quiet community but with and expanded LAX we would see more traffic traveling through residential streets trying to avoid gridlock on Sepulveda. There are alot of young families here and the extra traffic would endanger the kids.*

*I also believe Long Beach airport should be included in the regional plan*

AS A RESIDENT OF EL SEGUNDO, EXPANSION IS NOT A DESIRABLE PLAN. AIR TRAFFIC NOISE/POLLUTION CAN BE HEARD WELL INTO THE NIGHT (1 AM, 2 AM) AND ENHANCED ACTIVITY WOULD NOT BE WELCOME. ALSO, PROPERTY VALUE WOULD SIGNIFICANTLY BE AFFECTED FOR PLAYA DEL REY - EL SEGUNDO RESIDENTS. I SUPPORT YOUR EFFORTS TO OPPOSE AND SEEK OTHER AREAS WHICH ARE NOT AS "MARKED OUT" [NOT TO MENTION THE SEPULVEDA HELL CREATED AROUND THE AIRPORT (INCL. 405)].

STRONGLY OPPOSE URBANIZING WHAT LITTLE SERENITY IS LEFT OF THE BEACH COMMUNITIES AFFECTED!

*I think it is only a matter of time before there is a major catastrophe over the City of L.A. We need to move LAX to an area less inhabited, combined with a loop rail around the City with parking, connected to the airport. El Toro is absolutely the ideal location. If we can convince all the Yuppies in Orange we have a perfect location, almost ready for use.*

*Sincerely*

June 11, 2001  
 Sorry I didn't receive this on time to get this to you by June 9 but I definitely agree with your opposition to the LAX expansion. It is bad enough now. I have to go to the LAX frequently to pick up - and return - various certificates for the L.A. Opera so have watched the congestion grow over the past years. There are even occasions when an airplane is routed over Manhattan Beach and the noise is extremely nerve-racking.

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport; Alliance for a Regional Solution to Airport Congestion

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

Dear Congresswoman Harman,

Thank you for advocating the regional plan. Airport traffic should be distributed throughout the area, not concentrated in the beach cities. We live in Palos Verdes Estates and have already been disturbed at night by low flying airplanes. Our son lives in Marina del Rey and is looking forward to buying a house in the coastal region but is worried about the impact of noise and traffic. What is burdensome to us would be economic opportunity for neighbors in the Inland Empire.

*The new expansion plan for LAX will definitely have a bad impact on the Los Angeles area and specially for neighborhoods surrounding it. We already have a tremendous nuisance with the present levels of traffic besides the environmental factor. The pollution from all the traffic plus the several refineries in the South Bay worsen our daily way of life. I truly hope that there can be a better solution to this problem.*

*I do not travel, at all, unless it is absolutely necessary. LAX is so clogged with traffic - it takes an hour to get around & out. Lines get longer & longer & is generally congested in every way. Tell some of the "wealth" with Orange County Riverside & Palmdale. In 2 more years LAX will be a complete nightmare with no place to go. Tell those poor people in Hollywood & West L.A. in their homes & stop taking property & homes away! We don't need more "tourists" coming to L.A. &.*

- ① Extend light rail (The green line - currently the train to nowhere) into the airport! circle - every other world class city has.
- ② Regional flights (S.F., OAK, Phoenix etc) to be scheduled from Van Nuys, Long Beach, orange co, ontario etc
- ③ Cross Country and international passenger flights from LAX
- ④ Cargo into Victorville, Palmdale, San Bernardino etc
- ⑤ NO, NO, NO to expansion of LAX!!!

THE ATLANTIK OCEAN WAS CALLED  
AETHIOPIA OCEANUS FOR EVER BUT  
SINCE A COUPLE CENTURIES THAT  
MAN KNEW WHAT PAPER KNOWLEDGE  
GOT THAT WAS BEHIND MORE THAN  
A COUPLE THOUSAND YEARS WAR  
AGAINST NILE RIVER CIVILIZATION  
OF NATURAL PIPERS PLANT THAT  
PUT OTHER RIVERS LIKE MESOPOTAMIA,  
IN PERSIAN CHRISTIANITY OUT OF  
TIGRIS & EUHRATES RIVER GOD,  
SO IS THE RIVER GANJA FOR BUDHA,  
JAH IS RESTING & OFFERING THE  
WHOLE UNIVERSE IDENTIFIED  
ON THE ZION OF ETHIOPIA THE FIRST  
WHEN THEY FOUND OUT A COUPLE  
HUNDRED YEARS AGO THE PEACE  
PRODUCER HEMP THE DIDN'T DO  
NOTHING BRAINSTORMING THEIR  
BRAIN AGAINST IT (HEMP)  
THE AMERICAN CONSTITUTION  
WRITINGS ON HEMP PAPERS &

couple hundred years ago (sorry  
if I keep using "a couple" continuously  
but it is my respectful AFRICAN ACCENT  
to say it's not on my responsibility  
of perfectness of HEALTH, TIME and  
KNOWLEDGE) says any one wearing  
not HEMP OR LINEN uniform is a  
EXTRA UNIVERSAL ENEMY ROBOT AGAINST  
NATURE nothing to be but CRIMINAL.  
AND IT SAY AGAIN DONT LOOSE YOUR  
MIND, TIME and NATURE but SAVE THEM  
BECAUSE IT'S NOW VERY EASY TO PUT  
MILITARY & PRISONERS TO HEMP CIVIL  
ACTION THEY ARE NOT NOW BUT EATING  
ATLEAST 3 TIMES A DAY PIG PRODUCTION  
WEATHER IN JAIL OR IN A TANK FOR  
WAR, SAUSAGE, BOLGNA and HAM.  
TO KEEP THEM THIRSTY OF BLOOD out of  
THEIR INOCENSE CONSUMPTION OF  
THEIR GOD JESUS CHRIST, THE FOOD  
CLOTH and shelter out of his BODY  
for FOOD and HIS BLOOD TO KILL  
THIRSDAY (THIRSTINESS WATER)

So for their alternative and  
chosen power coming nothing  
tempesting WEAKNESS continuously  
loved their TREBELLIOUS LUCIFER  
they end up on the LAKE OF FIRE  
without any need of HELP BECAUSE  
THE HATE CANNABIS THEY GOT  
KEEP THEM EXISTING BY ONLY BURNING  
IT and sale pure people \$ 1.25 @  
12 ounce of water. THAT'S FROM ABRAHAM  
no matter is GETTING CALLED SARA  
LINCOLN, so effectively you see  
the AMERICAN CONSTITUTION DOESN'T  
HAVE NOTHING TO DO WITH INDIANS  
BUDDHIST ~~and~~ from the RIVER  
GANGJA, SAME THE MESOPOTAMIA  
CIVILIZATION OF ABRAHAM and Company  
too IS A RIVER CIVILIZATION BUT  
NEVER FROM THE NILE. So they  
think they are stealing the  
name of THE OCEAN OF ETHIOPIA  
at the same "a couple of hundred  
years ago" THIS SNAKE UNITED  
through ARABIA NORTH AFRICA ALAN

ALLAH TO IS ANOTHER MY LAND  
ENEMY FORGETTING THE SAND  
ZEUS FROM PANAMAS AMAZON  
AGAINST ME SEE PURE AFRIKAN  
FROM END TO RAS TSION ETHIOPIA  
SON OF "OUR FATHER HIS IMPERIAL  
PAGES RAS TAFARI FIRST "2 couple  
WORLD WAR<sup>S</sup> WINNER and still  
sitting in the middle of THIS  
(THE) UNIVERSE ON HIS NATURAL  
CANNABIS THROWN WITH NO  
HELL OR COPTIC (HELICOPTORS  
DECEITFULL WAR RUMORS TONGUE)  
OFFERING NATURES BANNER AS  
GREEN FOR LANDS  
YELLOW FOR SHINES  
RED FOR UNIVERS and  
TRUMPET OF RAGGAE RYTHMS  
proofed out of his 1960, OFFICIAL  
VISITS THROUGH CARREASTIAN ISLANDS  
it end EACH AIRPORT OF ISLANDS  
THAT HE WAS GOING THROUGH TO  
MAKE DONE HIS WORKS, AIRPORTS  
WERE HOLDING about FIVE or SIX  
different stages that each one  
WAS RECORDING AS A STAGE FOR

BECAUSE ON TV AND RADIO  
START GETTING HEARD THE  
MIX OF DIFFERENT TRIBAL SOUND  
IN ONE AIM EXISTING KNOWLEDGE  
BECAUSE AIROPLANE IS NOTHING  
A BETTER BUS TRANSPORTATION,  
but the MIX OF RIVERS AGAINST  
THE NILE THE TAKE AIROPLAN  
AS LOUXORIOUS AND POISONOUS  
TOOL AGAINST NATURE. IF YOU  
GO IN ETHIOPIA YOU HAVE TO  
MAKE TRAVEL BY BUS TO SEE  
DIFFEREN NATURE'S OFFERING  
but them ROADS MADE BY THE  
WIND ON THE TOP MASS AND CHAIN  
OF MOUNTAIN, YOU WOULD SEE  
CLOUDS AND SUN AND STARS SHINE  
UNDER THE BUS AND THE ROAD  
IS ROUGH OF ROCKS DAY AND NIGHT  
but RIGHT THERE YOU WOULD  
FEEL "SAYING," WHY THIS PLANE  
IS GETTING CALLED BUS WHEN  
FROM HERE I SEE GREEN DOWN THERE

FOR LANDERS THAT PLAYS SAMBA,  
same another stage not more  
THAN 100 FEET FAR FOR SCANDAL  
PLAYING MARINGHY CARACHA and  
another stage so on and not  
far than "a couple hundred feet,"  
and still between his IMPERIAL  
MAJESTIC ~~AIROPLAN~~ WITH THE LIONS OF  
JUDNA and others beautiful  
CREATURES FROM THE RIVER OF  
NILE, such the two EVER SEEN  
WHITE BEARS THAT OFFERED  
TO THE COUNTY OF CALIFORNIA  
they are still living here since  
60s they live for ever DONT WORRY  
same not that much far each other  
BANDS at fence in and out of  
the AIRPORT THERE WERE TRIBAL  
STAGE LIKE FOR CALYPSO and  
SOKA and etom you know  
WENT BORN RAGGAE AT EACH  
AIRPORT OF FATHER TRIP WORK

introduced in the 60 just at  
the same time of his official  
CARRIBIAN ISLANDS VISIT WORK  
IT WAS PLANNED BY THE CARNIFICATION  
OF JESUS and ~~EXTERA~~ WORK AT  
the beginning of the last century  
(1900) at the ISLAND OF CAPRI  
the now helpfull only for RICH  
POLLUTION CONSUMERS TOURISTICAL  
~~SEX DRUG and ROCKROLL~~ that was  
a weapon since the ROMAN  
FASCIST and MARIA CONSTITUTION  
CAUSE WAS PONTIOUS PLATONS  
and extra universal like PLUTO and  
PLATONIUM poisonous extra universal  
chemical liquid. Yes it was in  
CAPRI ISLAND that the EMPIRE OF ROME  
CONSTITUTION WAS GETTING WRITTEN  
OUT OF WROG and BLOODFOOLPAPER  
that helped out a NILE enemy  
CLAIMING BEING BORN "a couple of  
hundred of miles and time of  
lights from the NILE beeing

and yellow light day or  
night REB THE UNIVERSE  
WITH STARS FALLING AND  
REACHING <sup>AS</sup> UNHARMFULNESS  
CLOUDS. Yeah OUR FATHER  
MAKE STARS FALL AS CLOUDS  
NEVER SPELLED CHICKEN WINGS  
and called them different  
Angels kind good just to  
usefull interpretation of the  
REAL PAPER BOOK - CANNABIS  
to the people of BRITAIN  
DEALING WITH WORLDS GEOGRAPHY  
MAPS HELPFULL FOR SKIN LOOSERS  
RACE PARTICIPATING ANGLU  
SASSON CIVILIZATION derivated  
Anglo from ANGLE ex 90° ↙  
but not ANGELS AS MIKAEL,  
GABRIEL, ROFAEL etc.. OF EL,  
SASSO in latin means ROCK  
not SEX, ROCK, DRUG CULTURE

RETRACTED OUT OF FIFTY  
years on geographical  
poisoning map weather by  
navigators and LAND PIONEERS  
AS THE VAMPIRE RHODESIANS  
It end up the carnation  
the falsever known RESURRE  
TION FOR NOTHING falling  
on the NAME OF HITLER by  
burning his own people on  
five lakes as offerings for  
their TREBLOUS WHAT  
ever SOUND GOD OR THE AUTE  
NATIVE SATO ASS DOUBLOUS  
SATAN LUCIFER, YOU CAN'T  
KNOW NOTHING OUT OF THEM  
because they are bourn "a couple  
of hundred of mile and nights  
from TIGRI and EUPHRATES  
Rivers but NEVER IN BETHLEHEM  
OR AIRUSALAM that are MILES  
RASBAPTISIMAL AND WEEDING WORKS

IS LIKE YOU GET BAPTIZED  
IN THE TEMPLE TO LEARN HOW  
TO OBTAIN SELF FOOD, CLOTH  
and CULTURE, you eat, wear  
and live in the universe as a  
shelter is not difficult you  
have just to become RASTA  
it means noting CONSUMPTION  
SECURITY, if the seed that  
had made food, cloth and  
SHELTER had planted by your  
fingers you won't worry that  
they are <sup>not</sup> dirty, food, they are  
not bloody cloth and of course  
out knowledge you gain which  
PASSION = LIGHT you would  
make your shelter travel through  
the universe <sup>and</sup> find out who you  
are and never beg YOUR IDENTICAL  
EXISTANCE BY NO NEED MISERABILITY  
HELP MANIFESTATION OUT NOTHING  
BUT ENEMIES OF THE NILE <sup>DON'T</sup> <sup>call</sup> <sup>nothing else</sup>

OK, I was forgetting to tell  
you THIS ATLANTIC CIVILIZATION  
FALLING TO THE TRIANGLE BERBERIA  
MADE THE NAME OF LAND THAT  
WAS CALLED AETHIOPIUS TO  
FILTHY POISONOUS OR UNPOISONOUS  
REPTICAL MYTHOLOGY "AFRIKA,"

So, please madame politician  
I admire for your BUS FURTHER  
SIDE EFFECTS but as son of  
RESPECTFUL KING OF KING OF  
ANY WAR HAPPENED you need  
to see Mr. La Roche I'm sure  
you know him better than  
me, but he will tell where  
basically and generally poison  
are situate, they are all over  
and each RIVER DAMS starting  
from AUSAN OF THE NILE to the  
VENICE BEACH CANAL THEY NOTHING  
TO BE DESTROY and RESPECT NILE

CIVILIZATION BY BOMBARDING  
EACH PART IN THIS WORLD PROPERLY  
YOU OBTAIN THE SAME KIND OF  
FERTILITY BECAUSE OF WATER  
GREENING AROUND YOU THAT  
DON'T NEED EVEN BY YOUR OWN  
FINGERS cause of waterproody  
ring green herbs as food  
then you save time to go find  
by your self through and  
beyond the universe that  
simple that you don't need no  
DOCTRINE ISKIM-ISKINIZATION  
So don't forget to fight  
DISCRIMINATION OF CANNABIS  
because is THE KING OF KING OF ETHIOPIA  
that gave back MOSES GENERATION  
BUT ONLY FOR 50 YEARS SO THEY  
WOULD STOP TALKING THAT RETAIL  
RULES THE FRONT OF THE TREE AND  
THAT ONLY JEWS CAN ENJOY THE  
HOLY WOOD AS KNOWLEDGEFUL CROSS

Please don't let me write  
by delectful tongue ink  
for your Love of DENIETY  
OF SIMPLICITY-

Same AIRPORT NEEDS and is  
MADE OF PETROLIUM which  
CONTAINS OUR ANCESTORS  
BLOOD THAT THEY ARE DEATH  
WAITING FOR CARWAS BE FREE  
and solution DEAD, THAT THE  
ONLY JUDGEMENT AVAILABLE  
"scape hounded troubles" of  
CARNIVOR CREATURES LOVING ARE  
I mean it VAMPIRES-

Same BUS ROAD and road  
is the whole time on reparation  
You know how much money  
spent for Billion ROADS IN THE  
WORLD THAT THERE IS NO A  
CALENDAR OF year that they  
on RECONSTRUCTION and need  
of bloody VAMPIRE SYSTEM  
FORD FIX REPAIR DAILY yes  
FIX  
OR  
REPAIR  
DAILY

THAT WAS IN 1948 to 1998.  
THEY are back already for  
away for FATHER WIFE to  
their CARNIVOROUS RIVERS  
TIGRI REUPHATES. LADY IT'S  
NOT A JOKE, GO TO WATER  
NATION and check the rules  
of it. THIS CHRISTIAN, JEW,  
HEBREW and other name getting  
called the don't do nothing but  
against CANNIBALS since ever  
till DIAMOND came out their  
DOUBLOUS and shine wrong  
time and sky color  
SO RESPECT YOUR OWN  
CONSTITUTION JUST BY WEARING  
ACTUALLY USING AEMP.  
GO FOR IT I'M NO SCARED  
AT LEAST OF YOU BUT

Dear Congresswoman Harman,

Thank so much for assisting us in making our skys safer, cleaner and quieter. I have been a founder member of PANIC for many years. We have been hied to, conved and ignored by the FAA and LATA and the airlines for years in our fight to keep the Turboprops from overflying the P.V. peninsula. Any increase in the already overburdened MAP of LAX is counterintuitive. We cannot expect the airlines to look after our health or airspace - my concern is that I'm not sure I can trust our Federal or State government to do that either. The EIR is a joke and the attempt to muscle it through without sufficient time to competently review it by the public is simply greed if not graft at work.

## FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport; Alliance for a Regional Solution to Airport Congestion

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

We would be greatly affected by the noise and air pollution. The only time LAX was shut down was years ago and we could see forever and breathe normally. Let the other 10 million people in LA build an airport near them.

*I oppose expansion of LAX because of increased traffic, noise, and pollution. In addition I oppose development of more housing and commercial sites. We are too crowded in LA, and I don't want any more growth. Traffic is insane, and we don't have the resources we need.*

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*Dear Jane,  
Thank you for representing us and providing this opportunity. We, too, favor the regional plan. Living in Playa Del Rey, we would experience unbearable traffic, noise, and more black dirt/dust in & around our home. This could possibly lower our property values.*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

*Expansion of regional airports is long overdue - particularly in the Palmdale area. As a ex-resident of Westchester, residing 2 miles from LAX, I know first hand of the impact on the area i.e. traffic congestion for one which has a negative impact on the surrounding area. . . . + then there is the congestion within in airport itself. Whoever decided to expand LAX is/was either brain-dead or given a major incentive to vote for it!*

*I will not be personally affected at my home by the LAX expansion because we bought our home far enough away on purpose 43 years ago in Westchester. However my community and many friends will be affected and I'm not happy about it. Why are we picked on when Palmdale, Ontario and El Toro stay the same. Those residents fly from our airport and make traffic and noise and pollution worse. The FAA and LA World Airports don't give us a chance to have nice community when they just do what they want. Please vote to stop the expansion. Thank you for trying to do something about the expansion plan in the state legislature and your Congress*

*We live in W.H.A. nowhere near the airport, but we travel quite a bit. We don't drive there anymore because of the terrible traffic parking. We must take a taxi there, now. The airplanes are so overcrowded, it's almost impossible to get booked on a plane unless you do it months in advance. Why not spread it out? We have family in Orange County. They often have to drive to LAX to catch planes East & to Europe & to the Orient. This is ridiculous. They need their runways lengthened & more planes starting, or going through closer to them, in Orange County or close to them (not an hour or 2 hours away).*

6/8 Jane,

The congestion and pollution caused by LAX is already unbearable. It's so unhealthy we may have to move, — a tremendous trauma for our family. We have invested a great deal in this community and would never leave but for LAX's negative impact. The traffic congestion is also already unbearable. Why expand at all? Take the expansion elsewhere. Get the cargo completely out of LAX.

*As a resident of El Segundo since the age of 2 years I object strongly to any expansion of Los Angeles International Airport. I grew up on McCarty Court which is somewhat near the run ways and witnessed first hand damage done by both noise and air pollution. As the South Bay has continued to dramatically grow over the last 38 years, traffic and over population are serious concerns. This expansion to LAX would make it virtually impossible for me to drive 14 miles to work on the Westside within 2 hrs. time. Traffic is already annoying, any additional traffic would be dangerous as well as create hours of deadlock. With so many other viable options I see no reason to consider expansion of LAX.*

*Why spend millions to destroy established community of homes and business.*

*Besides more planes (and pollution) what about ground traffic? More cars, buses and trucks! Streets will be impassable.*

*Increasing the size of LAX will create jobs, but so will increasing the size of Palmdale, Ontario, etc.*

In 1997, we sold our home of 35 yrs. in mid-Wilshire and bought a home in Westchester to get away from some of the crime, + traffic, noise + pollution of the mid-city. If the airport at LAX expands too greatly by closing off more streets near Manchester and puts in a lot of new runways to accommodate more flights than we presently have, we will be forced to sell our "new" home here + move back to our old area to escape pollution from more planes + jet fuel + noise + traffic. My husband has a long commute daily to his office in Pasadena (which he can handle now, but couldn't if traffic increases), plus I have chronic respiratory problems that would prohibit my living here if pollution increases. Airport expansion could cost us a lot of money if we have to move again. We favor Regional expansion by diverting the airport expansion to take place in several airports in different locales.

*I thank you for your efforts to solve a regional problem on a regional basis. To increase the already impacted traffic around LAX is obviously ridiculous. To expand in a densely populated area rather than using more open land where the population growth is located is equally ridiculous. Good luck.*

*We are affected by prop planes having turned 180° and climbing over the peninsula while heading East. A distributed airport system with high speed rail interconnects ("red cars") would do much to reduce congestion. Get the airlines to buy into the plan also!*

- \* Traffic: The traffic is already incredible & extremely dangerous with reckless and speeding times & shuttles on La Tijera & Sepulveda. They run red lights, speed, and tailgate.
- \* Noise: Jet noise is bad enough now - more flights will simply increase the duration.
- \* Pollution: Npre flights = more "jet dirt" - black soot all over our cars, landscaping & homes.
- \* Economic Impact: The close proximity of LAX has encouraged airport-related businesses to proliferate along Sepulveda - tacky valet/shuttle businesses, prostitution, sleazy motels.

MOVE THE AIRPORT TO PALMDALE !!

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.

DEAR JANE,

AS A RESIDENT OF VENICE, CA., I AM OPPOSED TO THE LAX EXPANSION - LINCOLN BLVD. & SEPULVEDA BLVD ARE BOTH EXTREMELY OVER CROWDED NOW !!!

IF YOU COULD DO ANYTHING TO SAVE THE BALLONA WETLANDS FROM BEING DESTROYED BY PLAYA VISTA DEVELOPMENT, THAT WOULD ALSO BE APPRECIATED -

THANK YOU,

JOSEPH HARDIN

The quality of life in the South Bay will diminish with the LAX Master Plan. Traffic, noise and air pollution will increase. The South Bay has had a growth spurt this past year & I am already feeling like I want to stay in my house rather than drive the crowded streets & freeways!

I am opposed to LAX Expansion and strongly believe that a Regional Airport Alternative is a much better solution. There are the main reasons I'm opposed: Increased Traffic to El Segundo and surrounding areas will be terrible - more terrible than it already is especially during Rush Hour. I work in El Segundo so I know 1st Hand. More Cargo Activity will increase Truck Traffic and along with it Diesel Emissions (Pollution) Noise from Aircraft is already unbearable - more Noise from more Flights will destroy our Quality of Life in the So. Bay.

The LAX master plan would have a material negative adverse impact on our community and my family.

I currently live more than 5 miles from LAX and I am effected by the noise when planes disregard the "turnaround" rules.

If the airport is significantly expanded this problem will only get worse. When I settled my family here I took into account that we are far enough away from the airport that we should not be effected by noise.

Finally, I believe this expansion will have a very negative adverse impact on property values due to the added noise and congestion.

I would like to know how the LAX expansion would effect the city of Lawndale. Where I own property, and Run my Motion Picture Company, Hollywood Way Pictures. Could you do something to help this Community plant some trees. I would also like you to be aware of the prejudice toward this community. Ultimately this is effecting your community. Because my colleagues and I won't film in your community.

Hi Jane!

I agree that too much of one thing is not sensible. I support your plan to concentrate on other airports in the region first in order to fairly distribute noise, pollution as well as economic levels. Even though I work right by the airport and work for an airline I support your healthy, responsible and economically sensible plan. You can count on my vote.

*I own a house in Manhattan Beach and am very opposed to the expansion of LAX. It is ironic that the other regions around Los Angeles share in the burden of growth that is occurring. Note: that growth is not happening in the communities that border LAX, they are mostly seeing the growth in communities away from LAX. The residents near LAX suffer enough w/ daily + evening airport noise -- it is time for others to share the burden. Please do everything you can to stop the LAX expansion! Thankyou!*

I live in PDR and can see /hear all the airplanes take off. So I am familiar with the noise. More of it? No.

Besides that, it makes no sense at all to have people from Riverside, Simi Valley, etc., drive to LAX. This makes a trip to SF longer by public transportation than by driving. The freeways are already so congested that centralizing all the air traffic at LAX is kind of insane.

There is also the desperate need for a high speed train from SD to SF, via Riverside, LA, LA North, the valley. Trains for the residential public and not only for business executives. These stops will slow down the time from SD to SF but not much from LA to SF. In Europe high speed trains stop for exactly one or two minutes at cities and this works well.

Decentralization to some major areas is to me much more sensible than one center at Lax or anywhere.

We are almost in quad lock on PCH in  
Manhattan and Hermosa Beach. We already  
hear late night flights overhead 1:30am-2 am.  
We have lived in the South Bay for over  
twenty years - the quality of our space &  
life goes down hill with noise and congestion.  
Rosecrans Blvd & Aviation are just two  
examples. - Please oppose all LAX expansion  
and look @ Ontario, Orange Co. etc.

I completely support Rep. Harmon's concept for a regional solution for Southern California's air traffic problems. However, in no case should LAX be allowed to expand beyond its current MAP burden. The South Bay infrastructure and environment cannot cope with the current situation at LAX, it will collapse under expansion. I use LAX several times per month, and I have first hand knowledge that LAX utilization is stretched to its limits (in terms of land area, air space, and land use encroachment), which cannot be enlarged by any expansion plan, no matter how creative it is.

I look forward to Rep. Harmon's continued efforts and support on this most important of South Bay quality of life issues.

Traffic is drastically slowed now by increased airport activity. This would be exacerbated by further development. Noise has increased & is very noticeable at night as increased flights go over Manhattan Beach. Subsequent pollution is inevitable. Further development will degrade severely & perhaps destroy the life of surrounding communities, particularly those in the beach areas. It is fair, just, important & appropriate for a regional plan to utilize more sites & locations for the sharing of effects. Otherwise we will unnecessarily be creating a lighted area.

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

• This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport, Alliance for a Regional Solution to Airport Congestion

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

PLEASE PUT THE PRESSURE ON LAX <sup>WFAA</sup> TO ADOPT A REGIONAL  
 APPROACH TO EXPANSION (I.E., ONTARIO, PALMDALE, EL TORO, JOHN WAYNE, ETC)  
 ALSO, MAKE THEM GO OUT OVER THE OCEAN FARTHER, BEFORE TURNING  
 LEFT & COMING BACK (LIKE THEY USED TO DO)! THANKS.

Traffic congestion and noise levels are already very high near LAX. Property values will suffer. It makes a lot more sense to me to expand in areas where there will be higher growth, and where land is more plentiful, and where congestion is not so high.

DEAR CONGRESSWOMAN HARMAN:

WE AGREE AND SUPPORT YOUR POSITION OF NON-EXPANSION OF LAX. WE HAVE LIVED IN THE SOUTH BAY (P.V.E.) FOR 27 YEARS, AND, IN OUR OPINION, FURTHER DEVELOPMENT OF THE FACILITY WOULD INCREASE TRAFFIC CONGESTION ~~AND~~ EVEN MORE ON ~~THE~~ THE ALREADY OVER-BURDENED STREETS IN THE AREA.

*As it is now.... every time we have a Santa Ana wind, all out going planes fly directly over my home! The noise is steady with the current traffic flow. The house gets residual shaking and fuel emissions fall out and I have <sup>HAD</sup> to hire someone to clean outside weekly! My tenants complain about noise <sup>on the phone</sup>. We are about 7 miles from airport, but, increasing so, it's not enough.*

Honorable Congresswoman Harman,  
I am totally opposed to the planned  
expansion at LAX, our city is already impacted  
with jet noise compromising our Quality of life.  
and we should not allow LAX to increase  
airplane takeoffs + landings.  
Other airports in the region should  
absorb increased demand.

LAX seems to overschedule flights now, with numerous delays both inbound and outbound. The noise is bothersome only when it is foggy in PVE, so it does not affect us personally now, except when we travel. Longbeach is equidistant. Can it expand? From our position, El Toro would be ideal to relieve Orange County John Wayne. Norton Air Force Base would relieve SB County. Ontario would help, if there were <sup>WALNUT</sup> express busses or helicopter service into the city.

We live in Manhattan Beach and are seriously affected by traffic on Sepulveda, Vista del Mar + freeway. While we appreciate using our airport for passenger travel we feel there should be no forced expansion and no expansion of freight travel at LAX. Freight does not need to further clog up our already congested area. It should use alternatives

Sharing the growth among all the regional airports makes the most sense to me. Move cargo out of LAX to Palmdale.

And definitely, no more expansion of LAX until surface transportation problems are solved.

We moved from Playa del Rey to Torrance because of the intense noise problem as the airport grew over the last 15 years. As it continues to grow we hear its impact around the south bay and feel the impact as traffic near LAX makes travel in that area prohibitive.

Please expand other airports, NOT LAX

*I believe in a plan to distribute air traffic through out LA and Orange County. There is very little space left in LA county to expand, but much more in Orange County. There should be an easily way for air traffic to reach Orange County without coming from LAX. Or a high speed transport such as a train from LAX to orange county might help.*

I disapprove of the LAX Master Plan. The traffic will adversely affect my commute to work, & will increase auto pollution. I live in Palms Verdes, & in bad conditions they route planes "around" the Peninsula; in actual fact they cut the corner & fly over us. The noise is entirely unacceptable. Increased noise will decrease property values. The increase in jobs would be better placed closer to where people who will need those jobs will live (such as San Bernardino & Riverside), so they will not have to commute hours into neighborhoods they will be unable to live in, since the houses are too expensive for the salaries they will make. The airport is already unsafe (my husband had 2 close encounters on his last business flight with one of the cycles of a propeller's fan only in a flight plan up reported by the traffic controller).  
*More planes will only worsen this situation.*

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

WE ALREADY GET AIRPLANES FLYING OVER OUR HOUSE AT ALL HOURS, ESPECIALLY LATE AT NIGHT. AT TIMES IT IS DIFFICULT TO SLEEP!  
 WE DO NOT NEED ANYMORE TRAFFIC IN THE SOUTH BAY. THE CURRENT TRAFFIC LEVEL CAUSES ENOUGH NOISE, CONGESTION, & POLLUTION -

Dear Jane Harman:

as for expansion of the airport, I am against it: I live on Airport Blvd and making that an express way would just about eliminate this area of Westchester! heavy traffic 24 hrs a day, noisy semi-trucks within 30 or 40 ft of my bedroom windows, diesel fumes, pollution, I think Westchester has sacrificed enough for the airport.

I am in favor of upgrading what we have and not expansion! there are several military air bases that are closed, use them for cargo planes and passengers, instead of funneling everything into LAX.

Regional airports could share in the growth, there will come a day when LAX will have to stop growing, improve but not expand. Vote no on expansion and air-water interchange;

*In 1984 I moved from 9422 Glasgow Place in Manchester Square to get away from aircraft noise and fuel droppings. I moved to a new senior housing complex on Via Dolce Way in Venice peninsula. It was so clean and quiet here. That's all an old, old dream. The take-off patterns are in all directions now. The planes vary from monster passenger to private buzzy propeller twin-wings headed north towards Santa Monica of pairs of police & television news helicopters that hover this neighborhood.*

*I am outraged to learn that LAX would even consider expansion. Thirty years ago, we had to travel to LAX to fly to most places, and the same is still true today, despite Palmdale being eager to have an international airport. LAX should be attempting to route traffic to other airports. We are suffering in the South Bay from noise, air pollution, and traffic congestion.*

SILVIO MACK  
7300 W 90th St.  
Westchester, CA.  
90045  
310-670 0546

For the past 37 years the noise, traffic and jet fuel pollution from LAX has been unbearable and increasingly getting worse.

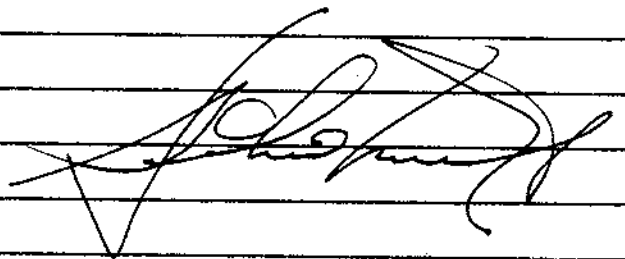

Prior to the purchase of my home in 1963 I was notified there would be no North Runway which turned out to be a lie.

The expansion over the following years has depressed the value of my home and neighborhood by approximately 31% when compared to comparable areas.

I along with my neighbors feel we have sufficiently paid economically and suffered enough due to the past expansion of LAX.

therefore any further expansion would be adding insult to injury.

I know expansion is needed, therefore why not utilize the 17,000 acres, plus of land that LAX owns in Palmdale Ca.

Where's the infrastructure supposed to occur? already, the San Diego freeway is one of the worst in the entire country... and they want to put even more traffic on it? Is there any thought to how this airport expansion will affect such transportation issues for L.A.?

I think it is unfair to burden the Westchester, beach areas and areas surrounding LAX to bear any more of the congestion, noise and pollution than they already to. The streets and freeways leading to and from LAX are bumper to bumper. If Ontario and Palmdale are viable, let's grow them.

Dear Jane Harman:

It is essential for the economic growth of S.C. county that airport expansion be started. We are looking at 3-5 years away to completion. Nobody wants an airport expansion near to them. People object to El Toro & Ontario expansions and will block expansion. Long Beach & John Wayne are flight controlled. The coast is with a blank March A.F.B. expansion. Palmdale is too far away. The only solution is to expand LAX. We already have the noise and traffic and the new generation of planes with control pollution.

Very truly yours,

Congresswoman Jane Harman 811 N. Catalina, Suite 1302 Redondo Beach, CA 90277			

I AM VERY OPPOSED TO EXPANSION OF LAX.  
IT WILL IMPOSE AN UNREASONABLE BURDEN ON THE  
ALREADY OVERCROWDED STREETS OF SEPULVEDA,  
CENTURY, LINCOLN AND THE 405. WE NEED TO  
IMPLEMENT REGIONAL AIRPORTS !!

## FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

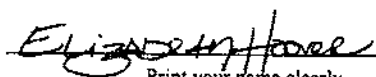

Sources: Los Angeles World Airport; Denver International Airport, Alliance for a Regional Solution to Airport Congestion

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

As residential property owners in Manhattan Beach, we are already affected by noise pollution and car traffic, due to LAX. We are awoken in the middle of the night by low flying planes and tied up in traffic around LAX at all hours and days of the week, both on Sepulveda Blvd. and 405/105 Freeways. With the LAX master plan in effect these problems will only worsen. The addition to LAX will make Manhattan Beach a less desirable area to live and visit, affecting home prices and the town economy in general. Let's let other communities help share the load of air travel, they use it too!

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic *getting worse in Manhattan Beach all the time* and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*Basically, I agree with the regional plan for airport expansion which you have outlined on the other side of this letter. I work at LAX for an incentive travel company several days per month and am highly aware of its congestion. Also, Lot "C" where my company requires us to park is often full on weekends, especially at holiday times.*

Dear Congresswoman Harman,

I have lived near LAX for a number of years. From 1982-1984 I lived in Playa Del Rey and had to contend with constant air plane noise and the residue of jet fuel on my car and other personal belongings left outside. From 1992 until present I have lived in Manhattan Beach and hear the planes from LAX every evening. There is a daily flight at approximately 11:00 PM that for some reason seems louder than most. My wife and I are disturbed by it daily. We could only imagine this situation worsening with LAX expansion.

I am very much opposed to the expansion of LAX. During the past 4 yrs. we have been fighting the FAA to get flights over the PV Peninsula routed around the Peninsula and 5 miles off shore. Property values on the Peninsula and South Bay communities will decline and this is a beautiful Peninsula. Safety on the ground and in the air will be jeopardized. Quality of life will be severely impacted with high levels of pollution, noise and ground transportation issues. Regional airports is the only solution.

*I would be sickened and generally annoyed by the increase of traffic, noise and pollution resulting from the plans proposed at the June 9, 2001 meeting. The proposal would force more people and cars into an already overcrowded airport located in a residential area. There was no consideration of redistributing to the other local airports.*

*We need to have a study made and regional plan developed by a group with no interest in LAX which includes consideration of all airports in this region.*

*I oppose the LAX Master Plan for the reasons set forth in your letter. ~~to~~ I do not believe it is fair for residents of other communities, especially Orange County, to oppose the building or expansion of airports in their areas because they don't want increased noise + congestion in their neighborhoods, while their use of LAX is one reason why LAX expansion is being sought.*

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

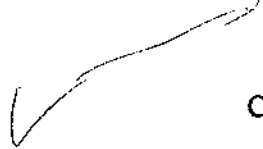

*Jane -  
The use of the Palmdale Airport would be the best for expansion, plus when LAX - John Wayne & Ontario are covered with fog, Palmdale is not. Also this would help to build up this area  
Thank you*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
<b>Millions of Annual Passengers (MAP)</b>	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
<b>Residents within planned 65 decibel noise boundary</b>	82,928		0
<b>Price Tag</b>	\$12 billion (projected)		\$4.2 billion (actual)
<b>Flights Per Day (average)</b>	2,146		1,371
<b>Size</b>	3,425 acres		34,000 acres

I SUPPORT THE REGIONAL AIRPORTS PROPOSAL. IT MAKES NO SENSE TO KEEP EXPANDING LAX. THE TRANSPORTATION IMPACTS HAVE ALREADY BEEN EXCEEDED. THE I-5 & SURFACE STREETS ARE GRID LOCKED NOW. THE RAIL SERVICE DOES NOT CONNECT TO THE AIRPORT, NEITHER DOES THE I-5, THUS EXACERBATING THE PROBLEM. THE ADJACENT CITIES CANNOT BE PUSHED BACK ANY FURTHER TO ACCOMMODATE MORE EXPANSION. WHAT ABOUT PRESERVATION OF THE REMAINING SAND DUNES AND BLUE BUTTERFLY HABITAT? SATELITE AIRPORTS IS THE ONLY ANSWER. WE NEED PLANNING, RESPONSIBLE PLANNING, BY OUR ELECTED OFFICIALS IN MEETING THE EXPANDING DEMAND OF AIRPORTS IN GROWTH AREAS THAT RELIEVE SOME OF THE IMPACTS AT LAX, NOT COMPOUND THEM.

*The LAX Master Plan is all wrong. Regional Airports are the ONLY FAIR and Responsible answer. Of course rapid transit ground transportation must be included. Area City streets and the 405 Freeway are already impacted at almost any hour. Keep up the good fight*

*No LAX expansion!!! Already so much activity that it creates major roadway traffic, especially the 405.*

*I would never support a politician or community leader who supported any expansion of LAX. and that means 0 (zero) expansion, not some expansion in conjunction of a regional plan.*

*The only intelligent major project would be to link LAX by rail to other areas so passengers could get to the airport quickly and without driving private cars.*

*I am a frequent flyer and depend on LAX for my business. I have seen the increased growth and congestion with the current facility and strongly support LAX expansion. The need for additional airport and runway capacity has been cited by the FAA in its National Aerospace Plan. I also favor expansion or development of other regional airports as well. I want to avoid a "not in my backyard" paralysis which will lead to under capacity airports, delays, lack of competition and increased ticket prices. This will only stifle our economy.*

Dear Congresswoman Harman: I live in a densely populated, low-rent housing area directly east of LAX. Under the proposed expansion plan, all apartment houses in this area will be demolished to make room for new cargo facilities. This expansion <sup>creates</sup> hardship for low-income retirees and employees of LAX and the surrounding hotels and businesses. As I'm sure you know, low-rent housing is shrinking rapidly in Los Angeles. Increased traffic, congestion, noise and pollution will make the area for miles around a nightmare to access or work in.

YES! A REGIONAL AIRPORT PLAN W/ GROUND TRANSIT IMPROVEMENTS IS DEFINITELY PREFERRED TO LARGE-SCALE LAX EXPANSION.

BUT WHAT ABOUT HIGH SPEED RAIL TO REPLACE ALL THOSE SHORT HAUL FLIGHTS (< 500 MILES)? THOSE FLIGHTS ACCOUNT FOR A GOOD PERCENTAGE OF THE REGIONAL AIRPORT TRAFFIC!!!

I would be adversely affected by additional airport traffic. I work 1 block from LAX, live in So. Bay. Noise pollution, air pollution, chronically inadequate and disrepaired roads are what LAX expansion mean to me.

Please oppose this expansion and find other regional solutions

- (1) First of all I am in the flight path, and as it is the FAA's traffic are not observing the curfew, they still fly between 12:00 A.M. and 6:00 A.M. I think they should be fined everytime curfew is violated.
- (2) Bad for our community & Neighborhood
- (3) Increase and concentrated noise, Air, and water pollution
- (4) Concern about Air Traffic safety due to overcrowded skies also increased air traffic would result in thousands more vehicles added to our freeways and congested streets
- (5) The proposed LAX master plan is bad for the environment, including our already threatened coastal wetlands.
- (6) The city of Los Angeles owns two key airports in the heart of high growth areas of the region - Ontario and Palmdale. It would be more efficient to develop these airports as opposed to LAX. EL TORO (Orange County) should be developed.

*I do believe in the expansion of LAX but not without a resolution to the traffic congestion that already exists. I do not believe buses are the answer, nor do I feel expanding our freeways are the answer. We must take our future generations and the earth into consideration. In order to make this consideration, a usable rail system providing transportation to all airports and major business districts must move to forefront of planning LA's future. Chicago and New York are perfect examples where the taxi driver/union and a rail system can thrive together. Traffic in any direction is always going to increase without a usable rail system.*

Dear Ms. Harman.

My reply is a little late, but my feelings against expansion of LAX are still very strong. I have enclosed some copies of letters to the Daily Breeze, two of which are mine, which show you how I feel regarding this issue. We must stop this madness and the greed of the airlines that don't like running airports!

## Hawthorne's future hangs on maintaining tax rates

In Chris Richard's Aug. 13 article, the sub-heading reads, "Hawthorne voters asked to approve new taxes." This statement was erroneous. While I am aware that a correction was published in Thursday's edition of the *Daily Breeze*, the initial headline was much more visible than the correction.

Hawthorne's upcoming Nov. 4 election is not about imposing any new taxes — but about freezing both the existing utility users tax and the business license tax at their current rate. No new taxes are at issue in this election. Passage does not require a two-thirds majority vote — only a simple majority.

As an employee of the city for 24 years, I can honestly say that I have been with the city through its best times and its worst times. While the past five years have been quite tumultuous for city officials, city employees and residents, there is something to be said about the loyalty and tenacity of those who have decided to remain living, working and fighting to maintain the image of Hawthorne as the "City of Good Neighbors." That something is dedication. Those who have remained are dedicated to making Hawthorne better.

"Better" can be accomplished but it will take a unified effort on everyone's part. It cannot be done without maintaining the current level of resources the city now has. A "No" vote in November actually means a \$5.2 million decrease in the city's current operating base. If that happens, all bets on making Hawthorne "better" are off.

So come on Martha Bails, Mark Young and all those who are opposed to maintaining the current tax base, let's give Hawthorne, its residents, officials and employees a chance to prove they can succeed in making you proud. Let's work

on a "Yes" vote in November.

— **TERRI SABOSKY**  
Vice President  
Hawthorne Municipal  
Employees Association  
Hawthorne

## Palmdale should expand; LAX is just too crowded

I am in full agreement with Robert Pullen Miles (Letters, July 27) that our voices must be heard regarding the expansion of Los Angeles International Airport. LAX is an accident waiting to happen!

As a former airline employee and resident of El Segundo for many years, I have noticed a tremendous increase in traffic (both air and ground) noise, pollution and early turns over our city, as well as aborted landings due to runway congestion.

We do not need another runway, as this airport has outgrown its capacity to accommodate more traffic.

Must we experience a disastrous mid-air collision to convince the greedy pro-expansionists that our skies are already overcrowded?

Palmdale would be a good alternative and has ample runway space. It should have been further developed when expansion of LAX was first proposed in the 1970s.

El Segundo

## Skateboard park backers need dedicated leader

After reading numerous articles and letters to the editor regarding the building of a skateboard park in one of the beach cities, I felt compelled to write this letter.

I feel sympathy for the skaters and the people who are trying to get a park built for them. As a parent of a roller-hockey enthusiast, I witnessed how the difficult and single-handed efforts of one man brought about a much-needed roller-hockey rink in Redondo Beach. I am referring to

8-14-98  
the South Bay TIDES Hockey League. TIDES stands for Teamwork, Integrity, Dedication, Excellence and Sportsmanship. John has dedicated himself to these beliefs and he instills these beliefs in the way he runs his organization.

From the lowly beginnings just a few years ago of playing roller hockey on the blacktop of a local elementary school (using a plastic "border patrol"), to working through all the red tape of the school district and city and getting funding, O'Rourke has made it possible for the community to enjoy a top-rate roller hockey rink at Adams Middle School in Redondo Beach.

I don't know if people realize what a tremendous effort this man put forward for this sport! He does not even have children old enough to participate yet!

As a parent who has encouraged her children to try many sports and activities in the South Bay, I can say that this sport has really had a terrific impact on my son's self-esteem. Through the years, he has played many sports like baseball, basketball, flag football and soccer, and enjoyed them all, but never truly excelled in any sport until he started playing roller hockey.

Besides wanting to praise and thank John O'Rourke in some way for his great efforts to make available a wonderful sport to our youth and adults, I am writing this in hopes that maybe there is someone like O'Rourke who wants a skateboard park badly enough to put in the effort, time, money, etc., to make it happen! For the sake of the skateboarding enthusiasts, I hope so, and good luck!

## School bureaucrats fail to use proven methods

In reference to Thursday's column by Peter Schrag of the *Sacramento Bee*, "School reform:

more of my brothers in the air will be flying over here since Torrance would be the *only* airport in the South Bay — making it much, much harder for the foes of Torrance Airport to close it.

— **JEFF WILLIAMS**  
Torrance

**Expansion would make LAX traffic unbearable**

Whenever we have to go to Los Angeles International Airport, the traffic is just terrible, and it's almost impossible to pick up someone, or even to find a parking space. It is dangerous to drive with all this congestion, and your odds are very high that you could have an accident no matter how good of a driver you are.

We do travel a lot now that we are retired, so we fly into many states and to several large airports such as Orlando and Miami. None of them seems to have the problem we have at LAX.

It has been impossible for the state Department of Transportation to build roads fast enough to handle the traffic surrounding LAX. How is Caltrans going to handle the added traffic if LAX expands?

Shuttle buses and parking areas are very expensive and not the answer. We cannot understand why the region has not taken advantage of some of these military bases such as Norton Air Force Base. This base has potential. It has one of the finest landing strips around. It is just sitting out there with weeds growing all around, with a freeway next to it. El Toro Air Base also has great potential.

Both airports are able to handle large aircraft and have lots of space to be able to handle traffic and are close to freeways. We feel that using either one of these bases would sure help the traffic problem we have in the South Bay, West Los Angeles and even the San Fernando Valley.

Do we need to spend all this money on LAX to make our lives more miserable? We don't think so.

— **MR. and MRS. W.M. HUDSON**  
Torrance

**Blind were not offended by word choice in story**

This is in response to a letter to the editor in the June 21 *Daily Breeze* written by Tony Senior of Carson. He complained that a recent article in the *Daily Breeze* about Stevie Wonder was insensitive because it said Wonder came to "see" and "watch" his son graduate.

Sometimes we sighted people are the ones who are too sensitive over small things.

My son, who is 33 years old and blind since birth, always refers to "watching a football game" or "seeing a movie." In fact, we have been around blind people all his life and they all do the same thing.

The article was great. I can guarantee you that there is probably not a blind person around who was hurt or offended.

Lighten up, Mr. Senior. The blind are not easily offended and have the best humor of anyone.

Hawthorne

**U.S. might have to go it alone on missile shield**

I was dismayed and disturbed to hear some of our European allies, as well as some of our U.S. media outlets, criticizing President Bush for his insistence on going forward with the U.S. missile-defense shield.

I could certainly understand resistance coming from the likes of Russia, China, Iran, Iraq and various other countries, but I have to admit that I was disappointed and mystified as to why European nations, which are supposed to be allies, would reject a plan that would allow America to defend itself should it be attacked by incoming nuclear missiles.

There must be a reason, but as of late I have not heard a good one.

For others in the United States, I guess money could be an issue. It could be costly, but not as costly as the loss of life should our cities come under nuclear attack. I realize the thought is an unpleasant one, but to bury our heads in the sand

and pretend it could never happen here does not make it so.

Bush put forth the missile-defense shield plan to the European allies, and for the most part they gave him the thumbs down.

It should be noted once again that in World War II, the United States was forced to come to the aid of Europe, mainly because of European appeasement to Hitler. Now, with Europe's recent rejection of our missile-defense shield, shadows of appeasement seem to be reappearing. It seems obvious to me that Europe doesn't wish to offend other trading partners that would be against our building the shield.

With the current atmosphere in Europe, it has become more evident as never before that the United States may feel it necessary to go it alone, so that it can better protect its own.

*BREEZE* 12/31/99

City Manager Les Evans is ready to blow the entire \$5 million tax surplus to fix up the ground under the whale watch center.

"Who is responsible for botching the high-profile project also remains an open question" is posed in the *Daily Breeze* article. Since every project in RPV has been botched, obviously the elected city officials are responsible.

The solution to stopping botched projects and other malfeasance in City Hall is to repeal the excess taxes immediately so that the politicians won't have their hands on our money.

**Palmdale remains answer to L.A. airport expansion**

In a letter to the editor Aug. 14, 1998, I stated that Los Angeles International Airport was an accident waiting to happen. Dec. 22's *Daily Breeze* headline reads: "LAX is inches away from disaster."

Now the question is: When?

One need not be an Einstein to figure out that this airport cannot safely handle more traffic yet the Los Angeles City Council and other monetary seekers are pushing for expansion. Where?

There is no space left in which to expand unless they buy out the cities of Inglewood, Westchester, Playa del Rey and El Segundo or construct floating runways on the Pacific Ocean.

Palmdale should have been expanded in the 1970s when the city of Los Angeles purchased acres of desert land intended for an international airport. It now sits idle wasting taxpayers' money! Get real!

— **MARTA BALAK**  
*El Segundo*

**Lowering standards does not really help minorities**

If we keep lowering and changing our rules and regulations to accommodate the minorities living in California, pretty soon our stats will be no better than the country that the minorities originally came from.

Instead of making exceptions in the rules for minorities getting financial assistance or lowering job educational requirements, all rules and regulations should be upheld by everyone.

Maybe if we didn't keep lowering our standards to make it easy for the minorities to get financial aid or jobs, even though they can't pass the test required, or being able to vote because the ballot is printed in their language instead of English, more would take advantage of the free education offered.

The opportunity is there!

— **RUTH MURREY**  
*Torrance*

**Correction**

In an "Editor's Note" to Gail Vasquez Connolly's letter Thursday, we incorrectly identified her as city clerk of La Mirada. In fact, she is the city clerk of Norwalk.

We apologize for the error.

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Source: Los Angeles World Airport; Denver International Airport; Alliance for a Regional Solution to Airport Congestion

Dear Congresswoman Harman,

For all of the reasons you state on the front of this form, I wholeheartedly support a regional plan rather than the LAX Master Plan. Even if I didn't live in the South Bay, where LAX's expansion would negatively impact my way of life with increased traffic, noise and pollution, I would like to believe that common sense would still tell me that the regional approach is what will best serve the transportation and economic needs of all of Southern California.

Congresswoman Jane Harman  
811 North Catalina Avenue  
Suite 1302  
Redondo Beach, CA 90277

Dear Congresswoman. Harman,

- 1) I am not for expanding LAX Airport. I live in Playa Del Rey and the noise level is very high 24 hours a day and the pollution resulting from the heavy traffic is unconscienable.
- 2) We were told that Vista Del Mar Avenue north of Culver Blvd. was going to be paved by March 2001. I have not seen any information or received any mail stating when the street would be finished of its repair. They are putting phone lines underground and this project started a year ago. When are they going to finish paving the street?
- 3) The palm trees on Culver Blvd. all the way to the 90 freeway need to be trimmed. I've called the local Ruth Gallanter office but have had no effect. They are completely down to the ground and need to be trimmed and are an eyesore.

*Thank you,*

*Elisabeth Melinz*

ELISABETH MELINZ

## FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport, Alliance for a Regional Solution to Airport Congestion

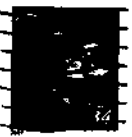

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*I support the Regional Plan to airport growth. LAX is too crowded with nowhere to grow. And it threatens what's left of Ballona Wetlands with noise and pollution. But also include rapid train transit to airports in Ontario and Palmdale - like the TGV bullet trains of Europe. They're superb. Let's get out of this archaic automobile mindset!*

The traffic around and into LAX is one big traffic jam. It's almost grid-lock. We don't need more of it. All the surrounding cities are plagued by the noise and pollution from so many airplanes. We don't need more of it. The United Airlines terminal is so large now that to get to some of the "gates" requires a long, time consuming hike. Some of their flights should be moved to other airports now. I don't feel that the airport should gobble up more houses and ruin more cities in an effort to have all the airlines at one airport. The noise level is not acceptable at night at my house at the present time. We don't need more of it.

Dear Congresswoman Harman,

I would heartily recommend that LAX not be expanded or enlarged. Rather, make better use of the <sup>existing</sup> regional airports with absolute emphasis on the Palmdale airport.

P.S. Received - 6-7-01

Sincerely,

Betty J. Paul

Dear Congresswoman Harman: 6/29/01  
I feel strongly that LAX should not be  
expanded, for the following reasons:

1. The airport and surrounding neighborhoods are  
already operating at an above capacity
2. Other municipalities need to step up  
and accept their share of the responsibility  
for airport capacity, including Orange County
3. Increasing the size of LAX will ultimately  
stifle growth; future expansion can better  
be accommodated in other areas and in the Torrance

Dear Representative **HARMAN**;

Thank you for your continual interest in so many issues that my family and neighbors are concerned about. I chose to live near LAX because I am an aircraft mechanic for Northwest Airlines. But I am not in favor of extreme expansion at LAX. Yes the airport must be refurbished, passenger movement and traffic is awful. Technologically the airport is a relic of the 60's. Expansion must be spread out in a regional manner.

I have tried to access the airport by bicycle and foot and found it impossible from the south, since Sepulveda turns into a tunnel with no pedestrian walk, or bike path. Even aviation blvd to the east has neither access. Therefore I am forced to drive to employee parking over roads not designed for the high volume now common. Many roads are also in disrepair, despite high volume at LAX.

**FN SUMMARY:** Improvement will result in expansion through higher efficiencies. **1990 is not always better, sometimes making it better for everyone is the answer.**

Living so close to the airport (about 3 miles south) we have already been affected by increased flying into LAX and changes in flight patterns over the beach cities. Sometimes we have noise from helicopters that have stayed from the Sepulveda corridor. Holiday times block up traffic all around. If we are spending the holiday at home we stay off the roads. Increased flights into LAX would make fighting the traffic a daily event & make it tough for me to travel north of Man. Bch. I favor spreading the flight load between LAX & other local airports (Palmdale Ontario etc.) & PLEASE how about a rail line between airports like they have in Europe so that people can catch other flights if they want to.

I live on Sunridge (225); when the planes take the path they are supposed to use, the noise isn't too bad. However, as I'm sure you know many times they take off over the houses, I assume because of air traffic. Increasing the flights is a concern. I feel each county should handle the flights for their population. Living on the North side of the airport I of course would rather see a strip added to the South. Can't they build sound walls or absorption cones. Or take off heading South just a little you have your hands full. Keep up the good work!

*Auto traffic to and from L.A.X. is already extreme, resulting in accidents, pollution, and road rage. Plus the pollution from the noisy planes and their filthy exhaust, is not healthy for anyone in the Southland Cities. L.A.X. should not be expanded for any reason, there is no room for them. A regional plan to expand the other airports where they have the room to grow, and serve the population living there is the only sensible answer.*

6-9-01

Palmdale is the proper place for a regional airport due to land availability. Most large airports are well outside of population centers. Kansas City is one such example. They have many airport busses.

*We live in the Palms Verdes Area. If the airport is enlarged, we feel jets will be flying over the peninsula. Many people in area have recorded jets & noise levels. We find traffic around LAX very heavy, I cannot imagine additional cars on the road. We need traffic relief as well as better airport service. We agree with your plan to expand other airports, other cities such Chicago, N.Y. London, Paris etc have 2 or more big airports, why not LA?*

*We definitely need to increase flights from regional airports other than LAX. An expansion of LAX would adversely affect traffic in my area, would increase the already existent noise problem, and would create additional pollution in my nearby environment. Better connections out of Burbank, John Wayne, & Ontario might wish decrease traffic in my area. ~~I am~~ I am completely against expanding LAX.*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*I think we need to accommodate growth, but I think other airports should shoulder their share, particularly Long Beach, which appears to be very underutilized.*

Congresswoman Harman

I agree! Please continue to oppose the LAX Master Plan.  
Safety factors, noise factors, plus traffic congestion  
made the plan so undesirable.  
Thank you.

*Safety: According to the data cited on this circular, a takeoff or landing will occur every 40 seconds. Is this an adequate margin? Surely there are sufficient airports in southern California to distribute the load. Why must we darken the sky of the 36th District?*

The 405 Freeway is the main route to LAX, and this freeway is already so overcrowded that it is almost useless during portions of each day. If the number of passengers using LAX increases, traffic will become even worse.

Developing new or existing airports in surrounding regions, away from LAX, will be much better for passengers and for local residents.

LAX is already busy enough. I am a pilot and my wife is a controller at LAX. The notion that traffic can be increased to proposed levels is ridiculous accounting by people who have never been in the front of a jet or control tower. El Toro should be used as a reliever airport at a minimum. Make surrounding communities utilize their existing airports to reduce congestion.

If you need more room, feel free to enclose additional pages with your name and address.

Expanding LAX means more traffic congestion, noise + considering that the 405 freeway is a parking lot 7 days per week, how could you think you can bring more people to the Airport? It will be more time sitting in your car, the surrounding neighbors will have to sound proof their homes and will suffer hearing loss from outdoor exposure to airplane noise. Westchester will lose its community center shopping area. Regional airports need to be developed to provide accessible transportation for all residents.

I hate the idea of expanding LAX, particularly given the above figures, when other regional airports are willing to expand. I used to live in Westchester in an area with heavy ~~air~~ airplane noise where LAX is now buying the houses. Manhattan Beach is now getting more (illegal?) fly over traffic than before. I hate it!

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport, Denver International Airport, Alliance for a Regional Solution to Airport Congestion

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

I'm with you! LAX is already overcrowded and overburdened, much of the traffic due to freight cargo that is then driven back out to the countryside. Plus, I'm tired of those 1 AM low flights over South Redondo + PV. Keep LAX as is + build outlying airports to accommodate growth.

Because I live in Redondo Beach the airport has a large negative effect on the quality of my life. For selfish reasons I would prefer not enlarging it.

I also think that it is very short sighted planning to put all the eggs in one basket. If the Inglewood fault were to have a major quake almost all the air traffic in and out of L.A. could be halted for an extended period of time. Having several major airports 50 or more miles apart serves our "spread out population" much better. A good rapid transit system between airports should also be planned.

*I support a regional plan as the best solution to an increasing number of air passengers. I believe that this burden should be distributed throughout the greater LA & Orange Co areas, LAX already is a challenge for frequent air commuters.*

*I live about 1 mile from LAX and the traffic, pollution + noise is already intolerable. I am a widow and do not have the funds to paint my home every 2 years which is necessary because of the pollution from planes flying over which is not suppose to be. The Airport doesn't seem to care if the planes follow the law. They have been my bad neighbors. I can't imagine what any opposition would mean. Why when two areas are asking for an airport - greed.*

*Expand other So. Cal. regional airports. LAX is already too busy - many arriving passengers are not staying in the LA area - expand airports where passengers live or plan as their destination. We on the South Bay are aware of the incremental changes and expansion LAX is already under taking; subtle changes we resist without proper impact studies. Quality of life, even in greater Los Angeles, should have some merit even if it interferes with so-called economic benefits - whose benefits? Please look at expanding Ontario or other regional airports.*

*I am not affected by traffic, noise and pollution resulting from LAX airport, neither do I think others are on the P.V. Peninsula - they're just looking for something to complain about. I have been very disturbed by low-flying helicopters, however. There is no argument that LAX needs to have operations reduced and that expansion needs to be stopped. We need to have Long Beach operations increased, to provide the South Bay with more departure options by major air carriers. Palmdale is a ridiculous choice - the summers are far too hot & there is no efficient surface transport to that airport.*

DEAR JANE,

TO DATE LAX HAS BEEN SELF SERVING. BETTER OR MORE UNSELFISH PLANNING COULD HAVE REDUCED TRAFFIC IN AND AROUND THE AIRPORT, WHY WOULD THINGS BE DIFFERENT NOW?

MY VOTE - EXPAND SURROUNDING AIRPORTS. WE HAVE ENOUGH POLLUTION!

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs: ✓

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport; Alliance for a Regional Solution to Airport Congestion

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*WE STRONGLY OPPOSE ANY EXPANSION OF LAX  
WE ALREADY HAVE TOO MUCH IMPACT ON  
SOUTH BAY AND SURROUNDING AREA.*

I agree with a regional solution. Not only is it SAFER to have the air traffic spread out instead of congested in one area, it just makes sense. I live about 10 mins. from LAX so it is great for me, but many must travel far distances to travel to and from LAX - only adding more ground transpo traffic. Plus, there are so many local residents opposed to expansion of LAX, because of noise and air pollution.

Dear Congresswoman Jane Harman:  
 The LAX Master Plan will severely impact the quality of life for myself, my family & our community. The Plan is one sided & careless. This plan reflects a lack of responsibility & foresight. The Plan must be stopped & a more regional approach must be implemented. Please continue your hard work & perseverance.

① Lower property values. Higher stress levels. More street traffic. Worsening on-time departure + arrival records. Noise noise noise. Pollution<sup>3</sup>, too.

② Don't know except ① above!

Please get direct rapid transit into LAX (like London, Paris, soon JFK-NY, et al).

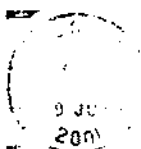

Thanks, Jane!

LAX IS BIG ENOUGH!  
I DO NOT WANT TO SEE AN EXPANSION AT LAX. I LIVE IN THE SOUTH BAY AND AIRREDDY AM PERTURBED BY EVENING PLANE NOISE. I MOVED TO HERMOSA BEACH TO BE WHERE I WILL NOT HEAR PLANES FLYING OVERHEAD. AIRPORT TRAFFIC IS ALSO A NUISANCE.

THE EFFECT ON MY IMMEDIATE NEIGHBORHOOD WOULD BE MINIMAL; REGIONAL TRAFFIC CONGESTION AND POLLUTION WOULD INCREASE. I CAN UNDERSTAND PEOPLE IN OTHER AREAS NOT WANTING TO DEAL WITH THE IMPACT OF AN INTERNATIONAL AIRPORT, BUT IT SEEMS FAIRER AND MORE EFFICIENT TO DISTRIBUTE AIR TRAFFIC MORE EVENLY. THE FORMER EL TORO AIRBASE SEEMS AN IDEAL CANDIDATE, BUT AS THEY SAY, NIMBY!

*The mistake often made is that bigger will be better. I have been in California since 1973 as a Presbyterian minister - five of those years serving a church three miles from LAX. During that time one of our churches closed due to proximity to LAX. Road work to enhance access is causing a mess, as it has in the past also. I live in Rancho Palos Verdes. In one evening I counted more than 10 planes in the air at one time - the noise is increasing. Let's share both benefits and headaches!*

For many years, aircraft departing LAX initiated their turns so that they were over Palos Verdes during the turn. This procedure guaranteed that the aircraft were too far up to have a noise impact in PV or any of the beach cities.

This procedure, when initiated, was widely publicized as a noise abatement measure. We were invited to observe the halos on the heads of the angelically considerate managers of these decisions.

For the last two years (or more), the aircraft noise over Hermosa Beach has been so high that I cannot hear my own, indoor, television when a plane passes over. Obviously, the airline managers have decided to save the cost of fuel rather than continue noise abatement procedures.

I had thought that the procedures were required by the FAA, and perhaps they are/were. Can you do anything to help enforce existing rules?

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

THE EXPANSION OF THE LAX IS NOT ACCEPTABLE. ALREADY, THERE ARE TOO MANY LOW FLYING AIRCRAFT OVER THE RESIDENTIAL NEIGHBORHOODS OF THE SOUTH BAY. I SUPPORT YOUR WORK IN DEVELOPING ALTERNATIVE MEANS OF HANDLING AIR TRAFFIC.

I would like to remark on the total airport facilities in the southern California area. I live south of LAX and west of Long Beach. I am a pilot and fly over southern California a great deal. I find that when I use LAX as a passenger, the traffic and terminal congestion are about as bad as one could want without traffic coming to a dead halt more times than it does now. These are my feelings from looking down from above, and as a passenger using LAX. Noise is not a problem with me although some people in my area are paranoid about the noise.

LAX expansion- No. It is too congested now.

Ontario: Should be some room for added flights.

Long Beach: Same as Ontario.

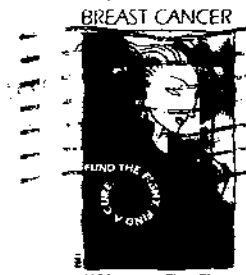

El Toro: Yes. It is far enough away from LAX to serve the San Diego and neighbors area of Southern California. The land is there. The basic runways are there. Some facilities are there. It seems to me to be the ideal location for another international airport. The complaint that it is unsafe I find interesting since the military used it without undue problems to my knowledge.

Dear Jane: I fully support your approach to airport - development. If LAX is enlarged  $\downarrow + \downarrow$  along with the disas. Playa Vista development will wreck havoc on the communities, the freeways + roads + ruin the beauty of our natural resources. ~~The~~ The 2 ideas are linked in their detrimental impact. So you can see I oppose both LAX expansion + Playa Vista. Since I moved to Venice in '85 the traffic has already become a mess. + re: LAX. ~~on~~ on foggy days right when some carrier takes off in Venice can hear the plane take off

Thanks,  
TSM

Our daughter lives near the #405 + Marina  
freeway crossing. She uses #405 for school  
(UCLA) and work. The grid lock happens  
many times - To update the airport is  
probably necessary but extension would  
only expand the already existing problems.  
Inglewood area has all of the problems plus.

My family and the families of my neighborhood, are concerned with the economic and environmental impact of the proposed expansion of LAX. Already on the west side there exists an excessive level of noise pollution and congestion, the magnification of which by the proposed expansion will only serve to lessen the quality of life of its residents. The resulting decline in property values will be devastating to many local communities, including the lovely middle class neighborhood of Westchester. That, coupled with the current economic downturn, would wipe out a significant portion of many residents net worth. At the same time, those living in communities to the north and east would face even worse traffic and congestion getting to LAX, and at LAX. The city, much like Chicago and NY, is far better served all around by regional solutions.

*Tom Cosgrove*  
 The LAX only solution is ill conceived, short term, and not a solution a world class city would ever embrace.

# Broken Promises

- ① No more early turns after deadly crash in El Seg. in the 60's, they still do it.
  - ② No more condemned homes in neighboring areas. Promised action wasn't real estate speculation. Today they want more homes condemned for their expansion.
  - ③ No more excessive noise promised MGM Grand Airline will be good neighbors. At night sleep is disrupted by engine testing + even during the day the jets are so loud my neighbor can't hear me even when I'm speaking directly to him. We just point at the sky + wait for the jet noise to subside.
  - ④ Many times houses shake in a way that makes you pause to see if it's a quake. Most of those occasions are created by "United" cargo flights.
- The Airport has always lied!  
I've seen + heard the truth for 40 years

# Suggestions

- ① Make Airport pay City of L.A. monies owed i.e. concessions etc. (No more secret deals)
- ② Keep LAX as a passenger airport + also for special imports, perishables, blood etc.
- ③ Farm out extra traffic <sup>+ cargo</sup> to Palmdale Orange County and El Toro. Closer airports means less commute for passengers.
- ④ Hold Airport to a good neighbor policy: After all respect for one another as individuals and as communities was a necessity for living, even long before airplanes and airports were invented!
- ⑤ Improve the Airport within the limits that exist. Quieter jets better air-control etc. There are some very smart people out there hire them use their ideas.

**To:** <ruthgalanter@council.lacity.org>  
**Sent:** Sunday, October 21, 2001 8:50 PM  
**Subject:** L.A. International Airport Expansion

Dear Ms. Galanter:

I would like to applaud you for speaking out against the expansion of LAX...

I live approximately 35 miles east of LAX in the Whittier hills and when the airport is busy, there are one or two flights flying over my rooftop every minute. Sometimes, there are 747's that are flying lower than allowed.. There are flights that sound as if they will be using my roof as their landing strip, after 11PM. My neighbors and I have discussed this often and hope that they will not continue this pattern or add any more flights to LAX.

I understand the City of Los Angeles, Dept. of Airports owns approximately 18,000 acres of land for a new airport at Palmdale. I am aware that this has been discussed for the past 30 years.. From an article in the L.A. Times a few years ago, you spoke up with regard to using Palmdale Airport to relieve traffic at LAX, which I thought was a GREAT idea!!

Now that there is a new mayor in the City of L.A., Mr. James Hahn, maybe this will become a reality. What is not realistic to spend twelve billion dollars to expand LAX or adding another airport in Orange County.

I have driven from my home to Palmdale in one hour and fifteen minutes.. I could live with that as well as many other people, to make the airports a 'safe' place to fly in and out of and to make the skys safer..

Please keep up the good work opposing the expansion of LAX.

Sincerely,

David Cinquini/14014 East Summit Drive/Whittier, California 90602

June 14, 2001

Congresswoman Jane Harman  
811 N. Catalina, Suite 1302  
Redondo Beach, CA 90277

Dear Ms. Harman,

Regarding the LAX Master Plan:

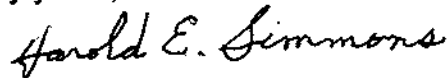

I am not totally aware of the details of the LAX Master plan; most bureaucratic plans tend to be mired in confusion, and I probably wouldn't understand it anyway.

Simply stated, I support expansion of the regional airports, i.e., Palmdale and Ontario, as you do. Your comparison of LAX and Denver illustrates quite clearly why LAX should not be expanded—the airport is an island surrounded on one side by the ocean and by people on the other three sides. The population density alone makes further LAX growth irresponsible.

The issue of expanding the regional airports is hardly new. If Los Angeles is to continue to bulge, as it likely will, these airports must be the focus for added airline service, both passengers and freight. Airport growth must be coupled with rapid transit service, preferably rail, to strategic points in this far-flung city. In recent visits to St. Louis and Atlanta, I have been impressed by the speed, cost, and efficiency of the airport to downtown service. Much faster and cheaper than cabs or busses, plus utilization of clean and smooth-riding equipment!

No need to mention the added traffic congestion, plus air and noise pollution! These are a given around any airport, and no one can deny that the already busy South Bay has plenty of these negatives with the existing airport facilities.

Truly yours,

Harold E. Simmons

**Re: Opposition to expansion of Los Angeles International Airport**

Mr. Kessler and Mr. Ritchie:

I live three miles south of the airport, and I oppose any expansion.

Like the freeway systems in southern California, the LAX airport is already too big, and even more detriments will result from expansion. We need to protect our neighborhoods and do what is right for the whole. A better alternative is to invest this money in high-speed rail, which is not subject to weather storms, etc.

The best air alternative is the regional plan to shift this extra growth to Palmdale and Ontario (though not to El Toro – that should be a regional park).

Please consider my alternatives and don't make the mistakes of past planners that have ruined southern California.

Sincerely,

Jay Ross

June 8, 2001

Dear Congresswoman Jane Harman,

At first, I would have been convinced that the LAX master plan was a good thing for the L.A. area as to jobs, and economic opportunity. Perhaps LAX still needs some improvements to improve the aging infrastructure there. But I am swayed by your statements about how the traffic has grown at LAX, as well as the number of passengers that are handled by LAX compared to the nation's newest airport at DIA.

It appears to me to be unfair to have LAX shoulder all the expense, noise, and traffic congestion, both on the ground and in the air. The inconvenience to our traveling public on the eve of holidays tell the true story of how bad the congestion can get.

I speak from personal experience, as an airline pilot, flying in and out of LAX, as well as being a resident in Redondo Beach. We have done a great job with our new 405 and 105 freeways to alleviate much of the congestion to the airport and have perhaps reached a good level of efficiency with LAX as it stands now. Trying to squeeze more chickens into this 10 pound bag.....well you know the story.

I'm in agreement with you: Let the other regions of greater Los Angeles share some of their land and airspace. And, they would enjoy the convenience of having their own airport. Ontario (also run by the City of L.A.), as well as the proposed new Orange County airport are some of the airports that could well be developed to handle some of the passenger load LAX is being asked to shoulder.

Of course this is my simplistic view. From an airline company point of view, bigger is better, of course, because they would rather have a single hub and spoke operation, and would prefer one large airport, over several smaller ones. Never mind the passenger inconvenience of commuting in traffic for hours. Not their problem.

In summary, it is time to consider other approaches (not a play on words) to the LAX Master Plan. Approaches that look not just to the next five or ten years, but the next 25 or 30 years, that would best serve our Southern California area.

Sincerely,

Wilson B. Quan,

October 23, 2001

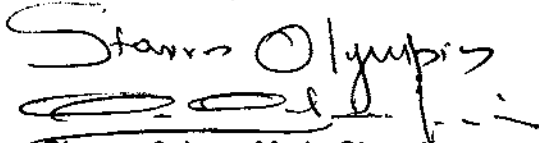

Mr. Jim Ritchie  
Deputy Executive Director  
LAX Master Plan/Room 218  
P. O. Box 92216  
Los Angeles, Ca 90009-2216

I am writing this letter to support the acquisition of the West Bluff of the Ballona wetland ecosystem as mitigation for any loss of habitat for the endangered Riverside Fairy Shrimp recently found at LAX. It is my understanding that the United States Fish and Wildlife Service has approved this mitigation.

The West Bluff has what is probably the very last vernal pool left in the City of Los Angeles. It is shown on the historical maps, and in recent photographs. It is also a critical component of the last large coastal wetland system left in Los Angeles County.

In writing this letter, I am not supporting the expansion of LAX. I am supporting the acquisition of the West Bluff in regards to the impacts of the current operations of LAX.

Thank you very much,

Stavros & Anne Marie Olympios  
8017 Rayford Drive  
Los Angeles, Ca.90045

June 19, 2001

Dear Congresswoman Harman,

I am writing this letter in response to the survey you sent out regarding the LAX master plan. This issue is the most important quality of life issue for me, my family and my neighborhood.

Our home is our main financial investment. My husband and I feel that we invested wisely, paying a premium for a small (1500 sq. ft), single-family residence in a quiet neighborhood with good schools in walking distance to the beach. If we add a second floor, our home will have an ocean view encompassing most of the Santa Monica Bay. On quiet evenings, we can hear the waves, seals barking, and the croon of the foghorn. My husband and I work long hours in order to be able to afford our home.

I have lived in the South Bay area since 1969, and in our present home since 1991. We never noticed any aircraft noise until 2 years ago. The roar of jets over our home has increased markedly since then. Heavy jets passing overhead between 10 PM and 2AM jolt us from our sleep. If this noise continues and increases, it will erode the quality of life and real estate values in one of the most livable areas of Los Angeles, an area with an almost perfect climate and relatively little air pollution. Families have no need of air conditioning or double paned windows since it is rarely very hot or cold. We could add these features to abate the noise, but we would increase our energy consumption and our energy costs and lose the breezes and the sounds of the sea that we bought our homes to enjoy.

Our area already supports its fair share of noise and pollution from LAX, numerous power plants (including one 2 miles from our home), and oil refineries (3 within a 10 mile radius), not to mention oil tankers and cargo ships. Air traffic must be spread to other areas of the region to prevent increased air pollution, noise, and traffic. Expand the airports in Orange County and the inland areas where so many LAX passengers currently reside.

Sincerely,

Portia La Ferla

November 2, 2001

Mayor James Hahn  
City of Los Angeles  
200 North Spring Street  
Los Angeles, CA 90012

This letter is to request information regarding our property in the Manchester Square area of Los Angeles. We own property at 5327 West 99th St.

As you are aware, the properties in this area of Westchester have been designated to be purchased by the Los Angeles World Airports (LAWA) through a Voluntary Property Acquisition/Relocation program. According to past LAWA correspondence regarding the Airport's acquisition of our property, the first properties acquired by the Airport were based on "hardship." Initially our property did not qualify as a hardship acquisition, based on the LAWA guidelines. Now, consistent with those guidelines, we qualify as a hardship acquisition.

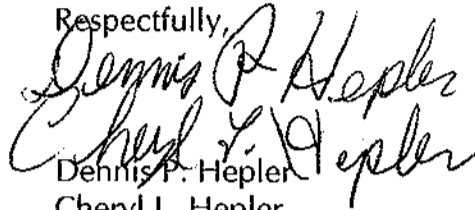

We are in a difficult situation of trying to rent a house with empty lots scattered throughout the neighborhood. As soon as a house was acquired by the LAWA it was razed. As of September our tenants have moved from our property to another location because they felt uncomfortable with the empty lots, and because many of their children's friends had moved away. Our property is now vacant and we are in a tough position of trying to find suitable tenants.

The information I am requesting is: **when will the airport be purchasing our property?** At the recent Board of Airport Commissioner's meeting on October 23, 2001, I asked the Airport Commission that question and was advised "this is the public comment session only." Therefore we are requesting an answer to this question in writing.

We would very much appreciate a response to this question as well as occasional information as to the progress and status of our property as it relates this program. This small effort on the part of the City of Los Angeles and the Airport Authority will go a long way in reestablishing accord with us as well as other property owners in this community. Thank you for your consideration.

Respectfully,

Dennis P. Hepler

Los Angeles World Airports  
LAX Master Plan - Room 218  
P.O. Box 92216  
Los Angeles, CA 90009-2216

Dear Mr. Ritchie:

It took the terrorism of September 11<sup>th</sup> to focus attention on safety and security rather than a bigger Los Angeles International Airport.

Finally, some sensible ideas are being substituted for the LAX Master Plan that ignored everything but more growth.

Please include the following comments for consideration along with Mayor Hahn's 'Alternative 5' proposal.

Sincerely,

Sallie Davison

Sallie R. Davison

Comments on the LAX Master Plan EIR/EIS Alternative

The communities surrounding Los Angeles International Airport have had to bear the burden of the Jet Age Airport since it moved west of Sepulveda Boulevard late in the 1950s. More than 10,000 homes were lost, those families displaced, two public schools were closed and the Westchester Central Business District was forced to undergo major changes which continue today. The toll taken by the ever-expanding airport and cargo facilities has not ended and the outdoor living enjoyment in this wonderful climate has suffered.

1) Safety has always been a major concern but little, if anything, has been said regarding the go-arounds and fly-overs of aircraft that have missed the runway or were ordered to make another attempt to land. It's scary to look out of the window of your home at the belly of a giant commercial airliner passing low overhead.

And what a shock it was to learn that the original control tower, atop the Administration Building, had a 'blind spot' which remained a problem for controllers until the new tower was constructed and operational in the early 1990s -- more than 30 years later!

The skies above LAX at the arrival and departure points are not limitless openings for aircraft. The more traffic in the air, the more serious the problem becomes for planes, the airport, and the hundreds of thousands of people on the ground. Increasing the size and capacity of LAX beyond serving 78 million annual passengers is unwise, undesirable, and unsafe from all standpoints. There must be a final end to the expansion of LAX and a determination to have the other Southern California airports carry their passenger and cargo burden.

2) Mayor James K. Hahn's proposal needs to be put into a written document with maps and figures that will allow the public to better understand what is being addressed. We need to be assured that the Mayor's 'Alternative 5' is permanent as a plan.

3) No more condemnations of private property and/or businesses in Westchester. This area has already suffered extensive damage in an ongoing effort to reinvent itself to accommodate LAX and its increasing ground and air traffic. The extension of the North Runway over Sepulveda Blvd. will cause additional losses. It is time to say ENOUGH.

4) No Ring Road to serve the airport. It would create more hardships for the Westchester/Playa del Rey communities.

5) No new Western Terminal that would stimulate the airport's ability to increase passengers, more gates for planes and more cargo.

6) By providing more runway separation, what additional problems such as noise and safety will be foisted on the nearby communities of El Segundo, Westchester and Playa del Rey?

PC02961

Sallie R. Davison

Comments on the LAX Master Plan EIR/EIS Alternative 5

7) In the effort to protect and secure the airline terminals, the proposal to move parking and check-in facilities to outlying areas fails to consider the needs of elderly and/or handicapped passengers who require more convenient resources. This is yet another matter that should be addressed since not all travelers are young and able-bodied.

8) Much more attention needs to be paid to the security of the passengers, their luggage, the upkeep of the planes, the employees, all check points and the cargo facilities. A larger airport makes that assignment even more difficult to carry out.

Thank you for including these comments within the LAX Master Plan EIR/EIS - Alternative 5.

Congresswoman Jane Harman  
811 North Catalina Avenue  
Suite 1302  
Redondo Beach, CA 90277

Fax No. 310-372-1622

Dear Ms. Harman:

In response to your request for my opinion on LAX expansion, I submit the following comments:

The FAA has too much clout in setting their own standards for their own agendas and that of the airlines. The Daily Breeze, dated Saturday, April 8, 2000, carried an article (one of many) concerning the lack of concern by the FAA and the airlines for the citizens of all the communities concerned about noise, pollution, and traffic, to say nothing of the risks and dangers of expansion at the airport. The FAA is known for renegeing on promises made. They have little regard for the taxpayers that support them (literally).

Our highways, particularly 405, are always jammed with cars going to and from the airport. All peoples living North of LA must come to LAX to pick up or drop off passengers, and fly themselves. It is almost impossible to set a time to reach a destination unless one left home at 5:00 A.M. As early as July of 1998, I noticed a daily increase in the number of planes flying over the peninsula. I began to note the flights overhead. On 7-9-98 between the hours of 12 noon and 1:10 (1 hr. and 10 min.) 15 jets and low flying prop planes crossed over my home. That equates to about one low-flying plane every 4 minutes. On 2-6-99, between 3:15 P.M. and 4:36 P.M., 22 planes flew over. On 4-8-00, 25 low-flying planes crossed over from 10:06 A.M. to 11:55 A.M. This amounted to approximaately 200 planes a day crossing over the same areas.

Noise has since abated due to diligent people and some officials to correct the problem. But, I feel certain that if this expansion is allowed to go forward, the noise, existing traffic problems at LAX itself, pollution, parking, safety in the air and on the runways will continue and there will be greater hazards and an abomination to the people (taxpayers and voters) who have to live with the consequences.

There are thousands of people living in outlying areas of LA. that would welcome the convenience and job opportunities of a working airport in their area. Let us be realistic about the problems this expansion would cause and stop thinking in terms of special interests, power and money for the few who would benefit by expansion. Ex Mayor Riordan is one of those - I pray our new mayor will rise to the occasion and fight for the rights of the people of L.A.

Thank you Jane Harman and Don Knabe for representing the majority of the voters. **OUR AIRPORTS SHOULD BE REGIONAL...**Lax is overburdened now and the expansion will not alleviate that problem and all the other problems it creates.

Mrs. Dorothy Bell

COMMENTS ON LAX MASTER PLAN

July 19, 2001

Congresswoman Jane Harman  
811 N. Catalina, Suite 1302  
Redondo Beach, CA 90277

Dear Congresswoman Harman:

I moved to your district in September 2000, and I would like to offer my comments on the proposed LAX Master Plan from the perspective of a relatively recent arrival to the area. I currently live and work in El Segundo, and about four months ago I began looking for a condo or townhome that I could afford to buy that would be close to my place of work. I have to say from the outset that the existing size of LAX has already negatively impacted my search for affordable housing. I am adamantly opposed to any expansion of the current airport, and I strongly endorse the alternative plan that you have backed, which calls for a more equitable distribution of future air traffic increases to surrounding regional airports.

Please allow me to describe the manner in which LAX has impacted my move to Southern California. First of all, I am currently renting in El Segundo. The apartment complex where I live has no air conditioning, because it is close to the ocean. During this summer, when I have had to keep my windows open at night, the noise levels from the airplanes taking off and circling over the Pacific is so great that I have to run a loud fan and wear ear plugs just to be able to sleep! When I began looking for a place to buy, most of the properties shown to me were very near the airport, since these were in my price range. (I am in a middle-income bracket.) Sometimes the noise would be so loud when I was being shown a property, the real estate agent and I would have to scream loudly just to be able to hear each other. There are already only a limited number of homes that are available locally to people in my income bracket. Any expansion of LAX would drive the number of such properties down even further. The quality of life for areas adjacent to LAX - Playa del Rey, Westchester, and El Segundo -- is already degraded by the current amount of air traffic. Adding millions of air passengers to the overburdened LAX can only result in a nightmarish situation for local residents. How, for example, can local corporations expect to attract new workers to the South Bay area with the accompanying increases in noise levels and traffic congestion that such an expansion will bring?

Thank you for taking the time to read my comments, and again I wholeheartedly endorse the regional airport plan as a viable and more rational solution to the problems posed by future increases in Los Angeles area air passengers.

Sincerely,

  
Steven Strom

PC02963

October 27, 2001

Dear Mr. Ritchie:

Our family has written at least a dozen comments to you and the FAA in opposition to any LAX expansion. The communities surrounding LAX have more than enough pollution, traffic, and noise. Enough is enough! Regional international airports are the solution.

Thank you.

Sincerely,

*J. A. Hyra*

August 30, 2001

Ms. Lydia Kennard  
Executive Director  
Los Angeles World Airports  
1 World Way  
P.O. Box 92216  
Los Angeles, CA 90009

Dear Ms. Kennard,

I am a current resident of Los Angeles County, and would like to support the recommended Los Angeles Airport Master Plan. I frequently fly up North, to Sacramento and Berkeley areas to visit friends, and often fly to Las Vegas, Nevada to have some fun.

The expansion plan of the Los Angeles International Airport would benefit the Los Angeles area greatly. It will also help to control the traffic congestion around Los Angeles and it's surrounding cities, helping the economic growth of the Los Angeles area.

I support the proposed Los Angeles Airport Master Plan Expansion.

Sincerely,

Kevin Wong

Los Angeles, CA 90009

Dear Ms. Kennard,

As a resident of San Bernardino County, I would like to support the recommended Los Angeles Airport Master Plan. I travel to the LAX area quite often and am concerned about the continuous growth and demands at LAX. I feel that any type of improvement would relieve much of the traffic congestion in that area. The LAX Master Plan will benefit the airport and bring economic growth as well as job opportunities.

I support the proposed LAX Master Plan Expansion in making LAX a world class airport.

Sincerely,

James Dela

Dear Ms. Kennard,

On behalf of United Poultry, Inc. I would like to express my support for the LAX Master Plan expansion. As a business located in Downtown Los Angeles, we rely on passenger travel and cargo shipment transport via LAX. In addition, I regularly use LAX for business and personal travel. It is a "World Class" airport with upper class appeal. The reason for this is because Los Angeles is one of the major cities in the U.S. LAX needs to maintain that standard and continue to be a "World Class" airport. Therefore, we are pleased to hear your commitment to update and improve LAX.

I look forward to a new classier airport and thank you for dedication to this effort.

Sincerely,

D. Moy  
Manager  
United Poultry, Inc.

Dear Ms. Kennard,

I'm a small business owner relying on LAX for business travel and cargo transport - both nationally and internationally. My company depends on the efficiency of airmail/freight on a daily basis. We are hopeful that we will double our current capacity as other businesses are forecasting the same. In order to handle the increase in volume, LAX must stay competitive and look for ways to improve their efficiency of air travel.

I am writing this letter to let you know that we, at D.K.G. Solutions support the recommended LAX Master Plan expansion. We feel that not only will this plan pave the way to more economical benefits for the surrounding communities and businesses, but will also provide better services to travelling customers. We look forward to a more productive and functional airport in the near future.

Sincerely,

Gail Y. Wong,  
Co-Owner

RE: LAX Masterplan Expansion and  
Environmental Impact Report

I, vehemently, reject your Masterplan  
Expansion and flawed Environmental  
Impact Report. And, urge, along with  
100 other cities and many other entities, to  
base plans for the future on regional  
airports in So. California rather than  
growth concentrated at LAX.

Growth concentrated at LAX <sup>would intensify</sup> intensifies  
pollution, increase traffic, create  
devastating noise, and air and surface  
safety would be in jeopardy.

PC02976

I urge you to rethink your priorities. We are not owls or blue butterflies - we are people. Can't we have the same consideration. Preserve our "HABITAT"

I attach herewith as exhibits (which may give you information to rethink your priorities) from the

# Perspective

By Jane Harman and Don Knabe

## Regional airports offer opportunity

**T**he remarkable consensus favoring a regional approach to air transportation in Southern California presents L.A. Mayor-elect James Hahn with a rare and valuable opportunity to do something truly great for all of Southern California.

Opposition to the \$12 billion "Master Plan" to expand Los Angeles International Airport cuts across party affiliation, geography and levels of government. All six major mayoral candidates opposed the LAX Master Plan and supported a regional approach. Almost 100 other cities across the region took the same position and, at a critical meeting of the Southern California Association of Governments, voted to base plans for the future on regional airports rather than growth concentrated at LAX.

The Los Angeles County Board of Supervisors has joined counterparts in Orange, San Bernardino and Riverside counties to revitalize an agency to coordinate development of regional airports.

And, last month, 13 members

of Congress from the region added our voices in calling for "a plan that fairly allocates the benefits and burdens of air transportation across the region."

Our approach should not be dismissed as a simple "not-in-my-back-yard" reaction to LAX. The airport's location along a fragile coastline and bordered on three sides by residential neighborhoods poses significant problems for expansion. The expanded footprint proposes to handle at least 89 million air passengers on 3,500 acres. By contrast, Denver's new 35,000-acre airport is designed for 44 million air passengers. In Los Angeles, 82,928 people currently live in an area where the average daily noise level from aircraft is above 65 decibels. Denver's airport is in an area where it was anticipated that not one resident would be in the 65-decibel area.

A regional approach, on the other hand, takes advantage of

other airport resources as well as the demographic reality that over the next 20 years, population will double on the perimeter of Los Angeles County while population in areas closer to LAX will grow less than 20 percent. Let's bring the airports and the economic development that goes with them out to the growing population instead of forcing more cars onto the congested freeways heading west.

It also reflects the economic reality that Southern California's economy will get a similar boost whether expansion takes place at LAX or at regional airports — \$11 billion and 83,000 jobs.

The regional approach has proved effective in Minneapolis, which is served by a network of complementary airports. No one would consider putting all of New York's traffic at one airport. And in Washington, D.C., air fares at Dulles and Reagan national airports have dropped sig-

nificantly since Southwest began offering flights from Baltimore, which is about as far from downtown Washington as Palmdale is from the San Fernando Valley.

A regional plan is also the best long-term response to concerns about noise and growth at Burbank, Long Beach and other airports situated adjacent to residential neighborhoods. Expansion at LAX will not relieve pressure on those airports. A viable airport in Palmdale and growth at Ontario and other Inland Empire airports will.

The LAX Master Plan does include some steps in the direction of a regional approach. For example, the plan proposes that LAX handle 89 million air passengers. This is not a limit, however. The government cannot impose an external limit on capacity at an airport. The current facilities at LAX were designed for 45 million air travelers and now handle 68 million.

In the absence of viable alternatives in Southern California, airlines will follow the path of least resistance and greatest profit, which means concentrating flights and resources at LAX. What's to prevent all 150 million annual air passengers expected in 20 years from landing at LAX? Only a regional alternative.

The task now is to develop and implement a "Regional Master Plan" that creates those alternatives. The Southern California Regional Airport Authority — a revitalized planning body with representatives from the city and county of Los Angeles, and four surrounding counties — may be an ideal vehicle for sponsoring a detailed plan for the region.

Let's start where there is near-unanimous agreement by defining what can be done to build viable commercial passenger and cargo facilities at former military bases in the Inland Empire and what incentives can be used or

# B5

related to attract passenger and cargo traffic there and to Ontario.

The regional approach is about more than just runway capacity. It's about the leadership that can develop and implement a vision for Southern California. A project of this scope and size is an opportunity to shape responsible economic development across the region. It's an opportunity to change the relationship between the city of Los Angeles and the surrounding region, recognizing that a solution that meets only the needs of one city is not a solution at all.

As elected officials representing South Bay communities, we are ready to work together to develop and implement a regional approach to aviation needs.

We hope that the next mayor of Los Angeles will see that as an opportunity where others have seen obstacles.

Jane Harman represents the 36th Congressional District, which encompasses much of the South Bay. Don Knabe represents Los Angeles County's Fourth Supervisorial District.

PC02976

# Supervisors to fight LAX

Vote against expansion is unanimous

By Troy Anderson

LOS ANGELES DAILY NEWS

Complaining they had been left out of the process, Los Angeles County supervisors vowed Tuesday to fight the planned \$12 billion expansion of Los Angeles International Airport.

"We told them to bring us to their table or we'd be their worst enemy," South Bay Supervisor Don Knabe said. "I guess it's time to be their worst enemy. They've left us with no choice."

The supervisors voted unanimously to oppose the plan after hearing a report that called the expansion "fatally flawed."

The supervisors said they prefer the expansion of outlying airports like ones in Palmdale and Ontario and are upset that the city of Los Angeles has not asked for the county's input

into the \$12 billion LAX expansion plan.

Supervisor Michael D. Antonovich said he doesn't understand why city officials want to expand LAX when it will lead to increased traffic congestion and air pollution in the area. He also noted that the Southern California Air Quality Management District has labeled LAX as the "dirtiest polluter in the basin."

"What they are leaving us with is an alternative to take this to court if they continue to turn a blind eye to the facts," Antonovich said.

Nancy Castles, spokeswoman for Los Angeles World Airports, said the LAX master plan and environmental studies are the product of seven years of research, planning and scientific analysis.

LAX/A14

## LAX

FROM PAGE A1

"We are now in the midst of a six-month public comment period on the draft document and we will respond to public input and make any needed refinements following the conclusion of the public comment period on July 25," Castles said.

The Los Angeles City Council has the final say on LAX expansion.

LAX handles about 67 million passengers a year and Los Angeles officials have a master plan to expand its capacity to 89 million a year to meet the expected demand.

In April, the Southern California Association of Governments Regional Council, a group of 71 local officials from throughout the six-county region, voted to recommend greater use of other airports to meet regional demand, which is expected to increase from the current 85 million pas-

sengers a year to 164 million by 2025.

In a \$175,000 report requested by the county supervisors, Burbank-based A.C. Lazzaretto & Associates found the LAX expansion plan is compromised by significant errors, omissions and biases.

"We found the document is fatally flawed and has problems that are systemic and pervasive," said consultant Andrew Lazzaretto, former Burbank city manager. "We feel after reviewing the document that the only appropriate action is for Los Angeles World Airports to revise the document and issue a new environmental impact report."

Los Angeles World Airports will hold public hearings at noon Saturday on the LAX master plan at three locations: the Furama Hotel, 8601 Lincoln Blvd., Los Angeles; The Pavilion at Hollywood Park, 3883 W. Century Blvd., Inglewood; and the Manhattan Beach Marriott, 1400 Parkview Ave., Manhattan Beach.

PC02976

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

# LAX Study Called 'Fatally Flawed'

**Aviation: Consultants hired by expansion foes say environmental report is riddled with inconsistencies.**

By JENNIFER OLDHAM  
TIMES STAFF WRITER

In an opening salvo of a coming battle over the \$12-billion LAX expansion proposal, consultants hired by local governments that oppose the plan blasted its voluminous environmental report, saying it inadequately addresses noise, air pollution and traffic worries.

The consultants, in a presentation Tuesday to the Los Angeles County Board of Supervisors, called the 12,000-page expansion document "fatally flawed" and said it fails to comply with federal and state law. They added that the document is so riddled with inconsistencies that "the only practical remedy is to start the process over again."

Criticism of the expansion plan is expected to rise in coming weeks as Los Angeles World Airports—the city agency that runs Los Angeles International and three other airports—and the Federal Aviation Administration close an 180-day public comment period July 25. Public hearings on the report are scheduled for Saturday.

firm hired by the South Bay council.

The expansion plan assumes that other airports will accommodate additional passenger growth, but doesn't provide a means to ensure that this happens, Lazzaretto said.

Among the inconsistencies Lazzaretto cited in the report are differences in the number of residents directly affected by airport noise.

A 1996 study by the airport agency found that 85,907 residents were most affected by airport noise, while the expansion plan says 49,000 residents fall into this category, he said.

Lichman and Lazzaretto said the report uses outdated statistics to determine how expansion would affect traffic and plane noise. The report also fails to analyze how traffic generated by an increase of 22 million passengers a year would affect intersections in neighboring communities, Lichman said.

The city airport agency offered no response to the consultants' charges, saying it will respond after the public comment period ends.

The expansion plan favored by the city agency would add no runways to LAX, but would make improvements to the existing facility to accommodate 89 million passengers a year by 2015. The airport currently serves about 67 million passengers a year.

The expansion plan has prompted an intense regional debate about how to accommodate a projected doubling of air passenger traffic in Southern California by 2025. County supervisors and about 100 Southland cities favor distributing this traffic among regional airports, while unions and airlines favor LAX expansion.

The report doesn't quantify the expansion plan's effects on minority neighborhoods, or suggest adequate measures to offset those impacts as required under federal law, said Andy Lazzaretto, whose firm, A.C. Lazzaretto & Associates, was hired by the county to analyze the plan.

"They say information on the number of minority businesses in the region that are impacted is not available," Lazzaretto said. "We take exception to that."

Lazzaretto agreed with a consultant hired by the South Bay Cities Council of Governments that there is nothing in the expansion plan to prevent the airport from absorbing all the region's passenger growth.

The environmental impact report "doesn't reveal the true build-out potential of the airport," said Barbara Lichman, a managing partner at Chevalier, Allen & Lichman, the

Jane Harmon  
Congresswoman 36th District

Congresswoman Harmon,

Please add the considerable weight of your office to the voices of your constituents on the matter of L.A.X. expansion. Many of us here in the Southbay feel that there is more than enough air traffic and ground traffic that we have to deal with here without an estimated 37 million additional passengers annually that will be produced under the current plan. A plane would take off or land every 25 seconds. Isn't it time for our neighbors around John Wayne and El Torro to bear some of the burden of the economic expansion of the Southland?

A good look at the E.I.R. prepared by Los Angeles World Airports shows many flaws according to Barbara Lichman and her consulting firm. The year 1996 was used as the base year for the E.I.R. noise impact report. In 1996 there were twice as many aircraft in the fleet at LAX as there are today. As a result, airport officials have inflated current noise levels to minimize future increases.

There are many good arguments out there to oppose LAX expansion. Understand that the best for those of us who make our homes here in your district is that we feel we are already observing the burden of the airport as it is and don't feel we should have to give anymore until our fellow Southlanders in Orange County pull their fair weight. Please support us in our time of need.

Thank you for your time and attention.

Your faithful constituent

Los Angeles, CA 90009-2216

Comments on the Draft Environmental Impact Report (DEIR) for the  
Expansion of the Los Angeles International Airport (LAX)

I have the following questions and comments regarding the DEIR:

- In light of the events of September 11<sup>th</sup> 2001, it is clear that more money must be spent on security at LAX. How will this redistribution of funding effect the budget/source of funding for the window replacement program and traffic mitigations described in the DEIR?
- What kind of assurances does the public have that LAWA will not continue its piecemeal expansion of LAX under the guise of security enhancement? What form will these assurances take? This type of assurance should be something the public can document; will LAWA give this type of assurance to the adjacent community?
- I understand that LAX was "grandfathered" into compliance for certain safety criteria. There is a mandatory safety clearance required between airport property and public roadways. This requirement was passed after LAX was established, so LAX was "grandfathered" into compliance. Is the public's safety being compromised because of a loophole? Because of the importance of safety issues, especially, in light of new security concerns, shouldn't this safety requirement should be enforced at LAX? What current risk is the public exposed to because of non-compliance with this safety requirement at LAX?
- The DEIR mentions that LAWA intends to expand service at all airports, not just LAX. What is the timeline and/or schedule for these other expansions? What assurance is there that this schedule will be followed? Can LAWA or the FAA expand on its plans for these other airports and give a corresponding timeline to achieve this regional expansion? If LAWA or FAA cannot provide this information now in the DEIR, what assurances does the community around LAX have that the regional expansion will occur? What assurances can be given that the disproportionate use of LAX will not continue?
- Are there restrictions on the types of aircraft allowed to fly in the middle of the night, between 10:00 p.m. and 5:am? What are these restrictions? Currently, 747 aircraft fly between these midnight hours, are these planes carrying cargo, passengers or both? If a passenger plane also carries cargo, is it considered a passenger or cargo plane?

Thanks you very much for your time,

Anne Backes

Los Angeles, CA 90045-1631

November 9, 2001

Mr. Jim Ritchie  
Deputy Executive Director  
Los Angeles Department of Airports  
LAX Master Plan Room 218  
PO Box 92216  
Los Angeles, CA 90009-2216

Dear Mr. Ritchie:

I am writing again to express my disapproval with all of the LAX Master Plan concepts presented, including the No Project Alternative, which is misnamed as several projects are incorporated into what is supposed to be a no change baseline study.

The LAX Master Plan will not be able to meet the traffic mitigation contemplated in the Environmental Impact Report and Environment Impact Statement and the Proposed Airport Layout Plans as several traffic mitigation projects have changed. The Arbor Vitae Interchange project has been put on hold. Plans to use Sepulveda Boulevard have been dashed by the Los Angeles City Council this Wednesday when the proposal to expand Sepulveda Boulevard between Centinela and Lincoln was removed from the Coastal Transportation Corridor Specific Plan. Another traffic mitigation project in limbo is Playa Vista's improvement of the Culver Boulevard interchange at Lincoln Boulevard. The California Coastal Commission is set to make a decision on Playa Vista's plan.

The world has changed since September 11<sup>th</sup>, including the world of air transport. So too must the thinking in airport planning. Traffic at LAX is down by about 30%. It's time to go regional-expand Ontario and build-up Palmdale into the truly modern airport that was promised more than 30 years ago. This is the time to make the infrastructure improvements at these two airports for the next 20 years while there is a lull in travel.

I am also opposed to Mayor James Hahn's fifth Alternative Plan which has not been properly prepared and noticed. While I support improving security at LAX, the world's third busiest airport, I will not support any plan that will move runways closer to the residents and businesses surrounding the airport. The surrounding airport communities always pay a heavy toll when LAX expands. Westchester and Playa del Rey have lost and will lose more homes and businesses under all of the expansion plans. Communities such as Inglewood, Lennox and El Segundo will be move heavily impacted by aircraft noise and pollution under all of the expansion plans. All communities in and around the airport will also suffer with increased traffic congestion and safety hazards.

Please join with thousands of residents, businesses and hundreds of local governments in opposing the LAX Master Plan and in supporting the regional solution to meeting our air traffic needs.

Sincerely,

*Robert Acherman*

Congresswoman Jane Harman  
811 N. Catalina, Suite 1302  
Redondo Beach, CA, 90277

In response to your survey and as a resident of Los Angeles, I oppose expansion of LAX and recommend the development of the Palmdale property for these reasons:

1. SAFETY

The air space around LAX is already over saturated. Witness the Cerritos accident of a few years ago and various recent near misses of midair collisions over the Los Angeles area. Expansion of LAX would exacerbate, and development of the Palmdale facility would alleviate the currently existing safety hazard. The safety problem is not just an LAX problem, it is a Los Angeles and vicinity problem. Airplane crashes are equal opportunity killers, both for passengers and those on the ground, regardless of which part of town gets devastated.

2. NOISE

There appears to be a discrepancy in the location of the Eastern end of the 65 dB noise contour line. The multi-volume draft in the public library shows the 1996 line about a mile short of the Harbor Freeway, while the General Plan revision dated September, 1998 Exhibit B shows the 65 dB noise contour extending East of the Harbor Freeway. Perhaps that was the noise level increase in two years? As traffic increases at LAX, air traffic, and therefore noise, increases all over town. Already noise complaints are coming in from as far away as Monterey Park. Soon noise abatement programs similar to those in the immediate vicinity of LAX will be necessary in many parts of town that are many miles from LAX. LAX noise is a problem for the entire city and environs.

### 3. GROUND TRANSPORTATION

The existing ground transportation congestion will turn into gridlock. I have recently been driving to Claremont from Westchester about once per week in the early morning and each time that I see the traffic crawling West on the I105 and the I210 I am thankful that I am headed East. Expansion of LAX can only make these traffic jams worse, all over town, not just in the vicinity of LAX, and not just on those particular freeways. The proposed traffic mitigation plans do not address these situations.

### 4. BUSINESS

The idea that expansion of LAX will be good for business is a myth, because the ensuing gridlock will send business elsewhere, probably resulting in a net loss of jobs for the area. Also, how many businesses will get displaced by LAX acquiring additional real estate for the planned expansion? That's more job loss. However, at Palmdale, jobs are just as important as they are around LAX, and the potential for growth is much greater.

### 5. AIRPORT ACCESS

A significant percentage of the population, and business, in Los Angeles is North of the Santa Monica mountains, and recent projections show that the fastest growth in the near future will be North of that, in the Santa Clarita valley. People in these areas can get to Palmdale just as easily, if not easier than to LAX. This will get even more true as traffic congestion increases and Palmdale access improves.

### 6. AIR QUALITY

Los Angeles already can not meet federal air quality standards. Expansion of LAX will exacerbate this problem too, especially since gridlock would be inevitable. Increased air pollution is a problem for the entire city of Los Angeles since the prevailing wind tends to send Westside pollution to other parts of town.

### 7. COST

According to the Master Plan the proposed LAX expansion is supposed to take care of increased traffic until 2015. Then what? Palmdale? Why not do it right the first time? Why do an expensive and shortsighted plan first?

Besides, when we hear an estimate as high as 12 billion dollars, based on virtually all previous experience, that number is just for starters. It will inevitably go up from there. How much more money will then be required to alleviate the problems caused by additional traffic jams and pollution?

Twelve billion dollars should be more than adequate to develop Palmdale and improve its ground access with money left over.

### 8. CONSTRUCTION

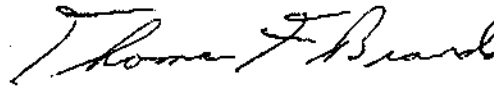

During the construction phase, even the current LAX capacity will be reduced as existing runways and terminals are razed. What kind of safety and other problems will that situation engender? Development of Palmdale obviates this concern.

9. ALTERNATIVES

The alternatives in the Master plan and the EIR are really just variations of the same plan. A true alternative would be to accommodate increased air traffic at other airports.

SUMMARY

To summarize, the idea of further expansion of LAX is expensive, dangerous, and temporary. It makes more sense to develop the Palmdale property instead.

Thomas F. Brands

November 2, 2001

The new plan for LAX upgrading, judging from the meager information available is still faulty for much the same reasons as the old or current one is:

1. SAFETY

Even though safety has acquired a new dimension since Sept 11, 2001, the safety hazards that existed prior to that time have yet to be addressed.

The air space around LAX is already over saturated. Witness the Cerritos accident of a few years ago and various recent near misses of midair collisions over the Los Angeles area. LAX should be limited to the traffic for which it was designed, about 48 MAP, not the 78 MAP that currently exists and is being used for alternative 5, even though this number is a rollback from the 98 MAP that was proposed. Development of the Palmdale facility would alleviate the currently existing safety hazard. The safety problem is not just an LAX problem, it is a Los Angeles and vicinity problem. Airplane crashes are equal opportunity killers, both for passengers and those on the ground, regardless of which part of town gets devastated. These have nothing to do with terrorism, but have a much higher potential for loss of life and property.

2. GROUND TRANSPORTATION

The existing ground transportation congestion has the potential for real gridlock. I have recently been driving to Claremont from Westchester about once per week in the early morning and each time that I see the traffic crawling West on the I105 and the I210 I am thankful that I am headed East. Expansion of LAX can only make these traffic jams worse, all over town, not just in the vicinity of LAX, and not just on those particular freeways. The proposed traffic mitigation plans do not address these situations.

3. BUSINESS

The idea that expansion of LAX will be good for business is a myth, because the ensuing gridlock will send business elsewhere, probably resulting in a net loss of jobs for the area. Also, how many businesses will get displaced by LAX acquiring additional real estate for the planned expansion? That's more job loss. However, at Palmdale, jobs are just as important as they are around LAX, and the potential for growth is much greater.

PC02983

4. AIRPORT ACCESS

A significant percentage of the population, and business, in Los Angeles is North of the Santa Monica mountains, and recent projections show that the fastest growth in the near future will be North of that, in the Santa Clarita valley. People in these areas can get to Palmdale just as easily, if not easier than to LAX. This will get even more true as traffic congestion increases and Palmdale access improves.

5. AIR QUALITY

Los Angeles already can not meet federal air quality standards. Pollution is a problem for the entire city of Los Angeles since the prevailing wind tends to send Westside pollution to other parts of town. Development of Palmdale should decrease overall pollution by reducing traffic congestion both on the ground and in the air.

6. COST

According to the Master Plan the proposed LAX expansion is supposed to take care of increased traffic until 2015. Then what? Palmdale? Why not do it right the first time? Why do an expensive and shortsighted plan first? The new facility at Palmdale could be designed from the ground up for maximum safety and still save money over any existing LAX upgrade proposal.

Besides, when we hear an estimate as high as 12 billion dollars, based on virtually all previous experience, that number is just for starters. It will inevitably go up from there. How much more money will then be required to alleviate the problems caused by additional traffic jams and pollution?

Twelve billion dollars should be more than adequate to develop Palmdale and improve its ground access with money left over.

7. CONSTRUCTION

During the construction phase, even the current LAX capacity will be reduced as existing runways and terminals are razed. What kind of safety and other problems will that situation engender? Development of Palmdale obviates this concern.

8. ALTERNATIVES

The alternatives in the Master plan and the EIR and the new alternative 5 are really just variations of the same plan. A true alternative would be to accommodate increased air traffic at other airports.

SUMMARY

To summarize, the idea of further expansion of LAX is expensive, dangerous, and temporary. It makes more sense to develop the Palmdale property.

Afterthought Safety & Security

To be Safe and Secure.

I Magic Mountain

Farpetched - Number of people need to be successful ect. I imagine all the work to be safe and secure at Magic Mountain. an Airplane - Airplane I <sup>cond</sup> arrives at LAX at 10:15 AM on Nov. 2, Airplane II (2) departs at what airport when?, how many people would need to go to Magic Mountain to make that run successfully, now if you used your LAX Master Plan 2015 <sup>or</sup> ~~at~~ what's left of it would that \$ cover being safe and secure at Magic Mountain when Plane 1 (one) crosses here?

2 & 3  
here?

25 people in car one at this attraction at Magic Mountain at 10:15 on Day 3 of some promotion they have - So plane 1-15 safely fly here to there, Magic Mountain is now guaranteed at least to be 10% successful including being safe and secure because your standards (LAX) of Safety & Security were tougher than theres (Magic Mountain) which makes Magic Mountain OK providing plane 1 (one) ect get here to there ect.

Dear Congresswoman Harman,

We went to the meeting at the Furama Hotel last Saturday, but did not stay. I wish to give you our opinion about the LAX expansion plans.

When we moved into Westchester in 1956 There were four markets and four pharmacies on Sepulveda Blvd. There were three hardware stores within Westchester, and one in Inglewood just outside of Westchester.

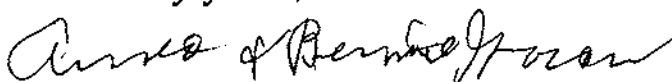

I was employed as an appliance technician and the 92d St. home of one of the first customers I called on had been recently bought by the airport. They were getting ready to move. They were very unhappy about the price they received and their treatment by the city. A junior high school and grammar school, both relatively new, also disappeared.

That was the beginning of MAJOR deterioration of our business neighborhood. The airport has had its way with expansion for too many years. In order to provide the route around the terminal from the I 405 will take more homes, businesses and part of the property where our oldest historic building, THE CENTINELA ADOBE, is located. If any improvements can be made without taking homes or businesses OK.

Enough is enough!! Get the wealthy developers and politicians off our backs. Spend the \$12,000,000.00 on improving our other airports and developing Palmdale.

We are living in the 9th decade of our lives and wish to continue with the same quality of life we've become accustomed to. Thank you for your continuing efforts in our behalf.

Sincerely yours,

Arnold & Bernice Gordon

P.S. Come celebrate our 60th anniversary with us November 9th.

LAX Master Plan, Room 218  
P.O.Box 92216  
Los Angeles, Ca 90009-2216

Re: LAX EXPANSION

Dear Mr Ritchie

We as residents of Westchester for the past 36 years are opposed to the expansion planned for LAX for the following reasons:

- 1) SAFETY from overcrowding of the air corridors. To even accommodate 78 MILLION passengers per year is too high a volume.
- 2) TRAFFIC is a nightmare for the residents now in trying to get to business; our area cannot handle any more cars .The plan to widen Sepulveda Blvd and/or Lincoln Blvd is not the answer to our traffic nightmare in Westchester. The safety of residents and school children on either boulevards should be the first concern. Overflow of traffic on the I-405 should not be directed thru Westchester via Sepulveda and Lincoln Blvds.
- 3) CARGO demands should be handled from other areas, i.e. Ontario, Palmdale and El Toro Develop these airports to take the pressure off LAX.
- 4) LOSS of the Central Business District on Sepulveda Blvd and Lincoln Blvd. This is a community of people who value home ownership. The airport expansion has taken too many homes from this area already. Look to expand in areas that have more space to accommodate the needs of the air lines. We ask that you leave our Westchester as it is now..
- 5) NOISE and AIR POLLUTION keeps increasing which destroys the family life. The residue in our bird-bath in the yard are proof of the increase in air pollution over the past years. Domestic airlines have been seen dumping fuel over Westchester. LAX is already one of the regions single largest sources of Nox emission.

At the present time there are too many large developments in the immediate area of LAX and not enough allowance for the increase of cars and people to handle these developments. The expansion of Sepulveda & Lincoln Blvds. is only a short-term quick fix approach and should not be allowed to go forward for all of the above reasons. Any future transportation projects and/or developments in Westchester should be included in

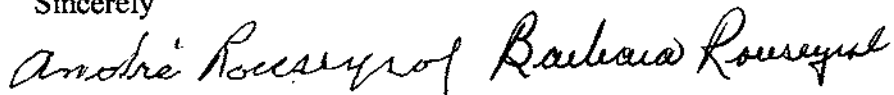

PC02986

the Westchester-Playa del Ray Community Plan which is being updated at the present time. The Community Plan is 26 years old and does not show the true effect of the most recent major changes to this area.

HOW CAN YOU EVALUATE THE TRUE EFFECT THAT WOULD OCCUR SHOULD THE EXPANSION OF LAX BE APPROVED AS PRESENTED?

Until a plan for moving traffic to LAX is presented which does not effect the life and business community surrounding Westchester let us live our lives in peace.  
The Master Plan or the many Alternatives that have been presented are not the answers.

Sincerely

Andre Rouseyrol and Barbara Rouseyrol

**Master Plan to LAX attachment.**

**I have always been confused about why common sense is called common sense as it just does not appear to be very common. I am at a loss to understand how the expansion of LAX or the increase of traffic through LAX and surrounds could make any sense to any one. The following are just a few of the obvious reasons why this whole Master Plan and any considered incremental additions are in no way advantages to the local public.**

**Most people who live close to the airport fall into the lower income bracket. The reasons for this are obvious – people with money will buy and rent in areas as far from the airport as possible.**

**If residents of the LAX area are displaced, where can they go and what can they afford to buy or rent?**

**In a time when there is a resurgence of gangs in LA probably due to poor education, dilapidated school buildings, lack of cohesiveness in the city, how can we justify subjecting youngsters in these areas to more pollution. This pollution takes many forms: poor air quality, additional noise, disregard for our fellow citizen, and the worst pollution of all - the haves vs the have-nots. Do you think we would be having this debate if the airport backed up to Brentwood or Bel Air?**

**I don't know if there is any scientific evidence, but I would guess that living in an environment filled with the above mentioned pollutions and violations of human needs must surely result in psychological despair. Again, it appears to be an overpowering of the less advantaged.**

**I would like each of you to take a moment and reflect how you would feel about your children being forced to live in an environment that is not in their best interest. What kind of message do you think that would send to them and how do you think it would affect their self-esteem and their attitude towards society? Are we trying to further polarize our city or can we adopt a policy of sanity that is in the best interest of ALL of our citizens.**

**Orange County and El Toro can and must handle their own residents' air travel needs and not expect Los Angeles to carry the whole load. It's not right, it's not fair and it certainly makes no sense, common or otherwise.**

**Sincerely,  
Anne Clark**

**MESSAGE:**

Dear Mayor Gordon,

I'm directing this fax to your office since I recall noting that you have an amicable relationship with the new Los Angeles mayor, Mr. Hahn.

I realize my next statement may seem unrealistically naive, but since I know nothing about politics, please bear with me - -

In Los Angeles County and elsewhere, there is enormous opposition to LAX expansion in any form. Since Mayor Riordan, who championed this buildout is now off pursuing other goals to bring him glory, can't the president of airport commissioners be simply handed his walking papers to put a stop to this expansion madness? In a related thought, whose mandate are our "hell-bent on LAX expansion" commissioners following without Mr. Riordan to praise and support them?

Is there a power behind the scenes that the public doesn't know about that is going to keep this expansion steamroller in motion?

Perhaps this issue can be presented to Mr. Hahn; I doubt he'd pay any attention to this Westchester fanatic who is politically ignorant.

By the way, you and Councilwoman Galanter have proven yourselves to be incredibly conscientious. In most elections, I voted Republican or Libertarian. You broke through to get me to look past the stereotype of the "bleeding heart" Democrat image. I feel betrayed by Mayor Riordan who ended up pursuing policies that bore little or no resemblance to his platform eight years ago when I helped vote him into office. Any politician who lays plans for innocent people to be harmed while keeping him/herself out of such harm's way deserves to be

If not received correctly, please call:

thrown out of office, or worse.

I thank you from the bottom of my heart, as I suspect thousands of others do too!!!! You are my heroes.

A handwritten signature in black ink, appearing to read "M. O.", written in a cursive style.

**\*\* A RESOUNDING "NO" TO THE NEW LAX EXPANSION PLAN\*\***

**\*\* A RESOUNDING "NO" TO THE WIDENING OF SEPULVEDA\*\***

The City of Los Angeles has two other key airports besides LAX - Ontario & Palmdale. These must be developed as opposed to LAX. El Toro in Orange County should also be developed instead of LAX. Expansion of LAX is a ridiculous and short term quick fix approach. It must be stopped.

Under the "NEW" LAX expansion program, the noise pollution in our community would still mean more soundproofing of homes - are our front and backyards also going to be soundproofed? Should those of us with young children keep them inside our "soundproofed" homes constantly? What about the incredible increase in air pollution and traffic into the LAX area?

YOU MUST NOT implement the "NEW" LAX expansion program. How many homes would be destroyed? How much of the Westchester Community would be torn apart? What happens when destroying Westchester isn't enough?

YOU MUST NOT widen Sepulveda Blvd. - the damage to the Westchester Central Business District would be horrific! Why do we need to widen Sepulveda Blvd.? Isn't it all a part of the master LAX expansion plan under a new heading?

I implore you - the citizens vote "NO" TO DESTROYING WESTCHESTER!!!

Subject: LAX Expansion

The purpose of this letter is to express my support for the following aspects of Mayor Hahn's new proposal for modifications at LAX including the following improvements...

- Capping LAX annual passenger capacity at 78 million or less.
- No ring road.
- No western terminal.
- Elimination of central terminal parking garages.
- Construction of a new check-in and security facility with high speed people movers to terminals.

Yours truly,

Re: LAX Master Plan

Dear Sirs,

We are writing to voice our strong opposition to the expansion plans proposed for Los Angeles International Airport (LAX) and the EIR/EIS prepared in connection therewith. Any proposed expansion or addition of runways beyond the existing airport perimeter will be seriously detrimental to all of the surrounding communities, and the additional passenger and flight traffic created thereby would adversely impact both adjacent and remote communities.

We are longtime residents of the Westchester community, adjacent to LAX. We enjoy living in an environment that still maintains a "small-town" feel despite the surroundings of a sprawling metropolis. Our two young children attend school in the community and we are active participants in local YMCA, church, park, AYSO and numerous other activities that bring our community together. Part of what makes this community so special is the large number of families and others of all ages who are willing to patronize local businesses in our revitalized business district, as well as live and play in the neighborhood without great fear for personal safety.

An increase in passenger and airline traffic at LAX, and/or the expansion, in any manner whatsoever, of LAX facilities beyond the existing airport boundaries (we do not, for example, support inclusion of any Manchester square property), would severely and detrimentally impact our community by bringing added noise, air and ground commuter traffic and pollution. Additionally, since the events of September 11, it has been suggested that expansion of LAX to accommodate more passengers, planes and cargo would only serve to increase its potential as a target for terrorist activity. Finally, but not any less significant, the expansion of LAX would destroy the ability of our community to exist peacefully next to

PC02993

Messrs. David B. Kessler and Jim Ritchie  
November 5, 2001  
Page 2

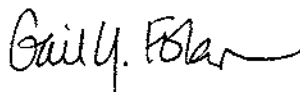

LAX. Thriving businesses would be eliminated, requiring residents to shop elsewhere (adversely impacting remaining businesses and ultimately inconveniencing the consumer); residents would become frustrated by unbearable noise and pollution levels from ground and air traffic; ground traffic transversing our community, without stopping to patronize any businesses and in great haste to make airline connections would raise great safety concerns for pedestrian traffic and neighborhood tranquility; and the increase in transient and/or temporary visitors does little to enhance the feeling of security and safety that comes with knowing your neighbors.

All of the above would necessarily result in the destruction of life as we know it today in Westchester (and all of the other communities surrounding LAX). The skies above Los Angeles are already too crowded and pose known safety hazards. Efforts are being undertaken to preserve and improve upon neighborhoods and quality of life throughout Los Angeles. The health, safety and welfare of Westchester residents is of paramount importance, and, fortunately, there is a viable alternative to the expansion of LAX.

We support the efforts of those groups that have promoted a "regional" approach to airport expansion. It is time to stop wasting time and money on LAX expansion and instead refocus the issue to quickly and efficiently developing regional alternatives. In light of the September 11 events, this approach also gives the added benefit of decreasing the visibility of LAX as a possible terrorist target. While we agree, conceptually, that some safety issues with the LAX facility need to be addressed, it should be within the strict confines of maintaining or reducing current passenger, airline and cargo capacity, and be accomplished without any further destruction of homes or businesses.

Thank you for your thoughtful consideration of these important matters.

Sincerely,

Gail Y. Folan

November 5, 2001

Dear Mr. Ritchie:

Transportation California, a non-profit coalition dedicated to highway improvement and safety, wishes to go on record in support of continuing the LAX Master Plan process. Both LAX and ground transportation access to the airport must be improved to avoid gridlock and inconvenience for LAX travelers and the surrounding communities.

In light of the events of September 11, the Master Plan must be looked at from a new perspective, while keeping in sight the realities that have not changed. The people of Southern California and the state's economy depend on LAX and will not be well served if the airport and its access infrastructure remain inadequate and inefficient.

Certainly, security and safety must now take center stage with regard to LAX, but the problem of traffic congestion must also remain a central concern. The likelihood is that passenger and freight levels at LAX will "normalize" within a matter of years, if not months. This will happen whether or not the airport is improved.

Before September 11, the recommended LAX Master Plan called for significant ground transportation improvements, including a ring road, a 405 Expressway and bringing the Green Line directly into the airport. Obviously, some of these elements will change as the plan is reconfigured, but it would be unfortunate if the emphasis on upgrading ground access is lost in the process.

The 405 is one of the most congested highways in California. While LAX is by no means a principal culprit in creating this congestion, there is no question that more efficient access to LAX from the 405 would ease the burden on this freeway. Likewise, the 106 and surface streets around LAX will all flow more freely if the LAX Master Plan includes major commitments to ground transportation.

We look forward to commenting on the revised LAX Master Plan as it evolves.

Sincerely,

*Lawrence W. Fisher*  
Lawrence W. Fisher  
Executive Director

Congresswoman Jane Harmon  
811 North Catalina Avenue  
Suite 1302  
Redondo Beach, CA 90277

6722 W 87<sup>th</sup> ST  
Los Angeles, California  
90045

Subject: Los Angeles International Airport Expansion

My simple response to this is **NO**.

I do not want increased traffic on the freeways and on the surface streets as surely this will happen. The plan (cost) to improve traffic will not be born by the airport but will fall upon the tax payers. Traffic improvement will not not happen in a timely fashion or at all. The taxpayers will be required to foot the bill for building roads to ease the traffic congestion, not the Airline Industry. Congestion and gridlock will definitely be the order of the day.

I find it difficult to enter Emerson Ave from my street 6722 W. 87 Th. St. now because of all the traffic trying to by-pass Sepulveda during the morning commute. I believe that the future plan is to open up Emerson Ave. to the Westchester Parkway, this will be an utter disaster as we will not be able to leave our homes due to the traffic jams on this street.

We will be inundated with more pollution from both Aircraft, Aircraft support vehicles and surface vehicles trying to get to the Airport.

I do not want to have an Arbor Vitae off ramp at the 405 freeway as it will just clog up the already congested streets.

Extending the Green Line into Westchester will do nothing to alleviate traffic but will in turn bring more crime into our neighborhood.

LAX has gobbled up enough land already, they do not need to expand. Since most of the LAX passengers are not from LA but are coming from Orange county and Antelope Valley. It is time for other counties to take their share of the traffic. Stop dumping on us.

Over the years we have seen friends loose their homes to this expansionist regime called Los Angeles International Airport. I notice that one of the plans of expansion is to destroy what little we have left of downtown Westchester plus the elimination of many, many homes. We recently got a new grocery store, drug store and many eateries that LAX wants to destroy by expanding this airport.

Additionally I can visualize increased noise pollution to anyone outside of a building.

November 1, 2001

Mr. James K. Hahn, Mayor  
City Hall  
200 N. Spring Street, Rm. 300  
Los Angeles, CA 90012

Re: Los Angeles International Airport Master Plan Draft Environmental Impact Statement (EIS) /  
Environmental Impact Report (EIR)

Dear Mr. Hahn:

I am requesting that the Federal Aviation Administration (FAA), Los Angeles World Airports (LAWA), and Southern California Association of Governments (SCAG) terminate the expansion of LAX. I oppose the LAX expansion alternatives A, B, and C.

Also, I am requesting that the "No Action/ No Project Alternative" for LAX Master Plan not be approved. The "No Action/ No Project Alternative" is a fraud because it includes the increase of passengers from 40 million to 78 million. LAX was intended to handle 40 million passengers.

I am requesting that the "Ring Road", "Arbor Vitae Interchange", and the "Airport Boulevard Connector Road" which are development plans for the LAX expansion be terminated. The development of the "Ring Road", "Arbor Vitae Interchange", and the "Airport Boulevard Connector Road" will not solve nor adequately mitigate any of the issues that the LAX draft EIS/EIR proposes. The development of the "Ring Road", "Arbor Vitae Interchange", and the "Airport Boulevard Connector Road" will destroy the residential communities of Westport Heights, Westchester, and Inglewood.

I am requesting that a "Regional Solution" be developed for airline passengers and airline cargo. Centralizing all the passengers and cargo from Los Angeles County, Orange County, San Bernardino County and San Diego County into LAX is ludicrous. Centralization of all the passengers and cargo into LAX is not feasible. The LAX draft EIS/EIR does not mitigate nor address the issues adequately. Now is the time that each region should develop and accept responsibility for airplane passengers and airplane cargo. There are eleven (11) airports in Southern California that should be developed as international airports to handle at least 40 million passengers and one million tons of cargo per airport.

My requests are based upon the Los Angeles International Airport Master Plan Draft Environmental Impact Statement (EIS) / Environmental Impact Report (EIR).

The LAX draft EIS/EIR does not adequately address nor mitigate the following issues:

1. The EIR does not adequately address nor mitigate traffic congestion. Traffic congestion on the 405 Fwy., 105 Fwy., 10 Fwy. and the 101 Fwy. have not and can not be mitigated. The freeways have become parking lots due to the excess LAX passengers and the cargo. For example, the EIR states that traffic congestion on the 405 Fwy exists between 7 a.m. to 9 a.m. and 3:30 p.m. to 7 p.m. These statements are false. The traffic congestion on the 405 Fwy exists from 6:30 a.m. to 11:30 a.m. and from 2:30 p.m. to 7:30 p.m. The 405 Fwy is bumper to bumper with traffic congestion all day long due to the excess 28 million passengers and the 1.4 million tons of cargo that exceed the capacity that LAX was built to handle back in 1966.

LAX was built to handle 40 million passengers and 1 million tons of cargo per year. Currently, 68 million passengers and 2.4 million tons of cargo pass through LAX per year. All the freeways are becoming parking lots for LAX traffic.

There is no way that Los Angeles can adequately address or mitigate 98 million passengers and 4.2 million tons of cargo by 2015 via the expansion of LAX.

2. The EIR does not adequately address nor mitigate health issues. The EIR does not adequately address nor mitigate the air pollution from the passenger airplanes, the cargo airplanes and the freeway traffic due to LAX. The EIR does not address nor mitigate the increase in cancer and respiratory ailments due to jet fuel and automobile and truck exhaust.

Anyone that lives within 10 miles of the LAX airport has potential legal causes of action to sue for cancer and respiratory ailments.

3. The EIR does not adequately address nor mitigate the noise pollution due to the passenger and cargo airplanes and the freeway traffic due to LAX. The EIR limited the study of noise levels to 65 db. The EIR is inadequate. The noise levels exceed the 65db levels in all of the surrounding communities: Westchester, Inglewood, El Segundo, Manhattan Beach, and Playa del Rey.

Today the noise level exceeds 65 db twenty four hours a day due to LAX excess passengers and cargo. Eight years ago the noise level dropped below 65 db after 8 p.m. to 6 a.m. due to LAX. LAX has failed to address noise pollution.

4. The EIR does not adequately address nor mitigate LAX safety of air space. The recently released FAA report indicates that LAX is the worst airport in the United States regarding near miss collisions. LAX has experienced 33 near miss collisions in the last four years. The limited airspace is dangerous. Common sense tells you that increasing the concentration of airplanes flying in and out of LAX will open the doors to civil actions against the FAA, LAWA and SCAG due the breach of their fiduciary duty to protect the passengers and the people who live in

the vicinity of LAX. Expansion of LAX will only increase the liability, damages and deaths due to the concentration and centralization of airplane passengers and cargo in such limited air space.

5. The EIR did not address the issue of risk from earthquakes at LAX. If LAWA, the FAA and SCAG proceed with the expansion of LAX to centralize and concentrate the passengers and cargo from all of Los Angeles County, Orange County, San Bernardino County and San Diego County, what will happen if there is a "Northridge" size earthquake at LAX? The LAX Master Plan for Expansion puts "all our eggs in one basket" for the entire Southern California region. This is ludicrous. This is a breach of your fiduciary duty. The "Regional Solution" to airport expansion is the only solution to diversify the risk from catastrophic disasters. Southern California's entire economy would be destroyed when LAX is hit by a "Northridge" size earthquake.

6. The EIR did not address the issue of risk from hijackers at LAX. If LAWA, the FAA and SCAG proceed with the expansion of LAX to centralize and concentrate the passengers and cargo from all of Los Angeles County, Orange County, San Bernardino County and San Diego County, what will happen if there are hijackers at LAX?

On September 11, 2001 the World Trade Towers in New York were destroyed by hijackers and over 5,100 people were killed. Again, the LAX Master Plan for Expansion puts "all our eggs in one basket" for the entire Southern California region. What if hijackers fly out of LAX (loaded with jet fuel) and crash into all the oil reserve tanks that are located in Manhattan Beach and El Segundo. LAX will be destroyed and all the people in Manhattan Beach and El Segundo will be killed. This is ludicrous. This is a breach of your fiduciary duty. The "Regional Solution" to airport expansion is the only solution to diversify the risk from catastrophic disasters.

7. The EIR did not address, incorporate nor mitigate the traffic congestion, noise, health, and safety issues that are the result of the development of the Howard Hughes project, Playa Vista project, Ballona Creek project and the Marina del Rey project(s). These four (4) developments are going to have a massive impact on the entire Westside of Los Angeles and the South Bay Areas. The LAX Master Plan for expansion and the EIS/EIR have failed to address the impact of these four developments on LAX. Again, this is ludicrous.

8. The LAX Master Plan for expansion does not address the fact that two (2) billion dollars will be wasted to demolish Westchester and Inglewood prior to the expansion of LAX. LAWA owns LAX, Palmdale and Ontario airports. Since the land in Palmdale and Ontario was purchased a long time ago why waste billions of dollars?

9. Orange County (El Toro airport, etc), San Diego County and the inland empires should be held responsible to provide airport facilities for passengers and cargo that are destined for that region.

10. I do not want SCAG's Incremental Expansion of local streets as an attempt to mitigate traffic

to expand LAX. The incremental expansion of these streets will destroy the following residential communities: Westport Heights, Westchester, Inglewood, Playa del Rey, Marina del Rey and Culver City.

I do not want Incremental Expansion of the following streets to mitigate traffic to expand LAX:

1. Arbor Vitae Interchange Project.
2. Widening of Sepulveda Blvd. From Centinela to Lincoln Blvd.
3. Widening the off ramp from the 105 Fwy. On to Sepulveda Blvd.
4. The completion of Westchester Parkway to the 405 Fwy.
5. Connecting Airport Blvd. (at 74th Street) with the 405 Fwy and widening Airport Blvd..
6. Widening of La Tijera Blvd. (Located at the Buggy Whip restaurant).
7. Widening of Aviation Blvd. from Arbor Vitae to Manhattan Beach Blvd.
8. HOV and High Speed Bus lanes from Sepulveda Blvd. To LAX.
9. Widening of the La Tijera freeway bridge for LAX expressway.

I hope you, as Mayor of Los Angeles, will fulfill your promise to stop the expansion of LAX.

The FAA, LAWA and SCAG has a fiduciary duty to address all these concerns. Try the regional airport approach. Stop the LAX expansion plan.

Sincerely,

  
Charles R. Younglove

RE: LAX DRAFT MASTER PLAN - Public Hearing

Dear Councilwoman Galanter, 6-12-01

Enclosed, please find copy of my Statement.

I participated in 3 "Workshops". Here are the results:

- 1) Pollution Control. They admit that it will be more of it. They claim that by moving West take off points they can control it. My concern is that Wind may blow it back. No Answer.
- 2) Master Plan should be comprehensive and reaching far ahead. Present proposals stop at year 2015. What happens later? They do not know. No Answer.
- 3) Environmental Justice. Fumes are blown back East and more is to come making people sick. How can scholarships and token gifts compensate major loss of health when many people do not have medical insurance? No Answer.

Common Sense does not rule.

Airlines do not listen to the Mayor.

Mayor listens to Airlines.

Sincerely yours

Andrew Stefanski

RE: LAX DRAFT MASTER PLAN

Public Hearing - June 9th 2001  
Westchester - Furama Hotel.

My name is Andrew Stefanski, Engineer & Realtor  
7296 W. 85th St. L.A. 90045

I recommend that your Plan as written be set  
aside for the following Reasons:

The Basis and Concepts are faulty, unacceptable,  
not in the best interests of people of California.  
They do not give the public full disclosures  
of Material Facts, Costs and Liabilities.

Southern California with almost 20 Million  
Population and IGO MAP projected needs at least  
3 or 4 Major Airports conveniently spaced  
throughout the Area according to a Regional  
Master Plan, which has not been presented.  
Without it, your present proposals are only short  
term, stop gap presentations, not a true Long Range  
Master Plan. Just crowd MAPs into a small, crowded LAX.  
It is bad to build a Major Airport inside a  
densely populated area, but it is even worse to keep  
expanding it.

Here are some facts concerning LAX impact on Housing.

Recently LA Times published an Article indicating  
that Airport already took thousands of homes  
and displaced some 20,000 people. This includes the  
condemnations in early 1970ies and present voluntary  
acquisitions in East Westchester.

This is not the end: Airport wants to take more.

Caltrans is proposing widening of 405 Fwy to provide  
better access to LAX (among other things). It will take  
more homes and businesses.

The whole Area East of LAX up to Harbour Fwy and  
beyond is heavily impacted and depressed by noise  
and fumes. It affects property values, discourages  
development, creates health hazards and causes  
Loss of City Taxes, while increasing County Costs  
of treating people in public hospitals at taxpayers  
costs. Many residents of these 500,000 living in  
the Area do not have medical insurance.

As time goes by some more people will request that  
their properties be taken, and they be relieved from insurance.  
Your Draft does not disclose these problems & Costs,  
They far exceed the benefits.

DISTRICT OFFICE

SEP 24 2001

CITY HALL OFFICE

SEP 25 2001

COUNCIL DISTRICT 6

Dear Ruth Galanter,

**COUNCIL DISTRICT**  
Please oppose the LAX expansion plan. Traffic in the LAX area is gridlocked during all daylight hours. One always comes to a complete stop on the 405 Freeway at LAX. This is a potentially disasterous situation. Expanding the airport and further exasperating this problem is unconscionable

The airspace around LAX is also congested and the traffic is spreading to a larger and larger area. Besides the noise and the psychological impact of low flying planes over densely populated areas, exhaust pollution rains down constantly. In the last several years the aircraft pattern has expanded to include the entire South Bay and calls to the FAA would confirm this fact. Now there is a strict denial that the take off routes have ever changed but those of us who live in this area know what they see and hear coming out of LAX. The black exhaust dust that we find each morning on our cars and children's toys comes from these planes. The Marina Del Rey is notorious for this exhaust material and now as more planes are squeezed into LAX the affected area is expanding without any enviornmental or health concern.

Please stop LAX expansion and restrict flight patterns to the corridor where flights currently land. Regional airports are in the best interest of business and people.

Sincerely,  
  
Douglas Scott

**Date:** 9/20/2001 4:04 PM  
**Subject:** Re: Invitation: A Forum on Airport and Airline Security

---

Dear Councilwoman Galanter:

First, as an LAX Advisory Boardmember representing Culver City, I want to thank you for all of the hard work you and your staff have put into making the airport in it's activities to show some concern for it's neighbors.

However, I am concerned that our response to airport security should be real and meaningful, not just "fluff" to make a now scared public believe that they are safe. For instance, no curbside check-in and private vehicle drop-off is not meaningful security. But, better scanning equipment, like the one SAIC produces which highlights in color objects by their size and shape which could be potentially dangerous should be installed at all airports. I saw this machine in a demonstration approximately two years ago at a convention on security held at our airport. In addition, arming pilots, securing the cockpit from entry, air marshalls on some flights and airport security provided by an armed federal force are meaningful in stopping this atrocity from happening again.

I hope you consider the above in your discussions tomorrow in creating real security measures for the safety of the airport and the public in general.

Unfortunately, I will not be able to attend the forum, though I appreciate the invitation.

With Kindest Regards,  
 Ted Smith III

## Ruth Galanter - LAX EXPANSION

---

**From:** <Mufarnum@aol.com>  
**To:** <ruthgalanter@council.lacity.org>  
**Date:** 9/25/2001 9:33 AM  
**Subject:** LAX EXPANSION

---

The following was sent to Mr. Jim Ritchie yesterday. Thanks for the update and a copy of Jim Hahn's letter to Ms. Kennard. Margaret Farnum

NOW IS THE TIME for all good men and women to come to the aid of their country, their cities and their airports. More than ever, we must look at a Regional Airports solution for our growing air transportation.

The devastating terrorists strikes illustrate the wisdom of not putting all our eggs in one basket. . .to borrow an old cliché. To funnel the major portion of air travel through LAX is not only foolhardy, but tempting to terrorists.

The environmental impact of an expanded LAX upon our city may now be overshadowed by the need to downsize for the safety of all of Southern California. The recent terrorists attack should be an ultimatum for the FAA to refocus upon a regional airport master plan.

---

**IMPACT OF NEW SECURITY MEASURES ON LAX EIR**

The EIR does not address any of the issues created by the new security measures and their impact on noise, traffic, pollution and whether the current terminals could handle the current passenger load. (At the time of the EIR, passengers were to be in the terminals for 1 hour (domestic) and 2 hours (international). That has now doubled. Therefore, there are twice as many people in the terminal as before.) I am sure that there are many more problem areas. Has anyone considered the economic impact of the increased security, the loss of passengers, and the loss of income from the parking in the Central Terminal Area.

I think that the current EIR should be delayed until these and all the other questionable areas of the EIR are completely answered.

Re: Los Angeles International Airport Master Plan Draft Environmental Impact Statement (EIS) /  
Environmental Impact Report (EIR)

Dear Ms. Galanter:

I am requesting that the Federal Aviation Administration (FAA), Los Angeles World Airports (LAWA), and Southern California Association of Governments (SCAG) terminate the expansion of LAX. I oppose the LAX expansion alternatives A, B, and C.

Also, I am requesting that the "No Action/ No Project Alternative" for LAX Master Plan not be approved. The "No Action/ No Project Alternative" is a fraud because it includes the increase of passengers from 40 million to 78 million. LAX was intended to handle 40 million passengers.

I am requesting that the "Ring Road", "Arbor Vitae Interchange", and the "Airport Boulevard Connector Road" which are development plans for the LAX expansion be terminated. The development of the "Ring Road", "Arbor Vitae Interchange", and the "Airport Boulevard Connector Road" will not solve nor adequately mitigate any of the issues that the LAX draft EIS/EIR proposes. The development of the "Ring Road", "Arbor Vitae Interchange", and the "Airport Boulevard Connector Road" will destroy the residential communities of Westport Heights, Westchester, and Inglewood.

I am requesting that a "Regional Solution" be developed for airline passengers and airline cargo. Centralizing all the passengers and cargo from Los Angeles County, Orange County, San Bernardino County and San Diego County into LAX is ludicrous. Centralization of all the passengers and cargo into LAX is not feasible. The LAX draft EIS/EIR does not mitigate nor address the issues adequately. Now is the time that each region should develop and accept responsibility for airplane passengers and airplane cargo. There are eleven (11) airports in Southern California that should be developed as international airports to handle at least 40 million passengers and one million tons of cargo per airport.

PC03003

My requests are based upon the Los Angeles International Airport Master Plan Draft Environmental Impact Statement (EIS) / Environmental Impact Report (EIR).

The LAX draft EIS/EIR does not adequately address nor mitigate the following issues:

1. The EIR does not adequately address nor mitigate traffic congestion. Traffic congestion on the 405 Fwy., 105 Fwy., 10 Fwy. and the 101 Fwy. have not and can not be mitigated. The freeways have become parking lots due to the excess LAX passengers and the cargo. For example, the EIR states that traffic congestion on the 405 Fwy exists between 7 a.m. to 9 a.m. and 3:30 p.m. to 7 p.m. These statements are false. The traffic congestion on the 405 Fwy exists from 6:30 a.m. to 11:30 a.m. and from 2:30 p.m. to 7:30 p.m. The 405 Fwy is bumper to bumper with traffic congestion all day long due to the excess 28 million passengers and the 1.4 million tons of cargo that exceed the capacity that LAX was built to handle back in 1966.

LAX was built to handle 40 million passengers and 1 million tons of cargo per year. Currently, 68 million passengers and 2.4 million tons of cargo pass through LAX per year. All the freeways are becoming parking lots for LAX traffic.

There is no way that Los Angeles can adequately address or mitigate 98 million passengers and 4.2 million tons of cargo by 2015 via the expansion of LAX.

2. The EIR does not adequately address nor mitigate health issues. The EIR does not adequately address nor mitigate the air pollution from the passenger airplanes, the cargo airplanes and the freeway traffic due to LAX. The EIR does not address nor mitigate the increase in cancer and respiratory ailments due to jet fuel and automobile and truck exhaust.

Anyone that lives within 10 miles of the LAX airport has potential legal causes of action to sue for cancer and respiratory ailments.

3. The EIR does not adequately address nor mitigate the noise pollution due to the passenger and cargo airplanes and the freeway traffic due to LAX. The EIR limited the study of noise levels to 65 db. The EIR is inadequate. The noise levels exceed the 65db levels in all of the surrounding communities: Westchester, Inglewood, El Segundo, Manhattan Beach, and Playa del Rey.

Today the noise level exceeds 65 db twenty four hours a day due to LAX excess passengers and cargo. Eight years ago the noise level dropped below 65 db after 8 p.m. to 6 a.m. due to LAX. LAX has failed to address noise pollution.

4. The EIR does not adequately address nor mitigate LAX safety of air space. The recently released FAA report indicates that LAX is the worst airport in the United States regarding near miss collisions. LAX has experienced 33 near miss collisions in the last four years. The limited airspace is dangerous. Common sense tells you that increasing the concentration of airplanes flying in and out of LAX will open the doors to civil actions against the FAA, LAWA and SCAG due the breach of their fiduciary duty to protect the passengers and the people who live in

the vicinity of LAX. Expansion of LAX will only increase the liability, damages and deaths due to the concentration and centralization of airplane passengers and cargo in such limited air space.

5. The EIR did not address the issue of risk from earthquakes at LAX. If LAWA, the FAA and SCAG proceed with the expansion of LAX to centralize and concentrate the passengers and cargo from all of Los Angeles County, Orange County, San Bernardino County and San Diego County, what will happen if there is a "Northridge" size earthquake at LAX? The LAX Master Plan for Expansion puts "all our eggs in one basket" for the entire Southern California region. This is ludicrous. This is a breach of your fiduciary duty. The "Regional Solution" to airport expansion is the only solution to diversify the risk from catastrophic disasters. Southern California's entire economy would be destroyed when LAX is hit by a "Northridge" size earthquake.

6. The EIR did not address the issue of risk from hijackers at LAX. If LAWA, the FAA and SCAG proceed with the expansion of LAX to centralize and concentrate the passengers and cargo from all of Los Angeles County, Orange County, San Bernardino County and San Diego County, what will happen if there are hijackers at LAX?

On September 11, 2001 the World Trade Towers in New York were destroyed by hijackers and over 5,100 people were killed. Again, the LAX Master Plan for Expansion puts "all our eggs in one basket" for the entire Southern California region. What if hijackers fly out of LAX (loaded with jet fuel) and crash into all the oil reserve tanks that are located in Manhattan Beach and El Segundo. LAX will be destroyed and all the people in Manhattan Beach and El Segundo will be killed. This is ludicrous. This is a breach of your fiduciary duty. The "Regional Solution" to airport expansion is the only solution to diversify the risk from catastrophic disasters.

7. The EIR did not address, incorporate nor mitigate the traffic congestion, noise, health, and safety issues that are the result of the development of the Howard Hughes project, Playa Vista project, Ballona Creek project and the Marina del Rey project(s). These four (4) developments are going to have a massive impact on the entire Westside of Los Angeles and the South Bay Areas. The LAX Master Plan for expansion and the EIS/EIR have failed to address the impact of these four developments on LAX. Again, this is ludicrous.

8. The LAX Master Plan for expansion does not address the fact that two (2) billion dollars will be wasted to demolish Westchester and Inglewood prior to the expansion of LAX. LAWA owns LAX, Palmdale and Ontario airports. Since the land in Palmdale and Ontario was purchased a long time ago why waste billions of dollars?

9. Orange County (El Toro airport, etc), San Diego County and the inland empires should be held responsible to provide airport facilities for passengers and cargo that are destined for that region.

10. I do not want SCAG's Incremental Expansion of local streets as an attempt to mitigate traffic

to expand LAX. The incremental expansion of these streets will destroy the following residential communities: Westport Heights, Westchester, Inglewood, Playa del Rey, Marina del Rey and Culver City.

I do not want Incremental Expansion of the following streets to mitigate traffic to expand LAX:

1. Arbor Vitae Interchange Project.
2. Widening of Sepulveda Blvd. From Centinela to Lincoln Blvd.
3. Widening the off ramp from the 105 Fwy. On to Sepulveda Blvd.
4. The completion of Westchester Parkway to the 405 Fwy.
5. Connecting Airport Blvd. (at 74th Street) with the 405 Fwy and widening Airport Blvd..
6. Widening of La Tijera Blvd. (Located at the Buggy Whip restaurant).
7. Widening of Aviation Blvd. from Arbor Vitae to Manhattan Beach Blvd.
8. HOV and High Speed Bus lanes from Sepulveda Blvd. To LAX.
9. Widening of the La Tijera freeway bridge for LAX expressway.

I hope James Hahn, Mayor of Los Angeles, will fulfill his promise to stop the expansion of LAX.

The FAA, LAWA and SCAG has a fiduciary duty to address all these concerns. Try the regional airport approach. Stop the LAX expansion plan.

Sincerely,

Charles R. Younglove

Gilbert B. Ruiz  
Senior Environmental Planner  
Southern California Association of Governments  
818 West Seventh Street, 12th Floor  
Los Angeles, CA. 90017-3435

Subject; Environmental Impact Report

References: 1) Notice of Preparation dated 9-18-00, To Interested Parties from  
Gilbert B. Ruiz, Senior Environmental Planner  
2) Daily Breeze dated Thursday, September 28, 2000  
3) Daily Breeze dated Friday, 29 September, 2000.

Gentlemen:

As a home owner and resident of Westchester, I am most concerned about the plans in progress to expand Los Angeles International Airport. The airport has already significantly degraded the quality of life in Westchester and surrounding areas. Further expansion will make living unbearable.

Safety, Noise, Air Quality and Traffic are major concerns. But it would appear that Business and Money are the driving forces behind expansion.

Who profits from expansion? The airlines? The FAA? The car rental agencies? The freight forwarders? Who pays for the expansion?

And it is very apparent that the Airport responds to the needs of the Airlines and the FAA, **not** to the people of Los Angeles and their duly elected officials.

The front page article in the Daily Breeze (Reference 2) stated that the City Council unanimously voted to request the Environmental Impact Report to include a study of today's conditions. It would appear that the Airport Commission and the Environmental Planners are going to ignore the Council's request, and plunge forward with their already conceived plan for expansion.

With respect to safety, the news media has reported on the increasing number of runway incursions at LAX. Another front page article in the Daily Breeze, (reference 3) reports on a near collision off LAX. The air traffic controllers say the incident points up flaws in the airport departure procedure. And you wish to put more planes into the traffic patterns?

Living adjacent to LAX, one can readily recognize the changing operations. The increase in number of flights and larger planes, and the shifting of the big planes with the larger and noisier engines to the north runways. Does anyone really believe that the new larger engines are quieter than the older engines? Does anyone believe that the pilots or airport administrators show any concern for noise during their run-ups, take-offs and landings?

When the news media make their daily report regarding air quality, I am sure they are not talking about Westchester. Perhaps they are talking about the air quality in Malibu, Brentwood or Palos Verdes, but not Westchester. Environmentalists have been concerned for years about the pollutants from automobiles. Only recently have I heard concerns expressed regarding diesel engines. How about the less efficient jet engines? Is any one concerned?

Have you ever sat in your home and smelled jet fuel or kerosene fumes? Do you know of any of your neighbors who are heating with fuel oil or kerosene? We have placed requirements on all gasoline filling stations to control emissions while filling your tank. But who says how many pounds of unburned jet fuel can be pumped into the air in Westchester?

We used to smell the sewage treatment plant and the refinery in El Segundo when the winds were from that direction. But they have made vast improvements in their operations.

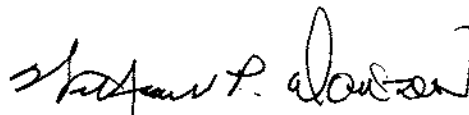

Traffic? Even LAX administrators admit that it is a mess today. Have you ever seen two Hertz busses driving side by side on the lower level? Or experienced the mini busses or car parking busses circleing the loop to maximize their fares? Why didn't the airport planners permit an off ramp from the 105 freeway onto airport property? Long range planning?

And one wonders about all the construction taking place at LAX when the plans are "still in preparation." It is hard to conceal the big equipment from the neighbors.

When did you last conduct a sound and air quality survey in Westchester? Specifically in residential areas not covered by your sound proofing project. And at what time of day did you do a survey? At 2:30 in the morning when some big jet is roaring down the runway?

With respect to your Program Environmental Impact Report, I am sure that you can come to any conclusion that the Airport Commissioners feel will be in the best interest of the Airlines, the FAA, and the for profit businesses that feed on LAX. But somewhere you have an obligation to the people to provide relevant facts **in understandable language.**

I am a concerned resident of Westchester, hoping for some recognition of the limitations of LAX and the need to seriously consider Palmdale.

The Honorable Richard Riordan  
Mayor, City of Los Angeles  
200 North Spring Street  
Los Angeles, CA 90012

FAX L13 847  
0549.  
~~13~~

Dear Mayor Riordan:

**We are concerned about the expansion of LAX.**

It is an accepted fact that childhood asthma in our neighborhoods is on the rise.

Our community, Wilmington, is severely impacted by the needs of the Port of Los Angeles to serve the Los Angeles basin and California - trucks, trains, etc.. Additionally, we are surrounded by oil refineries. As you must realize these businesses tend to pollute our environment. Also, with the Alameda Corridor extension to the Harbor Freeway we can expect more diesels exhaust and tire dust.

In the recent past, residents have begun to hear more planes and helicopters overhead. The residents of San Pedro Hill (Palos Verdes, Palos Verdes Peninsula, and Rancho Palos Verdes) successfully lobbied LAX personnel to move the flight plan from their air space into ours. FYI, Long Beach Airport is also using Wilmington's air space for their flight plans too. This noise reverberates through walls and windows disturbing the sanctity of our homes. And, our homes tend to be built with less insulation than the homes in more affluent neighborhoods.

Now, LAX is asking for an expansion. What can this mean for Wilmington? Mayor Riordan, with think it means more noise and more dirt in our sky. One more thing Wilmington is being asked to do for the benefit of the general whole.

Mayor Riordan, please allow the Regional Planning Commission to follow through with the building of an international airport in Orange County. We believe you and the powers that be are asking for trouble by trying to increase air traffic above Los Angeles. One plane into an oil refinery and Wilmington would disappear.

COUNCIL DISTRICT 6

DISTRICT OFFICE

JUN 1 2001

COUNCIL DISTRICT 6

*Meyf*

As a resident of Los Angeles I am against any LAX expansion because the plan does not compensate the local communities for losses in property values, local city services and local businesses.

First, for those living under the flight path their property values will fall further because no one wants to live under a flight path with increased pollution and noise. It will be left to the minorities and poor that don't have much of a choice.

Secondly, for the communities that are on the north side of LAX, no provision is made for the replacement or improvement of park and city services that will be displaced by the LAX expansion. Especially once it reaches Manchester Blvd and continues north as is expected if LAX is allowed to expand at all. Los Angeles is already behind on the park services that it should support. Also, the expansion plan does not compensate the residents for the loss in property values that will occur for residents that will EVENTUALLY live next to the airport and under flight paths.

Lastly, the plan does not replace or compensate the community for any of the lost businesses consumed by the expansion plan. Basically, you are condemning Westchester.

Again, I am against the LAX expansion.

Thank you

*Malcolm R. Risher*

I would like to see the people that live in the affected areas of the Antelope Valley have a chance to vote on whether or not we would like to have an International Airport or even an extension of any kind of LAX here. Of all the people I have ever talked to, not one is looking forward to having that airport here, the developers, Real Estate people & the Politicians seem to want it but don't ask ordinary citizens if they are for it. I have a feeling if the peoples voices could be heard there wouldn't be any large airport developed here.

email: byoun94@qnet.com

The expansion of an already overburden  
LAX would further harm the  
sensitive environment on the coastline.

It would create more noise for me  
since I am living 1 mile from the airport.  
We must spread the air transportation  
network out to the outlying areas where  
it will be more centralized for the

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport; Alliance for a Regional Solution to Airport Congestion

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

AS A NATIVE ANGELENO (80+ YEARS) I HAVE EXPERIENCED THE CHANGES TO THIS 'USED TO BE' GREAT CITY. I AM A LONG TIME RESIDENT OF WESTCHESTER (1947) AND I ABSOLUTELY ABHOR THE IDEA OF LAX EXPANSION. TRAFFIC AT THE PRESENT TIME IS HORENDOUS AND ADDING THIS ABOMINATION 'PLAYA VISTA' TO THE MIX IS GOING TO MAKE OUR GREAT AREA A VERY DIFFILULT PLALCE TO EXIST.

Sirs:

They'd like to know why

① The planes from LAX are flying so close to shore, instead of flying straight out over the ocean to gain altitude, before turning over our homes? Causing a possible dangerous situations

② Why so many helicopters flying so close to shore? We use to have a helicopter in the am. & 1 in the p.m. Now, we have several a day + one between 10 - 10:30 p.m.

③ Why are you sometimes using a different take off pattern that cause a constant loud roar, 5 miles away from LAX

④ Does it seem light that our waking & sleeping hours are being controlled by LAX. We now wear ear plugs at night and are still being awakened in the early mornings? Doesn't this sound like a 3rd world country where the "powers" that be, don't care about the well fair & safety of its citizens?

The original excuse for allowing more flights over homes without gaining the proper altitude was the cost of fuel to the airlines. Well,

PC03011

since then, the airlines are charging every passenger an extra fuel charge. -  
Then, we, citizens are paying higher fuel costs & no one to pass the increases to help us. - They don't see Hermosa Beach letting us drive through the park as a short cut, so we could save fuel. - They also won't let us go through the stop signals or set the signals, or go down 1 way streets. So why are the airlines allowed to take short cuts that cause disruptions to the beach city citizens?

It is never quiet anymore. When we step outside our home, the 1st thing we hear is some type of aircraft noise.

Enclosed is a list of noises from LAX & surrounding planes for Wednesday, July 18, 2001. The recorded from inside our home with the windows open. -

Mary Jane Topeka

Dear Congresswoman Harman,

Thank you for your inquiry and many friends are so concerned about the traffic congestion, exhaustion of our environment and the over crowding of our great area. We are totally against any LAX expansion. The latest LAX record of "near misses" as reported recently in the S.A. Times shows the already precarious situation at LAX.

Consider areas outside "the city" with open space which are not so near homes and buildings. Here, there would be room for development and a expansion. Travelers could ease the burden on LAX.

The developing along the already traffic burdened Lincoln Blvd. near Morning del Rey is another serious matter. The Playa Vista Project with its 13,000 homes

and 2.5 million square feet of offices  
and stores is obscene...  
\$168 million in tax-empt bonds to help  
finance the first phase of a private  
project..... which is over an old methane  
gas storage facility? Have our  
politicians projected what all this  
means? ?

Politicians see revenue for L.A.  
with LAX - But at what cost? ?

thank you,  
Patricia Marchbanks  
29507 Oceanport Rd.  
Rancho Palos Verdes  
CA 90275

P.S. It now takes my daughter 45  
minutes to get to work in Santa Monica  
which is 10 miles from her home in  
Playa del Rey.

The regional plan is the only sane solution.  
I live immediately north of the runway and am  
very dismayed at the prospect of having <sup>more</sup>  
noise and pollution. Please fight for the  
regional plan. Thank you.

*I'm living in Marina del Rey, as best as I can tell, I don't believe that the traffic & noise from an expansion will significantly affect my life. Pollution increases, though more subtle than noise & traffic, may have a more serious impact on me. However LAX is at the beach, whereas Ontario San B. & Anaheim, being in the smog belt, may be far worse for the whole inland population than it is from LAX.*

*If I understand the above statements from you, it seems that it is better economically, to have a regional system of airports versus expanding LAX. And if I'm wrong about the pollution problems being greater inland, it would appear to me to be better to build one there. Can't make up my mind. I want to also add here that a very important consideration should be which one would have a worse impact on the environment - land & air. And if they're both very bad, then we shouldn't build in either place.*

Dear Congresswoman July 23, 2001

Comments:

Office Use Only

I am outraged at even the mention of LAX much less the proposed Master Plan. The Dynda Family has already been displaced by LAX expansion - North Runway back in 1971 - and we moved to the Northeast section of Westchester where it once was quiet. Over the years as more aircraft used the facilities the noise has drastically increased and my windows and floor vibrate and now we are being gassed! Eyes gassed - by the smell of the fumes. God only knows what it is doing to our lungs. In fact, the cadets at the new police academy experience breathing difficulties during exercises. These breathing problems they don't experience at home! About soundproofing - Residents live in L.A. for the marvelous year around

climate to enjoy the outdoors - their back yards, patios, pools, etc. Are we suppose to shut our homes to an artificial environment so LAX can devour Westchester and surrounding communities? Is this anyway to live? Make the present Monster compatible if you can, and move on!

An outraged Westchester resident,  
 Marilyn A. Dynda  
 MAM

*I am a resident of Playa del Rey and live adjacent to the airport property. I already live with the noise from jets taking off, even with the recent sound proofing installed. I am concerned the runways will be even closer & jets will be flying above our condominium. I am also extremely concerned about increased traffic coming into the already overcrowded neighborhood. The freeways, and surface streets are already clogged with commuter and airport traffic. The proposed "loop" or freeway around the airport would significantly decrease access to my home. We are already having to tolerate many new, un-wanted developments (Playa Vista, Marina del Rey, Playa del Rey). I am very concerned about overcrowding in a small area which is already densely populated. I strongly support a regional plan and urge LAX to remain within its borders.*

7/23/01

SINCE I LIVE IN EL SEGUNDO, THE COMMUNITY AND ALL OF ITS RESIDENTS WOULD BE GREATLY AFFECTED BY NOT ONLY THE ADDITIONAL NOISE AND AIR POLLUTION FROM ADDITIONAL INCOMING AND OUTGOING FLIGHTS, BUT ALSO BY THE TRAFFIC TO AND FROM THE AIRPORT. THIS IS NOT AN ACCEPTABLE OPTION IN MY OPINION.

NOT SURE WHAT THE ECONOMIC IMPACT WOULD BE ON DOWNTOWN EL SEGUNDO, WITH AN EXPANDED AIRPORT, BUT DOUBT THERE WOULD BE ANY. THERE MIGHT BE A NEED FOR ADDITIONAL HOTEL SPACE (WHICH WE ALSO DO NOT NEED), CANNOT SEE WHERE ANY FIRMS WOULD REQUIRE ADDITIONAL OFFICE SPACE. BELIEVE WE ARE PRETTY WELL MAXED OUT IN OFFICE BUILDINGS AS WELL.

I Live 15 minutes from LAX and pass by it often. The population of that area is growing so tremendously that anything that can be done to de-centralize air traffic would be a blessing - auto traffic can be awful - exiting the 105 on to Southbound & Sepulveda N of Rosemead is always congested.  
Make it convenient for people to fly from areas closer to their home - Don't Expand LAX!

- ⇒ Email is key!! Because then we can communicate with them in the future by mail or e-mail.

This would greatly affect me.

I am on a fixed income. If I move I can't afford the cost. It would be a severe burden to me also if I stay the Trobe would be much harder for me at my age of 72. ~~It is hard.~~

June 19 - 2001

Dear Jane

I got your letter about proposed master plan for L.A. LAX Master plan.

I have lived in westchester close to the airport since 1950. I've seen the airport expand over the years. They have taken many homes out all around the airport.

The airport has much land on all side of it that they already own.

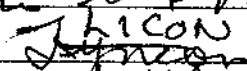

I think what is wrong with this airport is that it has a bottle neck at the entrance to the airport. It does not make sense to me to build more roads into a bottle neck.

A better way would be to create new entrances into the airport on the already existing land that the airport already has acquired.

I think they could do this with out new roads into the airport if they used people money something like Las Vegas has. They could even be under ground. They have properties on all sides that could be used.

The best location would be the east south side which is near the already existing freeway 405 & 105 which would eliminate local traffic.

If they need a north entry there is airport property extending to the sea, and road coming from the north

could be ~~added~~ used.  NP003023

What about landing airplanes on  
platforms along Calif coast and using  
helicopters to move on to the inland  
there could be heliports built along  
the coast on the Ocl coast like  
I've seen on TV. in some other countries

also another subject why not use the  
ocean for a source of energy and water.  
Hydrogen Hydrogen energy & fresh water  
wouldn't that be great.

Martha Adams  
7776 Isis ave  
N.A. Pa 90045

310-649-6092

Congresswoman Jane Harman,

Thank you for opposing the LAX Master Plan and supporting a regional plan for air transportation. We in the South Bay would be greatly affected by the increased traffic, noise and pollution from expansion of LAX.

Venice, CA 90291

Dear Congresswoman Jane Harman,  
I and my husband and two  
grown sons live a few blocks south  
of the Santa Monica Airport.  
The noise and pollution from  
the jets and small planes is  
incredible. The small trainer  
planes sputter and rattle as  
they circle over our house to  
land and take off again for  
trainer exercises.

Now I can see and hear jets  
taking off from LAX that turn  
as soon as possible and fly  
by on the south side of the  
house. The south-west side  
of LAX has become extremely  
noisy because so many planes  
are taking off, especially in the  
evening.

PC03025

(2)

Every jet that comes down the west-coast comes in over Venice and Ocean-Park, many right by and over my house, to land at LAX.

Then at night all the jets come from Inglewood directly over my house to land on the sand dunes. The jets let down the flaps under the wings of the airplane to help slow the airplane down because their brakes are not adequate to stop the plane. The lowered flaps cause a screeching sound as the plane goes over.

LAX Master Plan is going to put the noise to the West. Seems to me that an awful lot of noise and pollution has already been put to the w

When I tried to ask the airport representative at the track in in Westchester a few weeks ago about this she walked off and didn't answer me.

I appreciate your working for regional airports and thank you very much for your efforts on our behalf.

Sincerely,  
Cora Nell Abraham

**WHAT DO YOU THINK?**

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

The LAX Master Plan would have a significantly negative effect on me, my family and my neighborhood.

Please see the following pages.

Re: LAX Master Plan  
Page 2

Bonnie Allen  
8437 Iruxton Avenue  
Los Angeles, CA 90045

The LAX Master Plan would have a significantly NEGATIVE effect on me, my family, and my neighborhood.

My family moved into Westchester in 1947, and over the years we have seen LAX reduce our neighborhood's well-being, quality of life and property values by increasing noise, traffic, and pollution. We have witnessed LAX "do as they please" by gobbling up entire sections of neighborhoods despite extraordinary protests spanning years just so LAX can increase their revenue from income from the car rental companies and airport parking lots that now occupy this land. Homes north of the airport and west of downtown Westchester have been taken as well, apparently as part of LAX's long-term expansion plans. Now, LAX wants part of Inglewood and downtown Westchester, including the historic Paradise Building (the former location of the unique Paradise Theater with Oscar movie memorabilia stored in vaults in the floor and walls) and the Westchester Branch Library (where countless local children and adults have utilized its resources for decades). So, LAX wants a little more land to "modernize" LAX, telling us how good this will be for the surrounding neighborhoods. Do they think we are idiots? We've seen this all before. The only one who profits from the LAX Master Plan is LAX.

Let me tell you about our considerate LAX neighbor to our south. We have witnessed a "lost" jet plane preparing to land several miles to the north of the airport into our residential neighborhood -- right over our house. This jet flew over our house, just barely missing our tree in the front yard and just clearing the telephone poles in the back yard. Ask me about the lack of concern, explanation and response from LAX, the airline, and the FAA about this near disaster. Perhaps we would have received a more appropriate response had we contacted the news media, our local representatives and an attorney (for compensation for the damage to our house, and the severe ear pain and subsequent hearing losses we suffered as a result of this incident. Tell me and my family that LAX "cares" about its residential neighbors. We know this is untrue.

Over the years, we have seen schools closed down due to LAX growth. Ask me about the disruption to those students' education as a result of these actions. Ask me how often my teachers in Westchester schools had to stop classroom instruction, waiting for the noise from the airport to ease up so that the students could hear what was being said. Ask me how often instruction from a class I'm taking at Westchester Park has to stop due to airport noise. Ask me about waking up most of my childhood at 2 AM when the airport's jets revved up their engines. And, ask me about the use of the "north-north" runway -- the noise from which was intolerable and kept everyone up at night. Although the airport discontinued the use of this runway years ago due to public protest, it has since been put back in use, contrary to LAX's promises all those years ago.

Re: LAX Master Plan  
Page 3

Bonnie Allen  
8437 Truxton Avenue  
Los Angeles, CA 90045

LAWA wants us to believe that the traffic around the airport will improve if the Master Plan is adopted. Who are they kidding? The traffic around the airport and along the Sepulveda corridor is the worst it has ever been. Why? The airport construction on the Sepulveda tunnel and the not yet completed nor fully utilized Howard Hughes Center have increased the traffic. The latter's impact on traffic has yet to be fully realized, and there has not been enough done to alleviate the resulting, current traffic, let alone what we'll have in the future. I'm certain that the Hughes Center's EIR claimed that their project would address the traffic and they would be able to accommodate the increase in traffic, just as LAWA claims that their Master Plan will alleviate increased traffic. Just wait until the Playa Vista project is completed and people move into those new homes and begin to shop in the area. This is not properly addressed in the Master Plan. LAWA seeks to expand LAX in order to give the appearance of decreased traffic WITHIN LAX. Better mass transit is the solution to decreasing traffic within and around LAX. LAWA wants us to think that traffic will not increase by "modernizing" LAX via increasing its size in order to handle more flights. But, expanding LAX to handle more flights means more people, more traffic, more noise, and more pollution -- all to the detriment of LAX's residential and business neighbors.

The incidence of asthma and allergy problems in my family are aggravated by the airport. I recall asking my parents when I was quite young what was that odd, stinking smell in the air. It was kerosene from the airplanes -- a noxious odor coming from the airport. I recently painted the trim and doors white on our back patio and shed. Not long afterward, I was dismayed to see grayish-black spots all over the white surfaces. It was soot (AKA pollution) from the ever-expanding airport that covered the paint. In addition, whenever I dust my house, a few hours later, the dust is back again! These are indications of the airport's special, smelly, dirty gift to us: pollution. This is what I and my family breathe into our lungs day in and day out. How does LAWA measure the impact of pollution on the health of my family? Where does increased flights and increased traffic equate to less pollution in their Master Plan? Let's all use some common sense!

LAX is used to getting what they want. In spite of solid opposition and rulings that have gone against them, LAWA representatives have defiantly pronounced that their Master Plan will go into effect. They assume that their opposition will just dissovve away over time. But, we have seen the way they operate, and we will fight for our quality of life. Expanding LAX means greater profit for LAWA, but the resulting increase in noise, traffic and pollution is not good for our neighborhood. Tiny "Mines Field" was never designed to become the international airport the LAWA envisions for the future. A regional approach for airline traffic is the only rational approach. A super-giant LAX handling the bulk of Southern California's air traffic is

--- Continued on page 4 ---

PC03026

Re: LAX Master Plan  
Page 4

Bonnie Allen  
8437 Truxton Avenue  
Los Angeles, CA 90045

illogical. People from Orange County, Palmdale, and Ontario/San Bernardino should not have to drive hours to fly out of LAX when they have airports in their own back yards that should accommodate them. Expecting LAX to handle the bulk of air traffic in the future is inefficient, and increases traffic and pollution throughout Southern California. The Palmdale airport is surrounded with vacant land and can be easily expanded without adverse impact to the surrounding neighborhood. The former Norton Air Force Base could also be utilized, improving the economy in the area. Ontario could also be better utilized, and flights in and out of Ontario would increase if the ticket prices were more fair and competitive. The El Toro airport should be utilized for residents in the areas around Orange County.

What is the rationale for overburdening LAX and the neighboring region? The only reason is more profit for LANA. The benefits and burdens of aviation travel for all of Southern California MUST be FAIRLY DISTRIBUTED THROUGHOUT Southern California. Do not allow LAX to swallow up more of Westchester and Inglewood, destroying our neighborhood and the quality of our lives.

Thank you from myself and my family.

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

*A recent report in the LA Times discusses safety issues at LAX. Clearly these issues need to be addressed. Beyond that however, LAX should not be expanded because it is within a large population. We can certainly utilize regional airports, and we should seriously consider building an airport in Palmdale.*

7-14-2001

I have been a home owner in Playa del Rey 15 years and live 1 mile from the airport. The jets take off over the water near my house. I am an LANA employee.

- ① I don't like the noise. Its the worst problem in my area.
- ② A fine black dust like ashes falls on my property an I suspect it is jet exhaust. Does it hurt my children? Two young toddlers
- ③ Im concerned about the 1,302 % increase in smog expected with expansion at LAX.

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

Dear Ms. Harman,

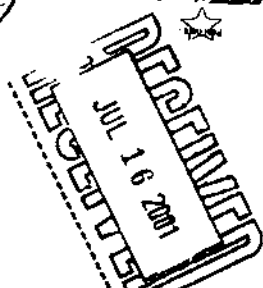

Our family has resided in Westchester for the past 7 years. Over the years, we have witnessed a number of changes to our community. Most of the development that Westchester has undergone has served to improve our access to shopping and entertainment. However, with development come increased traffic, congestion and pollution. Expansion of LAX is no different. Those of us who live adjacent to the airport are subjected to a daily diet of noise, exhaust, and inconvenience as we struggle to drive our children to school or make our way to work. There are better, more equitable alternatives to expansion of LAX. Given the statistics you site in your newsletter, we urge you to support the development of our regional airports and not the expansion of LAX.

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.

We are already affected by increased traffic, noise on the ground and overhead and pollution. Adding 29,000 more people in Playa Vista is insane. Every available spot in Del Rey, Marina del Rey and Playa del Rey is being filled with new housing construction. Please move all non-passenger traffic to a new place; e.g., Palmdale. Restrict small planes from coming to LAX at least during certain hours. LAX leads the country in on ground misses of hitting other aircraft. This should tell us something. Columbus, Ohio operates one airport for passengers and another in a different location for other traffic and it is extremely successful. See L.A. Times article done earlier this year. Why are more planes flying over my house (Culver Blvd. and McConnell by 90 Freeway)? Thank you.

To our congresswoman Jane Harman:  
 I am totally against the airport expansion and the expressway interchange. We live on Airport Blvd and have enough traffic and pollution now. I am in favor of upgrading what we have now, and build up the regional airports, as there are many. The population is expanding outward, so why funnel it all into LAX. Several vacant airbases could be used for cargo and passengers.  
 We have enough traffic, noise, and air pollution now let some one else share it. Westchester would be devastated if the Airbunker expressway and airport expansion were to occur. Kate 720

Thank you for encouraging constituents to express their thinking re. LAX expansion. We believe that traffic at LAX (plane and car) needs to be alleviated by planning for regional expansion at Pt. Mugu, Palmdale and the Ontario area. If runways at LAX need to be reconfigured for air traffic safety, then that should be done, but LAX does not have to solve all the expansion problems for all of southern Calif. The green line should be completed. We do not believe El Toro should become a commercial airport. Let that become a huge open space recreational/park area.

Dear Congresswoman Harman:

Thank you for soliciting comments on the airport expansion from its neighbors. Much appreciated.

When I bought my home in 1984, I thought the airport noise at my distance (in Westport Heights) was bearable and not a problem. Although occasionally air currents and/or storms at sea have caused me to hear considerably more noise, it has not been a major problem until recently, when I have heard more and more air traffic.

Already the air pollution in Westchester is bad, with residents finding black gunk on patio furniture and windows, and I personally experience the occasional smell of jet fuel, which can't be healthy. I know city dwellers are exposed to all manner of air pollution anyway, but I don't think we need to expose our families and ourselves to the chemicals emanating from additional airplanes coming into LAX. We have enough air pollution, thank you.

I am very concerned for property values, which have been going up in the past few years as people discover our lovely Westchester neighborhoods. Why do we have to ruin them? Thank you for helping to stop the onslaught of 20 million more passengers + freight per year.

I am opposed to the expansion of LAX in favor of expanding the other regional airports instead. Not only would this protect the residents of the South Bay from additional noise pollution due to increased flyovers, and from additional traffic headaches, but it would be of great benefit to the residents of inland and valley residents to have convenient access to air travel. Ms. Harman, please continue your fight on our behalf.

Noise makes resting or sleeping difficult - nerves can become frayed -  
Traffic congestion would increase accident rate, may add to road rage, add to commute time for people going to & from work; getting into & out of the airport -  
Pollution makes for health problems; in some cases difficulty in breathing -

Get started on the direct route thru the mountains to Palmdale where massive amounts of land have been accumulated for an airport. Present routes are indirect & too long.

How long do your other lawmakers want to wait to ban use of hand held phones in moving cars/trucks? People are needlessly killed because many people can't drive with 2 hands on the wheel and with out phone distraction much less using a phone while driving with one hand.

Honorable Jane Harman

I've often wondered why it was not possible to extend the LAX runways into the sea area where there's a lot of space. Many airports, like the one in Hong Kong, are built over water. Perhaps, it's not feasible in LA.

The presence of LAX near the 405 freeway result in a horrendous traffic on the freeway. I would like to see regional air ports expanded.

*From Andrea Valcourt (ANDREA VALCOURT)*

*This expansion will add noise pollution to our area. I live in Hermosa & already hear fly overs, especially after 10 PM, when the house is quiet.*

*It will also add to our traffic problems. I use LAX often & what should be a 15 minute can take 45 minutes, adding extra stress to my life as I hope I'll make my flight.*

*It will also impact traffic in the general vicinity - make shopping and dining even more inconvenient. I avoid this area (between Rosecrans & the airport) most days after 3 PM.*

*I hear added pollution from those planes flying over my house. Check airport employee cars for the ill effect. My dad lived close to Burlington airport - not much paint left after a few years. I support the regional airport approach should also lower fares there every where.*

## FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

DEAR HONORABLE CONGRESSWOMAN JANE HARMAN,

BEING A RESIDENCE OF HERMOSA BEACH, CA, I AM DEFINITELY AFFECTED BY LAX IN BOTH NOISE AND POLLUTION. IT SEEMS THAT DURING THE DAY "MOST" OF THE FLIGHTS ABIDE BY THE 5000 FT FLY-OVER RULE. AT NIGHT, FORGET IT. SOME INTERNATIONAL FLIGHTS, AS WELL AS DOMESTIC CARRIERS FLY OVER SO LOW THAT I CAN READ THE LOGO ON THEIR TAIL WING VERY CLEARLY, NOT TO MENTION HAVING MY EARS BLASTED BY THE NOISE. THE POLLUTION THAT SETTLES ON OUR HOUSE HAS TO BE WASHED OFF OUR DECKS ONCE A WEEK. ITS FILTHY. I HAVE KEPT PALE WITH THE ISSUE OF LAX EXPANSION. I DON'T SEE HOW IT IS POSSIBLE, CONSIDERING THAT ONLY BAD CAN COME FROM IT. SINCERELY,

Enough is enough in the LAX area, between the traffic and the noise and the uptightness of the public, we don't need any more distractions in our lives. Please if you do care, ~~then~~ use all your resources to stop any expansion of LAX.

And just another thought the Playa Del Rey area is a safe and extremely fragile animal refuge. not to say a fly away for our endangered birds that share our planet with us.

I am a resident of Westchester. The proposed LAX expansion is definitely ~~is definitely~~ going to have an effect on my health. I am a congested heart failure patient and as it is, the pollution that is created by emission of air planes fuel, has an adverse effect on my breathing, creating loss of breath. I have lived in this house for the last 15 yrs. Last year I put my house in the market for sale, with the intention of moving out for health reasons. The prospective buyers were concerned about the noise the airplanes make presently, and made no offer. You could imagine, what I will have to face with the planned expansion—more noise, more traffic and more pollution. Without getting another chance to sell my house, I will be stuck here with more loss of breath. It is nothing but right, for other communities in other areas to bare the burden of aviation traffic that force it LAX altogether.

*How easy it is to tell others what to do. You try to legislate this every day. The issue with air transportation isn't black or white. You can not legislate where people fly to or from.*

*LAX is operating near capacity - larger, quieter airplanes will help people use LAX because of frequency / not easy of access.*

*People do not use satellite airports because of lack of frequency.*

*The airlines are dictated to by passenger demand.*

*Spending money to modernize Ontario, Palmdale doesn't get the two together.*

*What is needed is better use & publicity for the transport systems - Metro, Metro rail, freeways, & incentives for passengers & airlines to cooperate.*

*Negatives don't do it. Nor does legislation. There is a lot of positive effort & coordination needs the cooperation of city, county, airline,*

*John Tinsley* *government & other resources to develop plans that will be acceptable to all parties - This has not been done. You are the responsible vehicle.*

*I am a retiree of, and still reside in Redondo Beach, CA. I am very much opposed to the expansion of LAX. The main concerns are the noise of the planes as they fly over my home, the sheer number of such flights and the traffic. It seems to me that we should utilize the numerous bases that are closed but have some runways etc that could be expanded.*

Observations over 25 year residency in Venice Beach.

Traffic-

One has to avoid Lincoln Blvd., if on it- one has to calculate any Left turn like a chess game. If on foot, crossing at light OR cross walk is dangerous.

I patronize Lincoln West side merchants without driving on Lincoln. Only patronize merchants on East side of Blvd. if coming from Eastside; use alleys only, not Lincoln.

Noise-

The noise while on 405 or Sepulveda/Rt 1 is horrendous.

Pollution-

Since LAX expansion we have a fine white dust daily on everything inside & out.

Santa Monica Airport is overgrown and until about 2 years ago treated complaint with arrogance; then they got a PR campaign going.

BUT WE NEED STATE AND FEDERAL LAWS RE: LOW LEVEL CRAFT/NOISE/CAPACITY.  
GO REGIONAL AND LEAVE LAX ALONE & DECREASE ITS USE.

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

Why not expand the use of Long Beach Airport which is as close as LAX and easier to get to.

*I feel that all homes in impacted area should be retrofitted at LAX expense. At present, any homeowner in the Airport suit of '68 are excluded unless they repay LAX. This is a separate issue - and especially if the plan goes through to expand LAX, homes need to be retrofitted. Inverse condemnation does not equal noise! If there is money to pay for those pillars of light etc, there is money to make life tolerable under the planes! Further info should be sought - the attorneys received one half of the settlement money, yet home-owner is being held responsible for total amount!*

*MY FAMILY IS OPPOSED TO ANY EXPANSION OF LAX AIRPORT, WHICH IF PERMITTED FOR THE SPACE OF THE AIRLINES GROW, WOULD ONLY DETERIORATE OUR ENVIRONMENT. WE HAVE MORE THAN ENOUGH PROBLEMS TO COPE WITH - CROWDED SREED FREEWAYS, HIGH HOUSING COSTS, MORE SMOG & DUST. WHICH WOULD ONLY BE AGGRAVATED BY MORE AIRLINES, HIGHER ENERGY COSTS (GAS, ELECTRICITY & WATER) TO ACCOMMODATE THE PROPOSED EXPANSION, & INCREASED NOISE LEVELS IN SURROUNDING COMMUNITIES. UNDERSTAND THE TORRANCE AIRPORT IS ALSO PROPOSING AN EXPANSION OF THEIR FACILITIES WHICH HAS BEEN BITTERLY OPPOSED BY RITE PV TORRANCE, ETC. RESIDENTS IN THE PAST WE KNOW TOO WELL WITH THE OIL REFINERIES CAN DO TO OUR HEALTH.*

I am in total agreement with your position supporting a regional airport. As a resident of Playa del Rey for 42 years I have seen the Vista del Mar area bordering the western edge of the airport change from a charming residential community to an ugly trash infested crime ridden barbed wire enclosed wasteland.

During commuter hours Culver Blvd. is choked with cars taking up to 15 minutes to get through the village to Lincoln Blvd. ( a distance of a mile) to avoid even worse airport congestion. Expanding LAX can only make matters worse.

Mary G. Koch

*Rather than expand LAX or create an El Toro Airport I think we should further develop & expand other existing regional airports such as Long Beach, Ontario, Palmdale, etc. We think that the increased in flights would increase the congestion in the vicinity of LAX far beyond anything reasonable. In addition, the more flights will create more air + noise pollution. All of this degrades our environment. Other areas would probably benefit economically from expanded activity at their airports. We think the LAX area is already saturated with development.*

*I think the burden of aviation should be shared by distributing the benefits and burdens with other areas. Calmdale and Ontario are the likely spots. The congestion is great enough now - too much to even drive to Westchester. My friends living in Inglewood have planes coming in directly and their house and the noise is awful. They haven't been able to grow tomatoes for years now due to pollution. My daughter teaches piano in her home in El Segundo and the noise is awful now without adding more to it. L.A.X. should not be expanded. The congestion now is at its peak as is the pollution and noise. The planes now don't go out over the ocean, many cut across town and over the refinery. Calmdale + Ontario would help our traffic and clear for people to fly out from their area. No expansion at L.A.X. Taking off is unsafe now.*

*Because of previous commitments we were unable to attend the June 9 hearing on LAX expansion. We are unalterably opposed to further LAX expansion until other areas, including Orange County assume their fair share.*

*We live in Westchester and our area has done its share. We do not need more traffic, noise and pollution, and the loss of our identity. We would lose a good part of our business section and more homes under the LAX Master Plan.*

*Thank you for your opposition to this airport expansion plan.*

*I feel that there are many other places in the LA area (LA and surrounding counties) that an additional airport could be built. Those outlying communities need an airport closer so that they wouldn't have to drive and add to the pollution + traffic. Such areas as Lancaster and Justin (or Joro) are prime places for additional airports. An expansion of LAX would affect traffic through my area, more noise if more aircraft coming in, and generally more congestion. It is not the best plan... and I oppose it!*

The politicians in favor of LAX expansion do so for only one reason: greed. They are in business with big businesses. LAX is shortsighted and terminal. The traffic on the 405 is already unbearable with speeds averaging 15 mph most days! We live in Westchester, and our lawn furniture is filthy from the pollution. The least amount of flights (additional) per day would be an extra 2000 or 100 per hour. People have to drive from an 80 mile radius for international and more domestic flight choices! Give the outlying airports the convenience their residents deserve. Don't overtax LAX anymore. Nobody wins. Don't let the airlines + businesses who stand to profit run this show. None of your constituents wants this. To have ugly cargo areas replace the small businesses and last open spaces of Westchester would be disgrace.

Dear Congresswoman Harman:

It was with the greatest delight that I received this mailing from you, stating your views on So. California airport development, and especially those concerning LAX. The ordinary people (and voters) of the South Bay and west side areas are given a little hope that someone, somewhere in government is listening to us rather than just to the big money NIMBYS of Orange County and the downtown L.A. special interest groups. Many people in our area feel that the die is already cast on a bigger LAX which may explain the lack of voter response at the city and county levels on this issue.

Please keep up the good fight for us. And PLEASE don't let those fine former military runways in Riverside and Orange counties go to waste. Thank You,

June 17, 2001

Dear Congresswoman Harman:

To follow up on the short note I placed on your response form:

No one wants to live next to an air port or under its flight path. Nor do they want a 2 hour drive on a congested freeway to an overcrowded terminal for a delayed 55 minute flight. So something has to give. As with the energy problems the basic issue is an ever expanding population. Just as we cannot simply conserve our way out of the energy problem, we cannot force all of air transportation "eggs" into one overcrowded basket. There must be a many faceted solution to both of these problems.

Sooner or later the political leaders at all levels of government for Southern California are going to have to stand up and tell the NIMBYS and their more rabid environmental allies: Hey look around, what about this growth that is a burden for ALL of us. Why should you have your own little utopia at the expense of other segments of the population? We must expand in all areas or strangle and die on an outdated and overcrowded infrastructure.

Already those of us living on the boundries of LAX feel the rise in traffic not only the numbers flights but the car and most especially the truck (for mail and airfreight) congestion on our streets. Just look at the Sepulveda Blvd. off ramps for the 105 freeway, or the intresection of Aviation and Imperial Hwy. on any afternoon. So we cannot even begin to think about what an expanded LAX would bring to us.

The wonderful L.A. city transit planners along with the Dept. of Airport planner's spent hundreds of Millions on transit, yet there is no DIRECT rapid transit (Non Bus) route from the LAX passenger terminal to downtown L.A. or any other major business area. Their only answer for an expanded LAX, is more car, bus, and truck traffic on improved (read even larger) streets.

Ontario Airport, the former Norton and March Air Force bases, are on existing rail lines. The population growth is there, let them expand. Or at the very least, shift the airfreight and mail traffic there. And of course Orange County should share in the passenger traffic growth. (After a guy wrote to a local paper the idea of an Orange County surtax for LAX usage became very popular with us.) El Toro is on a passenger rail line, you can get from

PC03077

[2]  
there to L.A. Union Station faster than from our  
unexpanded LAX.

As for the economic impact the demise of the aerospace industry in the Southbay, and NAFTA, have caused a real decline in middle and upper class employment. All business in our area has felt this decline and have cut back to match it. You can look at the parking lots of the remaining plants or the empty sites of the former ones and see the real economic story. I don't think that anyone believes that the congestion brought on by an expanded LAX coupled with an uncertain energy future will bring an economic upturn to the southbay.

Thnak You, and your staff, for giving me a chance to express my views on this issue.

Sincerely,

*Jack W. Corrick*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport, Denver International Airport, Alliance for a Regional Solution to Airport Congestion

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*I feel that an expansion of LAX would have a great impact on the South Bay area where I live. When I visited London, England, I took a train to center of London. It took about an hour, was inexpensive, what about an airport in Palmdale? Inexpensive, fast train to various areas in L.A. We don't want or need more traffic, air pollution, airplane noise over our beaches.*

June 14, 2001

Dear Jane Harman,  
I know in my heart that the LAX Master Plan will cause the same stress, pollution, congestion, noise and dangers to my community as my friend in Manhattan Beach is currently suffering on a daily basis. She wears ear plugs to bed and her complaints to the powers that be are side-stepped on a routine basis. Her home is abnormally dusty and the low flying aircraft range from the supersonic to helicopters and two engine machines toting advertising banners. She has no peace. If you lay on Manhattan Beach with your ear to the sand you can detect a loud rumble in the ground. I did so last summer. It is the sound of the mammoth cargo planes warming up and awaiting take-off. It is a chilling experience.

Dear Jane,

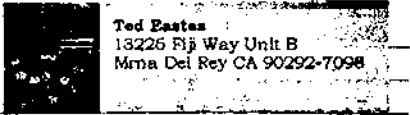

I would not be effected nearly as badly if the train had direct access to the terminals and our surrounding roads were not clogged with shuttle buses, vans, taxis, and other ~~car~~ cars dropping off and picking up passengers, who could otherwise <sup>conveniently</sup> use public transportation to and from LAX terminals. Do the right thing!

Please do not enlarge LAX or its capacity,  
Please increase utilization of other airports:

Burbank, Ontario, John Wayne.

I live in a quiet beach community  
about 6 miles from LAX. Our density,  
traffic + pollution is problematic enough  
without aggravating these problems by enlarging LAX!

Thank you.

IN MY VIEW, THERE ARE FEW "FACTS" PRESENTED ABOVE... TO WIT:

- (1) GOVERNMENT STUDIES (E.G., FOR COMMUTER RAIL SYSTEMS) ALWAYS (a) OVER-STATE THE BENEFITS AND (b) LOW-BALL THE COST ESTIMATES;
- (2) YOUR POPULATION GROWTH ESTIMATES ARE MEANINGLESS, SINCE THEY ARE DRAWN FROM VASTLY DIFFERENT BASES (E.G., SOUTH BAY VERSUS RIVERSIDE COUNTY); WHAT ARE THE PERCENTAGES?
- (3) YOUR LAX-DENVER PRICE TAG PROJECTIONS ARE UNDOUBTEDLY NOT ADJUSTED FOR INFLATION; IN REAL DOLLARS, DENVER MAY HAVE COST MUCH MORE PER MAP.

THE LAX EXPANSION PLAN IS EXTREMELY SHORT-SIGHTED: THE LAND AVAILABLE FOR RUNWAYS, TAXIWAYS, TERMINALS, PARKING, ETC., IS ABSOLUTELY LIMITED, AND TRANSPORTATION SERVICES ARE SO POORLY PLANNED (LOS FREEWAY, LIGHT RAIL, BUSES, ETC.) THAT IT WILL BE AN UNMITIGATED DISASTER FOR THE SOUTH BAY

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

Dear Congresswoman Jane Harman,  
 We have lived in PDR. for 4 1/2 years & already notice increased noise since we moved in. If LAX expands the noise will be constant & larger planes would mean louder noise. Our hearing is on one, would be affected & enjoying our outdoor yards would be difficult. My 4 year old already suffers some asthma symptoms with increased pollution would certainly affect. I wonder if this property already affects as large. I've been told that many children living near the airport suffer the same symptoms.  
 The wetland preserve will surely be affected with increased noise & pollution also. The traffic is already horrible <sup>additional</sup> will be increasingly worse as Playa Vista of the Marina del Rey project progresses. Adding airport traffic will be a disaster. Continue on pg. 2<sup>th</sup>

Bottom line, expanding L.A.X. will effect the health of all those in the surrounding communities. It will also effect the health of the environment including the wetland preserve, the beaches & marine life.

The Playa Del Rey, Westchester & El Segundo communities are all very family oriented with many young children. These cities have been wonderful places to raise children. The neighborhoods are well kept & reasonably safe for being a part of L.A. Expanding L.A.X. would drop the property values & make these communities much less desirable. L.A. needs safe communities to raise their children. We should be proud of these communities & support them not destroy them.

Palm Dale & Ontario & Orange County including El Toro should pick up the expansion. L.A. should not have to handle their growing populations - especially Orange County.

I understand that Palm Dale would like the cargo portion of the business. L.A. shouldn't be so greedy!

Please help, my family will personally be effected, & our community would be changed in a negative way.

The Delaney Family  
7901 W. 83rd St  
Playa Del Rey Ca 90293

Thank you,  
Jimmy & Paul Delaney  
PC03089

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

We, in the Lunada Bay community of Palos Verdes Estates - will be greatly affected - We do have some airport noise now and we do have increased pollution due to all the planes that have their flight pattern going over our community in its path - This will make our area less desirable to live in and therefore have a negative effect. We have often had to call and complain about helicopter noise and their flight patterns also -

*Dear Congresswoman Harman:*  
*The airport "Master Plan" may be a bad idea, but I am far more concerned about the corruption and incompetence levels of the LAPD, and the fact that they are turning my beloved city into a "police state." If some justice could be initiated in that direction, you would have my support in all your endeavors.*

I would like to see the Hawthorne airport included in ANY LAX expansion plan. Its proximity to LAX and runway length make it a prime candidate for a commuter reliever airport.

I HAVE LIVED IN MANHATTAN BEACH SINCE THE MID 1950'S, AND HAVE LIVED IN THE NORTHWEST PORTION OF THE CITY FOR THE PAST 20 YEARS. AS I WRITE THIS LETTER I CAN HEAR THE CONSTANT NOISE FROM THE AIRPORT WHICH SEEMS TO INCREASE WITH EACH PASSING YEAR. I LIVE SEVERAL MILES AWAY. THINK OF THOSE WHO LIVE MUCH CLOSER IN THIS HIGHLY POPULATED AREA. THE NOISE AND AIR POLLUTION FROM WHAT HAS BEEN IDENTIFIED AS THE DIRTIEST COMPUTER IN THE STATE SHOULD NOT BE ALLOWED TO EXPAND FOR THE OBVIOUS IMPACT ON THE PEOPLE WHO LIVE AROUND IT. I WAS HERE FIRST!

*The noise and pollution would increase - we already have straying planes too low over Man. Bch. I taught in El Segundo Schools some years ago and the noise and pollution were awful. It would cause enormous traffic jams. Traffic is already a mess. It would seem to me that folks out in the valley areas where the other possible sites are would appreciate being closer and with less planes than less noise, etc. We just cannot enlarge LAX.*

*We have lived in the Westchester Community since 1951. The impact of LAX on this area has been tremendous - not good. The expansion plan now proposed will only make it 100 times worse. The traffic on Lincoln, Sepulveda and the 405 Freeway is way too much due to airport traffic. Our carpets get so dirty from trucking in black soot that is on our sidewalks and driveways that we have to have them cleaned far too often. The planes are taking off all night long. We live just north of the airport - south of Manchester + west of Lincoln on 88th place.*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres <i>Dangerous!</i>		34,000 acres

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*I am enclosing a letter I wrote in 1969 to the L.A. Times. I believe it was - another called "The Rape of Westchester" was printed locally. To once again go through this, only more severely with Parks, Libraries, Municipal buildings, Senior Centers and everything else we have built here is like moving us to a far far land. The noise - all day & all night mostly because of the freight planes is intolerable - you can't sleep, our health is affected. Can't open windows & hear in your house - summer is especially bad. The bird bath had so much diesel fuel on it I quit watering the birds. My plant with water around it is the same. we are dying here and I hope you care. I have a heart condition, asthma, other health problems, irritated air this pollution, never mentioned. I can't drive the 405 + put on my headphones for time. How to get to me who in Santa Monica 10 miles*

March 19, 1969

Dear Editor:

It is a growing opinion with me that a new militant organization is growing-----the militant tax payer. He is sure to turn down every bond on the April ballot, and with good reason.

He has been a patient fellow, this taxpayer, but he can surely find better ways to spend his money than replacing fire gutted schools, and vandalized school property that amounts to millions of dollars.

He is not the overflowing bunt of excess money the politicians think. He has given up new cars, clothes, that color TV he's wanted for years, even dental and medical ware, he and his family should have, to hang on to that little piece of property called "home".

He must have been long asking himself why he must continue to pay and pay, while the School Board throws money away with both hands. He must grow quite enraged as he sees them make political decisions first, not those concerning the welfare of his children's education.

Yep, he and we have grown militant as the Airport like a giant octopus closes this school, threatens that one, makes study impossible in a dozen more, pollutes the air with the belch of noxious gases from it's jet's giant engines. And deafens the children, our little kids sitting helplessly while the monster grows and devours, and our politicians play the grand sonata, "You scratch my back, and I'll scratch yours."

Yep we are militant. If the Airport is allowed to drive us from our homes by destroying the schools, forget it chum, we'll go to the desert, and let the loveliest piece of residential homes in Westchester become a high rise apt area, a manufacturing mesa; a terminal for \$\$\$\$ hungry politicians to see with satisfaction, the tourists have a ride from the airport to their places of businesses down town.

But you want us to pay the bill too, mister, and to that I say, it's a little too much. Many of you have become millionaires when this area was bean fields and you put up a few cracker box houses for us to buy. Now you want those back, from us pawns, and you want to play another game. How often we hear "It has always been in the greater Westchester Plan" as if that made it the 11th commandment. I say then, that some of the developers on both levels are nothing

*a world famous  
Allergist says  
kids all want  
to see "one  
jet" taking  
off "puts so  
much pollution  
in the air as  
10,000 cars  
running  
24 hours!  
Count them!  
one taking off  
every 3 minutes!  
where is the  
A Q M D?*

but  
fraudulent thieves, crooks and miserable liars. I hope as they cavort among the hoo socially, and are touted in the biggest papers as Society and business leaders, that we view them for what they are, crooks, who operate inside the law if they can, and outside of it if it can be undetected, and to their advantage.

I say let the Airport ~~build~~ pay the cost of replacement of schools, let them sound and air profit them. Let them figure out what is supposed to be happening to their little ears and lungs when the stint in school is over, if they live across the street.

I submit to you that none of these hardbitten dollar ravenous scavengers gives a damn. He will go on draining and ruining this community and asking the taxpayer to pay for it as long as we all shall stick it out here, and when at last emphysema, bronchial asthma and deafness ~~hit~~ of our children have driven us from this lovely (once) community, then let the buzzards fight over the remains. I'm sure it is all in the Greater Westchester plans.

6/15/01  
Yesterday I was told of a Patron who the airport has forced from her home & paid her bare subsistence. This is a repeat of the 5000 forced out before.  
The airport has begun & is on its way with their plan, without any environmental survey. No one there is ever responsible.

Please, Jane Harman, you asked, please do all you can to develop Palm Dale with a fast train to L.A., look at the thousands of homes out North of L.A. and make Orange Co. develop El Toro air base. Fix them to fly from  
PC03104

*My family & I are opposed to the LAX Master Plan. We feel that the traffic & pollution & noise burden should be distributed amongst the regional airports in Orange, San Bern., & Riverside Counties. If the master plan is implemented, we would consider moving from Westchester. Traffic is becoming unbearable with the development of Playa Vista, (on Lincoln Bl.) & will only get worse with the LAX master plan buildout. And on some days the smell of Jet fuel pervades the air as far as 83rd St & Lincoln Bl. Please Please no LAX Master Plan!!*

*I oppose the expansion of LAX since the noise of jet and smaller planes flying over the Pelon Verde Peninsula after leaving LAX affects the sleep of residents and their daily activities. The regional airports would serve their communities growing needs for convenient air travel.*

*I commend you for your efforts in favor of regional airports and the needs of the residents of the South Bay.*

Sorry I do not understand the implications of your LAX vs Denver statistics.  
However, the benefits as well as the disturbances of more air fields should be shared by all equally if possible.

We should encourage progress and development.

*The approval of plans for the Playa Vista development will compound traffic problems in itself. Add that traffic burden to that already impacting the freeway and arterial routes in the South Bay and Westside communities, and the result will be gridlock. Even without airport expansion, growth in this area is overwhelming the transportation infrastructure. Given that local governments seem disinclined to recognize and address these growth-related issues, it becomes more important to look at the bigger picture, and propose a regional solution to air traffic needs.*

I totally support your regional plan. This is the only one that makes sense. We have already shouldered more than our fair share of the burden of traffic, noise and pollution in this area. With the additional traffic and pollution from the Playa Vista development in our area, we will either be trapped in our homes or driven out of this area completely. The quality of life, from Santa Monica to Palos Verdes, is becoming unbearable. If it continues to deteriorate, my husband and I will be leaving.

Expanding LAX will increase plane noise over my Redondo home + clog up already crowded surface streets around the airport. Let people in the valley + OC expand their own airports - reducing traffic to + from LAX!!!

## FAX TRANSMITTAL

Phone 310-540-9680  
FAX 310-316-6609

**TO:** Congresswoman Jane Harman  
**FAX #:** 310-372-1600 / 1622  
**FROM:** Wanda Davidson  
**DATE:** June 9, 2001

**Number of page including cover:** 1

**MESSAGE:** Please include my name as one who supports your position on the LAX Master Plan. I feel LAX has expanded further than its capability now. There are other areas that can be explored. The problem is they will not put money in the local governments pocket. LAX can be turned into an International Airport only and we can go to Palmdale, Ontario, Long Beach or Orange County for local flights.  
I am sick of hearing the big jets making their turns at night. I try to go to sleep anywhere from 12 or 1 a.m. and can hear them. I live in Torrance and its bad enough with the local airport. My house is now located in their takeoff pattern. I do not wish to compound the situation with the LAX Master Plan.  
Thank you for your support.

Wanda H. Davidson  
21421 Marjorie Ave.  
Torrance, CA 90503

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372-1622. If you need more room, feel free to enclose additional pages with your name and address.

I agree with you on the Master Plan for LAX. I oppose it! It is obvious the airport expansion will result in more traffic, noise & pollution!

I would like to see the 'fere' the airport pays the city increased! The airport can surely afford it & the city can use the money.

Dear Mrs. Harman,

I agree that LAX cannot take the burden of So. Calif. aviation needs. I support your regional plan. I have lived in Playa del Rey since 1972. The increased traffic on the north runway already awakens us at night and prohibits us from enjoying the patio. The 405 freeway has become a parking lot. Our quality of life has greatly diminished because of the noise and traffic.

When picking up a relative at LAX last week it took 45 minutes to drive one loop. Please fight for regional relief.

My husband & I are against the proposed LAX expansion. We live just a couple of blocks from the beach and are already bothered by planes approaching & taking off along the shoreline. Many nights jet engine noise wakes me up out of a sound sleep. I feel the other airports are underutilized & expansion at these airports could address the need for increased flights.

*We agree with you. Each area needs to accept its own share of the load. Orange County, Ontario & Palmdale/Landcaster and Santa Barbara/Ventura need to expand so their residents don't have to drive so far for airline transportation. And especially El Toro must be converted into a commercial airport since there are so many restrictions on John Wayne Airport.*

THE QUESTION IS TOO SIMPLISTIC FOR A SERIOUS ANSWER AND AS I WILL NOT BE INVOLVED in just adding to the obvious reply, let us move on to the more realistic issues. As every rational person would support a cessation of build out at LAX, what is there left to do? How about a referendum? Let those people who would be affected respond. The results are pre determined. Who supports the expansion of LAX? LAWA and possibly FAA, no one else of any stature. COULD YOU KINDLY TELL ME WHAT THE QUALIFICATIONS ARE OF Jim Ritchie? What is his educational background? What is his industrial experience? What does he propose as the plan if his expansion is rejected? CAN WE GET RID OF HIM BY EITHER FORCING HIS SUPERVISOR TO FIRE HIM? I am certain that his is a non elected job. As I said in the Easy Reader letter and to which you kindly replied, the options are for visionaries, No Stop Gap measures, but long term, Palmdale with a connecting MAG LEV TRAIN is

I agree that LAX expansion should be limited and other airport sites pressed into service. On the other hand, some expansion must be expected and the access to LAX significantly improved by bus, rail etc. Our location is not affected by traffic, pollution or noise.

It is painfully obvious, that the architects of the LAX Master Plan have tunnel vision. They would appear to be less interested in what would best serve Los Angeles, and the surrounding communities, then they are for what appears to be certain "special interests." The LAX Master Plan, in any of it's iterations, would significantly aggravate the already congested LAX/South Bay noise and air noise pollution, as well as freeway and surface street, traffic flow. Any plan that purports to address the needs of the expected major increase in air traffic to this area, that does not include all of the facilities available, is short sighted and significantly flawed.

A Master Plan, yes. But let's get real.

We are fundamentally opposed to the proposed expansion of Los Angeles International Airport for a number of practical and obvious reasons. The surface vehicular traffic in the area is already at saturation point and will only worsen with the developments already planned, primarily Playa Vista. In addition, it is impossible to mitigate the lack of air space. Per the recent front page article in the Los Angeles Times, LAX is currently one of the most dangerous airports in the country due to congestion. It is only a matter of time before there is an accident, and the idea of expanding the airport is irresponsible. Regional airports are

the solution. Don't let the airlines appropriate public air space.

Let's eliminate excessive vehicle traffic into  
the airport. all passengers shuttled in from  
parking lots - no car rental or hotel buses ✓  
An drastic solution - relocate airport to  
Baldwin & shuttle everyone in to L.A.  
Like Narita Airport in Japan  
NO MORE LAX EXPANSION!!

ONE OF THE WORST PROBLEMS WITH LAX PRESENTLY IS THE TRAFFIC FROM AUTO RENTAL AND HOTEL BUSES. WE NEED ALSO THE 105 FREEWAY EXTENDED TO THE AIRPORT. THE BUS PROBLEM COULD BE SOLVED BY ADDING A ROADWAY JUST FOR THEM AND THEY SHOULD HELP PAY FOR IT. THE LONG BEACH AIRPORT COULD BE USED FOR MORE TRAFFIC AND IT SHOULD BE. ALSO VAN NUYS AND PERHAPS PALM DALE. UNLESS THE EXPANDING IS CURTAILED AT LAX MORE PROBLEMS WILL OCCUR.

UNITED AIRLINES IS NO LONGER A PLEASURE TO USE. IT IS TOO BIG AND BUSY AT LAX. I AM A SIVERWINGS MEMBER NOW SIVER'S OLD.

*I favor regional airport expansion. I am opposed to LAX expansion. I live about 5 miles from the airport. The freeways in the area are already congested, as are the streets, as is parking. Regional expansion would also relieve LAX congestion, because people don't drive a airport closer to their homes.  
Expanding LAX to increase capacity is not logical, and opposes common sense.*

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

I think the airport is too crowded now. Why not use Ontario or John Wayne airports & expand them. Getting in the airport is a mess, why not leave all passenger cars outside & drop people off & have a van or tram take them to their plane.

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport, Denver International Airport, Alliance for a Regional Solution to Airport Congestion

*I agree that we should develop the regional airports - especially El Toro. That of course is not popular with a NIBY situation with the people of OJ County. LAX should be helped with as much development as possible especially a light rail to downtown and other destinations using the air rights above the 405 110 and the 10. No highways. Rendale doesn't cut it. The population isn't there. The inland empire yes! Especially Ontario. Add Maul or Norton to help out.*

*I live in Westchester. We are now sandwiched between 2 stupid, miserable plans for disaster - LAX expansion + Playa Vista development. Outlock on Sepulveda & Lincoln will impact the entire So Bay/Westside. We will choke our streets with cars & our lungs with pollution. Please fight to stop these man-made disasters.*

Rep. Harman-

June 17, 2001

I agree with your position. The area around LAX cannot support the ground transportation to and from the airport, and the <sup>airport</sup> noise severely degraded the quality of life in nearby communities. Moreover, regional airports are just good common sense.

By the way, a useful improvement to ~~the~~ LAX without expansion would be the improvement of public transportation systems all the way to the airport.

**LEADING THE WAY TO A REGIONAL AIRPORT ALTERNATIVE**

Dear Friends,

For eight years, I have advocated a regional plan that fairly shares the benefits and burdens of air transportation across our region. I oppose the proposed LAX Master Plan because it does not impose reasonable limits on growth and fails to include an adequately developed plan for building out other airports in the region. ✓

My view is shared by many others:

- ✦ More than 80 Southern California cities have joined a coalition opposed to the proposed expansion of LAX and in favor of a regional approach. ✓
- ✦ Four counties—Los Angeles, Orange, San Bernardino, Riverside—have revived the Southern California Regional Airport Authority to coordinate development of a fair regional aviation system. ✓
- ✦ Last month, 12 Southern California Members of Congress from both parties joined me to support common-sense principles for developing our airports. In a letter to Transportation Secretary Norman Mineta, we pledged to work toward a plan for Southern California that: ✓
  - Fairly distributes the benefits and burdens of aviation needs across the region. ✓
  - Gives priority to airports eager for more growth like Palmdale and Ontario. ✓
  - Does not force growth on already over-burdened airports like LAX. ✓✓✓
  - Includes ground transportation to reduce congestion and improve access to regional airports. ✓

Now it is your turn to make your voice heard. On Saturday, June 9th, the Federal Aviation Administration and Los Angeles World Airports (LAWA) will hold official hearings on the proposed expansion of LAX. I will be submitting testimony to hearings held in the 36th Congressional District at the Furama Hotel in Westchester and the Manhattan Beach Marriott. I want my testimony to reflect the views and concerns of this district and would like to hear from you. The public comment period on the Master Plan ends July 25. ✓  
 If you have comments on the Master Plan that you would like me to include in the official record, you can:

- Mail or fax the response form on the back of this letter to my office.
- Go to [www.house.gov/Harman](http://www.house.gov/Harman) and click on "Comment on the LAX EIS/EIR."

You can count on my continued active involvement on this issue. ✓

Regards,

*This arrived late as usual*

*Jane Harman*

JANE HARMAN

On May 3, Congresswoman Jane Harman and LA County Supervisor Don Knabe met on Capitol Hill with other Los Angeles area Representatives to support a Regional Airport Growth Plan.

Dear Congresswoman Jane Harman,

When my home was taken in the Southern end of Playa del Rey, the LAX Airport Commission promised they would never touch our community again, and would limit growth to 40,000,000. Well, there have been 3 takings since then and it seems their word means nothing. I am now 76 years old and have had it with their price and takings of this beautiful sea side community. It is very hard to breathe and the noise is so bad on the nerve system. It is criminal in my opinion. Thanks for your concern.

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

Dear Jane:

I have thought for many years that it would be ridiculous to expand LAX. The traffic on Lincoln is horrendous now and there are no real options to provide more north/south capacity. Since I remember that you previously served on the Armed Forces Committee, you might be able to pursue a pet thought of mine. When my dad retired from the Navy he and my mom occasionally would fly "space available" out of Point Mugu Naval Air Station. I dropped them off there once and noticed that they were flying commercial jets out of there to transport SeaBees around the world. Imagine a joint use, expanded Mugu Naval Air Station serving Santa Barbara and Ventura Counties, the north-western San Fernando Valley and even Malibu. Yes, the airlines would have to develop new cargo facilities and distribution centers in that area, but it would spark the economy there, give a dual use to the Air Station, and bleed off a tremendous amount of air travel from LAX. I ran the idea by a friend of mine who was a manager at SCAG and he in turn ran the idea by SCAG's air transport planner who said that Mugu Air Station was one of the few viable options to expansion of LAX. Might you look into it? Regards,

## FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

I oppose the LAX Master Plan. Increase noise would further deteriorate the current noise pollution from LAX. The noise hurts property values.

I AM OPPOSED TO THE LAX EXPANSION + STRONGLY BELIEVE THAT A REGIONAL AIRPORT ALTERNATIVE IS A MUCH BETTER SOLUTION. THESE ARE THE MAIN REASONS I AM OPPOSED: INCREASED TRAFFIC TO EL SEGUNDO + SURROUNDING AREAS WILL UNBEARABLE. IT IS ALREADY TERRIBLE DURING RUSH HOUR (4 HRS. OF THE DAY, 5 DAYS A WEEK) MY HUSBAND WORKS IN EL SEGUNDO + EXPERIENCES THIS ON A DAILY BASIS. MORE CARBO ACTIVITY WILL INCREASE TRUCK TRAFFIC + ALONG WITH IT DIESEL EMISSIONS (POLLUTION) NOISE FROM AIRCRAFT IS ALREADY UNBEARABLE - MORE NOISE FROM MORE AIRCRAFT FLIGHTS WILL DEEPLY AFFECT OUR QUALITY OF LIFE AS SOUTH BAY RESIDENTS.

*Traffic: The 405 freeway is heavily congested and time of day or night as it is now. Expanding airport would aggravate situation so much more. We cannot absorb any more noise than we are experiencing now. Pollution would increase not only for the airport but as it is black soot from the traffic & gas on the freeway covers everything within a radius of miles. Fruit is covered with black soot from the pollution now. No, no - no on expansion.*

I like the idea of spreading the impacts over other areas. How does LAX expansion impact me? As a Redondo Beach resident occasional flyover noise is the most notable due to flight/takeoff path changes in the last 2 years. I don't do too much flying but have a couple of visits a year from people I pick up & drop off at the LAX which I do not enjoy with the LAX traffic. Street traffic around LAX is not too much worse than elsewhere.

I am strongly opposed to further expansion of LAX.  
All impacts will be negative from my perspective.

- Increased traffic & pollution on the 405 freeway and surface streets including Sepulveda Blvd.
- Increased noise/pollution from additional air traffic flying over and around the Palos Verdes peninsula.
- Increased risk of an air disaster with the additional air traffic.

I perceive no benefits to myself or my family from this expansion.

## airport comments

The surface streets feeding automobiles to the airport are totally unable to handle the passengers on and off the airport property. When the new jumbo size passenger planes are in full service, two landings in an hour will require about 600 automobiles to take the passengers off the property.

at the same time there will be about the same number bringing in new passengers to fill up the outbound planes.

The capacity of the streets feeding the airport is totally inadequate, to handle both the airport and normal traffic that has nothing to do with the airport.

All the streets within several miles of the airport will be a disaster for traffic.

Plus the fact that the roads on the airport cannot handle the traffic. They cannot handle the present traffic let alone a bunch more.

An experienced airport user

*I am Totally against any expansion of LAX. The traffic is impossible already. Noise + pollution would significantly reduce my property's values. I see LAX as a tragic accident just waiting to happen. It doesn't belong in the heart of a major city. A sensible transit system must be part of a plan to move it to a less populated area.*

MAIN ISSUES #1 Traffic, Sepulveda and Imperial & 105 FWY AT SEPULVEDA OFF RAMP, ANY TIME OF THE DAY IS GRIDLOCKED. #2 AIR POLLUTION JET FUEL FUMES GET ALL OVER EL SEGUNDO, AND CARS GRIDLOCKED Idling. The noise is sometimes unbearable on the NORTH SIDE OF EL SEGUNDO. A INCREASE IN GROWTH OF L.A. & WOULD INCREASE ALL OF THESE Problems

I live two miles from the LAX Runway. I would be affected by the noise and pollution. I am already waking in the night coughing from pollutants & would be more affected if there was more air traffic. I am also extremely concerned about the traffic. The 405 freeway is already at a standstill most hours of the day between Rosecrans & Culver Blvd. Those exits between are the access to LAX. The 105 freeway has already been altered to permit 2 lanes to exit at LAX & there are still back-ups for 1/2 a mile. Last Thursday morning it took me 40 minutes to drive through the 'U' to drop a passenger at Terminal 4. Please tell me how this area can handle more traffic. I believe the people living in Orange County & the S.F. Valley need to take on their own burden for air travel. The load must be distributed, especially because much of the traffic is from passengers transferring to overseas flights who do not have the choice of using another local airport. I love using LAX & believe El Toro, Palmdale, John Wayne, Ontario & Palmdale must be developed to accommodate their local population.

*I OPPOSE THE EXPANSION OF THE LAX AIRPORT FOR THE FOLLOWING REASONS:*

1) MAJOR ARTERIES TO + FROM MANHATTAN BCH + LAX ARE ALREADY GRIDLOCKED (SEPA/NOVA, AVIATION) - ADD'L TRAFFIC CANNOT BE HANDLED BY RESIDENTS ATTEMPTING TO GO TO + FROM WORK.

2) NOISE LEVEL IS ALREADY TOO HIGH

3) WE HAVE ENOUGH POLLUTION

4) WHY DO REASONS HAVE TO BE ECONOMIC? WHY CAN'T WE JUST PRESERVE THE COMMUNITIES FOR THEIR CURRENT AESTHETIC QUALITIES?

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*I have no details re the LAX expansion plan. But I question the idea of closing LAX and moving service to Palmdale. If you've ever flown into the new Denver airport you will understand why I now prefer to fly into Colorado Springs and drive to the City of Denver. Limiting service to LAX would be acceptable. ~~Expand EL Torp also.~~*

I oppose the expansion of LAX.  
Traffic will become even more unbearable  
than it is now; & pollution will become  
worse! Los Angeles does not need more  
pollution, or traffic! It is my opinion that  
transportation on the ground (Above the ground  
Rail Rays & trains) should be looked into for  
consideration!

DEAR CONGRESSWOMAN HARMAN:

I AGREE WITH YOU THAT WE SHOULD EMPHASIZE A REGIONAL APPROACH TO OUR AIR TRANSPORTATION ~~AND~~ EXPANSION NEEDS AND NOT FOCUS ON EXPANDING LAX. I WOULD EVEN BE FOR CREATING AN INTERNATIONAL AIRPORT IN PALMDALE WITH RAIL SERVICE TO & FROM, AND LEAVING LAX FOR DOMESTIC SERVICE AND/OR EXPANDING INTERNATIONAL. I THINK WE SHOULD ALSO (LIKE MOST OTHER COUNTRIES) NOT PUT ALL OF OUR EMPHASIS ON AIR TRANSPORTATION AND CREATE HIGH-SPEED RAIL LINKS IN THE FOLLOWING CORRIDORS:

- a) L.A - SAN JOSE - SAN FRANCISCO
- b) L.A - Vegas
- c) L.A - SAN DIEGO

**LEADING THE WAY TO A REGIONAL AIRPORT ALTERNATIVE**

Dear Friends,

For eight years, I have advocated a regional plan that fairly shares the benefits and burdens of air transportation across our region. I oppose the proposed LAX Master Plan because it does not impose reasonable limits on growth and fails to include an adequately developed plan for building out other airports in the region.

My view is shared by many others:

- ☛ More than 80 Southern California cities have joined a coalition opposed to the proposed expansion of LAX and in favor of a regional approach.
- ☛ Four counties—Los Angeles, Orange, San Bernardino, Riverside—have revived the Southern California Regional Airport Authority to coordinate development of a fair regional aviation system.
- ☛ Last month, 12 Southern California Members of Congress from both parties joined me to support common-sense principles for developing our airports. In a letter to Transportation Secretary Norman Mineta, we pledged to work toward a plan for Southern California that:
  - Fairly distributes the benefits and burdens of aviation needs across the region.
  - Gives priority to airports eager for more growth like Palmdale and Ontario.
  - Does not force growth on already over-burdened airports like LAX.
  - Includes ground transportation to reduce congestion and improve access to regional airports.

Now it is your turn to make your voice heard. On Saturday, June 9th, the Federal Aviation Administration and Los Angeles World Airports (LAWA) will hold official hearings on the proposed expansion of LAX. I will be submitting testimony to hearings held in the 36th Congressional District at the Furama Hotel in Westchester and the Manhattan Beach Marriott. I want my testimony to reflect the views and concerns of this district and would like to hear from you. The public comment period on the Master Plan ends July 25. If you have comments on the Master Plan that you would like me to include in the official record, you can:

- Mail or fax the response form on the back of this letter to my office.
- Go to [www.house.gov/Harman](http://www.house.gov/Harman) and click on "Comment on the LAX EIS/EIR."

You can count on my continued active involvement on this issue.

Regards,

*Jane Harman*

LAX cannot handle more aircraft traffic.  
I would suggest another airport to  
be built in Riverside County to access  
that region.

I agree with your assessment of this LAX situation. Both Ontario & Palmdale is where the expansion should take place. Both Riverside & San Bernardino Counties are growing in population by leaps & bounds each year. Not only do these Airports need to expand their facilities - it also means many more jobs for those Counties, and less traffic congestion for Los Angeles.

Unfortunately the City of Los Angeles wants the "whole Apple Pie", and the expansion will never cease. Twenty three to twenty seven hundred flights per day, their next goal, that probably means pushing it somewhat to just over three thousand - until the next expansion [I reside in Cross Creek Village, Playa del Rey, right next to the North runway practically. Hour after hour day after day, night after night the roar fo the mighty JET - its not uncommon to not be able to hear the Television during take-offs, with the windows closed.

In the past month I have noticed homes going up For Sale, in the area to the rear of Westchester High School, on 91st Street. Neighbors already fearing the influx of noise and congestion. We appreciate your efforts Congresswoman, but I think its a lost cause - the City of Los Angeles wants those "big bucks. And they will get their way..... S.A.Hixson

7/8/01

I was out of town on June 9<sup>th</sup> so could not attend the meeting. I lived in Playa del Rey for 20 years until being bought out by the city of LA because of LAX. They lied to us then. The airport should have moved to Palmdale years ago. I very much appreciate your efforts to contain it + keep LAX from ruining even more desirable property with noise and pollution.

*I would prefer not to have LAX expanded. Living in Manhattan Bch, I now hear flights over my house - which is not what the agreed plan was during 12am-3am. When weather is questionable all flights seem to be rerouted over Manhattan & Hermosa Beach. I feel the surrounding airports need to absorb their communities travel, not have more commuting happening in and out of LAX.*

## FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport; Alliance for a Regional Solution to Airport Congestion

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*I agree with you - the REGIONAL PLAN is our BEST OPTION here. My neighborhood would be significantly impacted by the increased noise, pollution, and traffic under the LAX Master Plan.*

*THANK YOU for your support and efforts towards the Regional Plan.*

*Stop - We are already chocked with grid-lock - We cannot tolerate any more smog, people pollution, and grid lock, in this area. The politicians for many many years have not looking at the quality of life here. The politicians have been our major problem. Quality of life in South Bay is not one tenth as good as it used to be in say 1970. Not only the airport - but unlimited immigration has killed us.*

Dear Ms. Harman,

6/18/01

Please be advised that I am opposed to any further expansion of L.A.X. The noise factor is bad enough but the air quality from jet fuel exhaust and residue is terrible. The unbridled expansion of housing in the Marina and Playa Del Rey areas will add to our traffic congestion as it is. More traffic to LAX is obscene!

*The high number of homes/businesses developed in the Eastern Area will be better served by developing inland airports. Why would you destroy the valuable real-estate properties to attract in from the East Coast? This state benefits greatly from the high tax values of the P.U. Area. This area will change dramatically with increased jet noise!*

*I oppose the LAX Master Plan, also. My husband and I live and work in the area and would really be affected by the increase in traffic. We've lived here 18 years and have been upset by the large increase in traffic, noise & pollution. It's time to put a stop to all this expansion.*

My home in Playa del Rey will be adversely affected by all three; traffic, noise, & pollution. Let's just face a simple fact - LAX is full. Fact 2 - we need no more planes arriving here! If other areas want more air traffic, they know how to get it - otherwise let's put up the sign that says No More Vacancy

POPULATION IN THE LAX VICINITY INCLUDING MY CITY OF MANHATTAN BEACH WILL CONTINUE TO GROW. LETS NOT DEGRADE OUR QUALITY OF LIFE FURTHER BY INTRODUCING AN NEGATIVE IMPACT THAT IS WITHIN OUR CONTROL TO AVOID. BETTER THAT AN OCCASSIONAL AIRLINE PASSENGER BE INCONVENIENCED THAN THOUSANDS OF PEOPLE HAVE THEIR DAILY LIVES MADE MISERABLE BY EXPANDING LAX AND WE HAVEN'T EVEN MENTIONED THE NEGATIVE IMPACT ON PROPERTY VALUES IN MANHATTAN BCH.

Traffic in the South Bay is tremendous, including along Sepulveda Blvd & the 105 freeway - much supporting LAX. It makes no sense for people to drive 50 or more miles to LAX when they can have airport services close to home. It contributes to smog, unnecessary use of cars, gas, etc., clutters the highways - there is no reason to expand LAX except to protect the environments of residents in the areas of other airports. We have cars too!

Also the Metrolink system ought to go directly to LAX.

I think it is important to mention that there is a huge number of young families in the Redondo <sup>Insuburon</sup> Playa del Rey area, and our areas heavily encumbered with a number of undesirable public companies such as the refinery, water treatment plant... we shouldn't have to shoulder the burden. As the parent of two small children, I am concerned about LAX's expansion on my community & our children's future. We have plenty of other airports in the area that I believe would be happy to accommodate add'l passengers + air traffic to better service their community.

## FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
<b>Millions of Annual Passengers (MAP)</b>	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.

### NOI NOI NOI

To expansion in the south Bay. The area has already been burdened with too much noise, congestion and pollution from the existing airport. It makes no sense to expand LAX when the demographics show where the expansion should take place which is not in the south bay. As a resident of Redondo Beach for over 18 years I have been plagued in the last 5 yrs. with aircraft noise hovering overhead awaiting landings. From my kitchen window on a Sun. night I can count a lineup of 12 planes awaiting landing and hovering from the northeast on their approach to LAX. Again I plead no more expansion. Just lighten our load so the quality of our life can be back to what it should be

Dear Jane Harman:

Both my wife and I oppose the LAX Master Plan. As a person who travels extensively out of LAX on business across the U.S., I know how impacted the current airport — and surrounding communities — are by sheer numbers of people travelling. A larger LAX will not solve the problem. A regional plan will.

I believe developing regional airports is essential. It could relieve the horrendous traffic problems on the ground around LAX and share the burden of noise, pollution, etc. over the entire region.

I often use the Oakland or San Jose airports when flying into the San Francisco Bay area. They are a joy to use compared to the congestion of S.F. air.

We are a buyers dream or to the people who want to bring their business partners live in boxy condos w/ a 2.5 million dollar view of a dying ocean - were a community that needs some boosting. What about the small businesses that have thrived here for 30 some odd years.

It hurts me to tears to think this side of LA has no other value to developers than

98 billion dollar cash cow. Well bring that 98 billion dollars in here; watch the shores erode, the trash build up, the air get darker w/ smog, the foliage go brown; water this cash cow grow old, broken; used up very fast. And then of course there'll be serious environmental problems; on the heels of that millions of dollars of studies to find out what the problems are. And I tell you now it is SIMPLE GREED....

I oppose the current master plan for the LA Int. airport. I live in Hermosa Beach where the noise from overhead jets and the smell of jet fuel is already ruining our quality of life in the South Bay. Auto mobile traffic in and around the airport is already maxed out! How can the proponents of this plan mitigate the impacts of such an increase in growth? The answer is that they can't.

6/10/01

The traffic, noise & pollution are terrible now. I have lived in the same house for 25 years, and the increased dirt from aircraft & cars is very noticeable. Please encourage a cap on LAX growth and better rail transit to LAX to ease some of the congestion.

Dear Congresswoman Harman,

In the 15 years I have lived in Redondo Beach, my daily commute past LAX has risen from 25 minutes to 60 minutes to reach Santa Monica. We need to severely restrict the growth around LAX. Even now the South Bay is overbuilt and the lifestyle which attracted us, is rapidly disappearing.

Thank you!

I am against, firmly against the expansion of the LAX as most if not all people whose living space would be affected. The most frustrating thing is feeling a lack of cohesiveness w/ others who are just as adamant as myself. Cohesion or the appearance of cohesion is available & supported thru the media. The powers that want the expansion have several names; one voice. We are just people who work very hard every day to come home to news that our neighborhood is changing. There is little to be done about it. Meetings have been held in secret for months, or years. There it is on the six o'clock news. We are a community riddled w/ going activity for as the real estate market sees fit

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*There is already too much pollution and noise impacting the neighborhoods east of LAX. These are poorer communities. Why should their health be impacted even more with an expansion of LAX. Connect the 4 regional airports w/ high speed rail.*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

The Traffic At 405 Freeway Jammed all the time.  
 I put my son at the dorm at UCLA  
 Because of heavy traffic at 405.

I PAY 9 thousand \$ Dollars to avoid  
 the heavy traffic caused by LAX airport  
 Airport caused noises, pollution to our  
 residential area.

*We are very fortunate to have an airport facing the ocean with usual West → East wind patterns. This is probably the lowest "noise polation" per resident in the U.S. Airport traffic merits expansion. Also the convenience of residential travellers to flight access is probably the highest in the country.*

*My residence is 5 miles south of the airport on the N-S coast. I have no objection to significant increase of the LA airport traffic.*

Dear Ms. Harman:

Having reviewed the LAX Master Plan and your comments recently, I can say that we agree with your position only in part. We do feel that the other counties and airports such as Long Beach, Ontario, and John Wayne need to share the traffic burden. However, it is clear that increasing population and commerce will drive demand greatly upwards in the coming years. Therefore, major improvements at LAX are necessary even with the regional sharing approach. If half measures are adopted now, it will be only a matter of time until they will be overtaken by growth. We would therefore support Alternative A of the Master Plan, which seems to be the most effective way to increase LAX capacity.

Keep up the good work! LAX expansion is not necessary and we must pursue regional airport solutions. New leadership in City of Los Angeles may be helpful in widening the perspective from the past sole concentration on LAX. Let's hope so and push for it.

I AM DEFINITELY OPPOSED TO FURTHER EXPANSION AT LAX. I HAVE LIVED IN THE SAME HOUSE FOR 21 YEARS, THE NOISE LEVEL FROM LAX HAS <sup>DOMESTIC</sup> STEADILY RISEN AND IS BECOMING UNTOLERABLE. HOW MANY INTERNATIONAL PASSENGERS ARE FROM THE SAME AREAS IN ORANGE COUNTY THAT OPPOSE INCREASED TRAFFIC IN THEIR SKIES?

THE GREEN LINE MISSING LAX THE LAST TIME WAS A JOKE, YET THE AIRPORT PLAN IS VERY UNCLEAR AS TO HOW IT WOULD WORK THIS TIME AND WHAT KIND OF PASSENGER COUNT WOULD BE INVOLVED. LASTLY THE ENORMOUS PARKING STRUCTURES AND INCREASED TRAFFIC FLOW ON VISTA DEL MAR ARE POORLY THOUGHT OUT ESPECIALLY IN COMBINATION WITH THE PLAYA VISTA DEVELOPMENT

*Obviously you increase the number of flights where the people will be. Enlarging LAX increases to a crawl on Sepulveda/PCH to get there. It also wastes gas for people coming from the outlying areas to get to LAX for a flight. A terminal should be included in the outlying airport expansion plans. No one uses Santa Monica Bay. Why? How about LAX ferries from Santa Monica & north to LAX and South Bay & San Pedro from the South to LAX to relieve existing traffic.*

*STOP the whole project. Why should we deal with the increased traffic on the freeways + air pollution. Let the people of Orange County fly out of El Toro. Most of them moved there knowing it was an airport / Air Force base. The 405 is already a disaster. Century Blvd gets clogged up - the LAX entry + exit gets jammed. Make El Toro a Full International Airport + expand Ontario Airport. Let Orange + S/B counties residents fly out of their own counties. Let the airlines transfer some of their activities to other locations.*

*NO MORE EXPANSION!!!*

*LA purchased more than adequate acreage in Palmdale to develop a major airport. I believe that all cargo planes and many passenger flights could use Palmdale if a hi-speed route to LA was part of the development.*

*I believe Ontario and John Wayne should be utilized so that people in these areas would not have to drive to LAX and further increase our already over whelming traffic.*

*We do hear planes flying over at night. More flights, more traffic and more pollution can only result from MAXIMUM development of LAX.*

Dear Congresswoman Harman,  
 I live in Westchester about one mile north of LAX. The traffic on the 405, 105, Sepulveda, & Lincoln are pretty much gridlocked Monday AMs & Friday PMs & often other times as well. It's unfair to have the entire So. Calif. population traveling to LAX when they could convert El Toro to a large airport so easily. They should also expand Palmdale & make it easily accessible by rail or other rapid transit.

I am totally against the LAX Master Plan. LA has enough traffic and pollution. I understand that Pershing Dr. would no longer be for public use & that is UNACCEPTABLE. The noise is so bad where I live & can hardly hear myself think. This must decrease, not increase. And the pollution is most likely killing us. Look at the numbers of cancer patients with

*You asked for opinions. Here is mine!*

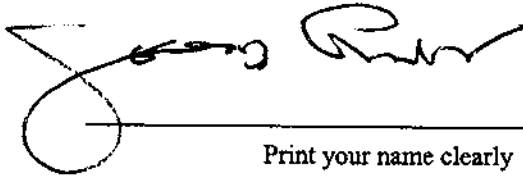

*LAX is already too big and too overcrowded making air travel a real pain for all except those who limos drive to the plane.*

*LAX is dangerous and awaiting a disaster. If last year's flight which went into the ocean had made it back to land on LAX hundreds more might have been killed.*

*We need a new, huge, airport way out in the sticks built for the 21st Century with rapid transit to/from downtown LA and Lax. Lets us start it now!*

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

I am sorry to have taken so long to respond. It seems imperative to me that the air traffic load be spread equitably among several airports which serve So. Calif. LAX cannot & should not carry all the load and should not be expanded until other locations have assumed their fair share.

I completely support your position on the LAX master plan. Traffic around LAX is ridiculous, and could certainly be reduced by flying passengers to airports closer to their final destinations. I believe business suffers <sup>(from traffic congestion)</sup> since people are reluctant to shop in areas that pass by LAX. Please continue your work on this issue.

We vehemently oppose the proposed LAX expansion.

It is unnecessary and uneconomical. Our lives and the lives of thousands of homes around the LAX would drastically be disrupted by the noise, traffic, pollution.

Please reconsider EL TORO, OR ORANGE COUNTY.

*Traffic going south to the Airport is horrendous. I live in Westchester & our community is bombarded with noise, airplane emissions that literally ruin our plants (and our lungs). Now, you want to expand further into Westchester. What is wrong with utilizing the facilities in Palmdale for cargo planes etc - I have lived in Westchester for 32 years & I am tired of my life being endangered by the Airport. Make another community miserable - not only us.*

the regard to plants - when I have problems with black spots on leaves of roses - I call Jason & Perkins (a catalog company selling plants). When I explain my problem to them they immediately ask if I live near the airport - I tell them about 3 miles away - I then I am told all the deterioration on the leaves is caused by airplane emissions.

Does anyone ever consider what could be happening to our lungs - If this is so detrimental to the plants God help our children!

Please stop them from expanding LAX further into our communities - or what's left of LA!

Sincerely

Bernice A. Pinto

P.S: We are an elderly community & the airport offers sound-proofing. - But to avail yourself of this sound proofing you must take down your drapes your venetian blinds etc. Needless to say most of us are arthritic & cannot do this & can't afford the cost of hiring someone for this chore - so we have to live without the sound proofing. -  
Your brochure was received on June 13th!

*June 18, 2001*

I'm writing this note for my 85 year old parents. They built their home in 1950 and have lived on Airport Blvd. for over 50 years. Now, their quiet neighborhood is in danger of becoming an expressway that would connect the traffic from the 405 freeway to Westchester Parkway to LAX. PLEASE STOP this expansion project as it would cause many negative effects on this community in the form of diesel soot, noise, and air pollution as well as destroying quiet neighborhoods and the quality of life people have worked hard for. PLEASE WORK TOWARDS alternatives that would reduce the traffic and provide access to regional airports.

Thank you.

Sincerely,

I cannot comment directly on the plan - never seen it. However, I do know that I DO NOT SUPPORT LAX EXPANSION!!! When we moved to Manhattan Beach <sup>(over 10 yrs ago)</sup> my husband + I commented how quiet it was at night - we had lived 1 block off a major street in our prior address in Redondo. Now, we lay awake in our bed listening to airplanes landing + taking off from LAX until 2am and starting up again before dawn. As a stay at home mom, I see + hear planes flying overhead (yes, they DO fly over my house, despite what LAX officials seem to claim) all day long. Not only do I not support expansion, I would like to see the beach city fly overs halted and the ocean "turn" point moved further offshore.

Thank you for listening!

*I am against expanding LAX. I live in Marina Del Rey and work in El Segundo. The traffic just to get out of the Marina area feels nearly as if I am driving in Manhattan, N.Y. It is way to congested. The air feels dirty. El Segundo is a great little town but the air is also polluted from the airplanes etc.. Many people that live in Westchester would like to sell their homes, they are scared of the pollution airport expansion and noise. The beach areas are becoming to industrial. I can see myself moving further South by next year or so. It is very unfortunate. Let other airports expand. Manika Oldmen*

I agree with your opposition entirely. Besides the increased noise from the aircraft, I am especially concerned about about I-405, which is already impossible during most hours. More cars and trucks is one thing, but it's ten times worse when they are all just sitting bumper-to-bumper on the so-called freeway, pouring tons of junk into the air I must breathe. Thanks again for your assistance.

NO airport expansion at all! Build high-speed rail to reduce the long-distance crunch! Preserving the neighborhoods of Westchester is much more valuable than adding more flights. We've already destroyed too many homes at Dockweiler Playa Del Rey & with freeways in the name of "progress"!

Thank you for standing up to LAX! This issue is extremely important!

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

Dear Jane, I'm pleased to hear that you oppose the expansion of LAX and that you are in favor of a regional solution. I live in El Segundo and would bear the lion's share of the impact. The noise is already such that you can not sit out on the porch and hold a conversation. The traffic on the 105 Freeway is at dangerous levels at the airport off ramp which can not presently adequately handle the load. I can not imagine adding more airport traffic. Pollution would of course increase which does not bode well for us since our city is one of the worst <sup>in terms of</sup> pollution wise with hyperion on the west, Charron on the east and Airport on the north. Over all our quality of life will be even more adversely affected. I appreciate your support.

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

6/11/01

We have been living here since 1948 (before the tunnel on Sepulveda was built) and the noise level has increased every since. At present the noise and the dirt from the jet exhausts is very high and we don't think we should tolerate any more. As Seniors (87 & 91) this is very disconcerting

Rep. Jane Harman:

I am opposed to LAX expansion primarily due to current and increased air pollution. This black soot covering everything is from the planes accelerating over the ocean. In addition we continually breath the fumes.

LAX is an unfortunate location. It is occupying fine beach front land. I hope with your help LAX will gradually be relocated to other sites.

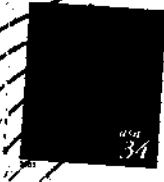

Thank you for this mailing.

*The traffic, noise and pollution would be just terrible. It is very, very bad now. Airplanes fly over head. Then if you call in your area bar. Also they try to get you to call other numbers, telling you the number you called is no longer good. It looks like they are trying to force people out of their homes. It is a shame.*

*Pin all for regional plan - that will take the pressure off the L.A.X. I live less than 10 miles away + would hate to see an expanded version of the airport in any way. During ~~cert~~ certain times of the year, you can smell the exhaust fumes of the airplanes - more of them would add to that lack of clean air. Thanks for your work on this! (none <sup>car</sup> traffic around LAX) As well as*

*Congresswoman Jane Harman,  
My comments are that we shouldn't put all our planes and cars in one place. Definitely not LAX. TRAFFIC IS A MESS, BOARDING IS A MESS. PALMDALE, ONTARIO, AND EL TORO SHOULD ALL BE INTERNATIONAL AIRPORTS. NIMBY'S CAN SACRIFICE SOMETHING FOR THE GREATER GOOD. IT DOESN'T MAKE SENSE TO TRY TO SHOE HORN MORE INTO LAX*

Noise Pollution, Extra Traffic, significant Traffic jams on Sepulveda during high airport Traffic hours, deterioration of communities. I have lived on the north & south side of LAX for 40 years. The Westchester community was devastated by LAX expansion. Expand to Palmdale, or Ontario or Orange where a complete airport sits already to go.

The noise level has gradually increased over these last few years. I'm opposed to LAX expansion. I have property in EL Segundo and Manhattan Beach. The noise level has increased in EL Segundo dramatically. The pollution from the planes is a big concern for me. This is really evident at my property in EL Segundo. We need to be concerned with our quality of life, not just commercial gains @ LAX. I would like another official hearing - with more notice.

Dear Jane Harman —  
Briefly - The airport + the 405 traffic can  
be unbearably congested - Any more traffic  
will be much worse. So many people  
have to travel 30-60 miles to get to LAX.  
Decentralized airports would be an immense  
improvement.

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*I do use LAX because it is close to my home and I'm sure others that live in out-laying areas would appreciate an air port near their home and not have to travel miles to an already crowded and congested LAX - but the way people travel today it will only get worse - When possible I use the train or ship. But then I'm retired and can take my time -*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

June 10, 2001

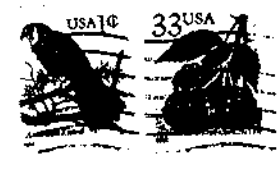

Dear Congresswoman Harman:  
 you are so right! Lax airport is already  
 too busy! People from other areas have  
 to go to Lax to catch the plane when  
 they could be going from a closer  
 airport. I support you completely.

- 1) THE PROXIMITY OF LAX TO OUR HOUSES KEEPS PROPERTY VALUE DOWN.
- 2) DUE TO THE NOISE LEVEL, IT IS VIRTUALLY IMPOSSIBLE TO LEAVE WINDOWS OPEN TO RECEIVE THE COOL OCEAN BREEZE. FOR SANITY SAKE ONE MUST SHUT WINDOWS & USE A/C WHICH WE ALL KNOW USES MORE PRECIOUS ELECTRICITY.
- 3) LAX NEEDS TO ADOPT A DOMESTIC ONLY POLICY FOR INCOMING & OUTGOING FLIGHTS. SEND ALL CARGO & INTERNATIONAL FLIGHTS TO PALMDALE.

*The noise of overhead planes has increased appreciably in the past year, especially at night, and every indication is that the LAX Master Plan would multiply that noise to an unacceptable decibel level. The effect on the desirability of living in Manhattan Beach will be to bring it closer to those communities - South Westchester & North El Segundo - immediately surrounding the airport.*

*I live in the Westchester area and LA expansion would negatively affect my quality of life. This plan would increase noise and traffic in my neighborhood. Also, there is good reason to expect that LA expansion will negatively affect property values. Most importantly, this plan would negatively affect our sense of community. Please oppose LA expansion.*

*I am very strongly against expanding LAX. Palmdale and Ontario need to be enlarged and El Toro should certainly still be a valid consideration. I believe LAX has already been expanded beyond its capacity to continue to expand it seems to be an easy out for a lot of people. ~~but~~ The expansion of LAX would have a very negative effect on an already overstressed community and impact negatively on the surrounding cities.*

The traffic in & around the airport is unbearable. Also the fuel-out from planes, must be bad for our lungs, because its terrible on the cars + windows. Let Orange Co. have some of the mess. Palmdale would work also.

*I oppose the expansion of LAX because there are other near by options, such as Palmdale and E.E. Elroy. It would also ease traffic in and around LAX. If both of these areas were developed into international airports, also perhaps there is more suitable room for expansion at Ontario International. Regardless I am very much against expanding LAX.*

LAX HAS NOT ACCOUNTED FOR ENVIRONMENTAL IMPACTS WITH A 45% INCREASE OF MAP SINCE THE LAST EIR WAS DONE AT 40 MAP. THIS IS IN VIOLATION OF CEQA, AS THERE ARE CLEARLY SERIOUS IMPACTS INCLUDING PUBLIC SAFETY ISSUES. THIS INCREASE IN AIR TRAFFIC GRAMMED INTO THIS TINY AIRPORT IS SOLELY DRIVEN BY FINANCIAL INTERESTS OF CORP. AIRLINE COS AT THE EXPENSE OF QUALITY OF LIFE AND THE HEALTH OF THE SURROUNDING COMMUNITY. THIS MUST STOP! IT'S POOR PLANNING (IF ONE CAN CALL IT PLANNING AT ALL) AND NO "ECONOMIC ENGINE" SHOULD OVERRIDE THE HEALTH AND SAFETY OF THE VERY CITIZENS IT PREPARES TO SERVE.

I AM AGAINST EXPANSION AND GROWTH OF LAX. THE HUMAN AND VEHICULAR CONGESTION WILL BECOME INTOLERABLE AND POLLUTION WILL BECOME ABOMINABLE. THE AREA IS ALREADY CONGESTED WITH INDUSTRIAL AND COMMERCIAL ENTERPRISE. IT IS ALSO OVERPOPULATED WITH RESIDENTIAL HOUSING. TRAFFIC ALREADY CRAWLS ALONG ITS THOROUGHFARES. GROWTH WILL BRING THINGS TO A STANDSTILL, CONGESTION WILL PREVAIL DAY AND NIGHT, POLLUTION WILL BE UNESCAPABLE, LAX SHOULD ONLY BE ALLOWED TO MAKE CHANGES TO MEET AIRPORT DESIGN STANDARDS, AND TO ENHANCE SAFETY. LAX SHOULD NOT BE ALLOWED TO GROW!

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport; Alliance for a Regional Solution to Airport Congestion

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372-1622. If you need more room, feel free to enclose additional pages with your name and address.

I'm so glad you're supporting a regional plan. There simply is no more room for growth at LAX. Travelers who have the option are already choosing smaller airports (Burbank, O.C., etc).

I work in El Segundo. The 405 and 105 freeways are already extremely congested, and the resulting gridlock from LAX expansion would be unbelievable. Please try to put the additional capacity where it makes sense, not here.

Dear Rep. Harman,

6/21/2001

I partially agree with your position re: the LAX master plan & the regional airports plan. I feel that both LAX & the regional airports need expansion and/or development. While some aspects of the LAX Master plan need improving, reconsideration, revision & more public input, that airport should for the next decade be considered the primary international airport for the LA metro area - as such it requires urgent modifications as well as additions to its runways so that the existing air traffic at LAX can operate more safely & smoothly. I would be in favor of more development of the regional airports you cite, as well as increased spending for more efficient & state-of-the-art, expanded

I oppose the expansion of LAX because I believe it would greatly increase the traffic in my area as well as others and especially the 405 freeway. My area is bad enough. My neighbors and I are planning to have speed bumps on our streets because of all the people using our street as a pass-thru between La Tijera & Sepulveda. I believe the noise and pollution from the expansion would greatly increase as well. The skies are too congested with planes lining up to land.

LAX Expansion

I am a Hermosa Beach resident and homeowner who is totally in favor of the LAX expansion plan. In my opinion, it appears to boil down to safety vs. need for quiet. I choose safety first. The skies around LAX are dangerously over crowded. Expansion is the only answer. Frankly I do a lot of yearly international travel and flying in and out of L.A. would be more enjoyable if there weren't so many delays attributed to lack of airport accessibility both on and off the ground! I vote for doing the right thing--expanding LAX.

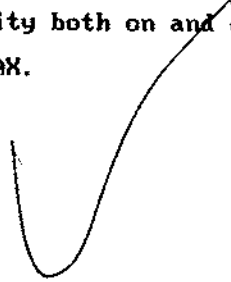

Sincerely,

Edna M. Tobias

*I definitely oppose the expansion of LAX. Traffic is already horrendous near the airport. The sound would encroach further into areas that don't need any more noise such as El Segundo, Westchester and Playa Del Rey. These are nice communities that need to be preserved not wrecked by money hungry capitalists.*

*Having lived under the North runway for several years on Rindge in Playa Del Rey, I have first hand knowledge of the noise pollution caused by LAX. At my residence all conversation stopped if the engine starts <sup>let</sup> near the area. The vibration & noise is totally intolerable. I personally witnessed a heavily burdened turbine plane barely miss house tops as he proceeded toward the ocean <sup>down</sup> ~~the~~ way st. He took several miles to ascend over the ocean above a few hundred feet. A disaster barely avoided.*

*As you indicated above LAX doesn't belong in L.A. LAX belongs in the unpopulated northern deserts e.g. Mojave, Palmdale, etc, on 34,000 acres. High speed transit Rail/BUS should then transport passengers to/from L.A. LAX should SHRINK not Expand! Here in Playa Verde I was taking PRISONERS SOUTHWESTERN (INSTEAD OF going out into the ocean) have caused significant noise recently.*

I live next to the airport and almost every airline is in violation of flying over the city of El Segundo and directly over the building I live in. I do not appreciate being woken up in the morning with planes flying over at 5:00am. I do not appreciate being woken up in the middle of the night with freight planes taking short cuts over my building! An increase in air traffic will drive me out of LA, and into Nevada. I have lived in El Segundo since the mid 1950's and have watched the airport grow and increase in pollution, traffic and noise. It's time for other airports to expand and take responsibility for the citizens that live within their boundaries.

**Re: proposed expansion of LAX vs. fair regional aviation system**

I support completely a regional plan to fairly distribute the benefits and burdens of air transportation across our region through a fair regional aviation system and thus avoid growth on the over-burdened LAX. However, to provide this regional aviation system is really practical, the reliable, effective, low-cost, and environmentally friendly ground transportation is crucial to reduce congestion and improve access to regional airports thus securing unconditional airport connectivity.

Since the ground public transportation technologies now being used (light rail/subway and bus/shuttle) can hardly - or even if- meet this need because of either the use of the same congested highways by buses/shuttles or expensive and prolonged construction and troublesome maintenance of dedicated railways, we, small but energetic group of specialists consisting of Mr. Alexander Uscolovsky, Product Developer, and Ms. Lena Levinson, M.S., Transportation Engineer at Caltrans, submitted the proposal to LA County Board of Supervisors (Mr. Antonovich) to develop and implement the safe, environmentally friendly, and cost effective transportation alternative within the Los Angeles region.

While relieving traffic congestion, air pollution, fuel consumption, and airport connectivity, this alternative offers cost effectiveness and the flexibility of the bus, as well as ridership appeal, travel time, and dependability of the dedicated rail owing to the use of passenger / cargo hovercrafts to connect any given destinations being located along the shoreline and the existing regional channel network, including but not limited to regional airports (LAX, Van Nuys, Burbank, John Wayne) and ports (San Pedro, Long Beach).

*Hovercrafts are vehicles which ride on the air cushion, whereby capable of high speed and comfortable riding. Great advantage of hovercrafts over conventional vessels is their being fully amphibious vehicles which are best applied to any relatively flat drying or shallow routes not requiring any infrastructure like dredged channels, docks, piers, etc. Namely such kind of routes is provided by existing channel network of Los Angeles. Therefore, hovercrafts should be ideal transportation alternative under these unique conditions of the Los Angeles region. Moreover, the confined cross section of the existing channels should promote effective protection against the vehicle's engine noise and enhance the hovercraft's efficiency due to reduction of scattering air pressure out from beneath the vehicle.*

*While having high performance, hovercrafts are distinctively environmentally friendly and safe, because: their excessive air pressure amounts insignificant figure (about 1 – 2 % of atmospheric one) and, while very unlikely to occur at all, they can hover over animals and birds causing no harm to them; their lower levels of noise are fairly mild so that wading birds often feed within meters of the hovercraft's routes; dedicated track (channels) and soft skirt together with air cushion produce bouncing instead of crash in very seldom collisions, thus providing with extreme safety proved by hovercraft's exceptional safe record.*

Commuter service into city centers (Downtown), regional airports (LAX, Burbank, Van Nuys, John Wayne), and to remote communities (say, Oxnard, Malibu, Santa Ana-Anaheim, Irvine, etc.), usual for the Los Angeles region, can be the most effective application of this hovercraft technology. Passengers of hovercrafts will enjoy cushioned comfortable ride at low levels of noise emissions, high speed, ultimate safety, assured dependability, and clean air of dedicated waterways, while being taken from remote locations directly to their destinations, including transfer from airports and tourist centers.

Thus there is an acute current need to develop the general design of the cost effective, safe, and environmentally friendly public transportation alternative for the Los Angeles region based on hovercraft technology to demonstrate its technical and economical merit and feasibility, and the possibility, within the resources and capabilities of Southern California to bring this alternative from the concept into the use. *The need might be met through creating a task team within the Southern California Regional Airport Authority for developing the preliminary general design of the proposed transportation alternative and concurrently coordinating the cooperation with appropriate governmental agencies involved as well as private enterprises like our Humans Preservation and Protection Fund just recently established and being in need of funding.*

Should you require further details on this proposal, we would of course be happy to supply this upon request.

Sincerely,

Alexander Uscolovsky, Vice President on Technology

Re: LAX Master Plan

Congresswoman Harman:

Thank you for your interest in the impact of the proposed LAX expansion and the critical and detrimental effects it would have for our community.

We recently purchased a home in the Playa del Rey community overlooking the wetlands, a natural preserve for the white egrets, the blue herons, the variety of the hawk family.

Currently, we hear the noise of the airport from early morning hours until late evening, with jet noise incessantly. Congestion from traffic on the 105 Westbound Freeway to exit for the airport (at Sepulveda - North) is present continuously. The beach in Playa del Rey is plagued so severely with air traffic that my husband and I must travel south to enjoy the beauty and serenity of the coast.

Permitting the proposed LAX expansion would increase airport traffic in and out of the airport (increase in travelers, and employees), congesting Sepulveda and the 105 Freeways; increase the jet noise overhead at the beach and in our home; destroy the natural home for so many species of wildlife in the wetlands. These are all detrimental and negative impacts that could be averted.

We would also suffer a decrease in our property value; a decrease in our value and quality of life in this community; decrease the beauty of one of the nations last remaining wetlands and wildlife preservations, all due to the proposed expansion of LAX.

Please help us to save our home, our community, our wetlands and wildlife preserve. We so desperately need your support and assistance in deterring the proposed LAX expansion.

I urge you to drive through our neighborhood and see the signs posted in protest of the proposed LAX expansion. To listen to the families, the residents of our community would mean preventing the proposed expansion of LAX.

Thank you again for your interest, time and effort.

Sincerely,

  
Kia Sinay, L.Ac. & Beau Elwell

PC03270

## FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Redondo Beach, CA. 90277  
Dear Congresswoman Harman:

The LAX Master Plan is a plan of intolerable congestion particularly surface traffic, noise pollution, etc. The surface traffic flow problem, i.e., passenger arrival/departure is the center of this situation. Adding runways will not help. Modernizing this situation with increased double decking, mass movement devices for transiting people could help but at great expense. Adding runways only compounds the situation.

The best solution is to expand the passenger handling capacity at BUR, ONT, SNA, with some assistance through commuter lines out of SMO, VNY, LGB, TOA, and RIV.

I have listened to a presentation of the proposed LAX Master Plan, courtesy of membership in the Aero Club of Southern California. In addition, I have been a licensed commercial pilot with multi-engine and IFR capability and have been operating a single engine aircraft under AARTC control since 1966. For 43 years, I was employed in Flight Test Operations, both administrative and operational, at Northrop Grumman Corporation.

You may telephone for any additional comments.

Sincerely,

Lawrence M. Rothrock

June 19, 2001

Congresswoman Jane Harman,

Everyone that is breathing knows about the current traffic situation on the West Side of Southern California.

Airport expansion must go to the areas where population is expanding.

The combination of Playa Vista and LAX expansions is a disaster waiting to happen.

From my experience (with a different project) the EIR treated the traffic problem with benign words that disguised the true scope of the problem.

I believe an expose' of the LAX EIR mitigation may be a good point of attack.

Dear Congresswoman Harmon,

I am writing this letter to encourage you to put an end to any Federal Funding that could go towards the funding of the expansion of LAX. I am familiar with many of the developments that make it seem that the expansion will not be approved. I am also aware of some things that are unethical if not possibly illegal in the effort by the Department of Airports (D.O.A.) to get the Master Plan completed. You'll notice I used the word completed, not approved.

Several years ago I was playing golf with a woman and the conversation turned toward the LAX Master Plan. Having been to several meetings about it I voiced my opposition to the plan and she told me that she was an attorney for the D.O.A. She further told me that at a recent meeting Jack Driscoll stated, "The plan was going to happen. It was just a matter of how much it was going to cost." This is a strange comment considering the long and lengthy process that was ahead of the D.O.A. before the plan could be approved. The Environmental Impact Study hadn't even been completed yet! Here are the reasons I believe Jack Driscoll made this comment.

- 1) The city/D.O.A. has continued to purchase land east of the airport where the extended runways would go if the plan were approved.
- 2) The D.O.A. has recently completed the widening of a taxiway, which required the widening of the underpass on Sepulveda Blvd. Also part of the Master Plan.
- 3) I have heard from other people that the plan is to continue the expansion piece by piece and not call it a Master Plan.

Has anyone looked at the last expansion plan and reviewed the result? Since I moved here in 1987 I had to do this and found some interesting things that go to the lack of creditability of the D.O.A.

- 1) The expansion plan called for the land on 3 holes of the Westchester Golf Course to be used for the LAX expansion. The course would be redesigned with the 3 holes replaced. Westchester Golf Course is still a 15 Hole Golf Course some 20 years later!
- 2) The expansion plan called for a light rail system to go into LAX. Twenty years later there is no light rail into LAX. When I pursued the answer to why I found out that after the plan was approved a study was done that found people would not use the train because their baggage would fall or lean up against their legs. I find this to be strange. If this reason was justification for not putting the light rail system in then why was the light

PC03273

rail system kept as part of the expansion plan? Was the report actually done before the expansion was approved and released the plan was approved because it had a negative impact on the expansion?

Now that it is clear that there is a creditability issue it brings me to ask these questions.

- 1) Did the Environmental Impact Report (E.I.R.) reflect the traffic impact including the Playa Vista Project traffic projections? If so, how do we know for sure?
- 2) Did the E.I.R. include all the significant expansions and repopulation of office space in the area? For example, just south of LAX on Sepulveda Blvd., several high-rise office buildings have been renovated or are in the process of being renovated. Many of these buildings are not yet fully rented.
- 3) Did the E.I.R. include the traffic from the 2,200 new homes that have been proposed by Boeing to be built on adjacent land to Long Beach Municipal Airport? Imagine the congestion around the Long Beach Municipal Airport, the 405 / 605 junction, and the 405 / 710 junction with this housing development and the increased traffic from the proposed LAX expansion.
- 4) Did the E.I.R. take into consideration the impact on traffic that the unofficial "Alameda Corridor" project would add? This unofficial part of the LAX Master Plan is to use the area along the 105 freeway to be developed into a light industry area for businesses that require warehousing and office space combinations. This plan as reported in the newspapers would create \$15 - \$20 per hour jobs. This is a good thing, but has anybody considered where these \$ 32,000 - \$ 42,000 a year employees will live? With this income they will be forced to seek homes to the east and northeast. This will put an even higher load on the traffic flow and roadway infrastructure. Has this been factored in? If so where?

The bottom line is any further expansion of LAX makes no sense except for the City of Los Angeles and a few developers. An expansion of LAX will help bring tax money in to the City of Los Angeles and huge profits to the developers on the inside track. The entire region will suffer from the over congestion caused by the proposed Master Plan expanding LAX. There are good solutions out there. We need only to look. This will only happen when the talk of expanding LAX is over. I urge you to get Congress to agree not to fund the LAX Master Plan. Then, and only then will we be able to take a rational and focused approach to solving the needs of Southern California's future air traffic needs.

Sincerely,

My wife and I are strongly opposed to the proposed LAX Master Plan for the following reasons:

Traffic

Even at the present level of passenger traffic at LAX, Sepulveda, Century, Imperial and Lincoln Blvds are barely able to handle surface traffic particularly at peak travel times. Any significant increase in passenger traffic at LAX could result in frequent GRIDLOCK forcing more street traffic into surrounding neighborhood streets in order to move at all. Altho we agree with developing a perimeter road around LAX and extending the light rail into the airport (where it should have been in the first place) this couldn't come close to solving the traffic congestion.

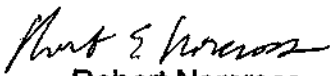

A related issue is traffic around the interior double decked airport roads. I would suggest members of the FAA try personally driving around those roads at current peak times and attempt to drop off or pick other FAA "passengers". Again this is at present levels of passenger traffic.

Noise and Pollution

The families in Inglewood, Hawthorne, El Segundo, Playa del Rey and Westchester have for many years borne the brunt of the noise and pollution of LAX. They have benefited by some reforms with quieter and less polluting modern jets but this trend would be reversed by an increase in take off and landings. This would be completely unfair to those living and doing business in the area.

We are firmly in favor of a regional plan for air transportation in Southern California.

Thank you for your efforts on our behalf.

Dear Ms. Harman,

I received your recent mailer. I am writing to let you know that as a resident of Playa del Rey I support the modernization and expansion of LAX.

The airport has not been improved or modernized since the 1984 Olympics. Unfortunately, LAX is a rather dismal gateway to our fine city. The surface transportation has reached near grid lock, with no end in sight. There is no reason to believe that the passenger volume will decrease anytime soon.

Given the fact that Los Angeles will continue to be desirable as a destination, how can we best capitalize on our success? My review of the Draft EIR indicates that the proposed ring road and extension of the green line to LAX are a great start to alleviating the present and future congestion. The addition of a terminal on the west end of the property will also assist in the redistribution of the passenger and automobile traffic.

Many of the arguments I heard in opposition to the LAX Master Plan are illogical at best. The suggestion that we divert air traffic to Ontario and Palmdale is unrealistic. When was the last time you flew out of Ontario? When was the last time an overseas tourist was destined for Lancaster? The Venice Boardwalk remains the #1 tourist attraction in Southern California. I operate a business in Santa Monica, and trust me, my clients are not interested in flying out of Ontario, John Wayne or anywhere other than LAX. Despite the incentives offered by LAWA, the public simply is not willing to travel in land. Although the population in the Inland Empire is increasing in leaps and bounds, it does not follow that passenger volume is increasing in a similar pattern. Passenger demand is still predominantly generated from Downtown to the Westside. Westside business needs a modern, efficient airport.

PC03275

Jane Harman  
June 9, 2001  
Page 2

The argument that an expansion at LAX will double the volume of cargo is equally flawed. The majority of cargo arrives in the bellies of passenger flights. The assertion that an increase in cargo volume will mean an increase in the number of large cargo planes at night is simply wrong. LAX could easily accommodate a two fold increase in cargo craft with no improvements. Cargo carriers do not need the surface improvements recommended by the LAX Master Plan. My clients, colleagues and neighbors do. Cargo carriers already perform much of their work at night, when the roads are relatively empty.

Last but not least, the Master Plan includes a new 18 hole golf course. The present 15 hole course is among the most used public courses in the State. A full 18 hole course plus an additional 9 hole course on the water would be a wonderful asset for Westchester and Playa del Rey.

Should you have any questions, please do not hesitate to call me.

Sincerely,

Rae Lamothe

Los Angeles World Airports  
LAX Master Plan Office  
P.O.Box 92216  
Los Angeles, CA 90009-2216

To Whom It May Concern:

I have been to the LAX web site to review the recommended plan for airport expansion and have the following comments:

1. The LA Airport has not been a good neighbor to El Segundo.

- Approval for the Imperial Cargo terminal was slipped in several years ago under questionable circumstances. It has been a continuing source of unwanted noise ever since.
- The vast majority of after-hours flights have always been scheduled for the south runways.
- Maintenance and landscaping along Imperial Highway have been lacking for more than the last decade.
- The provision of funding for noise mitigation was initially delayed and then tied to onerous conditions of acceptance.

2. There will be significant construction impact on the local area.

- The construction will result in major dust and dirt problems, and thus air pollution problems.
- There will be an incredible noise impact on the community, not only from the direct airport construction, but particularly from the construction of the extension of the 105 freeway into what appears to be an elevated 'ring road' around the airport. And, I imagine that this construction will be scheduled for more than just regular business hours.
- All of the construction will certainly result in substantial disruption to local traffic.

3. Once operational, the expanded airport will negatively impact the area in the following ways:

- Increased traffic.
  - There will be more traffic in general. In particular, this traffic will now be on an elevated roadway, flowing directly past the north side of El Segundo. I imagine that there will be as much mitigation of this noise as there is just east of us in the Del Aire area (none).
  - Not only will this increased traffic generate additional noise, it will generate additional air pollution.
- Increased cargo and passenger jet flights.
  - The LAX plan professes to not significantly increase the number of daily flights (current = 2235 (1996 base year), proposed = 2320). Who are you kidding? You expect to increase the annual passenger capacity by around 33%, and more than double (1.9 million tons annually to 4.2) the amount of cargo processed. This means more major aircraft takeoffs and landings.
    - This will result in more aircraft noise.
    - This will result in more early turns.
    - This will result in more air pollution from the aircraft.
  - There will be more engine run-ups.
  - Airport noise will extend further through the day and night.
  - On top of all this, the plan calls for moving the south runway fifty feet farther south, moving all this future noise even closer to El Segundo.

PC03276

4. Current maintenance around the airport is lacking; how much worse will it be with an expansion?
- I've already mentioned the lack of maintenance along Imperial Highway.
  - Maintenance on Pershing has been at least as bad.
    - It is often months between the time that a streetlight goes out and the time it gets replaced.
    - Street sweeping rarely takes place.
    - What little landscaping exists (by the World Way West overpass) is often neglected for years.
  - Street maintenance on Sepulveda is non-existent.
    - Just north of the Century Blvd overpass the road has been in a state of disrepair for years.
    - Some of the potholes are celebrating birthdays.

In conclusion, the airport expansion should be cancelled. It has been clearly demonstrated that LAWA and the city of Los Angeles are not able to properly maintain the airport in its current configuration. How much worse would it be with an expanded airport? It has been shown that they have no regard for neighboring cities. And, with the misrepresentation of the annual flight information mentioned above, it is clear that they are trying to deceive the public as to the true impact of the proposed expansion of LAX.

Thank you.

Sincerely,

Bob Streets  
756 Sierra St.  
El Segundo, Ca. 90245

Subsection (if applicable):  
Number: \_\_\_\_\_ Title: \_\_\_\_\_

<p><b>Comments:</b></p> <p>We are residents of Westchester, and therefore very concerned and very much opposed to the plan to expand the Los Angeles Airport. Not only will the expansion be detrimental to our neighborhood but to the surrounding areas as well. The expansion will increase noise pollution and air pollution, reduce safety, and aggravate the already bad traffic situation. In addition, your claims that it will "create new jobs" is criminally misleading.</p> <p>Those of us living in Westchester have learned to live with the level of noise generated by the airport. However, an increase in air traffic will make the noise levels intolerable. Not only will the noise affect those of us living in the area, but it will also affect our children. Concentrating on one's studies or listening to instruction with jets streaming overhead is extremely difficult if not impossible.</p> <p>Air pollution is a second major concern. Living in Los Angeles and breathing the air each day is bad enough without adding to the problem with more air traffic. The pollutants from jet fuel emissions will create more health hazards for us all. It is our children who suffer the most.</p> <p>Safety is a major issue affecting the residents of Westchester. The skies are already too crowded above Los Angeles. There have been too many close calls as it is. Adding more planes to an already overcrowded area is just asking for disaster.</p> <p>Finally, the expansion will create extreme traffic congestion in and around LAX. Just getting in and around the area, especially during peak hours is already very difficult. Los Angeles does not need more traffic in the already crowded streets near the airport.</p> <p>Your claim that expanding the airport will create new jobs is criminally misleading. In order to expand the airport, you plan to destroy many existing businesses. Expanding LAX will destroy existing jobs for "new" low-wage, civil servant jobs, and will likely result in no net job increase.</p> <p>The proposed LAX expansion plan is flawed. While it is necessary to manage the growth of air travel, it is clear that expansion at LAX is not the answer.</p> <p><i>Attach additional sheets if necessary.</i></p>	<p><i>Office Use Only</i></p>
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------

To Whom it May/Will Concern:

Re: AN LAX DEBACLE: THE PROPOSED LAX EXPANSION PLANS

Some years back, I became involved in attending airport commission hearings due to LAX purchases (via inverse condemnation) in the Emerson Manor area of Westchester. Back then at the meetings, I witnessed my submitted questions for the commission being hand shredded and pitched in the nearby round file. (By color coding the papers submitted, it became very easy to observe the destruction of my proposed questions.)

At that time, Clifton Moore was the LAX general manager, and he often referred to LAX being "a good neighbor" (unheard of now!) and about LAX staying at 40 million annual passengers. (Are you laughing yet? Some people believed Moore, but I was not among the trusting.)

Our Emerson Manor home was purchased by LAX after at least one insultingly low offer. We waived the condition that LAX had air rights as part of the sale. (Picture, if you will, a helicopter crash or otherwise during the escrow period. What then?)

The airport continues its disregard for surrounding areas of LAX and they continue to feel unanswerable to anyone or any government or civic/public agency. With more power, money, attorneys and time, LAX will continue its expansion and use any property, anytime, any way it sees fit for its own purposes.

As a result, the so called "Palmdale Airport" is more of an urban legend than anything else. Forewarned is forearmed. This "touch of history" goes into the record as notice/warning about Los Angeles "World" Airports ruthless approach to ruining any neighborhood.

It reads: their way at any cost.

I really miss my former auto license plate, BAH LAX. It was appropriate while registering for a commission meeting in "the tower." (I signed in with Red Ink for very good reasons!) Good luck and keep excellent records: phone conversations, dates, places (visited or proposed for destruction, er, re-use), persons--as the courts require accurate information.

Delay delay delay may just eventually read: delete delete  
delete expansion plans, so other outlying areas will be  
forced into sharing the greed and added "MAP's as well.

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Title:

Comments:

Office Use Only

I oppose the expansion of LAX. Updating the flow of traffic on the current plan using Shuttle buses and/or people movers is a great idea. However, the burden of future growth should be distributed regionally to other airports - not funnelled into LAX!

The fact that the list of individuals & organizations that support/endorse the LAX master plan is comprised solely of businesses & contractors leads me to believe that the LAX master plan is not in the best interest of the citizens of Los Angeles. It is the surrounding neighborhoods that will be negatively impacted with noise, pollution, & traffic congestion.

Stop making Los Angeles an  
ugly place to live!

RE: Proposed LAX Expansion Master Plan

Westchester and its residents should not have to suffer for all of Southern California. I grew up in Westchester, attended Westchester Lutheran School and twenty years ago, inherited the house my parents purchased in 1951. I have lived with increasing pollution from jet fuel and vehicles, increasing noise from aircraft, transcient traffic and cargo trucks, plus, year after year, the burden and stress of hearing expansion plans, and threats from LAWA as it slowly eats away at surrounding homes and the business district of my community. Now their sixty million dollar plus "Master Plan" suggests the Westchester Little League field down the street from my house would be just perfect for cargo facilities and an extended north runway. They are not going to take my house, my garden and my trees. I've had it and so have my neighbors who have LAX Expansion NO signs on their lawns. Our neighborhood is predominantly white, with house prices from 365,000 to 575,000 dollars, not the poor areas described in occasional L.A. Times articles.

One of my most vivid childhood memories is a woman being pulled out of her house on the corner of Kittyhawk and Interceptor by airport goons who had condemned her home for a parking lot. It was televised on local black & white TV. Then the house was bulldozed down in front of her. That's the arrogance of our neighbor, L. A. Airport. President Bush said in a recent radio address that home ownership is the most important and "hottest" investment in the American economy. The airport wants to destroy our homes and our business district to solve their problems. Their Master Plan doesn't even entertain the regional approach so the burden of air traffic and passengers is shared throughout Southern California.

The FAA, plus our local, state and federal elected officials, should demand LAWA focus on regional solutions with properties they already own, such as Ontario and Palmdale. Nearly 30 percent of LAX's current traffic comes from Orange Co. and, as it is considered one of the "growingest" regions in the state, a new airport using El Toro's land or expansion of existing facilities should be considered.

PC03280

However, an L.A. Times article June 17 reported that, although an airport in Orange Co. has many advocates and plenty of undeveloped land, many residents don't want it because of noise, traffic and pollution. The Irvine Co. is quickly trying to push through development of more than 2,000 new homes so a new airport can't be built on the land. How come new homes can't be condemned but ours can?

LAWA has owned more than 17,000 acres of flat, undeveloped land in Palmdale for thirty years, once earmarked for airport expansion. Send the cargo facilities and trucks there and eliminate the need for increased traffic and pollution in Westchester. Palmdale residents want the work.

Chicago has more than one airport, Kansas, Dallas and even Hong Kong had to build new airports away from residential communities.

Westchester has been forced to carry an unfair burden for more than fifty years. As California's population and air traffic grows, the FAA and LAWA are going to have to bite the bullet and focus on alternatives, to properties they own in Ontario and Palmdale, plus abandoned Air Force bases such as El Toro and other Southern California airports. Our elected officials need to be visible, outspoken and take a stand for us, their constituents and not allow LAWA to destroy our quality of life anymore: no extended north runway, which would take homes, businesses and a Little League field, plus alter flight paths over surrounding communities; no cargo facilities which would add to the noise and pollution of our neighborhoods; no expressway or ring road, which, with the already gridlocked freeways and surrounding streets, NOT mitigate traffic. The skies are already overcrowded and no amount of new facilities on the ground can eliminate concerns about air traffic safety.

LAWA has always been a lousy, intimidating neighbor and bully. But we're as mad as hell and we're not going to take it -- anymore.

Those of us in Westchester need our representatives to vigorously oppose all aspects of the LAX Expansion Plan and help us save the biggest investment people make: our homes.

Sincerely,

  
Cherrill Meyer

Congresswoman Jane Harmon  
811 N. Catalina, Suite 1302  
Redondo Beach, CA 90277

Dear Congresswoman,

Enclosed are the comments on the LAX Expansion Plan that we submitted. Long before the LAX expansion is completed, it will be obvious that growth at Palmdale, Ontario and Riverside will be necessary. That is where the population and business growth will take place during the next 15 to 20 years. So then we will spend many more billions in addition to the \$12 billion spent at LAX. It just doesn't make good sense.

We appreciate the work you are doing to make this a sensible and cost effective regional development. Incidentally, when you and had the AARP sponsored debate in Torrance, I was the person that asked what you would do in Congress to have an impact on the LAX expansion. I would say that you have gone beyond your statements that night. Thank you.

Yours truly,

Dean and Margie Lindstrom

LAX Master Plan, Room 218  
P.O. Box 92216  
Los Angeles, CA 90009-2216

#### COMMENTS ON THE LAX MASTER PLAN

1. **SAFETY** - - This should be a major factor in both LAWA and FAA considerations regarding air traffic. The number of close calls and diversions over our home is already at serious concern. Any plan or alternative should be subject to Risk Assessment. Risk analysis is used regularly in space programs as well as nuclear power and other fields. This should be a part of the expansion evaluations. Of course, it only takes reasonable judgment that the plan put forward by LAWA increases the safety risks over present safety considerations.
2. **TRAFFIC** - - At the present time, the travel time from Westchester to any other destination is difficult and time consuming. The increase in passenger and cargo flights will almost isolate those living in Westchester. The time required for people from north and south of LAX already is excessive; the expansion will compound. This happens to be one of our biggest concerns.
3. **CARGO** - - It just doesn't make sense to expand air cargo in this tiny area. It only makes sense to get the cargo as close as possible to the source or customer. Now a truck has to drive 125 miles north or south to make these deliveries. If no other changes were to be made, this is an important one for traffic, noise, pollution, and eventual cost.
4. **NOISE** - - While many homes are being soundproofed, the noise when we are outside and when we have windows open already is excessive. What will it be like with more flights. This has to be distressing to parents, teachers, and the children in the schools.
5. **AIR POLLUTION** - - Last year, we traveled by car (white) from California to Illinois. In that 3 week period, we traveled through the desert, through mountains, and on dirt roads. After 2 weeks in Los Angeles, our car became dirtier than on the whole trip to Illinois. Our windows and outside tables show the same effects. But more serious is what that pollution does to the human beings in this area. Figures for asthma and other allergies have shown the greater frequency of these problems near the airport. What about the school children??
6. **COMMUNITY** - - One of the statements made by expansion supporters is that expansion here will be good for business. I doubt that the 250 businesses that would be eliminated or moved would agree with that. The Ring Road is a terrible idea. It says to the people around that the El Segundo Blue butterflies and the cargo carriers are much more important than you. It really hurts to have this community destroyed in this way. When we moved into our house 42 years ago, the airport was on the east side of Sepulveda Blvd. Then it moved to within 5 blocks of us. Now they want to move the north runway another 300 feet closer to us. What is next?
7. **REGIONAL SOLUTION** - - Developing the air transportation to the north and east, as well as the south, will be required long before the LAX expansion can be completed. So then we will need many more billions in addition to that planned for LAX. Where is the growth in population? In Los Angeles county, it is to the north and east. Where will the business growth be? Where the people are - in the north and east. A regional plan is the only plan that truly will provide an efficient and safe plan for air transportation growth. This also will fit well with the plans of the State of California for building high speed rail in Southern California.

It so happens that we have been fortunate to have traveled to several other countries. Every other major city is expanding their airports well outside of the city limits. These include: Milan, Italy; Munich, Germany; Beijing, Shanghai, and Hong Kong, China. Why are they so far ahead of Los Angeles in this type of planning?

We are writing you with our concerns about the proposed LAX Expansion. We live on <sup>West</sup> 80<sup>th</sup> St across from the West Bluffs. We hear the run-ups of plane engines that are being serviced ALL NIGHT LONG! not to mention the noise during the day - especially if we are outside or have our windows open.

The traffic is awful with dangerous conditions on Lincoln Blvd. Cars are always running the red light in a hurry to get to the airport, plus all the expansion in the Marmes area with added cars, trucks & buses etc. as the we are being choked to death.

If the weather is overcast or starting to get foggy, the emissions from the planes is drably bad.

We are hoping that you will use other available land I.E. Palm Dale and Cerritos who would welcome development of their facilities.

Re: LAX Master Plan, Wolf in "Modernization"  
Date: July 31, 2001

To the Honorable Congresswoman Harman:

As a resident of Playa del Rey and hopeful future homeowner in the Westchester area, I very much appreciate your efforts to stop the LAX Master Plan. However, I am very concerned that the basic tenets of the Plan will be implemented under the new guise of "Modernization."

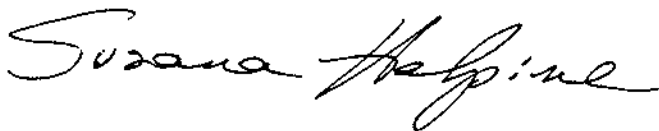

According to the LA Times article, "Regional Airports Likely Destination for LAX Overflow," many of the objectionable aspects of the proposed LAX expansion will take place in the name of "Modernization." (7/26/01, C1) And Westchester would still take the brunt of the expansion.

For example, the northern runway will move North, the ring road extension of the 405 will run along a residential area, and the travelers will increase to 89 MAP, which in turn raises the noise level and air pollutants. Aren't these the same unhealthy and unacceptable changes to our community that the Master Plan is proposing?

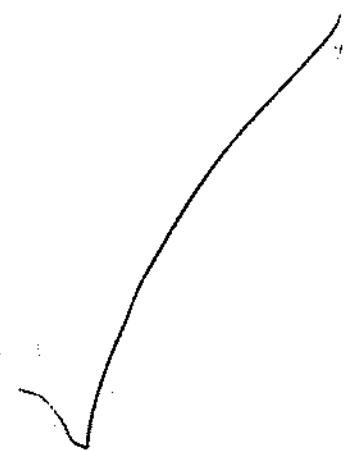

I, of course, understand there are very serious safety issues currently at LAX that must be addressed. On the other hand, Long Beach, John Wayne, Burbank, and the proposed El Toro airports all have caps on the number of flights. Why can't similar caps be implemented on LAX?

I urge you to stop the proposed expansion of LAX, whether its called the "Master Plan" or "Modernization."

Sincerely,

Susana Maria Halpine  
8640 Gulana Ave.  
Playa del Rey, CA 90293

① You ask how would we? We are now being subjected to all of the above. But in particular we can no longer enjoy the coveted Calif outdoor living. One prays for the marine layer to come in as it seems to elevate some of the noise. It is almost unbearable when the Santa Ana condition occurs. Come down & see for yourself. It is unbelievable & this is a constant noise with take offs & landings.

PLEASE I would like the same compassion for El Segundo & all the other affected communities as was shown to the few (by comparison) residents of Alt. who were disturbed by leaf blowers; they were disturbed an hour a week, but the council felt so sorry for them that they banned leaf blowers.

②

If only L.A. had half of that compassion + feel for us who live <sup>constantly</sup> with that problem.

El Segundo is a very nice family oriented community. It was here before L.A. expansion, starting with Menier Field. But little by little it has encroached upon us. Especially when it expanded to the West of Sepulveda + then building the longest runway to the South almost to El Segundo.

I have lived in my house a long time, this is my HOME. My husband was born in El Segundo. <sup>My 5 children would be</sup> I would rate to be forced out because of an ever-rising unhealthy environment.

I live in the city of El Segundo, a family community. We have enough pollution, we are between the refinery and LAX. The noise is annoyed. No money in the world could buy the health of my family. I do not support the LAX master Plan. I voted and supported you in the elections, because of your family oriented. The family is FIRST in life.

*There's no way that LAX can or should grow enough to handle the expected increases in air travel volume.*

*The regional airports should get the money and flights to serve their local populations. As a resident of Torrance, equidistant between LAX and Long Beach, I'd love to be able to take more flights from the Long Beach airport.*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

• This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport, Alliance for a Regional Solution to Airport Congestion

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*now. The plans are all a joke & no doubt unstoppable. This unfair growth burden on LAX (Westchester) is a criminal act on the "victims" who have lived here since 1962, in particular. Again, the rights of the little people are ignored in the name of "progress," & government revenues. The airport did it before, & now it will do it again! It all seems so hopeless to me, especially knowing how government has worked during the Clinton administration of neglect and corruption for eight years at the federal level.*

The traffic is maxed out already. The off ramps to the airport often has a long line.  
 The owners around El Toro don't want to accept the fact that some of the airport passengers & traffic must go from Orange Co.  
 If better control of noise & pollution from aircraft was enforced perhaps other areas would have fewer objections. Other cities main airports are far out of the city. Thanks for caring.

- of course expansion is ABSURD.  
 Last week it took me 25 minutes to get from the entrance of LAX to American Airlines Arrivals. Then it took me 35 minutes to exit the airport.  
 Please help!!

The only concern I have is traffic congestion. This problem could be solved by a simple change in policy: Require airline to report arrival times (and ETA) as the time the doors open at the gate, not the time of touchdown on the runway. Most people arrive at the airport to meet arriving passengers much too early. This is especially true for international arrivals because of delays in clearing customs. By the way, Denver is the worst airport in the U.S. I hate the long drive to nowhere.

As a South Bay resident, the LAX Master Plan would negatively affect my life as far as traffic is concerned. Traffic in Manhattan Beach, especially on Rosecrans due to recent development, is already very heavy and ~~so~~ this would only make things worse. People in Orange + Riverside counties need decent size airports to alleviate some of this congestion.

I agree that a regional airport plan is a much better idea than further expansion of LAX. I and my family live in Manhattan Beach, so obviously for our quality of life we'd prefer not to have the added pollution, noise, & traffic that expansion would include. The airport has no economic impact on me, & I don't feel that the viability of Manhattan Beach depends on the airport either.

Thank you for opposing further expansion at LAX

*The South Bay area is quite densely populated already + more homes + offices are being added constantly. Ex. Grand Ave in Redondo Beach 1 church property sold - 12-16 town homes built. Pollution - more people, more planes, more toxic fumes, Economics - more power, higher costs for utilities, roads, possible power blackouts. The Air Force has given an air force base to the City of San Bernardino, There are control tower, runways + maintenance facilities already in place. This airport is less likely to be closed by fog. It can serve LA + Orange County when these areas are fogged in as well as Mountain and desert areas, and results in these areas.*

*Dear Congress Woman Jane Harman*

*On my opinion, according to the above projections Denver does meet the need. It would build out an airport in the region that is eager for growth and it sounds like someone said to me, they would pass up \$5 billion to their region. This regional airport is great. What do I think? LAX is too busy now. Denver has more acres, Price Tag is cheaper, good location because of noise.*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

The traffic situation is a big problem - Lincoln, Sepulveda and La Tijera are only streets leading out of Westchester and are overloaded now - what will happen when or if the airport expands and Playa Vista is finished? Also the pollution now is so bad - my window sills and patio is black & greasy from the planes - I'm a 55 yr resident!

We oppose airport expansion. We already have terrible pollution from the airport from the fumes & the noise. The freeways <sup>& streets</sup> are not equipped to handle more traffic. not to mention the impact of Playa Vista on congestion.

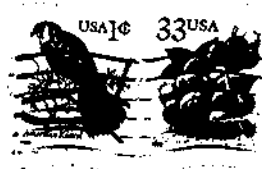

We got this letter after the meeting occurred. Do you want voter participation input or are you just paying lip service to your constituents?

Other areas should divide the responsibility of having increased air traffic. I live in Palos Verdes, looking out toward the ocean. More air traffic would bring more noise (day & night) there would be more pollution if fuel is dumped before landing. More danger of crashes. My property value would probably go down.

 The LAX Airport is already extremely busy and the traffic is horrible between 11am to 8pm. The parking is very hard to find, and it just seems like the airport is moving toward bad conditions. The new plan would bring even more noise, traffic, and pollution to our comfortable neighborhood. Ontario should be opened as an international airport as well as Palmdale. This would relieve us here. I strongly disagree with the LAX Master Plan!

The LAX Master Plan clearly overburdens the west side of LA with more noise, traffic, and pollution. My wife and I strongly oppose the Plan. We should enact a regional airport plan that addresses growth in outlying areas of LA. If this plan is enacted, our quality of life will worsen to the point where we will probably leave the state of California. Please find another more reasonable alternative!

*Ben,*  
 First of all, thanks for your involvement on this issue.  
 Secondly, I have just one question for LAX planners...  
 Why does ANY cargo come into LAX?? Ontario is the  
 logical location for cargo terminals, w/ all the trucking & railways out  
 there.... w/ no cargo @ LAX, passenger traffic could increase  
 and there would be little appreciable expansion needed @ LAX  
 and there would be little appreciable expansion needed @ LAX  
 simply RE-DESIGN THE IMPERIAL HIGHWAY corridor & call it good enough!  
 net traffic would be about the same (I'm guessing...)

*The Lax Master Plan.*

6-12-01

*It is unnecessary, we all ready have far to much traffic, Pollution and noise, I see nothing wrong with air traffic being routed to Palmdale.*

*Why are you trying to force this on us? are you thinking of us or is it greed? We people that live in L.A. pay Tax upon Tax every time we turn around, its time we should get some consideration on what we want, no expansion on the air port, Thank you*

CONGESTION IN AND AROUND LAX WILL NOT BE SOLVED BY EXPANSION. THE SOLUTION TO THE PROBLEM IN MY OPINION IS THE UTILIZATION OF AN AIRPORT (PALMDALE) TO SERVE NORTH LA COUNTY AND PARTS OF SAN BERNARDINO COUNTY AND THE KILBORN MARINE AIRSTATION TO SERVE ORANGE AND PARTS OF RIVERSIDE AND SAN DIEGO COUNTYS.  
A RAILWAY RIGHT OF WAY EXISTS BETWEEN PALMDALE AND L.A. UNION STATION THIS COULD BE EXPANDED AND WITH HIGH SPEED TRAINS, A LA JAPAN, THE TRIP BETWEEN THE PALMDALE AIRPORT AND DOWNTOWN WOULD BE SIGNIFICANTLY WITHIN A 35 TO 45 MINUTE RIDE. THINK ABOUT IT!

Congresswoman Harman,  
 My wife and I are 5 year Westchester residents - we are pleased to have voted for you the 96 & 00 elections. we will be adversely affect by the LAX Master Plan in several ways. ① Noise - though noise is an issue presently - it's only the reversing of runways or an occasional loud plane that dis turbes us. We investigated this before moving into our Airline Home. However, the master plan shows a runway extension over Sepulveda Blvd. This extension will place aircraft on the runway parallel to our home - we look at a house in a location that is similar (under the current footprint) and the outside noise was un bearable. The house had sound proofing but the outside deck noise was so loud you could not hold a conversation. ② Health - I am an Asthmatic - I found in AIR a suspected link between air pollution and Asthma - my condition was worse w/ more air traffic.

Page 2

③ Traffic - The Master Plan creates a new major through way on Airport Blvd near our home making our quiet street a logical alternative for those who want to get around traffic. The Plan also proposes a ring road that bring freeway traffic and noise closer to our home. ④ Economic - we were able to move into one of the last affordable areas in Los Angeles five years ago - we are both teachers and the rapid rise of real estate in Los Angeles prevents us from buying a similar home (2 bed + 1 bath) in the Los Angeles Area. We may be forced to relocate out of the city.

Thank you for your time regarding this matter.

Robert R. King

*Here is my opinion:*

*Have Orange County people traveling overseas and to East Coast to use El Toro Airport and not LAX. The LAX airport is too crowded now - why expand it. The only area that can be used is the Imperial Cargo area of the airport. However, there are too many tall buildings already built along Imperial Avenue.*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport, Alliance for a Regional Solution to Airport Congestion

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

To Jane Harman

I believe that LAX does not need much more traffic than it already handles. We already handle too much. at times it is a real mess, with all the crowding. I favor the scheme you and your group advocate for regional development on a national basis to divert more traffic to other regional air-ports.

WE HAVE 2 IMPORTANT THINGS TO ACCOMPLISH AT LAX. (1) PROHIBIT, AND ENFORCE NO, OVERFLIGHTS OVER BEACH CITIES. I AM COUNTING 4-5 MANY NIGHTS AFTER MIDNIGHT! AND I LIVE IN HERMOSA! (2) WE NEED BETTER SURFACE ACCESS INTO LAX JUST TO HANDLE EXISTING CAPACITY. EXTEND GREEN LINE, BUILD AUTOMATED PEOPLE CIRCULAR BETWEEN ALL TERMINALS AND EXTEND CENTURY FREEWAY DIRECTLY IN TO AIRPORT.

NO ON AIRPORT EXPANSION.

ITS HARD ENOUGH TRAVELING THE STREETS NOW.  
THE LAX EXPANSION WILL MAKE IT IMPOSSIBLE TO  
GET AROUND THE SOUTH BAY / WESTCHESTER AREA.  
OR EVEN TO EXIT THE AREA TO TRAVEL TO  
DIFFERENT PLACES.

Dear Jane Harman,  
 I worked in your office on Pacific Coast Hwy  
 manning a phone for your last election & will do so  
 again for your next. I totally agree, LAX should  
 not be expanded. Roads to LAX are already em-  
 garded & there is no relief in sight for them. Thanks  
 for your splendid work. The flying public need  
 help but also does the day by day working public  
 who must use the roadway & must suffer the delays.

*I am opposed to increasing air and surface traffic at LAX much beyond its present capacity. The money spent on this program <sup>perhaps</sup> could be used more wisely by upgrading outlying, underused airports and by providing efficient, low-cost surface transportation such as rapid or bus services linking them to each other and to metropolitan centers.*

I am strongly opposing LAX Expansion & the Arbor Vitae Expressway. I understand this would include making Airport Blvd. an expressway. We would be affected by so much more traffic, noise from the airport & increased traffic in the neighborhood. Pollution is a big concern for me & my family with the potential cancer it causes. Please don't pass the Expansion.

*I have been a home owner in the Westchester area since 1950. Have seen the airport grow from "Meris Field" to LAX. The time has come to share the traffic and pollution problems to other regions of the County. Spend the 12 billions dollars to the different areas which could create jobs. Did attend the June 9<sup>th</sup> meeting. I think the community said it all.*

*Same,*

*We must have a regional approach. LAX expansion will have a negative impact on our local community.*

*Regional airports like Palmdale and Ontario are the only true answer.*

*Having been a long time resident of Upland and Ontario, I would have welcomed the additional economic benefits an expanded Ontario airport would bring.*

*Congresswoman Jane Harman*

*We live about 1/2 mile north of LAX and when the airplanes take off the sound is unbearable when our doors or windows are open. We oppose the expansion of the airport because if it passes, could you imagine how much more noise it would begin to our area and it would cause use to move from this area which we dearly love. We hope they consider other areas such as Palmdale or Ontario for their expansion.*

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

I am in favor of developing regional airports.  
 I oppose the LAX expansion because the west side is already overdeveloped.  
 I am also very angry at the destruction of the "Balona Wet Lands". Shame on you and shame on me to let it happen.

*Enlarging the LA airport would affect me a lot I live right off old Imperial. Three houses from it. The noise is horrible even though I am nearly deaf. I moved to my home in 1942 when there was no airport. I gradually got worse as it grew. My husband went deaf. He is gone now. I also gradually got more troubled by the airport as it grew. The value of my house is less than it would be if it wasn't in this location. Please try to do all you can to stop this enlarging of it.*

*Expansion at LAX is unwarranted. Housing for employees near LAX is almost non-existent at a price employees can afford whereas housing at Palmdale is plentiful and reasonable. Our freeways near LAX are jammed, and traffic spills over into residential neighborhoods. Superhighway is impassable at every holiday weekend near LAX. Palmdale has the roads, schools, and potential for shopping that is not possible around LAX unless present homeowners are displaced and our neighborhoods bulldozed to accommodate trucks, terminals, & the services they need to support them.*

I cannot believe that the idea to expand LAX has ever gotten this far. The airport is already on top of so many stores and homes. We live in Westchester just north of Manchester, and the rumbling of the planes rattles our windows; granted they could stand to be replaced but the noise is constant. We can't have our windows open if we want to watch a movie in the evenings because the planes are so loud. When we first moved in a year ago, my 2 year old would become frightened whenever one of the louder jets would fly by. Also, my father has to do business in Santa Ana frequently but flies into LAX because there aren't as many options in Orange County. Traffic could definitely stand to be lightened through expanding the other air ports. LAX is plenty big.

I HAVE LIVED IN SOUTH BAY SINCE 1980. FIRST MANHATTAN BEACH NOW HERMONA BEACH. IN THE PAST 2 YEARS I HAVE NOTICED AN INCREDIBLE INCREASE IN AIR TRAFFIC OVER MY HOME. I AM TOLD THAT HB IS NOT IN THE FLIGHT PATH FOR COMMERCIAL CARRIERS, YET EVERY EVENING LIKE CLOCKWORK AFTER 12 MIDNIGHT - AIRCRAFT FLY OVER MY HOME - THE NOISE IS LOUD & DISCOMFORTING. I CAN'T IMAGINE WHAT AN EXPANSION IS GOING TO DO TO OUR LIVING CONDITIONS HERE. I USED TO OWN A HOME IN A NICE BEACH COMMUNITY - NOW WITH THE NOISE & INCREASED TRAFFIC I FEEL LIKE I LIVE IN NEW YORK CITY. I HAVE CALLED TO COMPLAIN ABOUT THE AIR NOISE & HAVE NEVER GOTTEN ONE RETURN PHONE CALL.

I WOULD BE HAPPY TO VOLUNTEER ON MY COMMITTEE THAT IS AGAINST THE AIRPORT EXPANSION. THANK YOU.

THE SOUTH BAY AREA IS ALREADY OVERPOPULATED, SATURATED WITH TRAFFIC, WAY TOO MUCH POLLUTION, AIRPLANE OVERFLIGHTS AT NIGHT (TORRANCE AREA) IT WOULD BE IRRESPONSIBLE TO PROCEED WITH THE EXPANSION OF LAX. THE ALTERNATIVE AND BETTER CHOICE WOULD BE PALMDALE AND PERHAPS ONTARIO

*To whom it may concern,*

I AM AGAINST THE LAX MASTER PLAN! MANY PEOPLE COMMUTE TO LAX FROM OTHER REGIONS. ~~WE SHOULD~~ WE SHOULD HAVE OTHER AIRPORTS IN THOSE REGIONS INSTEAD OF ADDING MORE CONGESTION TO LAX AREA. I LIVE IN MARINA DEL REY AND FREQUENTLY PICK UP AND/OR DROP OFF PEOPLE AT LAX. ON BUSY DAYS (SUCH AS HOLIDAYS OR WEEKENDS) IT IS SO BUSY AT LAX I CANNOT IMAGINE MAKING IT LARGER

June 2, 2001

Dear Congresswoman Harman,

my husband and I have lived in Westchester for 20 yr and 14 yr, respectively. We have two school-age children who attend a local school. Our children play soccer and Little League at Neilson Park near LAX. We are involved in our community, our church, our children's school and their sports programs. We live in a lovely neighborhood with wonderful neighbors whom we know and care about. The expansion of LAX with the added noise, pollution, traffic and congestion would destroy so much of what we cherish in Westchester. Please vote against this.

*As a resident of the So. Bay for over 70yrs. I have witnessed many changes, some very desirable, some not. I feel the proposed expansion of LAX would have extremely adverse effect on the area. Traffic congestion which is already bad could come unbearable, probably expanding to outlying areas and making a bad situation even worse.*

*Air quality, which is now quite good could be severely effected. I truly believe spreading the benefits and burdens around the area is the best solution from the following stand points:*

*Fairness, Efficiency, convenience and Common Sense.*

Traffic is already so terrible around LAX - it's a bottleneck on the 405 already - I say, let's keep LAX the same it is, and give people more flight options out of Burbank, Long Beach, etc.

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

## WHAT DO YOU THINK?

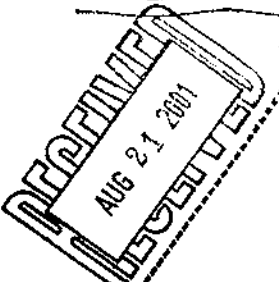

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*Thank you for your support against the LAX expansion. The master plan will create traffic problems on the freeway b/c all of LA should not be flying from only 1 major airport! I'm sure moving the runways closer to residents will increase noise + pollution*

- ① Increased Traffic in an already congested area
  - ② Increased noise from above & below (planes & cars)
  - ③ Pollution is always accompanied by an increase in traffic - Now add an increase in Air traffic - sheer madness
  - ④ THE ECONOMIC IMPACT is negative - Travelers only. increase Business for Hotels & Restaurants - minimal impact on ancillary business because the travel to other areas to get away from, guess what? noise, traffic & pollution away from the airport.
- Use your influence to open other Air Ports in ORANGE COUNTY & Riverside. Enough is enough in the South Bay

*I have lived in Los Angeles for nearly 30 years and have watched noise and traffic around the airport increase to unbearable levels. Because it is located so close to the beach areas any expansion would further pollute and destroy what is left of one of the last serene areas in Los Angeles county. Please do not build anymore when so many other logical options are available!*

I'm in favor of regional airports, by the time they get through expanding LAX - the cost, time & inconvenience, & traffic, it will be too small again! And what about the streets leading to LAX? Are they going to enlarge all the streets to handle the growing traffic?

I BELIEVE Inglewood would be at a disadvantage with the addition of additional structure at the LAX site. Roads are too narrow to support the additional commutes. Plus the noise level of the new or overhauled aircraft could cause great incidents with the routes and extra flight flights diverting the expansion will greatly draw youngsters toward the job market in the east of LA.

Dear Ms. Harman

I live in Westchester, an old established neighborhood. The traffic and pollution is already very bad. Sepulveda is a mess most of the time. There are a lot of retirees here who are affected by the traffic and pollution. The homes are expensive and we deserve to live in some peace and quiet, which is why we bought here in the first place. The load should be spread around to the other airports. Also object very strongly to the plans for Arbor Vitae and opening up Airport Blvd. Airport Blvd. is 1 house away from me. We now walk our dogs and walk for exercise in peace. This would be totally destroyed, bringing in strangers, crime etc. Please help us.

Dear Congresswoman,  
 I have lived in the south bay most of my life. I have noticed in the last few years a dramatic increase in noise from LAX. I recently had a baby so I am up many times throughout the night and I can hear planes flying above all night long! The LAX officials are totally lying if they say no planes fly over Hermosa Beach in the middle of the night (I day for that matter). I am so saddened to find out that the people that are supposed to be protecting our environment and way of life here seem to be on "vacation". I hope you can do something to protect our community. You have my support if you do.

*We are greatly concerned about the current plan for airport expansion. The recent studies regarding safety at LAX would indicate that more planes will only increase the unsafe conditions. "Near misses" could easily become more frequent and increase the chances of catastrophic events. As frequent users of LAX and the Sepulveda Blvd corridor we can imagine how bad the effects would be on local traffic. There is no place to accommodate more traffic and it is already a serious problem in this area. We would be seriously impacted by additional traffic in the Bull Terf. ## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*\**

Expansion of LAX would severely impact my neighborhood in every aspect, traffic, noise and pollution. I would have to move as it would render my condo unlivable.

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

• This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0

*I have lived on 76th St in Westchester since April of 1949. The changes caused by LAX, expansion are to numerous to mention. Noise, Pollution, Traffic conditions, must be looked into and improved. Strongly support development of other airports, such as Palmdale and Ontario. It is grossly unfair to expect the residents of our local and surrounding area to sustain additional upheavals and loss of businesses.*

LAX IS MAXED-OUT. EXPANDING LAX ONLY MEANS MORE NOISE, CONGESTION, AND POLLUTION FOR SOUTH BAY RESIDENTS.

Dear Jane,

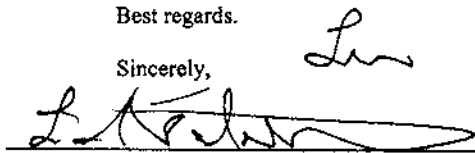

As usual, you are ahead of the curve! Anyone who has traveled somewhere from LAX knows that it is now a congested mess. To increase it roughly 50% from the present passenger figures, would intensify the traffic and other congestion and would not fairly allocate traffic to other airports such as Long Beach, Ontario, John Wayne and the El Toro Air Base, since an increasing percentage of LAX passengers come from Orange County.

The only way that these traffic loads can be fairly allocated among the various airports is to adopt a regional airport plan rather than putting all of the growth pressure on LAX.

I believe what you are doing is supported by the vast majority of people in the South Bay.

Best regards,

Sincerely,

*We live in East Torrance and I believe we would be affected by the noise of jets going over which we get now at any time of night, which fly real low, and wake everybody up. I'm sure we will get some pollution from this also. As you know we already have plenty of traffic around here. While I am sending this to you try to get the potholes fixed and the streets are rough driving. Thank you for all you are doing. We appreciate it.*

It just does not make sense to over-burden an already congested airport. This applies to air and ground transportation.

It does not make sense to have people drive long distances to arrive at a congested airport.

It does not make sense to have people driving on already congested freeways to reach the congested airport.

It does make sense to enlarge other airports and to make airports more accessible to all people living in other areas.

Way to go, Jane Harman! I'm all in favor of the Regional Plan.

The South Bay Beaches will be further affected for traffic, noise and pollution if the LAX Master Plan is adopted.

I may be a dinosaur, but I would like to suggest that we humans need to put the brakes on population growth. Sure, technology often comes to the rescue in obvious ways like nuclear power plants in California at great monetary cost and great cost to the environment but regional planning would do well to consider reasonable limits to human population as well as reasonable uses of the environment. More is not necessarily better. Good luck in dealing with the many problems facing lawmakers and citizens alike.

TRAFFIC With Completion of Playa Vista and Howard Hughes Center, traffic will be grid locked during peak hours. LAX expansion would greatly add to the misery.

NOISE Have you ever lived in a house close or near a "747" get ~~to~~<sup>aircraft</sup> revving up?

POLLUTION Noise and air pollution are already high within @ mile from LAX. Expansion would greatly exacerbate the problem.

ECONOMICS Expansion will bring in marginal businesses and will reduce healthy economic growth.

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*We should distribute the traffic to other airports. Maybe all cargo could go to Tonto and only passenger traffic to LAX. Other airports should be opened up. There must be no further burden on the residential areas around LAX. Let Orange Co. get involved and share some of the load! It's noisy enough here in Westchester!*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

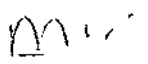

Sources: Los Angeles World Airport; Denver International Airport, Alliance for a Regional Solution to Airport Congestion

Dear Mrs Harman - Thank you for getting involved and showing your concern. 4 blocks south of the airport. The airport is already very loud so I think if they did expand it would be much worse and I'm afraid our home value would go down. We have a lot of black "fuel" buildup on and around our home. I hope some other airports can take up the slack. Limit the cargo planes - Fed ex, ect. TO Fly out of Palmdale and use LAX only for Passenger planes?? Thank you for your time -

Dear Ms. Harman, the LAX Master Plan has got to be stopped. I have lived in El Segundo for almost 30 years and every day I am reminded of LAX, when I breeze the air and hear the noise. It is unthinkable to have an increase of airtraffic and cartraffic due to what the LAX Master Plan stands for. If we wouldn't have alternatives i.e. other airports in the area, I could understand if one would choose LAX. Please do everything possible to stop this insane future planning. Thank you, Trudy Noble

- I DON'T BELIEVE YOUR FIGURES THAT PREDICT VERY LOW GROWTH FOR WEST SIDE AND SOUTH BAY. FOR INSTANCE NEAR MY SON'S HOUSE (CLOSE TO NATURAL AND SEPULVEDA) EVERY THIRD HOUSE IS EITHER BEING REPLACED BY SOMETHING MUCH LARGER OR IS UNDERGOING MAJOR ADDITIONS. NEAR WHERE I LIVE (HARMON DEL REY) NEW APARTMENT/CONDO CONSTRUCTION IS 4 AND 5 STORIES, IN CONTRAST TO MY 2 STORY TOWN HOUSE.
  - EVEN IF LAX CAN BE MODIFIED TO HANDLE MORE TRAFFIC, STREETS LIKE LINCOLN BLVD WILL BE CONTINUOUSLY OVERLOADED ALL DAY AND EVENING LONG. ONLY A MAJOR MASS TRANSIT SYSTEM COULD PROVIDE RELIEF, BUT COST WOULD BE PROHIBITIVE - POPULATION DENSITIES ARE STILL NOT HIGH ENOUGH.
  - AS FAR AS I AM CONCERNED, I DO NOT WANT ~~TO~~ LA'S POPULATION TO INCREASE. I SEE NO BENEFITS TO ME, ONLY A LOWERED QUALITY OF LIFE.

*Enlarging LAX would create many more problems than developing in less densely populated Palmdale area. It would also create jobs in that region that are needed by families living there. The noise, congestion and disruption around LAX is already at a breaking point. Please expand in an area that benefit in so many ways. I was raised in Hawthorne & now live in Torrance. I did live in Apple Valley for seven years and saw the needs there in the high desert.*

*Realign the distribution of passenger and freight*

1. Use Lancaster for all freight, both both international and domestic. Its locality is placed near interstate highways in all directions.
2. Use Ontario for passenger service to the inland empire
3. John Wayne airport orange county Passengers
7. Burbank and Long Beach for passengers in their respective areas.
5. Lax for international only.
6. All airports to be connected by the speed rail

Local surface traffic affects the surrounding area including the Pacific Coast Highway leading to LAX.

Expansion of LAX means more scheduled flights resulting in more surface traffic. LAX appears to ignore the surface problems already in place with apparent no thought to future handling.

Airlines should be made to use other regional Airports as their base operations-- i.e. British Air uses Heathrow--Delta Air uses Gatwick. Such assignment of carriers ought to be designated to other local regional airports as in the London example.

Along with that should develop high speed rail connections to all airports--we cannot rely on freeway access--presently overused and often fraught with dangerous conditions.

Concerned,

JOHN L. WHITMEYER

*A system of regional airports encompassing all of southern California is the only way to go! LAX is as big as it ever should get. LAX handles a huge volume of air traffic on a relatively small piece of land. The traffic problems at LAX already resemble "a 800". To enlarge LAX will create a situation bordering on "chaos". It is already not a pleasure going there! The increasing volume of air traffic must be spread around to other airports! I'm 64 years old and have lived in L.A. all my life. L.A. is famous for being short-sighted when looking into the future. So, my vote is NO on the LAX MASTER PLAN - YES on A REGIONAL AIRPORT SYSTEM!*

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*The airline industry needs to rethink its "spoke & hubs" systems which forces 90% of the US air traffic through a few large hubs. There needs to be more - point-to-point service which better utilizes the nation's total airport capacity. Then when LAX needs expanding to support its local area needs - then by all means - I support it.*

## FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport, Alliance for a Regional Solution to Airport Congestion

*I am completely behind Jane Harman's plan for a regional airport alternative. Let us implement the original So. Cal. Regional Airport Authority, and give priority to airports eager for more growth like Palmdale and Ontario. LAX is absolutely BIG ENOUGH — no further expansion is needed there.*

Judging from the trial flight patterns the FAA has allowed commercial air carriers to experiment with, I would surmise that expansion would negatively impact our quality of life in Redondo Beach.

I purchased my home in So. Redondo, to be close to work, yet far away from undesirable noise.

I have adjusted to the noise from Torrance Municipal Airport (although it sometimes allows private jets), but I believe expansion @ LAX would be an unnecessary imposition on our health & safety.

I have been scared out of bed in the middle of the night by commercial aircraft, by sound levels I believe greater than 100db. Flying very unusual flight patterns. Although these have subsided in recent months I have a grave concern these disturbances would resume if expansion is allowed. I strongly support focusing on exploring the expansion of Palmdale & Ontario & Heaven forbid "El Toro" along with the infrastructure to accommodate transportation to these hubs. I have enclosed disturbances I have experienced for your review, please be assured you have my complete support for what ever alternative you can develop.

We are opposed to the expansion of LAX! We support regional airports. Our community already is plagued with air pollution and noise pollution.

We are planning on moving from the area because of the air & noise pollution. But for our neighbors sake, we want no more growth.

*We live near Lincoln Blvd. in Venice where traffic has become increasingly dense in recent years. Currently it takes 40 minutes to travel less than 5 miles during peak traffic hours. For this reason alone the impact of further airport expansion does not make sense. The smart thing to do is to expand Palmdale and Ontario Airport while offering low cost shuttle transportation to these areas.*

*In addition, the noise pollution created by evening airport noise has become intolerable. In the summer we are forced to keep our windows closed at night to quiet the "air rumble" of airplanes overhead. We have put our lives on hold into our modest home and cannot afford to - up and leave - due to the noise pollution. We commend you government officials who would say "No to LAX expansion." Please keep your promise.*

*I commend you for a job well done! I work at LAX. I work for the INS as an immigration inspector. I see firsthand the millions of people suffering at LAX due to over congestion. It has taken me 2 hours to find a parking space. Tom Bradley Terminal can not accommodate any more passengers. Please, lets me; do not expand LAX. Expand Ontario, Palm Springs, and John Wayne; I am at the point of such frustration over overcrowding that I do not look forward to the summer season. Help us!!*

*LAX HAS ALREADY DESTROYED 10,000 HOMES AND FORCED THE CLOSURE OF TWO PUBLIC SCHOOLS IN THE WESTCHESTER AREA. NOISE AND TRAFFIC HAVE TAKEN A HEAVY TOLL ON SURROUNDING COMMUNITIES AND CAUSED LOSSES IN THE BUSINESS DISTRICTS THAT HAVE NEVER BEEN COUNTED. TO CONTINUE FURTHER EXPANSION COMPOUNDS THE PROBLEMS WE'VE HAD TO FACE FOR THE PAST 30+ YEARS. GROWTH IN SO. CALIF EXTENDS BEYOND LOS ANGELES AND OTHER AIRPORTS MUST CARRY THEIR SHARE OF THE CARGO AND PASSENGER LOAD. TO CONCENTRATE MORE ANTICIPATED GROWTH AT LAX, TO THE TUNE OF \$12 BILLION, IS SHORT-SIGHTED AND FAILS TO SERVE THE NEEDS OF SOUTHERN CALIFORNIA'S TRAVELING PUBLIC. THANK YOU, CONGRESS WOMAN HARMAN, FOR YOUR EFFORTS ON OUR BEHALF.*

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

*I oppose a "regional" airport plan which would spread the problem, increase activity in small airports, spread pollution and noise to more residential areas, decrease property values, create dangerous flight patterns and generally make life obnoxious.*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport, Alliance for a Regional Solution to Airport Congestion

As a resident of Palos Verdes Estates, I strongly object to any increase in the size and capacity of LAX.

Statistics showing the number of daily flights arriving and departing the LAX airport are frightening, and the confusion and traffic that a passenger presently experiences are sufficient argument against any enlargement.

I have arrived and departed from airports in Orange County, Salt Lake City, Boise, Idaho Falls, Billings and West Yellowstone. With the exception of Salt Lake City, the ease and pleasure of traveling small airports bear no comparison to the present unpleasant confusion and delays at LAX.

LAX should not be allowed to enlarge when nearby satellite airport sites are available.

JUN 13 2001

*Do not believe in "LAX masterplan" - Inadequate,  
Believe each and every airport should be  
developed to the fullest capacity - planning for future  
use.  
Impact on Community: Very Important! Note!  
How & where the planes shall fly is important -  
Insurance on property does NOT cover any damage  
occurred by airplanes, shall have to sue City County  
and state, the for damages for lack of air controls.*

*WE SHOULD RELOCATE ALL FREIGHT OPERATIONS AWAY FROM LAX & MOVE THEM TO PALMDALE, THIS RECOMMENDATION WAS POSED TO THE LAX MASTER PLAN OVER 20-YEARS AGO BY THOMAS W. FLOYD WHO DID AN IN-DEPTH STUDY OF THE MASTER PLAN IN HIS ROLE AS A SYSTEMS ANALYST FOR THE NORTHROP CORPORATION. MR. FLOYD INDICATED THAT MORE THAN 20 PERCENT OF AIR TRAFFIC AT THE TIME WERE AIR FREIGHT OPERATIONS. HIS STUDY RECOMMENDED MOVING ALL OF THIS LOAD TO PALMDALE, LONG BEFORE THE 14 FREEWAY WAS BUILT & WITH THE AVAILABILITY OF RAIL SERVICE TO PALMDALE, THIS PROPOSAL MAKES EVEN MORE SENSE TODAY. OUR SURFACE STREETS ARE GRID-LOCKED, A GOOD DEAL OF WHICH CAN BE BLAMED ON THE VERY LARGE NUMBERS OF TRUCKS CARRYING FREIGHT BOUND TO AND FROM LAX.*

DEAR JANE - WE ARE PLEASED TO KNOW OF YOUR STRONG OPPOSITION TO THE PROPOSED LAX EXPANSION, OUR VIEW THAT ONE POSITIVE WAY TO SOLVE SOME OF THE PROBLEMS IS TO COMPLETELY ELIMINATE ALL AIR FREIGHT FROM LAX. IN SO DOING THERE CAN BE ADDED TERMINAL SPACE, MUCH LESS AIR TRAFFIC, AND CONSIDERABLE EASING OF TRAFFIC ON THE 405 CAUSED BY TRUCKS THAT DELIVER AND PICK AIR FREIGHT FROM AND TO LAX. MOVE ALL AIR FREIGHT TO AN AIR FREIGHT TERMINAL IN PALMDALE, ADD MORE PASSENGER SPACE TO ONTARIO - AND PUSH HARD FOR THE OPENING OF AN ORANGE COUNTY MAJOR TERMINAL AT GILBERT. WE HOPE SOME OF THESE IDEAS WILL FINALLY GET ACROSS TO THE "MR BIGS" IN WASHINGTON - AND WESTCHESTER CAN ULTIMATELY REMAIN THE COMMUNITY WE HAVE LIVED IN AND ENJOYED FOR OVER 50 YEARS.

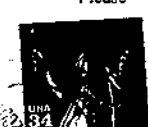

THANK YOU -

### WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

My big concern is the traffic congestion. I fly LAX maybe once a month and notice buses from as far away as Santa Barbara and Disneyland. Let's spread the impact - good and bad - to our neighboring counties. I would support rail service from LAX to Union Station (downtown).

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

DEAR JANE

HAVE ATTENDED 3 MEETINGS AGAINST EXPANSION. ALL THE ARGUMENTS ARE VALID AND VITALLY IMPORTANT TO OUR CITIZENS WHO LIVE AROUND THE AIRPORT. ABOVE AND BEYOND THE HEALTH & NOISE ISSUES, I'D LIKE YOU TO INCLUDE IN YOUR ARGUMENTS THE BREADED POSSIBILITY OF A "BRAIN & POPULATION BRAIN". I SEE AND HEAR FROM THE PROFESSIONAL PEOPLE <sup>THAT</sup> THEY WOULD MOVE OUT OF THE AREA RATHER <sup>THAN</sup> LIVE WITH NOISE & POLLUTION. ALL OF OUR UP-GRADED NEIGHBORHOODS WOULD SOON BECOME DOWN GRADED, AND THAT WOULD SERIOUSLY AFFECT OUR VOTER ATTENDANCE.

6-9-01 / Dear Sirs:

I concur with Congresswoman Jane Harman's position statement on the reverse side of this form. In particular, the air pollution from more flyovers to this area concerns me as a medical provider. After living in L.A. Co. for 23 years, I've been treating an increasing # of new asthma cases, included adult-onset in nonsmokers. Unfortunately, I have also become one of those health statistics. In addition to its many other attributes, my husband & I chose to buy our single family house in Manhattan Beach because of its relative lack of air pollution & usual presence of ocean breezes. I breathe easier here. Why should we pay so much to live in a place where this vital health aspect can be destroyed @ LAX expansionists' whims? Thank you for listening to Congresswoman Jane Harman & her coalition. It just makes health sense.

Respectfully,

The critical problem is RUNWAY INCURSIONS. LAX has the highest and growing number of near-collisions on the ground. Remember when the controllers landed the USAir 737 on top of the Skywest Merlin/Metroliner? I fly out of LAX 2-3 times a week. Twice w/ the last year we had to go around at the last moment due to an incursion (once on United, once on Frontier). With Lanson 767-400's, 747-400's, 737-800's etc. we could easily have 300-400 dead, and statistics don't lie - the accident will happen and probably soon. Construction will only increase accident probability. Palmdale should have been developed + linked by high-speed rail 20 yrs ago.

I've looked over the area surrounding LAX, and I see no way to expand it without moving a lot of people out at great inconvenience and astronomical expense. There are several possibilities in the San Bernardino-Riverside area. The old Norton AFB (now S.B. Airport) and there is a county airport out in that area, too. The county airport I used to pass on my way to California City. Also California City was actually established 20 years ago to handle housing for people who would be working at the Palmdale expanded facility - supposedly to take part of the load off of LAX. I understand they had even constructed a tunnel at some point to facilitate rapid transit to Los Angeles. I am sure that one of those facilities would be a much more adaptive alternative to further expanding LAX.

P.S. Vote to drastically cut immigration and to secure our borders.

*I wholeheartedly agree with Jane Harman's position in opposition to the proposed LAX Master Plan. The issue of air transportation should be a regional issue, with all communities sharing in the benefits and the burdens. Let's develop a visionary plan that includes increased use of Ontario Airport, Palmdale Airport, March AFB, El Toro, and John Wayne Orange County Airport. Plans should include coordination with ground transportation and aggressively combat "NUMBY" attitudes in Orange County. The LAX area already has too much ground traffic, noise, and pollution.*

*At present, one of the greatest problems at LAX is the traffic; if you have ever had to drive around and around the parking terminals, you can understand the frustration of delivering or picking up anyone. Any expansion at LAX would only compound the problem. The fare off and landing does not bother me, but, with expansion it could. Go for regional - Palmdale needs the jobs -*

Dear Jane Harman,

I agree that we should utilize Regional Airports, rather than to continue to expand LAX. Additional growth of LAX will certainly increase traffic, pollution and noise, which we surely don't need. LAX should stick with its current boundaries, and not expand any more. Traffic around LAX is already excessive, and further growth of LAX would only produce more.

sincerely yours,

*I live in Playa del Rey. The noise from LAX makes it hard to talk on the phone with the windows open. Every few weeks I have to wash the grime off the house from the jet exhaust. More runways would only add to this problem. I feel that we must regionalize the airport system. Under the current system, traffic on Sepulveda + the 405 freeway is always heavy into LAX. And driving around inside LAX to pick up passengers is unbearable. From my house it takes me 10 minutes to reach LAX but 30 minutes to drive the circle once. We need to establish rail links between the airports and union station, and high speed rail should be used instead of commuter flights on heavy routes, as recommended by the RAND study*

*The problems of air travel to and from So. Cal. will not be solved by enlarging LAX. The construction alone would cause chaos. More trucks on the 405 - thanks but no thanks! So. Cal. needs a huge inland airport where there is space to provide support services and room for future expansion. If steps are not taken soon to get a large inland airport the growth of those possible sites will preclude ever getting a proper site.*

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation needs:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres

Sources: Los Angeles World Airport; Denver International Airport, Alliance for a Regional Solution to Airport Congestion

## WHAT DO YOU THINK?

Please use the space below for comments on the LAX Master Plan. How would you be affected by traffic, noise, and pollution resulting from the airport? What economic impact does the airport have on you and your community? You can mail this form back to my office by folding it so that the return address below is visible, or faxing it to 310-372.1622. If you need more room, feel free to enclose additional pages with your name and address.

We live on The Strand along the Ocean in Hermosa Beach. The fly-over and noise problem has gotten progressively worse over the last few years! We hear the noise late at night and in the early morning hours, which interrupts our sleep. Our Hermosa Beach City Officials have been fighting this but apparently with no progress. This is even before any increased LAX expansion, which would obviously bring in even more traffic and noise. We also have concern about the increasing probability of catastrophes over our beach and our own home. Clearly, all of this devaluates the value of our million-dollar-plus properties in this area!

We appreciate your concern and look forward to a solution to the current problems as well as an acceptable alternate to the currently flawed LAX Master Plan.

*I do favor the Regional Airport Authority approach. Expansion of LAX would not affect me directly but even with the "improvements" made in the past it is a mess. We all have stories of our trials meeting passengers or trying to get out ourselves. The comparison with Denver doesn't even fair. We have nothing like the 34,000 acres there. It is a pleasure to use their facility.*

June 27, 2001

Dear Congresswoman Harmon,

Thank you for your steadfast opposition to the expansion of Los Angeles International Airport. After attending a city meeting in El Segundo, hearing from concerned citizens in other communities near the airport, and reviewing the LAX Master Plan, I am convinced that it is a large step in the wrong direction for the people and infrastructure of Los Angeles.

The airport is a great facility, but it should not be allowed to grow. Demographic studies for the Los Angeles/Southern California basin show that population growth over the next 30 years is expected to occur in Riverside and San Bernardino counties, to the largest extent Los Angeles is far removed from these locations. We should not service the needs of outlying areas by expanding the facilities of a central hub. Like we are learning with the recent power (electricity) crisis, a decentralized structure is less subject to the vulnerabilities of "putting all of our eggs in one basket." Applying the analogy to LAX, further concentrating the mechanical activities at LAX will lead to increased issues of congestion on our already gridlocked freeways and avenues (eg, the 405 freeway and Sepulveda Blvd, plus the ancillary connections), not to mention the near ceaseless drone of planes. Looking at most military bases as a design paradigm, there is a reason that they are sited away from urban areas, and it is not solely due to security; it is due to issues of noise pollution. Living on the south side of LAX in El Segundo, I hear a barrage of hums and roars day and night. Most of the time, I can ignore them, but if airport traffic were to further increase, it would be thoroughly overwhelming. I fear that an expansion of LAX would be economically damaging to the city of El Segundo, not to mention other communities on the LAX perimeter.

Concerning airport operations, I believe we should have the air traffic distributed more equivalently between the many communities in the Los Angeles Basin. For citizens that live in Palmdale, CA, I

or Orange County, traveling to LAX is a burden, given not only the geographic distance but the severe roadway congestion at virtually all hours. These people deserve facilities that are within closer reach. Furthermore, for the economic growth that is concentrated in these outlying areas, the transport of freight via air is much more logical and energy-efficient if it were done at terminals much closer to the freight destination.

From all large view perspectives, the proposed expansion of LAX described in the LAX Master Plan would be an extremely poor economic, social, and energy-minded decision. It does not make sense for an economically and architecturally mature city like Los Angeles (proper) to increase its number of runways, buildings, noise, and diesel pollution for the benefit of fringe communities. In fact, municipalities such as Palmdale are actively seeking increased airport service. For the people and organizations that require increased airport activity and for the people that don't — the proposed expansion of Los Angeles International Airport would be a large step backward for the greater Los Angeles area.

Sincerely yours,

John Keyantaski

1. We are impacted by airport noise. It will be worse with the new 600 passenger planes.
2. The LAX Master Plan does not address the air & noise pollution impact on the 6 schools & 3 high schools surrounding the LAX. Aircraft pollute heavily on takeoff & landing. Often we smell jet fuel. AQMD has no affect or jurisdiction on LAX.
3. Traffic on 405 & Lincoln Blvd is stop & go resulting in heavier car pollution. Cars pollute heavily during acceleration.
4. Aircraft on run-ways lead to unsafe airport operations.
5. Sepulveda Tunnel under LAX is crowded. Have a safety engineer analysis.

Dear Jane - I met you years ago at a friends home on Torrance Blvd. We go to Rolling Hills Covenant church. I voted for you. I'm 85 haven't any car any more as I had a very bad accident. We need to enlarge Palmdale airport. I have a grandson & family there not LAX. I love too much noise even from the Torrance airport where I live - Keep up the good work - I'll pray for you. I'm 85 - but still trying to help people Love & prayers

*I believe that growth at LAX must be curtailed, and a regional airport plan be put into effect. The traffic now on the San Diego (405) Freeway is impossible. If it continues to worsen (as it surely would with LAX expansion) the South Bay area will be unliveable.*

Wear Congresswoman; after reading your report, I have to agree with your view on regional airports it makes sense to me. Besides all the money the regional air port plan would generate. Think in terms of a major natural disaster like earthquakes, we would have more facilities on hand to accommodate emergency officials to disaster areas. Also more jobs to attract people out to our two largest counties. The Diamond Valley Reservoir will also attract more people.

*If the original, major expansion plan were to take place, the airport would take property to within 3 blocks of our home. They plan to knock down dozens of current and NEW businesses on Sepulveda (Ralphs, Office Depot, etc) which would affect all of us in the neighborhood. We bought our home here, in part, because of the ball park on Wiley Post (Neilson Field) and that would also be taken by the airport and used for parking or other uses. The value of our home will fall tremendously, after just going up recently. The pollution, smell and traffic will be unbelievable. This airport is right smack in the middle of big neighborhoods. Please don't support its expansion!*

Dear Congresswomen Jane Harmon

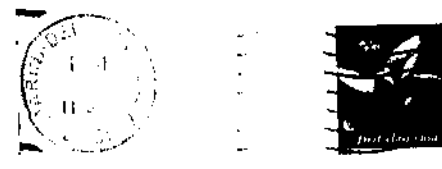

LAX is located in a highly congested population area. Surface access to the airport is physically limited with little opportunity to improve. Only so cars & buses can service the airport at any one time. It is time to develop an airport in an area with plenty of room to grow. Palmdale for example. This along with expanded use of the satellite airports. High-speed surface transportation should be developed to interconnect the airports.

Airport terminal could be built in high population areas where people could check in at their airline, including their bags. They would be moved by high speed surface transportation to one of the airports, where they could proceed directly to their gate/departure. These downtown terminals could include parking, thus help relieve airport congestion/traffic.

# FACTS ABOUT LAX AND REGIONAL AIRPORTS

- A regional airport plan would generate \$98 billion in economic activity in the Los Angeles region, according to a study prepared for the Southern California Association of Governments (SCAG).
- U.S. census data and SCAG projections show that population is growing faster near proposed regional airports than near LAX.

Region	Pop. Growth 2000-2020	Region	Pop. Growth 2000-2020
North LA County	762,000	South Bay	106,000
San Bernardino County	1.2 million	West Side	26,000
Riverside County	1.4 million	Gateway Cities	386,000

- This comparison shows how Denver met growing aviation demands:

	Los Angeles International Airport	Vs.	Denver International Airport
Millions of Annual Passengers (MAP)	67 MAP in 2000. Over 100 MAP capacity.		39 MAP in 2000. 55 MAP capacity.
Residents within planned 65 decibel noise boundary	82,928		0
Price Tag	\$12 billion (projected)		\$4.2 billion (actual)
Flights Per Day (average)	2,146		1,371
Size	3,425 acres		34,000 acres
